U.S. COIN AUCTION

JULY 11-12 & 14, 2019 | FUN | ORLANDO

Lot 3001

U.S. Coins

Featuring: The Dunleavy Collection

July 11-12 & 14, 2019 | Orlando

FLOOR Signature® Sessions 1-2

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Orange County Convention Center • Room W230A
West Concourse, 9800 International Drive
Orlando, FL 32819

Session 1– PREMIER

Thursday, July 11 • 7:00 PM ET • Lots 3001–3286

Session 2

Friday, July 12 • 6:00 PM ET • Lots 3287–4036

ONLINE ONLY Signature® Session 3

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 3

Sunday, July 14 • 2:00 PM CT • Lots 7001–7872

LOT SETTLEMENT AND PICK-UP

Friday, July 12 • 10:00 AM – 1:00 PM ET

Saturday, July 13 • 9:00 AM – 12:00 PM ET

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

BIDDING METHODS

HERITAGE Live!^{®1} Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive![®] program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. HA.com/1297

Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Dear Bidder,

This year's Summer FUN catalog is packed with collector coins in virtually all denominations. One of the highlights of this year's event is an appearance of one of the legendary wrong-planchet errors in U.S. Mint history -- a 1943 cent struck on a bronze planchet, certified XF45 by PCGS. This is simply one of the ultimate collector coins that has captivated the hearts and minds of numismatists young and old for more than 75 years, and it continues to energize growth of the hobby to this day.

Heritage is proud to serve once again as Official Auctioneer for the 13th Annual Summer FUN Convention in Orlando. Special lots abound, and while not all have the cachet of a 1943 bronze cent, each will appeal to enthusiasts across multiple collecting interests and specialties. Here are just a few examples:

- 1880 Morgan dollar, PR67 PCGS. CAC. Fantastic toning.
- 1855 Seated dollar, OC-1, MS62 PCGS.
- 1836 Gobrecht dollar, Judd-60 Original, Medal Alignment,
- 1949 Franklin half, MS67 Full Bell Lines PCGS.
Tied for finest certified.
- 1929 Saint-Gaudens double eagle, MS63 PCGS.
- 1803/2 half eagle, BD-1, MS63 PCGS.
- 1835 Capped Bust dime, JR-4, PR65 NGC. R.7 as a proof.
- 1856 Flying Eagle cent, Snow-9, PR64 PCGS.
- 1877 twenty cent, BF-1, PR63+ Cameo PCGS. CAC.
- 1776 Continental dollar, CURRENCY,
EG FECIT, Newman 3-D, W-8460, AU55 NGC.

THE DUNLEAVY COLLECTION

The Dunleavy Collection was formed over many years, and it contains a wide variety of collector coins – not always extreme rarities, but also an abundance of coins in attainable grades for every interest and budget. A strong assortment of type coins appear in Summer FUN throughout the Signature floor sessions and the online-only Signature® Internet session, and more can be found (hundreds of lots!) in upcoming Heritage weekly auctions. Watch for The Dunleavy Collection pedigree for many choice coins and values from this wide-ranging Featured Collection.

It promises to be a great time in Orlando -- a perfect place to meet friends, clients, and dealer associates, and for an all-around good time. We stand ready to serve any of your numismatic or bidding questions, as well as discuss future consignments. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGELive!®, plus plenty of time to place your secret bids through internet bidding that is active throughout the weeks and days preceding the live auction.

We look forward to seeing you in Orlando for a great FUN time!

Sincerely,

Greg Rohan

SESSION ONE

COLONIAL

1776 Continental Dollar, Choice AU
EG FECIT, Pewter, Newman 3-D

HALF CENT

1793 C-1, B-1 Half Cent, XF40
First Half Cent Variety

3001 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT, AU55 NGC. Newman 3-D, W-8460, R.4. EG FECIT is present on only one die variety of the Continental Dollar, Newman 3-D. Elisha Gallaudet (circa-1728 to 1779) was for many years regarded as the name behind the mysterious inscription, since he was the engraver for the sixth-dollar Continental currency notes of Feb. 17, 1776. But little is confirmed about any Continental dollar variety, except that the design first appears in print (although with German legends) in a 1783 almanac. This lightly circulated steel-gray example is struck from rotated dies, and exhibits the usually seen circular crack spanning the centers of most of the reverse rings. We note lumps on the obverse rims at 4:30 and 6 o'clock, and a spot on the I in CONTINENTAL. No abrasions are remotely consequential. Census: 1 in 55, 9 finer (5/19). Listed on page 87 of the 2020 *Guide Book*. NGC ID# 2AYU, PCGS# 795

3002 1793 C-1, B-1, High R.3, XF40 PCGS. Manley Die State 2.0, an intermediate state of the dies. The Cohen-1, Breen-1 1793 half cent is the first in the emission sequence, and therefore, this variety is the first half cent coined by the United States government during the first year of operation at the Philadelphia Mint, following a limited production of pattern or prototype pieces the previous year. This piece has smooth olive-brown surfaces with planchet flaws on each side. The obverse has a line of lamination from the nose to the border, and the reverse has a patch of lamination inside the lower right part of the wreath. Our EAC grade VF30. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

LARGE CENT

1793 Chain Cent, Good 4
Periods, S-4, B-5

3003 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Good 4 PCGS. Though the date is nearly worn smooth, the period after the Y in LIBERTY is bold, confirming the variety. Generally doeskin-brown surfaces show areas of fresher copper-gold near the margins, especially where rim bumps occur. The mildly abraded reverse shows a degree of peripheral weakness, but the chain remains bold. Our EAC grade AG3.

Ex: FUN Signature (Heritage, 1/2009), lot 164, which realized \$5,462.50; FUN Signature (Heritage, 1/2017), lot 3097, which realized \$4,817.50. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

PROOF FLYING EAGLE CENT

1856 Snow-9 Flying Eagle Cent, PR64
Inaugural Small Cent Issue

3004 1856 Snow-9 PR64 PCGS. This is an example of the usual Snow-9 variety, struck from a middle state of the dies as evidenced by the more pronounced die scratch through the U in UNITED and the repolished, mirrored fields. The coin's original copper-nickel color has deepened several shades and now each side displays a lovely, even golden-brown coloration. The only noticeable surface flaws are a couple of contact marks in the field below CENT on the reverse. The presence of a high-grade first-year Flying Eagle cent is the mark of any distinguished set.

Ex: Baltimore Signature (Heritage, 7/2003), lot 5240. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENT

1893 Indian Cent, MS67 Red
Tied for Finest Certified

- 3005 1893 MS67 Red NGC.** An area of softness and brightness at the top three headdress feathers is peculiar to many 1893s, identified by Indian cent expert Rick Snow as “liquid strike-through,” perhaps machine oil or possibly water. This coin is a perfect example — fully struck in all areas except the top of the headdress. Deep-red color prevails elsewhere, with fine-grained surfaces and pervasive mint luster. We note a short abrasion below E of STATES — perhaps yet another kind of strike-through — and one or two tiny carbon flecks on the reverse. All else is exceptional in technical quality and eye appeal for this amazing Superb Gem. There are no finer examples in full red at either service. Census: 3 in 67 Red, 0 finer (5/19). NGC ID# 228M, PCGS# 2186

PROOF INDIAN CENTS

1872 Indian Cent, PR66 Red
Among the Finest Non-Cameo Examples

- 3006 1872 PR66 Red PCGS.** From a mintage of 950 pieces, the 1872 proof Indian cent is an elusive issue in Premium Gem condition, with the Red designation. This spectacular Premium Gem proof exhibits sharply detailed design elements and hazily reflective fields that show some modest (but undesignated) cameo contrast. The original red surfaces are impeccably preserved. Population: 6 in 66 Red, 0 finer (6/19). NGC ID# 229R, PCGS# 2305

1901 Indian Cent, PR67 Red
Deeply Mirrored and Impeccably Preserved

- 3007 1901 PR67 Red PCGS.** Luminous emerald-green and rich cherry-red surfaces characterize this amazingly preserved Indian cent. Exquisitely struck design elements complement these attributes to yield outstanding eye appeal. Full Red pieces are scarce, especially in this lofty numerical grade. Housed in a green label holder. Population: 8 in 67 (2 in 67+) Red, 0 finer (6/19).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5382; Central States Signature (Heritage, 5/2005), lot 5295; Central States Signature (Heritage, 4/2009), lot 1228. NGC ID# 22AP, PCGS# 2392

LINCOLN CENTS

1914-D Cent, MS66 Brown
A Registry Candidate

- 3008 1914-D MS66 Brown NGC.** This condition rarity is among the finest numerically graded 1914-D Lincoln cents at NGC, showing glossy burgundy-brown patina with silvery-blue luster bands. It is well-struck despite some die fatigue in the fields and there is no carbon spotting. Eye appeal excels. Census: 4 in 66 Brown, 3 in 66 Red and Brown, 4 in 66 Red, 0 finer (6/19). NGC ID# 84BX, PCGS# 2471

1915 Cent, MS67 Red
One Coin Graded Finer

- 3009 1915 MS67 Red PCGS.** Of the 29 million Lincoln cents struck at the Philadelphia Mint in 1915, barely more than a dozen examples have been certified at this lofty grade level. Clean copper-orange surfaces glow with soft mint luster. The obverse is well-defined, while the reverse shows incompleteness around the border elements. The only notable ticks occurs above the N in ONE, and carbon is nearly unseen. Population: 15 in 67 (1 in 67+) Red, 1 finer (6/19). NGC ID# 22BK, PCGS# 2479

1915-S Cent, MS66 Red
Tied for Finest at Both Services
Condition and Color Rarity

3010 1915-S MS66 Red PCGS. The 1915-S Lincoln cent is a low-mintage issue (4.8 million coins) and something of a color rarity. Relatively few coins were saved in high grades, and since the bronze alloy used at the S-mint in 1914 and 1915 had a tendency to "turn dark quick," according to Bowers, few examples retain their Red color. Representatives of this quality are rare, much more so than the 1909-S VDB, for example. Further, while the 1915-S often comes well-struck, coins are seldom seen with full strike definition. The detail in Lincoln's hair and beard is exceptional. A single point of softness occurs on the last T in TRUST. Both sides feature light coppery-gold color with wisps of amber. Softly frosted and void of carbon with a single tick on the upper left upright of the N in ONE. Population: 10 in 66 Red, 0 finer (5/19). NGC ID# 22BM, PCGS# 2485

1925-S Cent, MS64+ Red
Rarely Seen Finer

3011 1925-S MS64+ Red PCGS. CAC. The 1925-S Lincoln cent is scarce in Mint State with original Red color. Choice examples are particularly elusive, and finer pieces are rare. This Plus-graded near-Gem displays mainly copper-orange luster but also shows wisps of delicate rose and pistachio-green hues. Only a few specks are present. Struck from worn dies, as usual, with metal flow lines on the obverse. Population: 58 in 64 (1 in 64+) Red, 12 finer (5/19). NGC ID# 22CH, PCGS# 2566

Lincoln plaque by Victor D. Brenner, basis of the Lincoln cent design.

1943 Bronze Lincoln Cent, XF45
 Legendary Wrong-Planchet Rarity
 Most Famous U.S. Mint Error

3012 1943 Struck on a Bronze Planchet XF45 PCGS. The 1943 bronze Lincoln cent is listed among both the *100 Greatest U.S. Coins* and the *100 Greatest U.S. Error Coins*, where the authors call it “the most famous error coin made by the U.S. Mint.” Copper was a strategic material in 1943, at the height of World War II. In order to conserve resources for the war effort, Congress authorized the Mint to strike cents on zinc-coated steel planchets in 1943, instead of the usual bronze blanks. However, it seems that a small number of bronze planchets remained stuck in the lids of the tote bins the Mint used to feed the coin presses at the end of 1942. When the bins were refilled with the zinc-coated steel planchets at the start of production in 1943, those blanks became dislodged and were fed into the presses, along with the authorized “steel” planchets, resulting in the famous “copper” cent errors. Among the hundreds of millions of wartime composition “steel” cents produced in 1943, the few bronze examples went unnoticed and entered circulation undetected. For many years, Mint officials categorically denied that any bronze composition cents were struck in 1943, but authentic examples are known from all three active U.S. Mints today.

The bronze examples began turning up in the 1940s, amazing coin collectors and puzzling Mint officials, who could not account for their existence. The fame of the 1943 “copper” cents extended far beyond numismatic circles, as nationwide advertisements appeared in magazines, newspapers, and comic books, offering fabulous rewards for authentic specimens. There was a widespread, but untrue, rumor that Henry Ford would exchange a new car for any legitimate 1943 “copper” cent (this caused the Ford Motor Company many problems for years). Current (5/19) population data shows 20 bronze 1943 Lincoln cents from the Philadelphia Mint certified at PCGS and NGC combined, including an unknown number of resubmissions and crossovers (see roster below).

The present coin is an attractive Choice XF specimen that shows some light wear on the strongly impressed design elements. A touch of softness shows on the 43 in the date, but the 3 has the long, hanging tail that distinguishes legitimate specimens of this issue (some counterfeits have been created by removing part of the 8 digit from 1948-dated cents). The pleasing surfaces exhibit light olive-tan hues in most areas, with highlights of steel and brown. The expected number of minor abrasions are present, with some chatter in the right obverse field, but no large or distracting marks are evident. Some traces of original mint luster remain intact. The overall presentation is most attractive for this sought-after, storied rarity.

1943 Philadelphia Bronze Cents Certified Populations

This is a listing of the certified grading events at PCGS and NGC. Duplications and crossovers are likely; some Genuine examples may be omitted.

PCGS-Certified Coins

1. **MS62 Brown.** Found in circulation by Marvin Beyer, Jr., age 14, around 1957; ANA Convention Sale (Abe Kosoff, 1958), where the coin was withdrawn by Marvin Beyer Sr. before the sale; reportedly sold to the Greer Company of Los Angeles for \$40,000 in 1959; Pre-Long Beach Sale (Superior, 10/2000), lot 4146, as MS61 ANACS, \$60,375; Benson Collection, Part II (Goldbergs, 2/2003), lot 148 as MS61 Brown PCGS, \$97,750 (certification #50035361); subsequently graded MS62 Brown PCGS Secure; Bob Simpson (9/2012); Simpson Collection. Beautiful blue-brown surfaces with generous luster, softly struck on Lincoln's beard and coat. Certification #18523486. Pictured on PCGS CoinFacts.
2. **MS61 Red and Brown.** “James Schirrippa,” per PCGS CoinFacts. Sharply struck with deep orange and purple-blue patina and some brownish toning on the lower reverse, hints of green in the obverse field. Carbon spot at L(LIBERTY). V-shaped mark right of C(ENT). In the Staten Island Collection Lincoln Cents, Off-Metal Strikes Registry Set (#2 behind the Simpson Collection). Certification #50040291. Pictured on PCGS CoinFacts.
- 3, 4. **MS61 Brown.** Two submissions; one is certification #19228068, last seen in the High Desert Collection. Pictured on PCGS CoinFacts. Lovely orange-gold and light-blue surfaces on both sides. PCGS still shows two in this grade, although as mentioned, one with certification #50035361 was later upgraded to the #1 Beyer-Simpson coin above. It is unclear if there are still *two other* PCGS coins in the MS61 Brown grade.
5. **AU58.** According to a photo (page 322, #8) in the 1996 Wexler-Flynn Lincoln cent *Authoritative Reference*, this coin was earlier certified by ANAAB with certificate #FD0251. Bob Simpson; FUN Signature (Heritage, 1/2016), lot 5266, realized \$305,500. PCGS certification #25510132. Pictured on PCGS CoinFacts.
6. **AU55.** Americana Sale (Stack's Bowers, 1/2013), lot 13257, brought \$317,250; Regency Auction (Legend-Morphy, 5/2014), lot 12, realized \$329,000. Currently in the Numism1 Set Registry inventory at PCGS and contained in the Hoener 100 Greatest U.S. Coins Registry Set. Well-struck overall with medium milk-chocolate surfaces, small flecks at bottom of coat (below 1) and front of Lincoln's head above the eyebrow. Weakness shows on O(NE) and AM(ERICA). Certification #26441689. Pictured on PCGS CoinFacts.
7. **XF45.** Sandy-tan example with a few scattered marks. Softly struck on 43 in the date. Certification #37650115. **The present coin.**
8. **XF45 PQ. CAC.** Pre-Long Beach Sale (Ira and Larry Goldberg, 2/2017), lot 756. Not identified by certification number.
9. **Genuine PCGS (VF Details).** A “teenaged newspaperboy”; bought at a Dearborn, Michigan, coin show around 1987; Goldberg Auctions (9/2007), lot 2462, brought \$60,375; New York Signature (Heritage, 11/2013), lot 3508, realized \$88,125. PCGS #21445181. Some unfortunate test cuts were made in the surfaces. Photographed as #4 in the Wexler-Flynn reference.

NGC Certifications

These grading events will undoubtedly duplicate some coins listed above.

10. MS63 Brown.

11. **MS62 Brown.** Albert Michael Pratt; ANA Signature (Heritage, 8/2017), lot 3899. Certification #2067200-002. An attractive walnut-brown specimen with a tick over the 4 in the date.

12. MS61 Red and Brown.

13. **MS61 Brown.** Albert Michael Pratt; FUN Signature (Heritage, 1/2018), lot 4763. Certification #2067200-001. Reddish-brown and steel patina, with a large obverse die break on the rim at 6 o'clock.

14, 15, 16. **AU58;** three grading events. One coin was once depicted on NGC Coin Explorer, unidentified as to grade or certification number — but it is the former Simpson coin, number 5 above, now in a PCGS holder.

17. AU55.

18. **AU53.** Discovered in a school cafeteria in 1947 by Don Lutes, Jr.; FUN Signature (Heritage, 1/2019), lot 4362, realized \$204,000. Certification #4629671-001. Pictured on NGC Coin Explorer. Lightly worn olive-brown example with a short horizontal gouge below the 3 in the date.

19, 20. **AU50;** two submissions. NGC ID# 22E5, PCGS# 82709

PROOF THREE CENT SILVER

1873 Three Cent Silver, PR66+
Ultra Cameo

- 3013 1873 PR66+ Ultra Cameo NGC.** The three cent silver denomination was discontinued after 1873, when a final proof-only mintage of 600 pieces was accomplished. The coins were struck early in the year and have a Closed 3 in the date. This Plus-graded Premium Gem exhibits sharply detailed, frosty design elements that contrast profoundly with the impeccably preserved, deeply mirrored fields. Census: 2 in 66 Ultra Cameo (1 in 66+), 1 finer (6/19). NGC ID# 27CJ, PCGS# 93724

THREE CENT NICKEL

1874 Three Cent Nickel, MS67
Sole Finest at NGC

- 3014 1874 MS67 NGC.** The 1874 three cent nickel (790,000 coins) can be readily found through MS65 before it becomes scarce in MS66. Each service reports a single coin at this level. Brilliant, highly lustrous surfaces exhibit complete strike detail. Die polish lines appear in the fields. A tiny planchet void occurs right of the 4 in the date, but post-mint flaws are essentially absent. Census: 1 in 67, 0 finer (6/19). NGC ID# 2759, PCGS# 3742

BUFFALO NICKELS

1913-S Buffalo Nickel, MS67+
Single-Year Type One Design

- 3015 1913-S Type One MS67+ NGC.** The Type One design, with the bison standing on a mound, was short-lived and was produced for only part of the first year before being changed to the design with the bison standing on a prairie. This Superb Gem has highly lustrous golden-gray surfaces with traces of blue and violet toning. Census: 23 in 67 (5 in 67+, 1 in 67★), 1 finer (6/19). NGC ID# 22PY, PCGS# 3917

1913-S Type One Buffalo Nickel, MS68
Tied for Finest Certified

- 3016 1913-S Type One MS68 NGC.** Approximately 2.1 million Type One Buffalo nickels were struck at the San Francisco Mint early in 1913, the first year of the design. It soon became apparent that the denomination on the reverse was too exposed to wear, and the Type Two variety, with the denomination recessed in the exergue, was introduced later in the year. The 1913-S is the most elusive Type One issue and has been a favorite of collectors over the years.

The present coin is the only MS68 example at NGC and is tied with two examples at PCGS for finest certified honors (6/19). The design elements are sharply detailed and the impeccably preserved, textured surfaces radiate vibrant mint luster. Highlights of ice-blue and pale jade toning add to the terrific eye appeal. NGC ID# 22PY, PCGS# 3917

1919 Nickel, MS67
Strong Strike

- 3017** 1919 MS67 PCGS. This is about as sharply struck a Buffalo nickel as can be expected for the period, with nearly full definition throughout. Powdery-blue accents complement the overwhelming brilliance of this frosty Superb Gem. A tick on the jaw and another on the bison's front left leg are the only visible abrasions. Population: 28 in 67 (3 in 67+), 0 finer (6/19). NGC ID# 22RL, PCGS# 3941

1925-S Nickel, MS65
A Rarity in Top Grades

- 3018** 1925-S MS65 PCGS. Evidence that the dies were used well-beyond their prime appear on each side, with clashing, softness, and extensive cracks and flow lines. Despite the quality of manufacture, this Gem Buffalo nickel was carefully preserved by its custodians over the past 94 years. There are no singular ticks to mention, and the softly frosted surfaces exhibit pleasing light golden patina. The 1925-S is scarce at this level and is one of the rarest issues in the series in MS66, surprising considering the mintage of 6.2 million coins. Population: 33 in 65 (2 in 65+), 1 finer (6/19). NGC ID# 22S4, PCGS# 3956

1926-D Nickel, MS66
Great Strike for the Issue

- 3019** 1926-D MS66 PCGS. The use of worn, widely spaced dies contributed to the poor overall production quality of the 1926-D nickel. Examples often show weak definition, but this Premium Gem is an exception. Detail is much finer than usual on the date, LIBERTY, braid, and on the bison's head. The other motifs are also well-detailed. Satiny mint luster glistens from the smooth, beautifully preserved surfaces. Aside from the slightest hints of golden color, each side remains brilliant. Population: 31 in 66 (5 in 66+), 2 finer (5/19). NGC ID# 22S6, PCGS# 3958

1937-D Three-Legged Nickel, MS64+
Popular FS-901 Variety, Clean for the Grade

- 3020** 1937-D Three-Legged, FS-901, MS64+ PCGS. A simple diagnostic for the always-popular 1937-D Three-Legged nickel is the raised line of die lumps from the bison's flank down to the rock. All examples were struck from eroded dies and show the effects thereof. This satiny Choice Uncirculated representative is strongly detailed on the obverse and slightly softer on the reverse. Mostly brilliant and clean for the grade. FS-901 coins are seldom offered in better condition. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1938-D/S Buffalo Nickel, MS68
Tied for Finest Certified

- 3021** 1938-D/S FS-511 MS68 NGC. The upper serif of the underlying S is visible on the top of the primary D mintmark on this *Guide Book* variety. NGC and PCGS combined have seen only 11 FS-511 coins in this grade and none are finer (5/19). The coin offered here is satiny with pastel toning and minimal die erosion in the fields. Only a touch of strike softness is evident on the bison's shoulder. Census: 10 in 68 (1 in 68★), 0 finer (5/19). NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKEL

1936 Type Two Nickel, PR68
Brilliant Finish, None Finer at NGC

3022 1936 Type Two — Brilliant Finish PR68 NGC. Proof production resumed in 1936 with the output of Satin and then Brilliant Finish proofs. This Type Two example ranks among the top-graded coins at NGC, and there are just two finer submissions at PCGS. Bright, nearly perfectly preserved surfaces display James Earle Fraser's design in complete detail. From a mintage of 4,420 pieces. Census: 22 in 68 (1 in 68+), 0 finer (6/19). NGC ID# 278Y, PCGS# 3995

JEFFERSON NICKEL

1944-S Nickel, MS68 Five Full Steps
Condition Census Registry Coin

3023 1944-S MS68 Five Full Steps NGC. The large mintmark above Monticello is an iconic symbol of the silver-alloy "nickels" struck during World War II. The 1944-S boasts the second-lowest mintage of the "war nickel" set (21.64 million pieces). Coins with Full Steps are scarce. This Superb Gem showcases shimmering, virtually flawless luster. Golden toning spans both sides save for areas of sky-blue at 8 o'clock on the obverse and 10 o'clock on the reverse. Five steps are complete. NGC has only certified one other Full Steps coin this fine, and PCGS lists just one piece in this grade. Census: 2 in 68 Full Steps, 0 finer (6/19). NGC ID# 22TW, PCGS# 84024

PROOF SEATED HALF DIME

1873 Seated Liberty Half Dime, PR67
Rare Deep Cameo Example
Finest Certified at PCGS

3024 1873 PR67 Deep Cameo PCGS. Closed 3, V-2. Breen's *Proof Encyclopedia* describes the variety as having the date low and close to the border, the shield point just left of the 1, the pendant just right of the serif of the 7, and the 1 with its left base above the right part of a denticle. On the reverse the right ribbon end is barely clear of the wreath above, while on the V-1 both ribbon ends touch the wreath.

This sharp Superb Gem proof, one of 600 struck, boasts an overall flashy appearance, a combination of the stark black-on-silver contrast from the mirrored fields and deeply frosted devices. Hints of lilac toning appear on each side. Population: 1 in 67 Deep Cameo, 0 finer (5/19).

Ex: ANA Signature (Heritage, 8/2007), lot 1609; Long Beach Signature (Heritage, 6/2014), lot 4392, which realized \$11,162.50. NGC ID# 236A, PCGS# 94456

EARLY DIMES

1796 JR-2 Dime, AU Details
Well-Detailed Draped Bust Type Coin

- 3025** 1796 JR-2, R.4 — Repaired — PCGS Genuine. AU Details. Except for the very rare 1792 disme pattern, the 1796 was the first year of the dime denomination, and one of only two years with a Small Eagle reverse. The centers this JR-2 are frosty and exhibit a cameo effect relative to the broad ocean-blue and autumn-brown peripheries. This is a well-defined example without mentionable abrasions, although the surfaces are lightly granular and mildly bright, with small areas of possible tooling on each side.

1805 Dime, MS63+
JR-2, 4 Berries Reverse

- 3026** 1805 4 Berries, JR-2, R.2, MS63+ PCGS. CAC. The 4 Berries reverse quickly differentiates this variety from its scarcer 5 Berries counterpart. Both are listed in the *Guide Book*, and each is suitably available to represent the Heraldic Eagle type. This impressive, attractively toned Select Mint State Draped Bust dime presents dusky antique patina with golden accents over each side. Definition is slightly uneven, but not so as to affect the appeal. Indeed, the coin has been recognized by both PCGS and CAC for its quality within the grade. Population: 29 in 63 (1 in 63+), 53 finer. CAC: 2 in 63, 16 finer (6/19). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

1807 JR-1 Dime, MS63+
Reverse Die Used to Strike Quarter Eagles

- 3027 1807 JR-1, R.2, MS63+ NGC. The reverse used to strike all 1807 dimes was also employed in the production of 1805 BD-1, 1806/4 BD-1, 1806/5 BD-2, and 1807 BD-1 quarter eagles. Examples of the 1807 are typically obtainable in high grades, but they usually show evidence of considerable obverse die clash, as here. Although the peripheries are slightly incomplete, the central portrait and eagle show pinpoint detail. Lightly toned with largely brilliant interiors. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIME

1833 JR-6 Dime, Notable MS65
Undesignated Prooflike Fields
Sharp and Attractive

- 3028 1833 JR-6, R.1, MS65 PCGS. The JR-6 shares an obverse with JR-8 and JR-9, paired with a distinct reverse that shows the left edge of the scroll aligned under the center of D in UNITED. This exceptional Gem is mostly brilliant, with flashy prooflike fields and razor-sharp definition on the relief elements. The sharp strike and mirrored fields are reminiscent of an early proof, and indeed references do cite an 1833 JR-6 proof, although we cannot differentiate this piece from a prooflike circulation strike with certainty. Blushes of rose-gold and forest-green toning color the margins for excellent eye appeal. Interesting machine doubling exists at date and on some of the right-hand stars. This is the finest JR-6 we have seen, and it likely ranks at the top of the Condition Census for the variety. PCGS has seen just three numerically finer 1833 dimes, regardless of variety. Population (all varieties): 15 in 65, 3 finer (5/19). PCGS# 38866 Base PCGS# 4522

PROOF BUST DIME

1835 JR-4 Bust Dime, PR65
Extremely Rare as a Proof

- 3029 1835 PR65 NGC. JR-4, R.7 as a Proof. While the JR-4 is readily accessible as a business strike, proofs are far rarer. The mintage for such pieces is speculative, as Mint records are incomplete for the time; certainly there are more than the two coins suggested (confirmed?) by Breen in his *Proof Encyclopedia*, but many estimates today put the surviving total at 10 pieces or slightly lower. This is a moderately contrasted example with light frost on fully struck devices. Broad silver mirrors frame the devices, and aside from glimpses of green-gold close to the rims, this faintly toned coin appears devoid of color. Census: 3 in 65, 2 finer (5/19). Ex: FUN Signature (Heritage, 2/2011), lot 5478. NGC ID# 237P, PCGS# 4557

SEATED DIME

1859-O Dime, High-End MS66+
Colorful Toning, Medium O Mintmark

- 3030** 1859-O Medium O, F-103, R.3, MS66+ PCGS. CAC. Two mintmark varieties exist for the 1859-O dime: Large O and Medium O. The latter is slightly scarcer, according to Fortin. This is one of two Medium O die marriage, with the obverse showing an Open 5 in the date. Intermixed shades of ice-blue and lavender toning are the hallmark of this gorgeous Premium Gem dime. Strike detail is good, and lively luster shines through the patina. Blatantly high-end. Population (all varieties): 13 in 66 (1 in 66+), 3 finer. CAC: 6 in 66, 2 finer (5/19). NGC ID# 2395, PCGS# 538142 Base PCGS# 4620

PROOF SEATED DIME

1873 Arrows Dime, PR66 Cameo
Sought-After Type, Lovely High-End Survivor

- 3031** 1873 Arrows PR66 Cameo NGC. F-102, R.4. Between the two varieties of the proof 1873 dime, the later With Arrows production was smaller. Just 800 pieces were struck compared to 1,100 coins for the No Arrows design. The Arrows variant's desirability puts further pressure on the small supply, particularly in higher grades. This lovely Superb Gem proof has outstanding contrast, unencumbered by warm peripheral russet-brown patina. Neither the flash of the deep mirrors nor the frost across the devices are diminished. Census: 1 in 66 Cameo, 2 finer (6/19). NGC ID# 23DH, PCGS# 84769

PROOF BARBER DIMES

1898 Barber Dime, PR67
Resplendent Deep Cameo

- 3032** 1898 PR67 Deep Cameo PCGS. Impeccably preserved and razor-sharp, this Superb Gem Deep Cameo proof displays bold contrast between glassy-mirrored fields and well-frosted devices. The obverse is brilliant with splendid white-on-black surfaces, while the reverse is equally pristine, with a splash of golden-tan toning along the upper-right wreath elements. Only a handful of Deep Cameo proofs are finer. Population: 4 in 67 (2 in 67+) Deep Cameo, 4 finer (5/19). NGC ID# 23GB, PCGS# 94882

1911 Barber Dime, PR68
Among the Finest at PCGS

- 3033** 1911 PR68 PCGS. Only 543 proof Barber dimes were struck at the Philadelphia Mint in 1911 and few survivors can match the quality and eye appeal of this magnificent PR68 specimen. The design elements are sharply detailed throughout and the virtually pristine surfaces include deeply reflective fields, under shades of emerald-green and lavender toning. Population: 5 in 68, 0 finer (6/19). NGC ID# 23GS, PCGS# 4895

MERCURY DIMES

1916-D Dime, Choice XF
Lightly Toned With Glints of Luster

- 3034** 1916-D XF45 PCGS. Remnants of original mint luster emerge from the recessed areas. The effect serves to lighten the briefly circulated surfaces of this recognizable key-date Mercury dime. Each side displays attractive gold and silver-gray patina with slight friction over the motifs. A strong strike is still evident throughout. The average grade awarded by the leading certification services barely exceeds VG8. This 1916-D is well above that. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, MS64 Full Bands
Denver Key, Seldom Offered Finer**

3035 1916-D MS64 Full Bands PCGS. CAC. The Mint ushered in a replacement for Chief Engraver Charles Barber's Liberty Head dime design in 1916, with a winged-cap motif by German-born sculptor Adolph Alexander Weinman. The winged cap's similarity to that of the mythological messenger of the Roman gods, Mercury, has led to the Mercury dime moniker.

The inaugural coinage of the Mercury dime at Denver in 1916 was cut short by sudden demand for quarter dollars, which forced the Colorado branch mint to shift its resources away from the smaller denomination. Only 264,000 Mercury dimes were struck at Denver in 1916. This key date is highly sought-after in all grades, but especially in Mint State with Full Bands definition. The near-Gem offered here is CAC approved and well-struck. The lustrous surfaces have a hint of light golden toning. NGC ID# 23GY, PCGS# 4907

**1929-S Mercury Dime, MS67+ Full Bands
Among the Finest Certified Examples**

3036 1929-S MS67+ Full Bands PCGS. CAC. From a mintage of 4.7 million pieces, this Plus-graded Superb Gem Mercury dime exhibits sharply detailed design elements throughout, with fully split and rounded bands on the fascies. The virtually flawless brilliant surfaces radiate vibrant mint luster from both sides, with terrific eye appeal. Population: 69 in 67 (6 in 67+) Full Bands, 0 finer. CAC: 28 in 67, 0 finer (6/19). NGC ID# 23J4, PCGS# 4977

**1930-S Dime, MS67+ Full Bands
Finest at Both Grading Services**

3037 1930-S MS67+ Full Bands PCGS. CAC. Rose, pale blue, and tan-gold accents gently grace frosty, near-flawless surfaces that maintain considerable mint brilliance. This Superb Gem is strongly struck from the centers to the rims with faint flow lines in the fields. An eye-appealing example that ranks among the finest coins at PCGS and NGC combined by the margin of the Plus designation. Population: 24 in 67 (8 in 67+) Full Bands, 0 finer. CAC: 10 in 67, 0 finer (6/19). NGC ID# 84NT, PCGS# 4981

**1938 Dime, MS68 Full Bands
Rare, Among the Finest Certified**

3038 1938 MS68 Full Bands PCGS. Not all Mercury dime issues are known in MS68 Full Bands, and those that do survive so fine are almost universally scarce or rare. This 1938 is among the finest certified, and it is rare as such — a Registry collector's must-have. The left obverse border and much of the reverse margin are toned in rich olive-gold, forest-green, and russet hues, leaving the remainder of each side with slight iridescence. Both sides are sharp. Satiny mint luster reveals near-perfection under a loupe. Population: 14 in 68 Full Bands, 0 finer (5/19). NGC ID# 5C9Y, PCGS# 5011

PROOF TWENTY CENT PIECES

1877 Twenty Cent, PR62
Just 510 Proofs Struck, Series Key
CAC Approved

3039 1877 PR62 PCGS. CAC. BF-1, R.3. Lightly frosted motifs offer moderate contrast against brilliant, nicely mirrored fields that highlight this key, proof-only issue from the short-lived twenty cent series. A few delicate hairlines and tiny marks are grade-consistent, while the strike is sharp throughout both sides. CAC endorsement is an important adjunct to the PR62 grade — the present coin is one of only a half dozen examples so-recognized. CAC: 6 in 62, 35 finer (5/19). NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent, PR63+ Cameo
Contrasted Proof Type Coin

3040 1877 PR63+ Cameo PCGS. CAC. BF-1, R.3. Only 510 proof twenty cent pieces were struck in 1877, and no circulation strikes were made to supplement. Nonetheless, this proof-only issue has a fairly substantial survival rate, likely more than half of the mintage. What makes the present coin special is the Cameo designation. This proof issue is decidedly difficult to locate in Cameo grades, and it is nearly uncollectible for most enthusiasts in Deep Cameo grades. Moreover, this piece is Plus-graded — one of only three Select Cameo proofs so-designated at PCGS — and it is CAC endorsed. Both sides are sharp and well-contrasted. The obverse has light golden toning, while the reverse displays full brilliance. The only imperfections are some faint hairlines in the fields, which, of course, merely determine the numeric grade. Population: 23 in 63 (3 in 63+) Cameo, 47 finer; 0 in 63 Deep Cameo, 4 finer. CAC: 5 in 63, 19 finer (5/19). NGC ID# 27H4, PCGS# 85305

EARLY QUARTER

1796 Quarter Dollar, VF Details
B-2, Small Eagle Type Coin

3041 1796 B-2, R.3 — Repaired — PCGS Genuine. VF Details. Tompkins Die State 2/1, obverse lapped. The surfaces display muted olive-gray and army-green patina and a generally smooth texture. Evidence of tooling appears around the RTY in LIBERTY. The remainder of the coin is pleasing and well-detailed, particularly in Liberty's hair curls and the eagle's wing feathers.

The 1796 quarter dollar is highly sought-after in any condition as a scarce first and single-year type with the Small Eagle reverse. Only 6,146 pieces were struck before quarter dollar coinage was suspended until 1804, by which point the reverse design had been changed. Resources at the early Mint during this period were more focused on half cents and cents, and on silver dollars as requested by depositors of silver bullion. The smaller U.S. silver denominations had little demand in the early days of the Mint, since commercial needs were still almost entirely served by the well-established Spanish dollar and its subsidiary denominations. Luckily for modern collectors, the novelty of the Small Eagle quarter dollar of 1796 prompted enough pieces to be saved that it is usually obtainable today, albeit, for a price.

SEATED QUARTERS

1858-O Quarter, Semiprooflike MS65
Tied Atop the Condition Census
Rare in Mint State

3042 1858-O MS65 NGC. Briggs 1-A. The two die varieties listed by Briggs are difficult to distinguish. The slightly recut stars and centering of the mintmark aid in attribution. This New Orleans quarter dollar issue was struck to the healthy extent of 520,000 coins. The pieces that survive are usually seen in well-circulated condition. Coins in XF to AU are scarce and underrated, while Mint State survivors are rare in any grade. Estimates for the number of extant Uncirculated representatives ranges from eight coins (PCGS CoinFacts) to as many as 40 pieces (Bowers, 2016) although that figure seems grossly out of line with the certified population data. There are only six Mint State submissions at NGC and another six at PCGS, likely including a few duplications. Among those twelve grading events, this Gem is tied with another MS65 at NGC and a single Gem at PCGS, both of which were previously included in the Eugene H. Gardner Collection.

This dazzling Condition Census example features semiprooflike fields that deliver modest cameo contrast. The sharpness of the strike is staggering. Both sides display light golden toning beneath which a few tiny ticks reside, leaving this coin with stand-out eye appeal. Census: 2 in 65, 0 finer (5/19). NGC ID# 44LC, PCGS# 5446

1883 Quarter, Near-Flawless MS67 Among the Finest Examples

- 3043** 1883 MS67 PCGS. CAC. Briggs 2-A. The shield point is right of the 1. A tick on the knee is the only flaw on this otherwise pristine, wholly brilliant 1883 quarter. Swirling mint frost cartwheels over fully struck devices and fields that retain a hint of semiprooflikeness. Without any commercial need for additional quarters, production was limited to 14,400 circulation strikes and 1,039 proofs. This Superb Gem ranks among the finest examples at both grading services and CAC. Population: 3 in 67, 0 finer. CAC: 2 in 67, 0 finer (5/19). NGC ID# 23VE, PCGS# 5515

PROOF SEATED QUARTERS

1865 Seated Liberty Quarter, PR66 Vivid Multicolor Toning

- 3044** 1865 PR66 PCGS. Briggs 3-B. A small mintage of 500 proof Seated Liberty quarters was struck in 1865, the final No Motto issue of the series. This delightful Premium Gem proof exhibits sharply detailed design elements and deeply mirrored fields throughout. The well-preserved surfaces are blanketed in vivid shades of emerald-green and cobalt-blue toning. Population: 9 in 66 (1 in 66+), 3 finer (6/19). NGC ID# 23WT, PCGS# 5561

1883 Quarter, Flashy PR68 Lovely Toning and Eye Appeal

- 3045** 1883 PR68 NGC. Contrast may be minimal, but eye appeal is no less pronounced. This Superb Gem proof quarter is richly toned with rose, violet, blue, green, and gold tones over flashy fields and generally pristine surfaces. The 1883 enjoys a production of 1,039 proofs. High-end examples like this often take the place of their more challenging circulation-strike counterparts in collectors' sets. Census: 2 in 68, 1 finer in this category (6/19). NGC ID# 23XF, PCGS# 5584

BARBER QUARTERS

1899-S Quarter, Lightly Toned MS67 One Numerically Finer at PCGS

- 3046** 1899-S MS67 PCGS. This is only the second individual MS67 example of the 1899-S Barber quarter that we have ever offered, with the other one bringing just shy of \$10,000 in its last appearance in June 2015. This piece is boldly struck and displays frosty luster. Each side shows mottled lemon-gold, olive, and lavender-gray toning. Rarely seen this fine and almost uncollectible finer. Population: 4 in 67 (1 in 67+), 1 finer (5/19). NGC ID# 23YJ, PCGS# 5624

1913-S Barber Quarter, Unc Details Challenging Key Issue

- 3047** 1913-S — Altered Surfaces — PCGS Genuine. Unc Details. The 1913-S Barber Quarter is one of the three key issues in the series, from a tiny mintage of 40,000 pieces. Collectors prize examples in all grades and conditions. This impressive example exhibits sharply detailed design elements, with no actual wear, and lightly marked surfaces with a flat aspect and questionable shades of lavender and pale jade toning.

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS61 Smooth Stone-Gray and Tan-Gold Surfaces

- 3048** 1916 MS61 ANACS. Not only is the 1916 Standing Liberty quarter the most famous date in the series, it is one of the most well-known keys in 20th century American coinage. Much of that is because of its low mintage of 52,000 coins and its high-grade scarcity. Tan-gold blushes complement stone-gray surfaces on this MS61 representative. The obverse is somewhat softly struck, but the reverse is better-defined with crisp breast feather detail. Smooth for the grade and housed in a small sized holder. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS64
Mattelike Full Head Coin
Well-Struck From an Early Die State

1916 Standing Liberty Quarter With CAC
Brilliant MS64 Full Head
Long-Sought-After Key Date

3049 1916 MS64 Full Head NGC. Writing in the December 2, 2003 issue of Numismatic News, in an article titled “‘Best’ U.S. quarter makes for tough collection,” Paul M. Green stated:

“In the 1950s, the spot for the 1916 in the Whitman folder for Standing Liberty quarters was not even punched out. It simply read RARE, which is interesting as the 1916 was not even the lowest-mintage quarter from the period 1910-1920. That distinction belongs to the 1913-S.”

Perhaps it was not so much that the 1916 Standing Liberty quarter was rare in the absolute sense, but that collector demand for the key date in a highly popular series far exceeded the supply. The Standing Liberty series is one of the most beloved in 20th century numismatics to this day, while the preceding Barber series and its key dates such as the 1913-S, are still wanting of appreciation by comparison.

This near-Gem 1916 displays gold-tinted satin luster, and detail is about as sharp as is ever seen on the 1916. The coin is struck from an early die state with a fine mattelike texture on each side. No singular abrasions are evident. NGC ID# 2AMV, PCGS# 5705

3050 1916 MS64 Full Head PCGS. CAC. The famously low 52,000-coin mintage of the 1916 Standing Liberty quarter was accomplished in December of that year. It was a token quantity that served to get the new coin into official production on schedule, i.e., in the 1916 calendar year. The 1916 coins were released in January 1917, alongside a flood of 1917-dated coins with a refined obverse design. Few collectors initially realized the rarity of the 1916 date — or even that there was such a date — and when they did, they would spend years searching the channels of commerce for lost examples of the rarity. There is evidence that worn examples of the 1916 key eluded collectors in circulation until as late as the 1940s. The New York Subway Hoard, which is described as having been accumulated during the ‘40s, contained 19 examples of the 1916 quarter, spent by the general public with no knowledge of the coins’ high numismatic value.

This piece is frosty and untuned with complete head detail and a sharp date. A small mark overlapping the edge of the shield and Liberty’s bust is the only singular abrasion, while each side displays attractive eye appeal. Few Full Head coins in this grade carry CAC endorsement. CAC: 26 in 64, 25 finer (5/19).

Ex: Dallas Signature (Heritage, 10/2006), lot 998, which realized \$22,425. NGC ID# 2AMV, PCGS# 5705

**1919-D Quarter, Lightly Toned MS66
Scarce This Fine**

- 3051 1919-D MS66 PCGS.** A scarce Premium Gem example of this semikey Denver issue, showing warm golden toning that cedes to silver-green around the borders. Satiny luster is devoid of abrasions. Although the date numerals are sharp, Liberty's temple and the shield rivets exhibit the usual softness associated with this issue. There are no clash marks present, and the surfaces have the appearance of an early die state save for the radial crack from the reverse rim into the eagle's right (facing) wing. Population: 32 in 66 (1 in 66+), 1 finer (6/19). NGC ID# 243C, PCGS# 5730

**1920-S Quarter, MS64+ Full Head
Toned Original Luster**

- 3052 1920-S MS64+ Full Head PCGS.** This underrated San Francisco issue is scarce with Full Head detail, and such coins are rarely seen finer than the present. This piece is remarkably well-struck, showing sharp date numerals, Liberty's toes, shield rivets, and head detail. Satiny luster shines through olive-gold toning with flecks of russet and amber-orange around the borders. No significant abrasions are seen. Population: 39 in 64 (2 in 64+) Full Head, 28 finer (6/19). NGC ID# 243G, PCGS# 5739

WASHINGTON QUARTERS

**1932 Washington Quarter, MS67
Registry-Grade Condition Rarity**

- 3053 1932 MS67 NGC.** The first-year Washington quarter from Philadelphia is a popular type coin, although it is rare in Superb Gem condition. NGC and PCGS combined have seen only 16 submissions in MS67 with none finer (5/19). This piece displays sharp devices and frosty original luster. Both sides are largely brilliant, although the obverse margins exhibit rainbow toning. Census: 6 in 67, 0 finer (5/19). NGC ID# 2447, PCGS# 5790

**1932-S Washington Quarter, MS66
Famous 20th Century Key
None Graded Finer**

- 3054 1932-S MS66 NGC.** The 1932-S Washington quarter is one of those 20th century keys that enthusiasts in all stages of collection, from nascent through advanced, gravitate toward. It enjoys first-year status, the lowest mintage in the series (408,000 coins), and is famously difficult to locate in the highest levels of Mint State. Indeed, neither NGC nor PCGS have graded a finer representative.

This gorgeous, mostly brilliant Premium Gem emits soft mint frost from beneath a thin layer of pale golden color. Speckled toning also appears along the right reverse border. Washington's hair and the eagle's breast feathers are notably strong. No singular marks to report. Census: 7 in 66, 0 finer (6/19). NGC ID# 2449, PCGS# 5792

EARLY HALF DOLLAR

1794 Flowing Hair Half, VF20
O-101, Sharply Defined, Ex: Hilt

3055 1794 O-101, T-7, High R.3, VF20 NGC. Tompkins Die State 1/2. The master dies for Flowing Hair half dollars consisted of just the bust on the obverse and the eagle on the reverse. Working dies were made by hand with punches and graving tools to create the date, stars, and lettering on the obverse, and the laurel branches, leaves, berries, and legend on the reverse. Because the average working die only produced 4,000 pieces (or less), a total of six obverse dies and seven reverse dies were needed to produce 23,464 half dollars dated 1794.

The Overton-101 variety is the most available 1794 variety by far, but it is scarce both in terms of surviving examples and demand. This coin shows strong definition on all of the devices and an attractive, medium-gray patina. Golden highlights occupy the recesses. A few light adjustment marks are seen at the upper-left reverse, and several small marks are scattered across the surfaces, visible with a glass.

Ex: Hilt Collection / Central States Signature (Heritage, 4/2015), lot 5052, where it brought \$12,925. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

BUST HALF DOLLARS

1817 Capped Bust Half, MS64
Popular O-110 Variety

3056 1817 O-110, R.2, MS64 PCGS. The tripled dentil below star 13 and the horizontal die line from the upper arrow feathers identifies the O-110 variety. The design elements of this attractive Choice example are sharply detailed and a diagnostic die lump is evident below the base of the 7 in the date. The well-preserved surfaces are brightly lustrous, under shades of pleasing lavender-gray toning. Population (for the variety): 1 in 64, 0 finer (6/19). NGC ID# 24F6, PCGS# 39502 Base PCGS# 6109

1820 O-108 Half Dollar, MS63+
Square Base 2, Large Date, No Knob

3057 1820 Square Base 2, Large Date, No Knob, O-108, R.2, MS63+ NGC. Star 5 is recut on the obverse, and the leaves are distinctly doubled on the reverse. Although a plentiful variety, few survive in higher grades. Recent auction appearances include just three finer examples that have been offered during the last 15 years. This fully lustrous, Select Mint State piece exhibits natural light gold toning that is reminiscent of pieces from old-time collections. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

1823 O-111 Half, MS64+
Elusive Early Die State

3058 1823 O-111, R.3, MS64+ PCGS. CAC. The very scarce early die state for the variety without the die crack through the first four stars. This example is choice with bright underlying mint luster. Dappled green-gold and silver-gray patina drapes much of each side, and blue and peach accents also appear. For non-Guide Book varieties, PCGS has graded just 11 finer examples (5/19). Ex: Long Beach Signature (Heritage, 5/2009), lot 741. NGC ID# 24FJ, PCGS# 6131 Base PCGS# 6131

1826 Half Dollar, O-118a, MS65
CAC Endorsed, Cracked Die State

3059 1826 O-118a, R.1, MS65 PCGS. CAC. The stars are quite close to the milling, and the date is compact and evenly spaced. The reverse shows A higher than M in AMERICA. The O-118a state, as here, has a die crack joining NITED STATES and ERICA. The surfaces of this piece are silvery with a dusting of cinnamon patina. The strike is bold, if not quite absolute on the high points of a few of the hair curls, and complements a notable absence of abrasions. The green CAC label indicates that that firm considers this piece high-end for the grade. NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

1828 O-116 Half Dollar, MS65
Square Base 2, Small 8s, Large Letters

- 3060** 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS65 NGC. Although not listed in the most recent Stephen Herrman listing (Spring 2019), this Gem O-116 is tied for second in the Condition Census for the variety — listed behind only the former Pogue coin, which was graded MS66. Rich and pervasive album toning displays cobalt-blue borders that merge with reddish-gold centers. A pinpoint-sharp strike accompanies strong mint luster that glows beneath the abundant patina. A series of horizontal die lines beneath Liberty's bust — just left of the date — confirms the variety. NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

PROOF BUST HALF DOLLAR

1818 O-107 Half Dollar, PR62
Very Rare in Proof Format

- 3061** 1818 PR62 NGC. O-107, High R.7 as a Proof. A brilliant and razor-sharp half dollar with mirrored fields and bagmark-free surfaces. Both sides exhibit delicate vertical hairlines. The unlisted prime die state of O-107 with an unfinished surface on the field beneath the eagle's head, die rust above the rightmost leaf pair, a pronounced bulge near the bust tip, and a thick horizontal die line at 12 o'clock. These characteristics were mostly lapped away on later commercial strikings from the die pair. Two other proof 1818 O-107 half dollars are known: the Green-Newman-Pogue specimen (lot 2029 in the 9/2015 Stack's Bowers Pogue II auction), and the Thomas Cleneay specimen (lot 1142 in the 12/1890 Chapman Brothers auction, later as lot 2741 in the 2/1961 Kreisberg-Schulman auction). The Pogue II catalog lists three confirmed proof 1818 half dollars of other die marriages: the Smithsonian, Eliasberg, and Hain-Byers specimens. Additionally, the 7/2013 Superior auction offered as lot 1124 an Uncertified O-113 half dollar with the dual grades of PR65 and MS66, and Walter Breen claimed proof status for two Uncertified 1818/7 halves (respectively O-101 and O-102) from the Oviedo Collection auctioned by Stack's in 9/1983. NGC ID# 24G8, PCGS# 6193

SEATED HALF DOLLAR

1864-S Half Dollar, MS63
WB-101, Large S Mintmark

- 3062** 1864-S Large S, WB-101, Die Pair 1, R.2, MS63 NGC. Type One Reverse. Large S Mintmark. The WB-101 variety represents the final use of the Type One Reverse on a San Francisco Mint half dollar. This is a well-struck Select Uncirculated example is one of the rare, mid-1860s S-mint dates, with fewer than two dozen pieces certified at the MS63 grade or finer by both services combined. An even glow of reddish-gold toning covers both sides, with lilac accents and only slight weakness at Liberty's upper hair strands and star 8. The coin shows remarkably few abrasions for the grade. Census: 4 in 63, 4 finer (5/19). *Stack's* (10/02), lot 596; *FUN Signature* (Heritage, 1/2005), lot 7322; *PNG Dallas Signature* (Heritage, 2/2015), lot 3829, which realized \$4,700. NGC ID# 24JE, PCGS# 572160 Base PCGS# 6312

PROOF SEATED HALF DOLLAR

1876 Seated Liberty Half, PR67
Tied for Finest Cameo at NGC

- 3063** 1876 PR67 Cameo NGC. An extraordinary Superb Gem Cameo proof, this Seated Liberty half dollar exhibits amazing contrast between the frosty silver devices and lightly toned fields. The surfaces are impeccably preserved and splashes of gold and violet toning add to the outstanding eye appeal of this centennial issue. Census: 2 in 67 Cameo, 0 finer (6/19). *Ex: Long Beach Signature* (Heritage, 2/2013), lot 3815, realized \$10,575. NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

WALKING LIBERTY HALF DOLLARS

1927-S Half Dollar, MS65
Among the Finest at NGC

- 3064** 1927-S MS65 NGC. On close inspection, slight separation can be detected between Liberty's thumb and index finger, and good detail is present on Liberty's head and the eagle's leg. This degree of definition is rare on the 1927-S, one of the most poorly struck issues of the series. The unmarked surfaces display vibrant frosty mint luster and outstanding eye appeal. NGC has yet to encounter an example in higher numeric grade (6/19). NGC ID# 24RA, PCGS# 6587

**1928-S Half Dollar, MS66
None Finer, Bold Strike**

- 3065 1928-S MS66 NGC.** The 1928-S is the last in a series of three consecutive S-mint issues where Western production constituted the entirety of Walking Liberty half dollar output for the year, preceded by the 1923-S and 1927-S. Only 1.9 million 1928-S half dollars were struck, and the average grade awarded by the leading certification companies falls between XF45 and AU50. This monumental Premium Gem ranks among the top four submissions at NGC (5/19).

Practically every design element is sharply struck, the exception being Liberty's branch hand, which still shows clear thumb separation. Variegated toning is speckled around a brilliant center on the obverse. The reverse remains mostly bright and frosty with a touch of peripheral color. An impossible-to-upgrade example of this challenging issue. NGC ID# 24RB, PCGS# 6588

**1929-S Walking Liberty Half, MS66
Attractive Luster, Original Toning**

- 3066 1929-S MS66 PCGS. CAC.** Reddish-gold, turquoise, and pale-rose shades mingle at the margins, while satin silver luster occupies the central devices of this highly original, remarkably attractive 1929-S Premium Gem. Faint-gold patina surrounds the primarily brilliant reverse. Both sides are free of abrasions, save for one obscure reeding mark in Liberty's lower gown, just above the hem. Lack of a strong strike through the centers is a typical '29-S characteristic, the only obstacle to an even higher grade. PCGS has seen just two numerically finer examples. Population: 61 in 66 (1 in 66+), 2 finer. CAC: 15 in 66, 2 finer (5/19). NGC ID# 24RD, PCGS# 6590

**1937-S Half Dollar, MS67
Fully Struck and Richly Frosted**

- 3067 1937-S MS67 PCGS. CAC.** Liberty's head and branch hand, the drapery lines, and the eagle's trailing leg feathers exhibit pinpoint definition. Rich mint frost radiates from near-flawless, brilliant surfaces with delicate golden accents. This San Francisco Walker compares to the finest examples at both grading services. Population: 47 in 67 (4 in 67+), 0 finer. CAC: 23 in 67, 0 finer (5/19). NGC ID# 24RT, PCGS# 6603

**1939 Half Dollar, Unsurpassed MS68
Powder-Blue Accents**

- 3068 1939 MS68 PCGS. CAC.** Pastel blushes of powder-blue blend with areas of brilliance and glints of mint-green, yellow, and rose patina to produce unsurpassed eye appeal. This frosty Superb Gem Walker is fully struck, and the surfaces are pristine. Population: 28 in 68 (4 in 68+), 0 finer. CAC: 19 in 68, 0 finer (6/19). NGC ID# 24RW, PCGS# 6606

1940-S Half Dollar, MS67
Frosty and Completely Untoned

- 3069 1940-S MS67 NGC.** The high points along a vertical line on the obverse from 12 o'clock to 6 o'clock are incomplete, as usual. The eagle's leg is similarly soft. However, the rest of this blazing, untoned Superb Gem displays captivating eye appeal, uninhibited cartwheel mint frost, and wonderfully unabraded fields. Census: 11 in 67, 0 finer (6/19). NGC ID# 24S2, PCGS# 6610

1941-S Walking Liberty Half Dollar, MS67
Iridescent Rim Toning

- 3070 1941-S MS67 NGC.** Strike definition is about as strong as can be for any 1941-S half dollar. The rims display iridescent toning with reddish-orange color being the dominant hue. Minimal patina appears over the centers. Perhaps the most impressive feature is the near-total lack of abrasions. Census: 26 in 67, 0 finer (6/19). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

1946-D Half Dollar, MS67+
Among the Finest at Both Services

- 3071 1946-D MS67+ NGC. CAC.** Traces of powder-blue, gold, and lavender color gently grace satiny surfaces. Strike detail is mostly strong, with the exception of Liberty's branch hand, though partial thumb separation is apparent. The fields are clean, and only a couple of ticks on each side prevent an even higher assessment. Still, this MS67+ 1946-D half dollar ranks among the finest submissions at NGC and PCGS combined. CAC: 63 in 67, 0 finer (6/19). NGC ID# 24SK, PCGS# 6628

FRANKLIN HALF DOLLARS

1949 Half Dollar, MS67 Full Bell Lines
Tied for Finest at PCGS and NGC
Major Condition Rarity at This Level

- 3072 1949 MS67 Full Bell Lines PCGS. CAC.** The 1949 Franklin half dollar was a well-produced and well-saved issue. Sharply struck Full Bell Lines representatives can be found in MS64 and MS65 grades without trouble, and while Premium Gems are scarce, they remain entirely within reach for a majority of collectors. None of that is true for Superb Gems, which are major condition rarities. Only four coins are so graded at PCGS with another example at NGC. Two of those five submissions have received green CAC stickers, including this one (5/19).

Speckled blue, gold, and mauve toning fails to subdue the frosty underlying mint brilliance. Each side displays a complete impression, and marks are limited to a couple of tiny ticks on the bell that are nicely concealed beneath the delicate patina. A wonderful coin for Registry purposes. NGC ID# 24ST, PCGS# 86653 Base PCGS# 86653

1952 Half Dollar, MS67 Full Bell Lines
Beautifully Toned Borders

- 3073** 1952 MS67 Full Bell Lines PCGS. A gorgeous Superb Gem, this radiantly lustrous 1952 Franklin half dollar is among the finest coins certified, and its magnificent toning sets it apart from its peers. Brilliant centers cede to concentric rainbow hues, which are especially prominent on the reverse. The obverse periphery is russet. Population: 34 in 67 (2 in 67+) Full Bell Lines, 0 finer (5/19).
Ex: Central States Signature (Heritage, 4/2018), lot 4884, which realized \$5,640. NGC ID# 6L2U, PCGS# 86661

1961 Franklin Half Dollar, MS66+
Rare Full Bell Lines Example

- 3074** 1961 MS66+ Full Bell Lines PCGS. CAC. From a mintage of 8.2 million pieces, the 1961 Franklin half dollar is generally not a well-struck issue and examples in MS66 condition, with Full Bell Lines, are seldom encountered. This sharply detailed Premium Gem does show complete definition on the bell lines, and the well-preserved, lustrous surfaces are blanketed in attractive shades of golden-tan and lavender toning. This toning scheme is normally associated with halves that were pulled from Mint Sets; however, packaging changed after 1958 and the toning seen here must be from different environmental conditions. Population: 19 in 66 (4 in 66+) Full Bell Lines, 0 finer. CAC: 8 in 66, 0 finer (5/19). NGC ID# 24TN, PCGS# 86680

EARLY DOLLARS

1795 Flowing Hair Dollar, Choice XF
Three Leaves, B-7, BB-18

- 3075** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, XF45 NGC. Bowers Die State I: Two die flaws appear near the left ribbon end, as usual. The date is widely spaced. The lowest curl is small, touching the innermost point of star 1. The Three Leaves reverse has 14 berries, seven on each branch half, with only one berry on the left branch half between the eagle's wing and the bow. This deep silver and olive-gray Choice XF Flowing Hair dollar is strongly defined and devoid of mentionable contact marks. Adjustment marks are similarly absent.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1167, where it realized \$9,775. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

1796 B-4, BB-61 Dollar, XF40
Small Date, Large Letters

- 3076** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF40 ANACS. Bowers Die State II, with lapped forecurls. BB-61 features a single leaf under the D in UNITED. Deep gunmetal-gray patina covers both sides of this early Draped Bust dollar. We note two small marks, one below the 1 in the date and the other below the eagle's beak, as well as a couple of faint pinscratches in the reverse margins. Nonetheless, this piece is still better than the typical example. Housed in a small-sized holder.

Ex: ANA Signature (Heritage, 8/2010), lot 5090, where it brought \$5,750. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 B-1, BB-66 Dollar, XF45
Scarce Small Date, Small Letters Variety

- 3077** 1796 Small Date, Small Letters, B-1, BB-66, R.4, XF45 PCGS. Bowers Die State I. For the 1796 dollars, there are three distinct Small Date, Small Letters die pairs, two with Small Date, Large Letters, and just one with Large Date, Small Letters. All Small Date, Small Letters combinations are either scarce or extremely rare. The B-1, BB-66 variety is in the former category, and this is a marvelously preserved example of that die marriage. Considerable luster remains on each side, filtering through a thick layer of golden-gray, orange, blue, and violet patina. Aside from a small nick on the neck, the portrait is free of most distractions.

Ex: Houston Signature (Heritage, 12/2010), lot 3779, where it brought \$13,800. NGC ID# 24X3, PCGS# 39999 Base PCGS# 6859

1798 Draped Bust, Large Eagle Dollar, AU53
Pointed 9, Close Date, B-27, BB-113

- 3078** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU53 PCGS. Bowers Die State I/II. The 8 is much too high in the date, and a tiny extra tine of metal appears in the field near star 12. The reverse shows the usual die crack from the rim above S to OF to the wing tip to the rim above the first A in AMERICA. The obverse lacks the usually seen die crack through the 9 in the date, and as such may prove to be a prize for die-state collectors. Although the strike is slightly uneven, this piece has lustrous silver-gold surfaces with lots of vibrancy and appeal.

Ex: Central States Signature (Heritage, 4-5/2010), lot 1001, where it brought \$7,475. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

1798 Draped Bust Dollar, AU55
B-27, BB-113, Pointed 9, Close Date

- 3079** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU55 NGC. Mint luster emanates from Liberty's hair strands and glows from the colorfully toned peripheries of this boldly detailed Draped Bust dollar. Silver-gray centers merge into gold and aqua margins characteristic of dollars stored in cardboard albums many years ago, acquiring a concentric patina much-valued today. This is a nice example of the 1798 date with the Heraldic Eagle reverse, showing little wear and no significant marks from what must have been a very short time in circulation.

Ex: National Money Show Signature (Heritage, 2-3/2014), lot 3956. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

1799/8 Dollar, B-3, BB-141, AU50
Blundered 15 Stars Reverse

- 3080** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU50 PCGS. Bowers Die State III. Raised die flaws occur under (LIBE)RT(Y), and a die crack runs from the right ribbon through (A)ME(RICA). Occupying a prominent place in the yearly *Guide Book*, BB-141 is quickly attributed by the second 9 over an 8 in the date, and the tips of two stars under the first and final clouds on the reverse. The issue enjoys a substantial survivorship, although coins at the AU level are scarce. Central strike softness gives way to strong detail around the borders. That is where splashes of gold and gunmetal-blue toning appear, complementing the bright silver interiors. A few marks are noted on Liberty's neck. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1803 Draped Bust Dollar, AU50
B-6, BB-255 Variety

- 3081** 1803 Large 3, B-6, BB-255, R.2, AU50 PCGS. CAC. Bowers Die State III, with a hairline crack through the stars on the right. The Large 3 in the date, normal T in LIBERTY, and the upright of the E in STATES positioned left of the cloud break identifies the BB-255 variety. This impressive AU50 specimen shows only light wear on the design elements and the lightly abraded bluish-gray surfaces retain traces of original mint luster in sheltered areas. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

GOBRECHT DOLLARS

1836 Gobrecht Dollar, Toned PR55
Judd-60, Die Alignment I, Die State F

- 3082** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 PR55 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State F, which is characterized by a rim nick above the R in DOLLAR and a diagonal die scratch through the O in ONE. The die scratch below the D in DOLLAR that is usually associated with this state is not apparent here, most likely because of the toning in that area. The Mint's account books show that Judd-60 dollars were struck in the last week of December 1836. Those with the diagonal die clash above the eagle's wing (seen here) were minted in the final part of that week. The fields are moderately reflective, as with all 1836 dollars, and each side displays speckled rose and blue toning, with colors that are several shades deeper on the reverse. Only the smallest contact marks can be found with magnification. NGC ID# BLWV, PCGS# 11225

1836 Gobrecht Dollar, PR63+
Judd-60 Original, Die Alignment IV

- 3083** 1836 Judd-60 Original, Medal Alignment, Pollock-65, R.1, PR63+ NGC. Silver. Plain Edge. Die Alignment IV (center of Liberty's head opposite the right side of F in OF). Die State H. All the diagnostic markers from previous die states are clear and the diagonal clash mark above the eagle's wing is especially crisp. The surfaces of this piece are notable for the depth of reflectivity found in the fields, mirroring that is never seen on Die Alignment I dollars. Each side also displays aqua-blue toning with a slight undercurrent of rose patina. Sharply detailed with no obvious contact marks. A few minor hairlines can be found with a loupe beneath the toning. NGC ID# BLWV, PCGS# 11226

SEATED DOLLARS

1846 Dollar, Bold MS64
Conditionally Scarce, No Motto Type Coin

- 3084** 1846 MS64 PCGS. OC-1, R.1. The Mint struck 110,600 Seated dollars in 1846 using one obverse and two reverses. A tiny die dot connects the upper berry to the eagle's leg on this variety. The crack above D STATES OF confirms the later die state. With about 3,500 coins extant, the 1846 is a plentiful issue suitable to represent the No Motto type. Near-Gems are scarcely seen, though, and finer coins are major rarities. The devices show bold definition. Gunmetal-blue, crimson, and tan-gold border toning progresses to brilliant centers. Population: 27 in 64 (4 in 64+), 3 finer (6/19). NGC ID# 24YH, PCGS# 6932

**1855 Seated Dollar, Reflective MS62
Low-Mintage Circulation Strike Rarity**

- 3085 1855 MS62 PCGS. OC-1, High R.3.** Osburn-Cushing Die State a/a. Both proofs and circulation strikes were struck from the same die pair, making the identification of 1855 circulation strikes subjective, especially when the coin is an early strike with prooflike surfaces such as this Mint State coin. The strike is less-sharp than expected on a proof, with several star centers rounded, and some strike weakness exists through the eagle's left (facing) side.

Uncirculated business strikes are considerably scarcer than proofs, although both formats are rare for this low-mintage key issue. Just 26,000 pieces were struck — slightly under the mintage of the equally rare 1854 issue, creating a pair of mid-fifties Seated dollars that continue to challenge collectors to this day. Both sides of the coin display mirrored fields, diminished by a few light abrasions and a thin veil of golden toning. There are no heavy marks, and much of the prooflike character survives. Population: 12 in 62, 8 finer (6/19). NGC ID# 24YU, PCGS# 6943

**1859-S Seated Dollar, MS62
Mint State Rarity**

- 3086 1859-S MS62 PCGS. OC-1, R.2.** Osburn-Cushing Die State a/d. The inaugural silver dollar from this branch mint, the 1859-S was produced to the extent of just 20,000 coins. Most of these were exported and subsequently melted, and even high-grade circulated survivors will set one back several thousand dollars. Uncirculated examples are even rarer, with few coins that grade above the present level of preservation. There is some hallmark strike softness over the reverse portrait, but all other features are bold, if not sharp. The number of distractions is few for the grade — a small area of tiny marks in the right obverse field is noted for accuracy. A pleasing example, nonetheless, with a delicate overlay of steel-gray and mixed pastel colors. Population: 9 in 62, 9 finer (6/19). NGC ID# 24YZ, PCGS# 6948

**1870-CC Seated Dollar, AU53
Ex: Reiver, First Carson City Issue**

- 3087 1870-CC AU53 NGC. OC-6, High R.5.** Ex: Jules Reiver Collection. The 7 is centered between two dentils, and the CC mintmark is closely spaced. Attractive golden-brown and slate-gray toning graces the lightly marked and minimally worn surfaces. The fields have a few wispy hairlines, and an area of mint-made roughness is noted left of the pole beneath the shoulder. The 1870-CC is the most available of the four CC-mint issues of the Seated type, but it is nonetheless of considerably greater rarity than any CC-mint Morgan dollar, especially in Mint State. The 1870-CC is also famous as the first issue struck by the Carson City Mint. Ex: *Jules Reiver Collection, Part II (Heritage, 1/2006)*, lot 21563, where it brought \$4,600. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Liberty Dollar, AU55
Inaugural Carson City Mint Issue

- 3088** 1870-CC AU55 PCGS. OC-9, Low R.4. Osburn-Cushing Die State a/a. The date is vertically centered in the exergue, while the Medium Wide CC mintmark has the right edge of the first C aligned with the feather tip above. Nine die pairs were required to strike just 12,462 silver dollars — Carson City's first attempt at the denomination, which was hampered by a lack of silver bullion. This Choice About Uncirculated example is semireflective, with iridescent colors and bluish-gray overtones. The strike is sharp throughout both sides. Only a few minuscule marks are seen on either side. Population: 39 in 55, 39 finer (6/19). NGC ID# 24ZE, PCGS# 6964

Carson City Mint, 1875

TRADE DOLLARS

1874 Trade Dollar, MS65
Only Two Numerically Finer

- 3089** 1874 MS65 PCGS. CAC. No period after FINE, as often seen on this issue. Pretty much any Trade dollar issue is a condition rarity in MS65, and early dates in the series are particularly elusive in high grade. The Trade dollar was first and foremost a trade coin, intended only for export. When it ultimately did circulate domestically, it caused a commercial use problem due to its heavy silver weight. It was never the subject of strong numismatic interest at the time of issue, and most collectors who did obtain examples often acquired proofs (which are relatively plentiful today).

We have previously handled a Gem 1874 Trade dollar on only five or six occasions, and we have never seen a finer coin, despite a few higher-graded specimens in the population data. This piece is the most attractively toned Gem 1874 that we have seen, showing natural amber, lilac, and sky-blue toning overall. The fields are moderately reflective, although strike weakness around the borders and on the eagle's right (facing) leg confirms the business strike origin of this piece. Population: 6 in 65 (1 in 65+), 2 finer. CAC: 2 in 65, 2 finer (5/19). NGC ID# 252Z, PCGS# 7034

1875-CC Trade Dollar, Bright MS64
Berry Under Claw, Great Nevada Type Coin

- 3090 1875-CC Type One Reverse MS64 NGC.** Most 1875-CC Trade dollars feature the Type One Reverse with a berry under the right (facing) talon. This bright near-Gem, represents one of the finer available examples of this popular Carson City issue, an excellent choice for type purposes. Brilliant surfaces exhibit scattered bagmarks and slight flatness on Liberty's head and foot, and the eagle's claw. The coin is well-struck otherwise and readily appealing. Census (all varieties): 14 in 64, 4 finer (6/19). NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1877-CC Trade Dollar, MS61★
Low-Mintage Branch Mint Issue

- 3091 1877-CC MS61★ NGC.** A small mintage of 534,000 Trade dollars was accomplished at the Carson City Mint in 1877, making the issue elusive in all Mint State grades today. This impressive MS61 specimen exhibits well-detailed design elements, with brilliant surfaces that show a mix of satiny mint luster and prooflike reflectivity in the fields. Lightly marked for the grade. Census: 22 in 61 (1 in 61+, 1 in 61★), 46 finer (6/19). NGC ID# 253D, PCGS# 7045

1878-CC Trade Dollar, AU58
Last of the Carson City Trade Dollars

- 3092 1878-CC AU58 NGC.** For all practical purposes, the Trade dollar was replaced by the Morgan silver dollar in 1878, although proof-only issues kept the series alive for a few more years. The 1878-CC Trade dollar was a last-gasp circulation strike mintage, with nearly half of the 97,000-piece mintage melted in July 1878, and the remaining coins dispersed throughout the Western states, where they continued to circulate. This is a near-Mint example, with clearly original golden-brown toning enhanced by pleasing, pale blue and rose accents. Smooth, partially reflective surfaces show underlying glimpses of mint luster and only microscopic marks, along with light, high-point wear. Census: 11 in 58, 26 finer (5/19). NGC ID# 253M, PCGS# 7047

1878-S Trade Dollar, MS65
Dappled Olive-Gold Toning

- 3093 1878-S MS65 PCGS.** This mass-produced San Francisco issue is one of the more collectible Trade dollars in high grades, perfect for type representation. Dappled olive-gold patina adorns dusky silver surfaces that glisten with frosty mint luster. Both sides are as strongly detailed as one could hope to find, including the olive leaves, Liberty's head, and the eagle's feathers and talons. Population: 25 in 65 (3 in 65+), 23 finer (6/19). NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLAR

1874 Dollar, PR64 Deep Cameo
Exceptional Contrast

- 3094 1874 PR64 Deep Cameo PCGS.** Walter Breen wrote about the 1874 Trade dollar his *Proof Encyclopedia*: "Some 100 each struck in January, March, April and June; 200 in February, and 50 each in September and December." Those totals correspond to the recorded proof set deliveries, suggesting these coins were only issued in sets. While non-Cameo and Cameo proofs are seen with regularity, Deep or Ultra Cameo specimens are significantly rarer. Indeed, this is only the eighth time we have offered a Deep Cameo representative since the establishment of our Permanent Auction Archives in 1993. Aside from light patina on the reverse, this near-Gem proof is brilliant and thickly frosted with dramatic field mirroring. Contrast is exceptional. Population: 8 in 64 Deep Cameo, 3 finer (5/19). NGC ID# 27YK, PCGS# 97054

MORGAN DOLLARS

1878-CC Dollar, MS66+ VAM-9, Mintmark Tilted Right

- 3095** 1878-CC MS66+ PCGS. VAM-9. The CC mintmark is tilted right. Other die markers include a broken tip on the fourth star right of the date, and a die line from the wreath to the O in ONE. Fully struck hair strands and feathers define this totally brilliant, thickly frosted Premium Gem. Planchet striations remain apparent on Liberty's chin. PCGS reports six 1878-CC dollars finer for all varieties (6/19). NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, MS63 Challenging Branch Mint Issue

- 3096** 1879-CC MS63 PCGS. Normal Mintmark. Its small mintage of 756,000 pieces and limited representation in the GSA sales of the 1970s make the 1879-CC Morgan dollar a challenging issue in the Carson City series. This attractive Select specimen exhibits well-detailed design elements and lightly marked, lustrous surfaces with outstanding eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS63 Appealing for the Grade

- 3097** 1879-CC MS63 NGC. VAM-4, a Normal Mintmark variety that shows a die chip on the left side of the 8 in the date and a pair of die lines extending downward from Liberty's nose. This example is frosty and lustrous with a hint of pale champagne toning. Abrasions are surprisingly minimal for the grade. Minor strike weakness occurs on the eagle's breast and on the hair above Liberty's ear. Ex: FUN Signature (Heritage, 1/2017), lot 4973, which realized \$7,050. NGC ID# 253U, PCGS# 7086

1879-CC Morgan, MS64 Prooflike Few Are Known Finer

- 3098** 1879-CC MS64 Prooflike PCGS. After the 1889-CC, the 1879-CC Morgan dollar is the scarcest Carson City issue in this series. It is particularly elusive in attractive Prooflike grades. This near-Gem example is sharp and starkly contrasted. The reverse has credit to a full MS65 designation, although a few light contact marks on Liberty's cheek and in the adjacent obverse field define the MS64 grade. A couple of tiny toning flecks near Liberty's temple and below the ear serve as pedigree markers, although the coin is otherwise brilliant and frosty. Population (normal mintmark): 91 in 64 (6 in 64+) Prooflike, 12 finer; 20 in 64 (1 in 64+) Deep Mirror Prooflike, 2 finer (5/19). NGC ID# 253T, PCGS# 7087

1879-CC Capped Die Morgan, MS63 CAC-Approved VAM-3 Example

- 3099** 1879-CC Capped Die, VAM-3, Top 100, MS63 PCGS. CAC. A Top 100 Variety. CAC has awarded green labels to a fraction of the known Capped Die dollars, and coins in MS63 and finer grades with this recognition are particularly scarce. This satiny coin is essentially brilliant and softly lustrous. Light contact marks on Liberty's cheek are all that limit the grade. Slight strike weakness is noted on the eagle's breast and the hair above Liberty's ear, although it is not obtrusive. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-S Reverse of 1878 Dollar, MS65
Scarce Type Two Reverse**

- 3100 1879-S Reverse of 1878 MS65 PCGS.** A half-dozen or so reverses left over from 1878 were used on S-mint dollars in 1879. The reverse die from 1878 is most apparent by the flat breast on the eagle, but another characteristic are the parallel arrow feathers (rather than angled as in 1879 and subsequent years). Few high-grade examples are known and only lower-end, baggy Uncirculated pieces were in LaVeré Redfield's holdings. This is an exceptionally clean and highly lustrous example. The strike is complete in all areas and both sides are snow-white. Population: 62 in 65 (4 in 65+), 1 finer (5/19). NGC ID# 253W, PCGS# 7094

**1879-S Morgan, Frosty MS68
None Are Numerically Finer**

- 3101 1879-S MS68 PCGS. CAC.** The 1879-S is the first readily available Morgan dollar in Superb Gem condition, although most such coins are MS67s. Pieces in MS68 are significantly scarcer, and it is rare to encounter a CAC-approved coin this fine. That offered here is beautifully frosted throughout and sharply struck. Both sides are brilliant. The surface quality is remarkable — this coin earns an MS68 grade and CAC recognition purely off of its outstanding preservation, without the aid of semiprooflike fields which helps many other coins achieve this lofty grade. Population: 142 in 68 (11 in 68+), 0 finer. CAC: 85 in 68, 0 finer (5/19). NGC ID# 253X, PCGS# 7092

**1880-S Morgan Dollar, MS68★
Tremendous Quality and Eye Appeal**

- 3102 1880-S MS68★ NGC.** From a mintage of 8.9 million pieces, the 1880-S Morgan dollar is one of the most plentiful issues of the series in high grade. Even at the lofty MS68 grade level, the 1880-S is not too difficult to locate, but finer coins are rare. This spectacular MS68 specimen exhibits sharply detailed design elements and virtually flawless, lustrous surfaces. Vivid highlights of cobalt-blue and emerald-green toning visit the obverse. The terrific eye appeal is attested by the Star designation. NGC has graded five numerically finer examples (6/19). NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68
Sharply Detailed, Impeccably Preserved**

- 3103 1880-S MS68 PCGS. CAC.** Large S. The San Francisco Mint struck a large production of 8.9 million Morgan dollars in 1880, and the coins were uniformly well-produced. This stunning MS68 example displays sharp design elements and the virtually pristine surfaces radiate vibrant mint luster. Eye appeal is terrific. The fields are semiprooflike, and a modest cameo effect is evident on both sides. NGC has graded five numerically finer examples (5/19). NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68 Prooflike
Top Registry Set Contender**

- 3104 1880-S MS68 Prooflike NGC.** Exceptional white-on-black contrast exists on both sides of this prooflike 1880-S — perhaps a touch stronger on the obverse than the reverse — but visually arresting in either instance. Mirroring is particularly deep on the obverse. A needle-sharp strike exists beneath the mint frost on all devices, and there are no marks or abrasions to mention. A bit of mint grease below the arrowheads is the sole visitor to the virtually pristine surfaces, of no consequence whatsoever. This is a spectacular Superb Gem for the finest Morgan dollar set. Census: 11 in 68 (1 in 68★) Prooflike, 0 finer (5/19). NGC ID# 2544, PCGS# 7119

**1884-S Dollar, Brilliant MS60
Famous Condition Rarity**

- 3105 1884-S MS60 NGC.** This San Francisco Morgan dollar issue is well-known in specialist circles because of its conditional rarity. The lack of supply at MS63 and MS64 levels puts tremendous pressure on lower-grade Uncirculated representatives, those in MS60 to MS62. This well-struck and brilliant semikey displays few obtrusive abrasions for the grade. Subdued luster in the fields and faint hairlines likely contribute to the assessment. The only marks of note occur left of the eagle's beak and on its upper chest. NGC ID# 254P, PCGS# 7156

1889-CC Dollar, AU55
Key Branch Mint Issue

- 3106 1889-CC AU55 NGC.** The Carson City Mint only resumed coinage operations in October of 1889, resulting in a meager mintage of 350,000 Morgan dollars that year. Accordingly, the 1889-CC Morgan dollar is the most challenging issue in the Carson City series. This lightly worn, lightly abraded Choice AU specimen exhibits low-intensity shades of lavender toning, with traces of original mint luster underneath. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU58
Key Carson City Date

- 3107 1889-CC AU58 NGC.** The 1889-CC Morgan dollar is a demand rarity, and it is a key date in the series. No other Carson City Morgan is as sought-after and elusive. The bulk of the survivorship grades VF or lower, and there are a small number of Mint State pieces known for ambitious, well-heeled collectors. What are lacking in the market are attractive AU coins. This near-Mint example displays original satin luster in the fields, complementing sharp central devices that show only slight high-point friction. Both sides are smooth without noticeable abrasions. Eye appeal is pleasing. This attractive 1889-CC dollar displays a blush of light golden toning on each side. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU58
Sought-After Series Key

- 3108 1889-CC AU58 PCGS.** Closed for coinage operations for three years, the Carson City Mint needed substantial repairs as well as new management personnel and technicians before the facility was again viable for production. It was not until October 1889 before everything was in place, and the old Nevada Mint could manage just 31,000 double eagles in addition to a paltry 350,000 silver dollars as its year's output.

In particular, the silver dollar mintage was low — even by Carson City's standards. Today, the 1889-CC is one of the most desirable scarcities in the Morgan dollar series, with a one-two punch of low mintage combined with the undeniable allure of its CC mintmark. This is a brilliant, partially prooflike example, with light field abrasions and a trace of high-point wear. The coin is a whisper away from full Mint State, and its near-Mint condition is comparable to many lower-end Uncirculated pieces. Bright mint luster remains across both sides. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS62
Partially Prooflike Fields

- 3109 1889-CC MS62 NGC.** Unlike other Carson City silver dollar issues, the 1889-CC is scarce with prooflike or deep prooflike surfaces. The reflective fields of this MS62 example carry just enough mint frost to preclude a prooflike designation, although the sharp and brilliant surfaces show substantial mirroring. As usually seen, tiny marks are somewhat magnified on mirrored surfaces, but for the MS62 level, any marks are few for the grade and minor in size. Liberty's cheek is smooth and frosted, while the strands are defined above the ear. The coin is a good fit for any mid- to high-grade Uncirculated set. Only about 6% of all 1889-CC dollars offered by Heritage reach the Uncirculated level, let alone with partially prooflike surfaces. NGC ID# 2559, PCGS# 7190

1891-CC Silver Dollar, MS65 Prooflike
Scarce This Fine With Reflective Fields

- 3110 1891-CC MS65 Prooflike PCGS.** The fields are deeply reflective, although not quite mirrored enough for a DMPL designation. Nonetheless, even Prooflike 1891-CC dollars are in Gem condition. This piece displays a bold strike and a remarkably clean cheek on Liberty. The faintest trace of light golden toning clings to the outer peripheries. Population: 22 in 65 (1 in 65+) Prooflike, 2 finer; 4 in 65 Deep Mirror Prooflike, 0 finer (6/19). NGC ID# 255H, PCGS# 7207

1892-CC Dollar, MS65
Attractively Toned

- 3111 1892-CC MS65 PCGS.** Although not a common date, the 1892-CC Morgan silver dollar is also not one of the rarities in the series. Nonetheless, Gem examples are truly difficult to locate, especially with the eye appeal of this specimen. Both sides have pleasing golden-brown color with sea-green and iridescent toning, all over frosty mint luster. Just 40 finer non-prooflike examples of this date have been certified by PCGS (6/19).

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5380; *Summer FUN Signature* (Heritage, 7/2016), lot 3949. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS65
Missing From the GSA Holdings

- 3112 1892-CC MS65 PCGS.** A brilliant and unmarked Gem that has only minor inexactness of strike at the centers. Both sides show overlapping sets of clashmarks. The 1892-CC was virtually absent from the GSA holdings, although a number of Treasury bags were undoubtedly disbursed during the 1950s.

Ex: *Dallas Signature* (Heritage, 11/2007), lot 1269. NGC ID# 255M, PCGS# 7214

1892-CC VAM-8A Dollar, MS65+
Few Known Finer

- 3113 1892-CC MS65+ PCGS. VAM-8A.** A distinctive VAM identified by a "filled 2 base" die break and a "faint partial incuse n of In" clash mark, in the parlance of VAMworld.com. Virtually absent from the GSA sales, the 1892-CC is a better Carson City issue in the present lofty grade. Lustrous and boldly struck with brilliant fields and devices. The margins exhibit freckles of golden-brown and jade-green toning. The reverse is remarkably unabraded, as is the right obverse. The portrait and left obverse field display only wispy grazes. PCGS has certified only 40 pieces finer (5/19).

Ex: *FUN Signature* (Heritage, 1/2016), lot 6010, which realized \$7,050. NGC ID# 255M, PCGS# 7214

1892-S Silver Dollar, AU58
Second-Rarest Morgan in High Grade

- 3114 1892-S AU58 PCGS.** The unrivaled key Morgan dollar in Mint State is the 1893-S, although a close second is the 1892-S. The latter issue boasts a mintage of 1.2 million coins — 12 times that of the 1893-S, but few examples were preserved for numismatic purposes. The 1892-S circulated extensively in the late 19th century, and coins that were put into storage were largely paid out by the 1930s. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers notes the rarity of Uncirculated 1892-S dollars: “Today, most collectors will opt for an inexpensive VF or an affordable EF, the 1892-S often being one of the few Morgan dollars in a set that is not Mint State.”

Offered here is a coin as close to Mint State as possible without crossing that prohibitive threshold. It is graded AU58 and displays substantial luster in the fields. Wisps of light golden and russet toning complement little evidence of wear, and eye appeal is pleasing. Finer coins are rare in the context of the series. NGC ID# 255P, PCGS# 7218

1893-CC Morgan Dollar, MS62+
Reflective Fields

- 3115 1893-CC MS62+ NGC. CAC.** Like many others, this attractive final-year Carson City Morgan dollar has satin luster with reflective fields and frosty devices, showing myriad bagmarks, yet retaining excellent eye appeal. Both sides are brilliant with a hint of golden-violet peripheral toning. The usual strike softness is noted in the centers.

Ex: Roy Harte Collection, Part II (Bowers and Ruddy, 3/1981), lot 435; *Houston Signature* (Heritage, 12/2013), lot 3744, which realized \$5,875. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Lustrous CAC-Approved Coin

- 3116 1893-CC MS63 PCGS. CAC.** Blazing, brilliant cartwheel luster engulfs this Select 1893-CC silver dollar, complementing above-average sharpness and remarkably well-preserved surfaces for the grade. This final-year Carson City issue is available in MS63, but few such coins carry CAC endorsement, which this piece has. NGC ID# 255S, PCGS# 7222

1893-S Morgan Dollar, XF40
Pleasing and Well-Struck

- 3117 1893-S XF40 PCGS.** A pleasing, midgrade example of this important key date. This San Francisco Mint issue is usually seen in lower circulated grades, most often in VF. The devices are well-struck, and the originally preserved surfaces exhibit touches of green, ruby, and gold-tan border toning. Only a few minor marks are found on either side. Morgan dollar specialists will recognize this offering as a significant opportunity to acquire an example of the lowest-mintage issue in the entire series.

Ex: *National Money Show Signature* (Heritage, 2-3/2014), lot 4043. NGC ID# 255U, PCGS# 7226

1894 Silver Dollar, MS64**Ex: Jack Lee**

- 3118 1894 MS64 PCGS.** This is a gorgeous near-Gem with frosty silver luster and exceptional design definition, weak only over Liberty's ear, and there only a touch weak. The reverse details are bold including sharp breast feathers. PCGS has only certified 36 finer pieces (5/19).

Ex: Jack Lee Estate, Inventory / Dallas Signature (Heritage, 10/2008), lot 1426, where it brought \$7,475. NGC ID# 255V, PCGS# 7228

1894-S Morgan Dollar, MS65+**Seldom Seen Finer**

- 3119 1894-S MS65+ PCGS. CAC.** The unusual but attractive toning pattern on each side of this Gem 1894-S dollar includes untuned silver-gray areas that alternate with charcoal, rose, cinnamon, and bluish-gray patina. Even a loupe fails to reveal more than scattered, insignificant contact marks. Some light roller marks appear on the hair over the ear and on the cheek. An extremely attractive coin for the grade. PCGS has graded 19 numerically finer examples (5/19). NGC ID# 255X, PCGS# 7232

1895-S Morgan Dollar, MS63**Semikey San Francisco Issue**

- 3120 1895-S MS63 PCGS.** The branch mints at New Orleans and San Francisco produced the only circulation-strike silver dollars in 1895 that were released into circulation. The O-mint issue boasted a mintage of 450,000 coins, and the 1895-S 400,000. Both of these dates are semikeys today, although the S-mint coin is scarcer overall. This Select '95-S dollar displays vibrant cartwheel luster and a blush of light golden toning. Light grazes on Liberty's cheek prevent a finer grade. NGC ID# 255Z, PCGS# 7238

1896 Morgan, MS66+ Deep Mirror Prooflike**Registry-Grade Condition Rarity**

- 3121 1896 MS66+ Deep Mirror Prooflike PCGS. CAC.** Deep Mirror Prooflike Morgan dollars of any date are rarely seen without unsightly field abrasions that show up because of the reflectivity. This CAC-approved MS66+ 1896 coin does not show any distractions. Each side is beautifully preserved and modestly contrasted with no toning. Slight strike weakness is noted on the hair above Liberty's ear. Higher-grade Deep Mirror Prooflike 1896 dollars are virtually uncollectible. Population: 25 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 5 in 66, 0 finer (5/19). NGC ID# 2562, PCGS# 97241

1896-S Morgan Dollar, MS64+**Scarce Any Finer**

- 3122 1896-S MS64+ PCGS. CAC. VAM-2, Repunched 6.** No large quantity of 1896-S dollars emerged from the Treasury vaults, and aside from a few hundred coins rescued from the Redfield hoard, no trace of the greater part of the 5 million-piece mintage remains. Melting under the terms of the Pittman Act is suspected. Gem or finer coins are notably scarce (and expensive). This high-end near-Gem example is well-struck and well-preserved, with mottled blue and peach-gold toning on the obverse and a trace of reddish-gold border toning on the reverse. The 6 in the date is repunched — the primary marker for VAM-2 — and the mintmark shows minor doubling.

Ex: Houston Money Show Signature (Heritage, 12/2015), lot 3274. NGC ID# 2564, PCGS# 7244

1899-O Silver Dollar, MS67+**Only One Coin Numerically Finer**

- 3123 1899-O MS67+ PCGS.** The 1899-O Morgan dollar is moderately scarce in MS67, and only 20 coins are Plus-graded at PCGS, with one MS68 piece finer (5/19). This beautifully preserved Registry coin displays above-average central sharpness and frosty, untuned mint luster. Liberty's cheek and the fields are especially clean. An important Registry Set opportunity. NGC ID# 256C, PCGS# 7260

1901 Silver Dollar, MS63+
Rare Plus-Graded Registry Candidate

3124 1901 MS63+ PCGS. The 1901 Morgan dollar is a classic condition key, plentiful in circulated grades but scarce in Mint State, and as such, one of the most sought-after Philadelphia issues in this condition. The typical Uncirculated coin to appear at auction grades no finer than MS62, or occasionally, MS63. In MS64, the 1901 Morgan is a grand rarity, and a Gem example would headline an auction if it were to be offered. Hovering between the MS63 and MS64 levels are a dozen MS63+ coins — 10 at PCGS, two at NGC (5/19). One of those coins is offered here, and it is the ideal balance for most collectors between affordability and rarity. We have previously offered only three other MS63+ coins, the last of which was an NGC coin in the 2016 Summer FUN Signature (Heritage, 7/2016), lot 3956. We last offered a PCGS coin in this grade in the fall 2014 Beverly Hills Signature (Heritage, 11/2014), lot 3874, and that coin realized \$20,562.50. By comparison, MS64 examples often exceed \$50,000 at auction.

This high-end Select piece displays vibrant mint luster and remarkably light abrasions for the grade. Central sharpness is above average and eye appeal is excellent. PCGS lists only 36 finer representatives (5/19). NGC ID# 256J, PCGS# 7272

PROOF MORGAN DOLLARS

1878 8 Tailfeathers Dollar, PR66 Cameo
Nicely Preserved and Well-Contrasted

3125 1878 8TF PR66 Cameo NGC. Ex: Pacific Rim Collection. It is unusual to find this first-year Morgan dollar variety with any degree of mentionable contrast, making this Premium Gem Cameo example a standout coin in many regards. One hundred proofs were struck on March 12 and 15, 1878, and 300 more on March 18, leading to the usual production figure of 500 proofs of the variety. Most certified examples, however, grade no finer than PR64 to PR65 and without a Cameo designation. This piece boasts light rose patina with moderate device frost that contrasts well against deeply mirrored fields. One thin line through the 1 in the date and a couple of minor ticks and thin marks on Liberty's cheek account for the grade, none of them distracting. Some prominent die polishing lines appear on the lower reverse, part of the normal die preparation process. Census: 12 in 66 Cameo, 6 finer (5/19). Ex: *Central States Signature* (Heritage, 4/2016), lot 4731. NGC ID# 2572, PCGS# 87311

1880 Morgan Dollar, PR67
Spectacular Toning and Visual Appeal

3126 1880 PR67 PCGS. CAC. A proof Morgan dollar is the ultimate representation of one of the most famous designs in American numismatics. The 1880 is the best issue in the series for type collectors looking for an example in this format. More proofs were produced that year than any other (1,355 specimens).

This Superb Gem proof has been endorsed by CAC for its quality within the grade, and deservedly so. Dusky lavender and golden patina turns to eye-catching shades of orange, rose-violet, and cobalt-blue when rotated under a light source. Moderate contrast also becomes more apparent. A spectacular coin. Population: 24 in 67 (4 in 67+), 4 finer. CAC: 7 in 67, 2 finer (6/19). NGC ID# 2724, PCGS# 7315

1881 Dollar, Premium Gem Proof
Flashy Fields Under Golden Patina

3127 1881 PR66 PCGS. The proof mintage for the 1881 Morgan dollar dipped to 984 pieces, but this remains a generally collectible issue from the early part of the series. This beautifully preserved Premium Gem offers flashy fields beneath delicate golden-orange, rose-violet, and blue patina. Fully struck devices stand out markedly, generating partial but wholly eye-appealing contrast. Population: 22 in 66 (2 in 66+), 11 finer in this category (6/19). NGC ID# 2725, PCGS# 7316

1889 Morgan Dollar, PR65 Cameo
Strong Field-Device Contrast

3128 1889 PR65 Cameo PCGS. The design elements of this delightful Gem display razor-sharp definition in all areas and the rich mint frost of the devices contrasts boldly with the deeply mirrored fields to produce a startling black-on-white flash when the coin is tilted in the light. Population: 16 in 65 (1 in 65+) Cameo, 15 finer (5/19). Ex: National Money Show Signature (Heritage, 2-3/2014), lot 4061. NGC ID# 272J, PCGS# 87324

1892 Silver Dollar, PR67 Cameo
Delicate Border Toning

- 3129 1892 PR67 Cameo NGC.** The proof 1892 Morgan dollar's high mintage of 1,245 pieces is attributable to the introduction of the new Barber designs on the lesser silver denominations. Morgan dollars were included in the silver proof sets of that year, which were produced in uncommonly high numbers due to the introductory novelty of Barber's dime, quarter, and half dollar designs (a collector interest that quickly waned). The proof dollar of this date is readily available if condition does not matter, but Superb Gem Cameos are rarely offered. This piece displays stark contrast and champagne-tinted interiors. Deeper lavender-gold toning surrounds the borders. In keeping with the reputation of the issue, moderate central strike weakness is visible on each side. Census: 17 in 67 Cameo (3 in 67★), 4 finer (5/19). NGC ID# 27ZM, PCGS# 87327

1904 Dollar, PR66
650 Proofs Minted

- 3130 1904 PR66 PCGS.** Dusky golden patina and specks of deeper toning provide color to the flashy, minimally contrasted surfaces of this Premium Gem dollar. The absence of contact befits the high grade. This was the final publicly available proof mintage in the Morgan dollar series, with only 650 pieces struck. Population: 39 in 66 (4 in 66+), 9 finer (6/19). NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

1921 High Relief Peace Dollar, MS66
Registry Set Quality, Luminous Type Coin

- 3131 1921 MS66 PCGS.** Ex: California. The High Relief Peace dollar of 1921 is seldom found in Premium Gem condition, and finer pieces are rare — far out of reach for most collectors even if one could be located. This MS66 coin is satiny and luminous with golden toning. The preservation is spectacular, complementing slightly above-average central sharpness. Minor weakness is still evident at Liberty's cheek bone and at the top of the eagle's leg, which is virtually unavoidable on the circulation strike issue of this type. PCGS# 7356

1925-S Dollar, MS65
Nearly Unknown Finer

- 3132 1925-S MS65 NGC.** Gem condition is the highest available grade level for the 1925-S Peace dollar. A single coin is grade higher, housed in an NGC holder. A thin, dusky golden skin covers otherwise brilliant, frosty surfaces that show the normal amount of softness on IN GOD WE TRUST and the eagle's plumage. The fields are clean, with minor chatter at the lower left obverse. Census: 74 in 65 (2 in 65+), 1 finer (6/19). NGC ID# 257M, PCGS# 7366

1927-S Peace Dollar, MS65
Only One Coin Finer at NGC

- 3133 1927-S MS65 NGC.** A mintage of 866,000 pieces cements the 1927-S as a better date in high grade. Only the 1927 and 1928 Philadelphia issues have lower production totals. In MS65, the 1927-S is scarce, and it is essentially uncollectible finer, with only three such coins reported by NGC and PCGS combined. This Gem displays a bold strike and satiny mint luster. The interiors are brilliant, surrounded by a dusting of lavender, blue, gold, and russet-green toning. Census: 77 in 65 (1 in 65+), 1 finer (5/19). NGC ID# 26J6, PCGS# 7372

1934-S Dollar, MS64+
CAC-Approved, Scarce So Fine

- 3134** 1934-S MS64+ PCGS. CAC. The average certified grade for the famously challenging 1934-S Peace dollar falls shy of AU50. This high-end MS64+ with CAC approval is on the cusp of joining rarified company. The frosted surfaces are mostly brilliant and show daubs of pale crimson and gold color that serve to confirm the originality. Two ticks, one in the right field of each side, barely limit the grade. Well-struck. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, Bright MS65+
Undisputed Key to the Series

- 3135** 1934-S MS65+ PCGS. Just over a million 1934-S dollars were produced, and most were released into circulation shortly after striking. This accounts for the rarity of the '34-S in Uncirculated grades, but at the time of production and in the 10-15 years after it was not considered an especially challenging Peace dollar. Once collectors (and dealers) began to focus on Uncirculated coins this issue's scarcity quickly became apparent. This is a remarkably bright and lustrous example that shows no toning or obvious abrasions. There are a few faint "milk spots" on the obverse, a common occurrence on Peace dollars. NGC ID# 257Z, PCGS# 7377

GOLD DOLLARS

1850-D Gold Dollar, AU58
Underrated Branch Mint Issue

- 3136** 1850-D AU58 PCGS. CAC. Variety 2-C. From a mintage of 8,382 pieces, the 1850-D gold dollar is an elusive, underrated branch mint issue in all grades. This attractive near-Mint specimen exhibits a sharper than average strike, with just a trace of wear on the high points of the design elements. The pleasing orange-gold surfaces are lustrous and lightly abraded. Population: 16 in 58, 11 finer. CAC: 1 in 58, 2 finer (6/19). NGC ID# 25BH, PCGS# 7511

1852-C Gold Dollar, MS63
The Usual Variety

- 3137** 1852-C MS63 NGC. Variety 2. The base of the 1 in the date is doubled, apparently as always on the 1852-C gold dollars. This nicely detailed, fully brilliant light yellow gold example has excellent eye appeal despite trivial obverse and reverse marks. Census: 12 in 63, 16 finer (6/19). NGC ID# 25BR, PCGS# 7518

1852-C Gold Dollar, MS64
Low Mintage, Clean Fields
Popular North Carolina Issue

3138 1852-C MS64 NGC. Variety 2. The base of the 1 in the date is repunched. The Charlotte Mint reduced its gold dollar output from more than 41,000 coins in 1851 to 9,434 pieces in 1852. In fact, production was cut across all facilities, with the 1852 *Annual Mint Director's Report* explaining, "The demand for them [gold dollars] is very moderate compared with that for the larger coins." Doug Winter estimates 20 to 30 1852-C gold dollars survive in all Uncirculated grades. He notes that examples are "surprisingly difficult to locate with clean fields."

Liberty's portrait and the stars are uniformly sharp on this near-Gem. The dentils from 5 to 11 o'clock on that side are indistinct. The reverse is generally crisp with a touch of incompleteness on LA in DOLLAR and on the date. Warm honey-gold surfaces are softly frosted. The only mark of note is a thin abrasion on Liberty's cheek. Census: 10 in 64 (1 in 64+), 6 finer (5/19). NGC ID# 25BR, PCGS# 7518

1855 Gold Dollar, MS62
Collectible Type Two Coin

3139 1855 Type 2 MS64 NGC. Ex: Freedom Collection. In 1854, the gold dollar was reduced in thickness and enlarged in diameter to make the coin more manageable in circulation. James Longacre adapted his three dollar gold design in creating a slightly broader and thinner coin. The Type Two gold dollar features Liberty wearing a headdress rather than a coronet, as on the Type One; and Liberty is encircled by the legend UNITED STATES OF AMERICA, rather than thirteen peripheral stars. This near-Gem example is highly lustrous and features pleasing shades of peach and honey-gold. Both sides show prominent die clashing, which is not unusual, but the coin's details are sharper than average for the issue, especially on DOLLAR and the date.

Ex: FUN Signature (Heritage, 1/2007), lot 3354, which realized \$13,800. NGC ID# 25C4, PCGS# 7532

1860 Gold Dollar, Glittering Gem
One Finer Example at NGC

3140 1860 MS65 NGC. The number of gold dollars coined in previous years vastly outpaced demand, resulting in a large accumulation in the vaults of the New York Treasury office. According to the 1860 *Annual Mint Director's Report*, "the system of banking adopted in most states tends to exclude small gold coins from circulation." Only 36,668 gold dollars were struck in 1860. Examples are collectible through MS64, but comparable Gems are much rarer. This strongly detailed example enjoys glittering luster over peach-gold surfaces. Minor marks occur in the fields. Census: 6 in 65, 1 finer (5/19). NGC ID# 25CR, PCGS# 7555

1865 Gold Dollar, Reflective MS64+
Sole CAC Coin for the Grade

- 3141** 1865 MS64+ PCGS. CAC. A paltry mintage of 3,700 coins ensures the overall scarcity of this gold dollar issue, and in Mint State it is a rarity. Uncirculated examples are scattered across the grade spectrum, with MS64 as a median level. This piece, however, stands out from its peers with a Plus designation — the only Choice example so graded at PCGS. It is also the only near-Gem with CAC endorsement. The coin is fully struck from clashed dies with rich peach-orange patina. Die polish lines are evident in the fields, but both sides nonetheless exhibit prooflike reflectivity. Population: 6 in 64 (1 in 64+), 19 finer. CAC: 1 in 64, 8 finer (5/19). NGC ID# 25CZ, PCGS# 7564

1880 Gold Dollar, Exceptional MS68

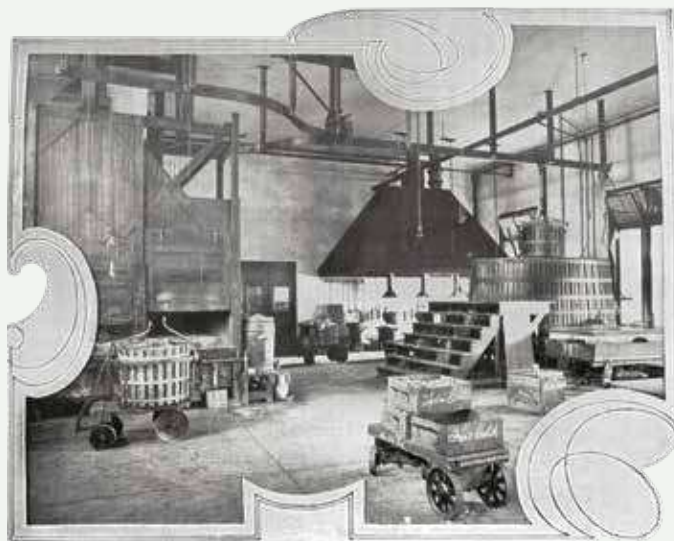

- 3142** 1880 MS68 NGC. The wheat-gold surfaces brim with bright mint luster on this Superb Gem late-date gold dollar. The 1880 issue was made in the tiny amount of 1,600 circulation strikes and 36 proofs, and today the average for Mint State certified pieces is only at the Gem or MS65 level. The central devices are uniformly clean and distraction-free on this exceptional and well-struck coin. Census: 24 in 68 (3 in 68★), 1 finer (5/19). Ex: Central States Signature (Heritage, 4/2015), lot 6043. NGC ID# 25DJ, PCGS# 7581

PROOF GOLD DOLLAR

1885 Gold Dollar, PR65
Excellent Eye Appeal

- 3143** 1885 PR65 PCGS. CAC. JD-1. Fully struck and flashy with attractive olive-gold and peach toning. Although Mint records indicate 1,105 proofs were delivered, most were purchased by jewelers who converted them to love tokens or other adornments. Jewelers selected proofs since gold dollars generally did not circulate after 1862. John Dannreuther estimates an equal number of proofs are extant from each die pair of the 1885 gold dollar, i.e., 200 to 300 pieces total. High grade proofs are rare. Housed in a green label holder. Population: 12 in 65, 16 finer. CAC: 1 in 65, 3 finer (5/19). Ex: Summer FUN Signature (Heritage, 7/2015), lot 3264. NGC ID# 25EV, PCGS# 7635

EARLY QUARTER EAGLES

1804 BD-2 Quarter Eagle, AU55
14 Stars Reverse

- 3144** 1804 14 Stars Reverse, BD-2, R.4, AU55 NGC. Bass-Dannreuther Die State a/a with no die cracks, lapping, or clash marks evident on either side. The obverse was used for both 1804 quarter eagle varieties, while the reverse was used nowhere else in the series. This is the only quarter eagle variety with 14 stars on the reverse. A small oblong mark in the left obverse field will help to establish a past provenance for this Choice AU quarter eagle that exhibits faint peripheral adjustment marks on the obverse, and small scrapes from the reverse border at 6:30 and 8 o'clock. This is a pleasing, light yellow-gold example of the BD-2 variety, popular and in-demand for its oddly arranged, cross-pattern 14 Stars reverse. NGC ID# BFVT, PCGS# 45510 Base PCGS# 7652

1804 Quarter Eagle, AU58
BD-2, 14 Stars Reverse

- 3145** 1804 14 Stars Reverse, BD-2, R.4, AU58 NGC. Bass-Dannreuther Die State a/a. This is the usual variety encountered among 1804 quarter eagles. The other variety with 13 reverse stars is an important rarity among these early gold coins. The 1804 14 Stars reverse is one of seven dual-denomination dies that were used for both dimes and quarter eagles. Those seven dual-denomination dies were used to coin 12 early dime varieties and 11 quarter eagle varieties. In this particular case, the reverse was also used to produced 1804 JR-2 dimes, while the obverse was used for both 1804 quarter eagle varieties. This near-Mint representative has brilliant lemon-yellow surfaces (with a faint greenish tone) and nearly full mint luster. Census: 22 in 58 (1 in 58+), 11 finer (6/19). NGC ID# BFVT, PCGS# 45510 Base PCGS# 7652

CLASSIC QUARTER EAGLES

1834 Two and a Half, MS63
Scarce Variety 3

- 3146** 1834 MS63 PCGS. Large Head, Breen-6140, Variety 3, R.4. Variety 3 is undoubtedly scarcest among the four 1834 Classic quarter eagle marriages. The pick-up point is the T in UNITED, entered lower than surrounding letters. We know of only four other AU or finer examples of the variety that have appeared in a Heritage auction within the past five years. The present lot is graded higher than any of those four pieces, and is likely among the finest Variety 3 examples. It is a prooflike sun-gold piece with attractive surfaces and moderate incompleteness of strike at the centers. NGC ID# 25FS, PCGS# 7692

1839-D Classic Head Two and a Half
Olive-Gold AU55

- 3147** 1839-D AU55 NGC. Winter 1-B, Variety 25, R.4. The Dahlonega Mint began striking quarter eagles in 1839, one year before the design change to Christian Gobrecht's Liberty Head. The 1839-D Classic Head issue is a one-year type coin. This Choice AU example displays uniform olive-gold patina and has little wear, although moderate strike weakness is evident in the centers. Census: 22 in 55, 31 finer (5/19). NGC ID# 4UKS, PCGS# 7700

LIBERTY QUARTER EAGLES

1843-C Two and a Half, MS62
Large Date, Plain 4

- 3148** 1843-C Large Date, Plain 4, MS62 PCGS. Variety 1. A splendid Charlotte quarter eagle. The surfaces are peach-gold aside from a blush of powder-blue on the central reverse. The fields exhibit semiprooflike flash and are surprisingly free from contact. A small strike-through between stars 12 and 13 is strictly of mint origin. Peripheral elements are well struck, though the centers show incompleteness usual for the North Carolina facility. As always for the Large Date 1843-C, the 18 is lightly repunched, as is the left curve of the mintmark. The Large Date is available relative to the rare Small Date '43-C variety, but becomes very rare in the present quality. Population: 4 in 62, 4 finer (6/19). NGC ID# 7HLG, PCGS# 7728

1855-C Two and a Half, AU58
Challenging in All Grades

- 3149 1855-C AU58 NGC. Variety 1.** The 1855-C is the lowest-mintage Charlotte quarter eagle after the 1843-C Small Date, boasting a production total of just 3,677 coins. Doug Winter estimates that only 85 to 105 coins are extant in all grades. This near-Mint example displays almost no perceivable wear, although slight strike weakness is evident on the eagle's legs and talons, and on the hair curls around Liberty's face. Several stars are also incomplete. This satiny wheat-gold representative is slightly lustrous in the fields and has none of the often-seen heavy abrasions that are synonymous with Charlotte gold coins. Census: 18 in 58 (1 in 58+), 14 finer (6/19). NGC ID# 25J5, PCGS# 7775

1857-D Two and a Half, AU58
Better Dahlonga Issue

- 3150 1857-D AU58 NGC. Variety 21-N.** A scant mintage of 2,364 coins earns the 1857-D quarter eagle a certain degree of scarcity, and among Dahlonga issues it is decidedly rare in Mint State. The near-Mint coin offered here is a more accessible alternative for the series collector. Both sides show a bold strike with light high-point wear. The fields are satiny and lustrous. Original lemon-gold and prairie hues adorn each side, producing strong eye appeal. Census: 24 in 58, 19 finer (5/19).
From The Allen Moretti Swiss Collection. NGC ID# 25JD, PCGS# 7783

1888 Quarter Eagle, MS66
None Numerically Finer at PCGS

- 3151 1888 MS66 PCGS.** Surface preservation is exceptional. This glittering peach-gold Premium Gem is void of all but the tiniest ticks, unseen without magnification. The stars, dentils, and legends are crisp, while Liberty's centermost curls and the eagle's leg feathers display slight incompleteness. A couple of alloy spots appear mainly on the reverse, including one on the right (facing) wing. Population: 10 in 66 (2 in 66+), 0 finer (6/19). NGC ID# 25LC, PCGS# 7840

PROOF LIBERTY QUARTER EAGLES

1878 Quarter Eagle, PR62 Cameo
12 to 14 Pieces Extant in All Grades
Major Proof Gold Rarity

- 3152 1878 PR62 Cameo PCGS. CAC. JD-2, Low R.7.** The recorded mintage of 20 proof quarter eagles was accomplished on February 8 or 9, 1878. One obverse and two reverses were used, suggesting a possible unrecorded second striking period. It may be that more than 20 pieces were produced, but will likely never know with certainty. JD-1 features a lump on the rim above IT in UNITED, while JD-2 has no such lump. David Akers has called the 1878 proof quarter eagle the rarest in the series post-1859. John Dannreuther adds: "This is another date that sounds common, but is extremely rare. ... It is rarer than the more highly regarded Proof-only 1863 quarter eagle or the 1875 with its low circulation strike output." About 12 to 14 pieces probably survive. PCGS records one PR64, one PR62 Cameo (the present coin), two PR64 Deep Cameo, and two PR65 Deep Cameo submissions (5/19). Orange-gold surfaces display profound mirroring in the fields and well-frosted devices, with the total effect resulting eye-catching Cameo contrast. Wispy hairlines are undistracting; eye appeal remains excellent. PCGS# 87904

1889 Two and a Half, PR64 Cameo
Scarce, Low-Mintage Proof Date

- 3153** 1889 PR64 Cameo PCGS. The mintage of 1889 proof quarter eagles dropped by almost half from the previous year, and the number of survivors is line with this decreased production. Only 20 to 25 pieces are believed known today. This is a deeply reflective proof with rim-to-rim mirroring on each side. Some faint haziness surrounds the sharply detailed, frosty design elements, slightly reducing the field/device contrast. The less-than-Gem grade is derived from a few tiny contact marks in the left obverse field. Even, light reddish-gold color is seen throughout. Population: 7 in 64 Cameo, 5 finer (5/19). NGC ID# 288C, PCGS# 87915

1894 Quarter Eagle, PR67 Deep Cameo
60 to 80 Proofs Extant
None Finer at PCGS

- 3154** 1894 PR67 Deep Cameo PCGS. JD-1, Low R.5. Of the 122 proof quarter eagles struck in 1894, likely only 60 to 80 coins survive in all grades, according to PCGS and John Dannreuther's estimates. The combined PCGS and NGC certified population of 122 submissions is inflated by duplications. To be sure, Superb Gems with Deep or Ultra Cameo contrast represent the very highest quality coins the Mint was capable of producing during the late 19th century, and they are conditionally rare. This piece is fully struck and starkly contrasted with bright yellow-gold surfaces. The preservation is exceptional, producing outstanding eye appeal. Population: 4 in 67 Deep Cameo, 0 finer (6/19). NGC ID# 288H, PCGS# 97920

1903 Liberty Quarter Eagle, PR63+
Brightly Mirrored Surfaces

- 3155** 1903 PR63+ PCGS. CAC. The 1903 proof quarter eagle had a mintage of 197 pieces, and the most recent estimate of the number of survivors (done by John Dannreuther) suggests that 80 to 100 pieces may exist of the JD-1 variety, and 40 to 60 examples may survive of the JD-2 variant. This piece was struck from the JD-1, State a dies. The surfaces are bright throughout, the only variation in color being a faint copper stain between stars 2 and 3. Close examination with a loupe shows a few stray hairlines, but these do not appear to have come from an intentional cleaning. As such, this moderately contrasted proof represents excellent value at this grade level. NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS63
Attractive Color, Strong Strike

- 3156** 1911-D MS63 NGC. A deep reddish-gold hue paints this well-preserved Denver key date. The affect is appealing and enhanced by the satiny mint luster that radiates from each side. Strong detail appears on the headdress and eagle, and the mintmark is fully raised. Trivial hairlines explain the grade, which seems conservative given the pleasing color and bold strike. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS64
Pinpoint-Sharp Impression

- 3157** 1911-D MS64 NGC. Although the feature is unmentioned on the NGC insert, the D mintmark is razor-sharp on this impeccable 1911-D quarter eagle. Like the mintmark, the Indian's headdress and the eagle's feathers and talons display a pinpoint impression. The raised fin of metal around the upper-right obverse rim is characteristic of authentic examples of this famous key date. Radiant satin mint luster glimmers across warm honey-gold surfaces that lack any singular flaws. From a mintage of 55,680 pieces and with few examples finer, this near-Gem would be a challenge to upgrade. NGC ID# 7KR7, PCGS# 7943

1914-D Indian Quarter Eagle, MS65+
Only One Finer Certified

- 3158 1914-D MS65+ NGC.** The 1914-D Indian quarter eagle claims a mintage of 448,000 pieces and the issue is not difficult to locate in lower Mint State grades, but it is the leading condition rarity of the series in grades above the MS65 level. The 1914-D was not a well-produced issue, and is frequently seen with a soft strike and excessive die buckling. This Plus-graded Gem exhibits unusually sharp definition on all design elements, but evidence of die buckling shows on both sides, leaving a “creased” mintmark on the reverse. The well-preserved copper-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Only one finer coin appears in the population data from either of the leading grading services. Census: 48 in 65 (2 in 65+), 1 finer (6/19). NGC ID# 2899, PCGS# 7947

PROOF INDIAN QUARTER EAGLES

1909 Quarter Eagle, PR64
Rarest Indian Proof in High Grade

- 3159 1909 PR64 PCGS.** The matte proof finish proved unpopular with collectors in 1908, so the Philadelphia Mint abandoned it in 1909. Instead, proofs were struck on the medal press using carefully selected planchets with no sandblasted surface treatment. Aside from the superior striking characteristics, the proofs were virtually identical to the business-strikes in appearance. A nominal mintage of 139 proof quarter eagles was produced in 1909, but the new coins were no more popular than their matte proof counterparts of the previous year. An unknown number of 1909 proofs went unsold and were simply released into circulation at the end of the year. Wear soon made them indistinguishable from the regular-issue coins of that date. Today, the 1909 proof quarter eagle is the most elusive proof of the series in high grade.

The present coin is an attractive Choice specimen, with razor-sharp definition on all design elements. The well-preserved, fine-grained orange-gold surfaces radiate satiny mint luster from both sides, with outstanding eye appeal. Population: 27 in 64, 4 finer (6/19). NGC ID# 289H, PCGS# 7958

1909 Quarter Eagle, PR64
Only 50-60 Pieces Believed Extant

- 3160** 1909 PR64 PCGS. CAC. After a frustrating first-year offering of matte proof gold in 1908, the Mint altered the finish in 1909 and 1910. Roger Burdette states that proof gold from these years received no special surface treatment, just striking from the medal press. At the time they were produced these coins were called "bright proofs," certainly a more descriptive term than the enigmatic "Roman Finish." This is an early die state for the 1909 proof quarter eagle, lacking any trace of the die crack seen on later strikes through BERT in LIBERTY on the obverse. The surfaces are bright, even yellow-gold. Close examination reveals a few shallow marks that explain the grade. Population: 27 in 64, 4 finer. CAC: 5 in 64, 1 finer (5/19). NGC ID# 289H, PCGS# 7958

THREE DOLLAR GOLD PIECES

1855 Three Dollar Gold, MS64
Condition Rarity in Finer Grades

- 3161** 1855 MS64 PCGS. Despite a relatively generous mintage of 50,555 pieces, the 1855 three dollar gold piece is an elusive issue in MS64 condition and finer pieces are condition rarities. This attractive Choice specimen exhibits well-detailed design elements, with a touch of the usual softness on the ribbon knot. The lightly marked orange-gold surfaces are lustrous and appealing. Population: 36 in 64 (5 in 64+), 5 finer (6/19). NGC ID# 25M6, PCGS# 7972

1857-S Three Dollar With Pinch, MS61
Ex: S.S. Central America
Rare Mint State Survivor

- 3162** 1857-S S.S. Central America #2 (with Pinch) MS61 PCGS. Ex: S.S. Central America. Although recoveries from the S.S. Central America more than doubled the number of Mint State 1857-S threes known, just 11 pieces are currently shown in Uncirculated grades by PCGS and NGC combined. This MS61 coin is one of eight Mint State pieces certified by PCGS (6/19). Just 14,200 pieces were struck, nearly all of which were released into circulation and used extensively in West Coast trade.

This yellow-gold example retains most of its original semireflective surface on the obverse, while the reverse is lightly frosted across its smooth fields. Both sides show light, hair-thin abrasions and a few tiny marks. A sharp strike weakens only at the highest points of Liberty's curls, and bright mint luster shines throughout the obverse and reverse. A pinch of gold dust recovered from the shipwreck occupies one of the dual holder windows, while the back of the holder has the signature of chief scientist and historian of the shipwreck treasure, Bob Evans, confirming recovery of the gold dust and coin from the S.S. Central America. Its box of issue is included. PCGS# 670757 Base PCGS# 7977

1864 Three Dollar Gold, Scarce MS61

- 3163 1864 MS61 PCGS.** The date is repunched at 18, confirming the circulation strike format of this scarce Mint State 1864 three dollar gold. Just 2,630 coins were struck for circulation, although few gold or silver coins of any denomination circulated at all during the Civil War. Sharply struck throughout both sides without any sign of die clashing, with slight reflectivity in the fields. Small marks and abrasions limit the Uncirculated grade. David Bowers estimated the number of Mint State survivors at 35 to 45 pieces, although grading events at both services combined are nearly double that number. Population: 5 in 61, 37 finer (5/19). NGC ID# 7HSK, PCGS# 7985

1883 Three Dollar Gold, MS63

- 3164 1883 MS63 NGC.** The 1883 three dollar gold piece is among the lowest-mintage issues in a series famous for tiny production figures; in the case of the 1883, only 900 business strikes were produced. It appears that astute dealers and numismatists nonetheless set aside a percentage of those late-series issues, else they might be uncollectibly rare today. This Select Mint State specimen shows a single straight planchet depression on the cheek that determines the grade, as elsewhere it is appealing and free of mentionable abrasions. Golden-orange centers yield to deeper hues at the device margins, and the strike is bold overall, despite minor weakness on some of the hair curls on the obverse. Census: 11 in 63 (1 in 63+), 21 finer (5/19).
Ex: Long Beach Signature (Heritage, 2/2012), lot 4740, realized \$9,775. NGC ID# 25N6, PCGS# 8005

1888 Three Dollar Gold, MS64+
Elusive CAC-Endorsed Example

- 3165 1888 MS64+ PCGS. CAC.** A mintage of only 5,000 pieces makes the 1888 three dollar gold piece popular with collectors, although it is more plentiful than that mintage would suggest since it was well-saved at the time of issue. Nonetheless, it is challenging to locate CAC-approved coins. This Plus-graded piece displays impressively sharp detail and smooth honey-gold mint luster. Only some faint hairlines on Liberty's cheek prevent Gem classification. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

1803/2 BD-1 Half Eagle, MS63
Exceptional Surface Preservation
Terminal Reverse Die State

- 3166 1803/2 BD-1, R.4, MS63 PCGS.** Bass-Dannreuther Die State c/e, terminal, with a rim cud above the UN in UNITED. Die cracks run through the TED, as well as down from the rim to the left of OF, toward the shield and olive branch. A bisecting crack runs from the rim below the arrows, through the I in PLURIBUS, toward the rim above the E in STATES. Soft, satiny mint luster yields no evidence of wear on this coin, and abrasions are limited. Rich peach and green-gold hues adorn each side. Sharpness spans the peripheral stars, and the central devices display equally strong definition. An exceptional example of this overdate issue, and a remarkably appealing type coin for the grade. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1804 Capped Bust Right Half Eagle, MS62
BD-7, Small 8 Over Large 8

3167 1804 Small Over Large 8, BD-7, R.4, MS62 NGC. Bass-Dannreuther Die State b/b. The Bass-Dannreuther reference calls BD-7 the “Normal 180 over Large 180” variety. This popular 1804 die marriage is one of the more dramatic overdates in the entire half eagle series, with spectacular repunching seen most clearly at the 8. Among Capped Bust Right half eagles, perhaps only the 1797/5 Large Eagle, 15 Stars (BD-7) rivals the Small Over Large 8 in terms of blatant overpunching at the date.

This lustrous, well-struck example displays satinlike surfaces glow brightly at the margins. The surfaces are wonderfully smooth and minimally abraded for the assigned grade, although some delicate hairlines exist when viewed under a loupe. Vibrant mint luster beams throughout both sides, with needle-sharp stars and nearly full definition on Liberty’s hair, cap, and drapery folds. Honey-gold color shows brief orange accents at the borders. Perhaps 100 to 150 BD-7 pieces survive in all grades. Census: 9 in 62, 10 finer (6/19). NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

1804 BD-7 Half Eagle, MS63
Small Over Large 8, Guide Book Variety

3168 1804 Small Over Large 8, BD-7, R.4, MS63 PCGS. CAC. Bass-Dannreuther Die State c/c. BD-7 is the most collectible of the three 1804 Small Over Large 8 half eagles (the variety is better described as Normal 8 over Large 8). The upright of the E in STATES is over the space between two clouds. The obverse is heavily clashed, and the reverse shows a crack from the eagle’s left (facing) wing through the ribbon to the D in UNITED. Dannreuther estimates 100 to 150 pieces extant, but only a small handful compare to this Select offering.

Lightly frosted olive-gold surfaces are inarguably natural. The devices show a strong overall impression with a few areas of localized softness. Heavy as-made adjustment marks occur above MERIC. Q. David Bowers wrote in 2011 that this coin “exemplifies high quality and nice eye appeal.” We wholeheartedly agree. Population (all Small Over Large 8 varieties): 4 in 63, 1 finer. CAC: 4 in 63, 1 finer (4/19).

Ex: *The Benson Collection, Part III* (Goldberg Auctions, 2/2003), lot 1998, unsold; *Brandywine Collection / Baltimore Auction* (Stack’s Bowers, 11/2011), lot 9449. NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

1806 Half Eagle, MS62
Knob 6, 7x6 Stars, BD-6
Lustrous Honey-Gold Type Coin

3169 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS62 PCGS. Bass-Dannreuther Die State e/f. This hardy die pair produced an estimated 35,000 to 50,000 of the 64,093 total half eagles in 1806. Identified by the distinctive Knob 6 in the date and 7x6 Star arrangement (all other 1806 variants feature a Pointed 6 and 8x5 Star pattern), about 600 to 900 pieces are believed extant, making this the most collectible variety for the year and one of the most popular early half eagles for type purposes. The dies were subject to frequent clashing and lapping, resulting in multiple die states. This is either the last or second-to last state, with a rust lump on the R in LIBERTY and clashing on each side.

The highest design points show a hint of strike softness, as do the second and third vertical shield bars, but this lustrous MS62 five dollar gold piece is generally well-defined. More impressive are the relatively smooth honey-gold surfaces that deliver lovely eye appeal for the grade. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Five Dollar, AU55
BD-8, Capped Bust Left

3170 1807 Bust Left, BD-8, R.2, AU55 NGC. Bass-Dannreuther Die State b/a. The obverse shows die clashing, but no cracks, paired with a perfect reverse. Attractive reddish-gold color visits both sides of this Capped Bust Left half eagle, with the feather tip pointing to the tip of 5 to confirm the BD-8 variety. Ideal for type, the BD-8 is ranks as the most-available of John Reich's new 1807 design. Lightly abraded, Choice About Uncirculated surfaces show sharp definition and plentiful remaining mint luster. We note a pair of shallow, hair-thin lines in the left obverse field, but no other marks of consequence for the grade. NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1808 Half Eagle, Bold MS61
Closed 5D, BD-3, Attractive Color

3171 1808 Close 5D, BD-3, R.4, MS61 PCGS. Bass-Dannreuther Die State b/e, extensively clashed on each side. BD-3 is one of two non-overdate varieties for the year. It shares an obverse with BD-4. The two reverses are differentiated by the spacing of the first A in AMERICA relative to the wing. It is wide on BD-3 and narrow on BD-5. This die also shows 5D relatively close with the D entirely under the fletching. Dannreuther believes that probably a few more than 100 examples of this 1808 die marriage still exist from a mintage in the range of 10,000 to 15,000 coins.

Orange and olive-gold color dominates this Uncirculated Draped Bust Left half eagle. Luster issues from the protected area, illuminating a multihued alloy spot at star 12 and deep reddish accents around AMERICA. Each side is needle-sharp with peppered abrasions. Adjustment marks occur at the upper obverse rim. NGC ID# 25PA, PCGS# 507604 Base PCGS# 8102

1809/8 Five Dollar, MS61
BD-1, Scarcest Date for the Type
About 300 Coins Survive

3172 1809/8 BD-1, High R.3, MS61 NGC. Bass-Dannreuther Die State a/b. The obverse die is in its earliest, uncracked state. The reverse was previously used to strike 1808 BD-4 half eagles and features light clashing around the eagle's wings and the scroll. BD-1 is the only die variety for the year. The reported mintage for 1809 was 33,875 pieces, but that total may have included back-dated coins. John Dannreuther suggests the actual production of 1809/8 five dollar gold pieces may have been as low as 20,000 coins. Regardless, about 250 to 325 examples survive, making this the scarcest date of this type, excluding rarer varieties from other years.

Bright wheat-gold surfaces maintain original mint luster around the legends and motifs. The stars, curls, and eagle show strong definition without a trace of friction. Small ticks and scattered hairlines account for the MS61 grade. NGC ID# BFXX, PCGS# 507603 Base PCGS# 8104

1810 BD-4 Half Eagle, MS60
Large Date, Large 5
Ideal for Type

3173 1810 Large Date, Large 5, BD-4, R.2, MS60 PCGS. Bass-Dannreuther Die State c/b. A vertical die crack extends between 81 up toward Liberty's clasp. John Dannreuther estimates the Large Date, Large 5 BD-4 die pair was used to strike between 75% to 90% of the 100,287 half eagles minted in 1810. Consequently, this variety represents one of the most collectible half eagles struck from 1795 to 1834 (Motto).

This Uncirculated Draped Bust Left type coin showcases bright yellow-gold surfaces and good design detail. Softness is virtually limited to the shield and adjacent feathers. Faint hairlines explain the grade. Housed in a green label holder. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 Capped Bust Left Half Eagle, AU58
Small 5, BD-2

3174 1811 Small 5, BD-2, R.3, AU58 NGC. Bass-Dannreuther Die State d/a. The Small 5 in the denomination identifies the BD-2 variety. This impressive near-Mint specimen offers well-detailed design elements and lightly abraded orange-gold surfaces that show some faint planchet adjustment marks on the reverse borders. Vibrant mint luster adds to the strong eye appeal. Census (for the variety): 5 in 58, 16 finer (5/19). NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1811 Half Eagle, MS64
Small 5, BD-2, None Finer

1812 BD-1 Half Eagle, MS62
Perfect Die State, Struck-Through Obverse

3175 1811 Small 5, BD-2, R.3, MS64 PCGS. Bass-Dannreuther Die State d/a, without clash marks on reverse. However, a faint crack between stars 9 and 10 suggest an intermediate die state. With only two varieties for the year, the 1811 BD-2, Small 5 half eagle is easily distinguished from its BD-1, Tall 5 counterpart, though both were struck from the same obverse die. According to John Dannreuther, about 225 to 300 examples of the 1811 Small 5 are known. None are graded higher than this lustrous near-Gem.

Brightly frosted yellow-gold surfaces showcase bold detail on the obverse and a softer strike on the reverse. Roller marks appear on that side, especially through TE in STATES and IBU in PLURIBUS. A few adjustment marks also occur around the rims, but none of these affect the grade or appeal. This early half eagle is a prize. Population (for the Small 5 variant): 22 in 64 (3 in 64+), 0 finer (6/19). NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

3176 1812 BD-1, R.3, MS62 NGC. Bass-Dannreuther Die State a/a, as usual with no discernible clash marks. However, this piece does have a large strike-through — possibly from a piece of cord — across Liberty's cheek and into the field left of the chin. Moderate strike weakness is also evident on the reverse shield and adjacent plumage. Aside from these attributes, this is a pleasing Mint State type coin with lustrous orange-gold surfaces and sharp peripheral stars. Some light field chatter is seen on each side, limiting the grade, but no singular abrasions distract from the eye appeal. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

**1814/3 Capped Head Left Half Eagle, AU55
BD-1, Only Dies for the Date**

- 3177 1814/3 BD-1, High R.4, AU55 PCGS.** Bass-Dannreuther Die State b/c, with a hairline crack from between 1 and 4 in the date to star 13. A small mintage of 15,454 Capped Head Left half eagles was accomplished in 1814, using an overdated obverse die leftover from the previous year. A single die variety is known for the date, with a surviving population of 80-100 specimens in all grades.

The present coin is an impressive Choice AU specimen, with well-detailed design elements that show incomplete definition on the eagle's feathers and some star centers. Only a trace of actual wear is evident. The vivid antique-gold surfaces are lightly abraded and retain much original mint luster intact. The overall presentation is most attractive and this early overdate is always popular with collectors. NGC ID# BFXT, PCGS# 519908 Base PCGS# 8117

LIBERTY HALF EAGLES

**1847-C Half Eagle, Sharp MS60
A Rarity in Uncirculated Grades**

- 3178 1847-C MS60 NGC. Variety 1.** Although readily available in circulated grades, the 1847-C is seldom seen in any Uncirculated condition. Doug Winter notes: "It becomes very scarce in properly graded AU58 and is both very rare and undervalued in full Mint State." This sharply struck, frosted example is CAC endorsed with natural deep, green-gold color and glowing mint luster beneath the toning. A loupe reveals microscopic abrasions and tiny ticks, but no significant marks. This coin displays great, original eye appeal. Census: 6 in 60, 7 finer. CAC: 1 in 60, 0 finer (6/19). NGC ID# 25TN, PCGS# 8233

**1853 Five Dollar, MS63+
Seldom Available at This Level**

- 3179 1853 MS63+ PCGS.** The 1853 is available in absolute terms, but Select Uncirculated survivors are scarce and only a handful of coins qualify for higher grade levels. This No Motto half eagle enjoys frosty peach-gold surfaces. The stars exhibit crisp detail, while softness occurs on the forecurls, fletchings, and right talon. Peppered ticks are consistent with the grade. Population: 12 in 63 (1 in 63+), 4 finer (6/19). NGC ID# 25UD, PCGS# 8253

**1855 Five Dollar, Crisp MS63+
Underrated Philadelphia Issue**

- 3180 1855 MS63+ PCGS. CAC.** Considering the rarity of the 1855 half eagle in this high grade and the infrequency with which similarly well-preserved examples are made available, this issue is clearly underrated. This coin is gorgeous for the grade. It features a crisp strike, bright mint frost, and smooth peach-gold surfaces, including the fields and cheek. Natural grease spots occur under the hair bun. Population: 4 in 63 (1 in 63+), 5 finer. CAC: 1 in 63, 2 finer (4/19). NGC ID# 42AP, PCGS# 8261

1857-S Five Dollar With Pinch, AU58
Ex: S.S. Central America

- 3181 1857-S S.S. Central America #2 (with Pinch), Bob Evans Signature, AU58 PCGS.** Ex: S.S. Central America. While the S.S. Central America shipwreck yielded thousands of double eagles, some lesser gold denominations were recovered, too. A second batch of coins was brought up in 2014 — including about 3,100 gold coins in total — in a variety of denominations, as well as gold bars, territorial gold coins, and gold dust. This near-Mint 1857-S half eagle was among those coins, now housed in a dual-chambered PCGS holder that accommodates the coin as well as a “pinch” of gold dust. The coin displays pleasingly frosted, medium-gold surfaces, with minor field chatter and a touch of high-point wear. The back of the holder has the signature of chief scientist and historian of the shipwreck treasure, Bob Evans, confirming recovery of the gold dust and coin from the S.S. Central America. Its box of issue is included. PCGS# 670803 Base PCGS# 8275

1858-S Five Dollar, AU55
Underrated Date, Few Finer

- 3182 1858-S AU55 NGC.** All Federal gold coin was in demand throughout West Coast commerce upon opening of the San Francisco Mint in 1854. The half eagle amounted to “small change” in a red-hot economy that preferred double eagles. Except for 1856 and 1857, S-mint fives were struck in small quantity and circulated to attrition. Few (if any) pieces were numismatically saved. The 1858-S had a mintage of just 18,600 pieces, and only two Mint State survivors are known today. The balance of 100 or so pieces that exist show some level of circulation. This Choice About Uncirculated example displays apricot-gold color and some deep-gray accents, with areas of microgranularity and myriad tiny marks. It retains its sharp strike and subtle mint luster at the margins. Census: 11 in 55, 11 finer (5/19). NGC ID# CLAM, PCGS# 8279

1877-CC Five Dollar, Choice XF
Elusive Carson City Issue

- 3183 1877-CC XF45 PCGS. Variety 1-B.** The Carson City Mint struck 8,680 half eagles in 1877, and these circulated extensively in the Nevada territory. Mint State survivors are prohibitively rare. This collectible XF45 coin is scarce. Each side displays bold detail and satiny bronze-gold patina. A few minor marks on the portrait are not distracting. Population: 20 in 45, 30 finer (5/19). NGC ID# BT9Z, PCGS# 8343

1877-S Five Dollar, MS60
Mint State Rarity

- 3184 1877-S MS60 PCGS.** A run of low-mintage half eagles from the San Francisco Mint ended in 1877, with just 26,700 pieces minted. The 1878 mintage of S-Mint half eagles increased nearly six-fold. Even so, the 1877 P-mint and CC-mint counterparts saw even smaller mintages, and as a result the 1877-S five is underrated through all grades. Mint State survivors of all three Mints are rare both conditionally and in an absolute sense. This MS60 example offers shining yellow-gold surfaces and crisp detail. A total of just four Mint State examples are reported by PCGS, while NGC lists only a single piece in Uncirculated condition. Population: 1 in 60, 3 finer (5/19).
 Ex: Long Beach Signature (Heritage, 2/2016), lot 3385. NGC ID# 25X3, PCGS# 8344

1891 Half Eagle, MS64+
Finest Example at PCGS

- 3185** 1891 MS64+ PCGS. CAC. This Philadelphia issue is significantly scarcer in Mint State than its Carson City cousin. None are graded higher than Choice Uncirculated at PCGS, and this is the only coin at that level with a Plus designation. Registry collectors should bid accordingly. Bright mint frost, peach-gold color, and strong motifs appear on each side. Light clashing occurs in the fields, and abrasions are minimal. Population: 21 in 64 (1 in 64+), 0 finer. CAC: 1 in 64, 1 finer (6/19). NGC ID# 25Y4, PCGS# 8377

1903-S Half Eagle, MS66+
One Coin Finer at PCGS

- 3186** 1903-S MS66+ PCGS. CAC. With a mintage exceeding 1.8 million coins, the 1903-S is readily available through Gem condition. It becomes scarce in MS66, rare in this high-end state with CAC approval, and practically uncollectible any finer. Gleaming surfaces showcase complete central detail and rich yellow-gold color. Mint frost swirls uninhibited over each side. Population: 36 in 66 (12 in 66+), 1 finer. CAC: 9 in 66, 0 finer (4/19). NGC ID# 25Z3, PCGS# 8408

INDIAN HALF EAGLES

1908-S Indian Head Five, MS64
Rare CAC-Approved Example

- 3187** 1908-S MS64 PCGS. CAC. From a mintage of only 82,000 coins, the 1908-S half eagle is a semikey date in high grades. Choice and finer examples are scarce, and such coins are rare with CAC labels. This is the lowest-mintage of the three first-year Indian Head issues. The current coin displays luminous peach-gold mint luster and exceptionally smooth fields. The devices are sharply struck and the coin produces splendid eye appeal. Mike Fuljenz writes of this issue: "The luster is excellent and it certainly ranks as one of the best San Francisco issues of this type." Indeed, this example is highly appealing. NGC ID# 65K3, PCGS# 8512

1909-O Indian Head Five, AU50
One-Year New Orleans Type

- 3188** 1909-O AU50 NGC. The aging New Orleans Mint had barely started striking its first Indian Head half eagles before it received word that the government suspended mintage operations at the facility. Just 34,200 pieces were struck. This example circulated to some extent, with smoothly worn orange-gold surfaces and deep-russet toning that outline the sunken devices. The O mintmark is weak but visible, and scattered tiny marks are minimized by wear. A key issue in the Indian gold set, always in demand. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58
Final Issue from the New Orleans Mint

3189 1909-O AU58 NGC. Variety 1. The 1909-O is one of two undisputed keys to the series, ranking just behind the 1929 in terms of overall rarity. A low mintage of 34,200 coins contributes to that status. Even more important is the issue's claim to being the only New Orleans half eagle in the series and the final product from the storied Southern branch mint.

This AU58 representative offers a much stronger strike than what is typically seen, with bold feather detail on the headdress and eagle. Olive and orange-gold surfaces exhibit minimal evidence of friction. A few prominent reeding marks appear on the cheek and in the left obverse field. The mintmark is clear, if not strong. NGC ID# 25ZK, PCGS# 8515

1911 Half Eagle, MS65+
Rivals the Three Finer Survivors

3190 1911 MS65+ PCGS. The 1911 is plentiful in most grades and only becomes challenging in near-Gem condition. Like a majority of other dates in the Pratt half eagle series, however, survivors in MS65 are genuinely difficult to obtain. The raised fields were prone to grade-limiting ticks, explaining the dearth of high-grade examples available to discerning collectors.

This coin is a remarkable exception, rivaling the finest certified examples. Frosty luster rolls over medium yellow-gold surfaces that show only small ticks and superficial grazes. They are confined mainly to the upper-right reverse field. Well-struck. Population: 72 in 65 (4 in 65+), 2 finer (6/19). NGC ID# 28DP, PCGS# 8520

1916-S Indian Half Eagle, MS64
Rarely Seen Finer

3191 1916-S MS64 PCGS. The San Francisco Mint was alone in striking 240,000 half eagles in 1916 — the denomination's final year of issue before its swan song in 1929. Those coins were struck at the Philadelphia Mint, though, and are generally uncollectible. This wheat-gold near-Gem is well-defined at the centers. Slight buckling around the rims softens peripheral detail somewhat. Mint luster is rich and frosty. PCGS has graded 15 finer submissions (5/19). NGC ID# 28DY, PCGS# 8532

1929 Indian Half Eagle
Elusive Final Issue

3192 1929 — Cleaned — ANACS. Genuine. ANACS certifies this coin as Genuine and lists Cleaning as the reason the coin was not graded. In our opinion, this coin has the details of an Uncirculated specimen that has been cleaned. A substantial mintage of 662,000 Indian half eagles was accomplished at the Philadelphia Mint in 1929, but most of the coins were never released into circulation. There was little demand for half eagles in the national economy and none had been coined at any U.S. mint since 1916. With the coming of the Great Depression, in late 1929, there was even less demand and no more five dollar gold coins were ever struck for circulation. Most of the 1929 mintage remained stored in bank or Treasury vaults until the Gold Recall of 1933, when they were melted and stored as gold bars at the Fort Knox Bullion Repository. The issue is the rarest regular-issue Indian half eagle in today's market.

The design elements of this coin are well-detailed and exhibit no actual wear. The surfaces show the expected number of minor contact marks for a coin that experienced shipping, counting, and storage with other coins. Some original mint luster remains intact, despite the unnatural sheen from the noted cleaning. NGC ID# 28E2, PCGS# 8533

EARLY EAGLES

1799 BD-7 Eagle, XF45
Small Obverse Stars

3193 1799 Small Obverse Stars, BD-7, R.3, XF45 PCGS. Bass-Dannreuther Die State d/d, with extensive obverse die cracks in the periphery. BD-7 is the only plentiful Small Obverse Stars variety, with an estimated survivorship of 250 to 350 coins. However, many examples are impaired in some way, and attractive collector coins only occasionally make market appearances. This Choice XF coin displays satiny olive-gold patina and sharp devices. Light wear on each side accompanies light field chatter and other faint hairline scratches, although the coin displays moderately smooth surfaces to the unaided eye. Housed in a green label holder. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1800 BD-1 Eagle, XF45
Elusive in Any Grade
Low Survivorship for the Date

3194 1800 BD-1, High R.3, XF45 NGC. Bass-Dannreuther Die State b/c. The only dies used to strike 1800-dated eagles. The reverse was previously used to strike 1799 ten dollar gold pieces, and it was also employed in the production of 1801 eagles before being remarried with this obverse. A crack through the top of LIBERTY (as here) appears on middle die state examples (manufactured in 1800). Coins struck in 1801 exhibit clash marks from the obverse dentils above STAT. Because of the remarriage, it is almost certain that the recorded mintage of 5,999 coins underreported the actual number of 1800 eagles minted, which Dannreuther estimates may be as high as 12,500 pieces. That total is still notably low, and only 200 to 300 survivors are believed extant.

Bright yellow-gold surfaces show signs of brief circulation, including light high-point rub and myriad marks. Strike detail is slightly uneven, with incompleteness on the shield and occasional softness on the peripheral elements. A couple of thin pinscratches in the left obverse field identify this particular example. NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

LIBERTY EAGLES

1839 Liberty Eagle, XF40
Type of 1839, Old Green Holder

- 3195** 1839 Small Letters, Head of 1840, XF40 PCGS. The Small Letters 1839 Liberty Head ten is known to many collectors as the Type of 1839, with the remodeled Liberty portrait and smaller reverse lettering. It is also significantly scarcer than the earlier Type of 1838 issue. Coinage was about half that of the Large Letters coin (12,447 vs 25,801 pieces), and the later issue's survivorship is estimated at only about 50 or 60 coins, according to PCGS. PCGS lists just one Mint State example. This collectible XF coin displays partially lustrous fields and pleasing straw-gold color. Detail is sharp for the grade, although there are moderate abrasions on each side. Housed in an old green label holder. Population: 7 in 40, 18 finer (6/19). NGC ID# 54XJ, PCGS# 8580

1844-O Liberty Ten, MS60
Rare in Mint State

- 3196** 1844-O MS60 NGC. Variety 1, struck from blundered dies. The obverse has a misplaced 8 in the dentils below the digit 8 in the date, and the reverse has the mintmark recut inside the left hand curve. That mintmark is nearly centered over the space between the E and N in TEN, and leans to the left. This issue is rare in Mint State grades, with just 20 examples certified as MS60 or finer. This example is the 13th appearance of a Mint State example in our auctions since the start of our Permanent Auction Archives. Both sides of this light yellow-gold example are sharply defined, with considerable satin mint luster, and minimal scattered marks. Census: 6 in 60, 9 finer (6/19). NGC ID# 554G, PCGS# 8591

1856-O Ten Dollar, Near-Mint
Underappreciated New Orleans Issue
Only Three Coins Finer

3197 1856-O AU58 NGC. Variety 1. The New Orleans Mint struck 14,500 eagles in 1856. Three die pairs are known, all with the same obverse die. The three reverses are distinguished by the mintmark placement — high, medium, and low relative to the fletching. The mintmark is low on Variety 1. Though not as nearly rare as its famous double eagle counterpart, the 1856-O ten dollar gold piece is an elusive issue in its own right. Doug Winter calls it “unheralded” and “an issue which is not often seen in grades above the VF-XF range.” Examples this fine are scarce, and Winter knows of only three Uncirculated pieces among the 100 to 125 coins that survive despite the likely inflated population totals.

The reverse on this near-Mint representative is better-struck than the obverse, as always, with good detail on the eagle’s feathers. Most star radials are apparent, and softness is only moderate over the curls and hair strands. Yellow-gold surfaces retain an impressive degree of luster within the protected regions. Marks are trivial, though scattered hairlines appear on each side. Census: 20 in 58 (1 in 58+), 4 finer (5/19). NGC ID# 263R, PCGS# 8620

1858-S Ten Dollar, AU58
Among the Finest Certified
Rarely Offered in This Grade

3198 1858-S AU58 NGC. The San Francisco Mint struck only 11,800 Liberty eagles in 1858, and the entirety of this mintage was released into circulation. The finest surviving examples are 13 AU58 coins — 10 at NGC and three at PCGS (6/19) — although a handful of Unc Details pieces are known with cleaning or other impairments. This coin displays bright yellow-gold color that deepens around the outer rims, and detail is sharp with little wear over the high points. Moderate luster remains in the protected areas of the fields and there are no bothersome abrasions. Census: 10 in 58, 0 finer (6/19). NGC ID# 263Y, PCGS# 8627

1882-O Liberty Ten, MS61
Only Three Finer at PCGS

3199 1882-O MS61 PCGS. Variety 1. The 1882-O eagle is an elusive issue from a small mintage of 10,820 coins. The average survivor grades AU50. Rarely encountered in Mint State, with just 35 pieces certified MS60 to MS63 at PCGS and NGC combined. This satiny yellow-gold example has slightly reflective fields with scattered marks. Delicate orange overtones add to the eye appeal. Population: 10 in 61, 3 finer (6/19). NGC ID# 55GJ, PCGS# 8697

1891 Near-Gem Ten Dollar An Important Condition Rarity

- 3200 1891 MS64 PCGS.** The 1891 ten dollar is a relatively scarce date, although Uncirculated pieces through MS62 are available with a little patience and searching. MS63 examples, however, are elusive, and higher-grade coins are extremely rare. The 2006 Garrett and Guth gold reference calls the 1891 in Choice Uncirculated grade "one of the bargains of the century." That comment holds true to this day. Reddish-gold patina resides on the lustrous surfaces of this richly frosted, straw-gold MS64 example. The strike is razor-sharp throughout. A few minute marks may preclude full Gem classification, although there are no individually notable abrasions. PCGS and NGC combined have graded a mere six near-Gems, and just one finer coin (none finer at PCGS). PCGS Population: 5 in 64, 0 finer (5/19). NGC ID# 266T, PCGS# 8719

1891-CC/CC Liberty Eagle, MS63 Repunched Mintmark, FS-501

- 3201 1891-CC/CC FS-501 MS63 NGC.** The undertype CC is visible to the right of the primary mintmark, identifying the popular *Cherrypickers* variety. This impressive Select specimen exhibits sharply detailed design elements, with a die crack through the stars on the left. The pleasing orange-gold surfaces are lustrous and lightly marked. Census (for the variety): 6 in 63, 1 finer (6/19). NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1904 Eagle, Gem Ideal for Top Registry Set

- 3202 1904 MS65 PCGS.** Cartwheel mint luster rolls over each side, blending with gorgeous orange-gold color. Bold devices and smooth surfaces enhance the appeal. A small cluster of tiny ticks above the date and two reeding marks below the beak prevent an even higher grade for this magnificent, Registry-worthy Gem. Population: 3 in 65 (1 in 65+), 2 finer (6/19). NGC ID# 267Y, PCGS# 8755

INDIAN EAGLES

1907 No Motto Ten, MS65 Population Tapers Off at This Level

- 3203 1907 No Motto MS65 NGC.** The certified population for the 1907 No Motto ten dollar really tapers off in MS65. Many of these first-year coins were saved in high grades, explaining the issue's general availability through MS64. This Gem is finely textured and lustrous, showing rich orange-gold color and a bold strike. Two ticks appear on the lower part of the neck. NGC ID# 28GF, PCGS# 8852

1907 No Periods Eagle, MS66 Perennial No Motto Type Favorite

- 3204 1907 No Motto MS66 NGC.** The No Motto ten is an essential two-year type, although the 1908 No Motto eagle is much scarcer than the 1907 issue in high grades. Accordingly, this smooth and lustrous 1907 Premium Gem ten an excellent type selection. Charles Barber's revised design made production simpler but sacrificed aesthetics, a worthwhile trade-off as far as Mint productivity was concerned. As a result, the hair detail around Liberty's ear is soft (per Barber's design, not from strike) and some of the lower headdress feathers lack detail. Still, this example earns high marks for eye appeal, rich medium-gold color, and an absence of any distracting marks.

From The Dunleavy Collection. NGC ID# 28GF, PCGS# 8852

1908-S Ten Dollar, MS64+
First San Francisco Issue
Low-Mintage Semikey

- 3205 1908-S MS64+ PCGS. CAC.** The San Francisco Mint was first engaged in the production of Saint-Gaudens ten dollar gold pieces in 1908, but only after the July 1 reinstatement of the motto IN GOD WE TRUST. Output amounted to 59,850 coins, which stands as one of the lowest mintages in the series. As is true for most issues, Gems are challenging to locate. This CAC-approved MS64+ eagle very nearly approaches that level of quality. The warm orange-gold surfaces are smooth and finely textured with radiant mint frost swirling over each side. Obverse design detail is uniformly strong, and only a hint of softness appears on the eagle's shoulder. A graze above its head probably prevents a full Gem grade. Population: 45 in 64 (5 in 64+), 36 finer. CAC: 7 in 64, 15 finer (6/19). NGC ID# 28GL, PCGS# 8861

1909 Eagle, MS64+
Impressive Quality for the Grade

- 3206 1909 MS64+ PCGS. CAC.** The most collectible ten dollar issue for the year claims a mintage of 184,700 coins, few of which survive in better condition than this crisp MS64+ representative with CAC approval. Golden-yellow color graces frosty, well-preserved surfaces. Ticks and grazes are trivial; a single line on the tip of the bust deserves mention. PCGS reports 31 finer submissions for the 1909 eagle. CAC: 28 in 64, 8 finer (6/19). NGC ID# 28GM, PCGS# 8862

1911-D Ten Dollar, MS61
Series-Low Mintage of 30,100 Coins

- 3207 1911-D MS61 NGC.** The Denver Mint coined all four denominations of gold coins in 1911, but only the double eagle was minted in substantial numbers. The eagle had a production of 30,100 coins, the lowest mintage of the Indian With Motto series. The facility also produced 72,500 half eagles and 55,680 quarter eagles. This pleasing Mint State piece has scattered surface marks as the grade suggests, yet it retains full mint brilliance and displays a sharp strike, especially on the lower headdress feathers. NGC ID# 28GU, PCGS# 8869

1912 Ten Dollar, MS65+
Scarcely Seen in Higher Grades

- 3208 1912 MS65+ PCGS. CAC.** The Philadelphia Mint produced 405,000 eagles in 1912. Examples are among the most frequently seen Saint-Gaudens tens in high grades, perfect for type representation. This Plus-graded Gem shows a few tiny ticks on the portrait and eagle, but they are absolutely trivial. The yellow-gold fields are smooth and softly frosted. Well-struck. Population: 50 in 65 (7 in 65+), 13 finer. CAC: 17 in 65, 5 finer (4/19). NGC ID# 28GW, PCGS# 8871

1912-S Eagle, MS64+
Ex: D.L. Hansen Collection

- 3209 1912-S MS64+ PCGS. CAC.** Ex: D.L. Hansen Collection. Gem 1912-S eagles are rarely seen, making this a wonderful alternative for a high-end set of Saint-Gaudens ten dollar gold pieces. Well-struck and thickly frosted surfaces enjoy rich golden-yellow color. Each side is smooth and finely textured with minimal, inconspicuous ticks. There are 16 finer grading events at PCGS and three at CAC (4/19).

Ex: Internet Auction #924 (David Lawrence Rare Coins, 5/2016), lot 384; Regency Auction XIX (Legend Rare Coin Auctions, 12/2016), lot 475; Internet Auction #1006 (David Lawrence Rare Coins, 4/2018), lot 1250. NGC ID# 269G, PCGS# 8872

1913-S Ten Dollar, MS62
Attractive for the Grade

- 3210 1913-S MS62 PCGS.** A 66,000-coin mintage is always popular with collectors, but there a limited number high-grade examples of the 1913-S to go around. This coin is softly lustrous rather than brightly frosted. Textured, lightly abraded surfaces display a blend of reddish-gold color and occasional olive accents. Incompletely struck on the normal problem areas, but still readily appealing. This semikey S-mint issue is rarely offered in better condition. NGC ID# 28GZ, PCGS# 8874

1914-D Eagle, Satiny MS65+
Collectible Branch Mint Issue

- 3211 1914-D MS65+ PCGS.** With a mintage of 343,500 coins, the 1914-D is a collectible branch mint Saint-Gaudens ten dollar issue that become scarce in Gem condition or better. The motifs showcase razor-sharp detail on this satiny wheat-gold representative. A tick on the nose and another in the field left of the chin identify this coin. Population: 39 in 65 (6 in 65+), 11 finer (6/19). NGC ID# 28H3, PCGS# 8876

LIBERTY DOUBLE EAGLES

1850 Twenty Dollar, AU58
Outstanding Surfaces and Eye Appeal

- 3212 1850 AU58 PCGS. CAC.** Scarce in high About Uncirculated condition as well as in full Mint State grades, the 1850 date is in extra demand by collectors as the earliest attainable double eagle from the Philadelphia Mint. As a regular issue, it fills the first-year slot in many collections. More than 1.1 million pieces were struck, mostly from the first influx of California gold to reach the Mother Mint. This example displays outstanding olive-gold surfaces with a healthy amount of orange accents throughout both sides. A sharp strike and surprisingly few marks for the grade earn CAC endorsement to complement the outstanding eye appeal. Population: 61 in 58 (1 in 58+), 96 finer. CAC: 21 in 58, 15 finer (5/19). NGC ID# 268F, PCGS# 8902

1851-O Double Eagle, AU55
Scarce in This Grade

- 3213** 1851-O AU55 NGC. **Variety 1.** Die chips in front of Liberty's eye confirm the attribution. The 1851-O is the most collectible New Orleans double eagle overall, but Doug Winter notes that it is "scarcer in high grades (AU55 and above) than the 1852-O." This well-struck orange-gold twenty dollar displays a touch of friction and peppered abrasions. The overall appeal is excellent, with bold detail on the curls, glints of original mint luster, and a dearth of singularly distracting flaws. NGC ID# 268J, PCGS# 8905

1852-O Twenty Dollar, AU53
Among the Few Collectible O-Mint Issues

- 3214** 1852-O AU53 PCGS. **Variety 1.** The 1852-O is one of the few collectible New Orleans double eagles, but even this date is challenging in problem-free AU condition or better. Original luster glows around the raised design elements, which show typical definition for a lightly circulated O-mint product. Yellow-gold surfaces are lightly abraded without any singular blemishes to report. NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, Lustrous AU55
In-Demand *Guide Book* Variety

- 3215** 1853/'2' FS-301 AU55 NGC. While the exact nature of the so-called 1853/'2' date anomaly continues to prompt debate, it remains a popular *Guide Book* listing. This moderately abraded example shows many nicks and abrasions plus a few reeding marks, yet it retains nearly full mint luster throughout the bright, yellow-gold surfaces. A curved die line or remnant of a digit is visible within the lower loop of 3 to confirm the *Cherrypickers'* variety. Census: 31 in 55, 51 finer (5/19). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853-O Liberty Double Eagle, AU50
From a Modest Branch Mint Production

- 3216** 1853-O AU50 NGC. **Variety 1.** Only 71,000 Liberty double eagles were coined at the New Orleans Mint in 1853, a sharp decline in production due to the anticipated opening of the San Francisco Mint the following year. This attractive AU specimen displays only light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded, outside of a scrape on the reverse, above the denomination. NGC ID# 268N, PCGS# 8910

1856-S Twenty Dollar, MS62
Softly Lustrous Khaki-Gold Surfaces
Likely Survived Above Sea Level

- 3217** 1856-S MS62 PCGS. **CAC.** Medium S. The availability of the 1856-S double eagle was significantly enhanced by the S.S. *Central America* shipwreck recoveries. Before the 1990s, this issue was rarely seen in Mint State. The PCGS insert makes no mention of the origin of this MS62 twenty dollar gold piece, but its softly lustrous khaki-gold surfaces do not resemble those of the brightly frosted coins brought up from the depths of the Atlantic. This appears to be one of the few coins that miraculously avoided being thrown into the channels of Western commerce. Strike definition is crisp, and eye appeal is outstanding. Population: 23 in 62, 16 finer. CAC: 3 in 62, 7 finer (6/19). NGC ID# 2692, PCGS# 8919

1857-S No Motto Twenty, MS64
Ex: SSCA, Frosty Shipwreck Coin

3218 1857-S Spiked Shield, Variety 20A, MS64 PCGS. Ex: S.S. *Central America*. SSCA 0068. The so-called Spiked Shield variety (20A) is the most plentiful die marriage among the thousands of 1857-S twenty dollar gold pieces salvaged from the Ship of Gold. It features a raised die gouge through the left shield border. This beautifully frosted shipwreck coin enjoys a strong strike and radiant orange-gold color with coppery accents mainly over the central reverse. Housed in its original gold foil holder. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

1857-S Double Eagle, MS65
Vibrant Mint Frost, Rich Color

3219 1857-S Spiked Shield, Variety 20A, MS65 PCGS. CAC. Ex: Chicago Classics. Although this Gem 1857-S Liberty double eagle no longer resides in its original PCGS gold foil holder, it is an unquestionable S.S. *Central America* recovery and example of the plentiful Spiked Shield variety designated by Robert Evans as Variety 20B. Rich golden-orange borders turn to lighter shades of peach-gold near the centers. Both sides are awash in the vibrant mint frost that characterizes the *Central America* coins, and the effect is highly appealing. CAC's endorsement is entirely deserved, affirming the quality of this Gem No Motto twenty. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

1857-S Twenty With Pinch of Gold, MS63**Ex: S.S. Central America**

- 3220** 1857-S S.S. Central America #2 (with Pinch), Variety 20A, Spiked Shield, Bob Evans Signature, MS63 PCGS. Ex: S.S. Central America. This Select Uncirculated 1857-S double eagle was recovered from the famous S.S. Central America shipwreck, now housed in a large-size Ship of Gold PCGS holder. A pinch of California gold dust is separately encapsulated in the holder — it, too, was recovered from the S.S. Central America shipwreck. Frosted yellow-gold coloration adorns the coin's finely grained fields and bold devices. As usually seen among the shipwreck recoveries, the piece is remarkably well-preserved for its grade level. We note a few tiny ticks on the obverse, and a short reeding mark below OF on the reverse. Strong mint luster radiates from each side. The back of the holder has the signature of chief scientist and historian of the shipwreck treasure, Bob Evans, confirming recovery of the gold dust and coin from the S.S. Central America. Its box of issue is included. PCGS# 670713 Base PCGS# 670830

1857-S Double Eagle, MS62**Ex: S.S. Central America**

- 3221** 1857-S Bold S, Variety 20B, MS62 PCGS. Ex: S.S. Central America, SSCA 4496. An excellent type coin, this 1857-S double eagle is also a more affordable Central America coin for collectors seeking a single representative from the famed shipwreck. It is well-struck and luminous with orange-gold borders that surround lighter-gold interiors. Abrasions are minor for the grade. NGC ID# 2696, PCGS# 70001 Base PCGS# 8922

1857-S Liberty Double Eagle, MS66**S.S. Central America**

- 3222** 1857-S Bold S, Variety 20B, MS66 PCGS. CAC. Ex: S.S. Central America. Like most Type One double eagles, the 1857-S was extremely rare in high grade before recent shipwreck finds augmented the small supply of Mint State specimens. The present coin is one of the more than 5,000 examples of this issue that were aboard the famous S.S. Central America when the ship sank. Many high-quality coins have been recovered over the years and vigorous salvage efforts are still underway today.

The coin offered here is a spectacular Premium Gem, with well-preserved orange-gold surfaces and sharply detailed design elements throughout. Vibrant mint luster adds to the outstanding eye appeal. The 1857-S is listed among the *100 Greatest U.S. Coins* because of the profound effect it has had on the collection of double eagles in recent years. Population: 48 in 66, 3 finer. CAC: 22 in 66, 2 finer (6/19). NGC ID# 2696, PCGS# 70001 Base PCGS# 8922

1857-S Double Eagle, MS66
Ex: S.S. Central America
Glowing No Motto Type Coin

3223 1857-S Bold S, Variety 20B, MS66 PCGS. CAC. Ex: S.S. Central America. Bold S. The wreckage of the famous sidewheeler steamer, which sank in September 1857 off the coast of the Carolinas, yielded more than 5,000 of these 1857-S double eagles among a trove of other relics, including Territorial gold pieces and massive gold ingots. The discovery made thousands of high-grade Type One twenties available to many collectors for the first time.

This gorgeous No Motto double eagle would make an outstanding type coin. Radiant mint frost glows from warm surfaces that seem nearly pristine. Peach-gold color deepens slightly at the rims, heightening the CAC-approved eye appeal. NGC ID# 2696, PCGS# 70001 Base PCGS# 8922

1861 Twenty Dollar, MS62
Frosty and Sharp

3224 1861 MS62 NGC. Despite the general collectibility of the 1861, this Civil War-era double eagle issue experiences a significant population decline in grades above MS62. Strike definition is uniformly sharp, and the reverse is especially crisp. Cartwheel luster radiates over orange-gold surfaces. A few hairlines and minor chatter prevent a technically higher grade, but eye appeal is much better than expected. NGC reports 49 finer submissions (6/19). NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar Liberty, MS62
Lightly Marked, Colorful Surfaces

3225 1861 MS62 PCGS. From a large mintage of nearly 3 million pieces, the 1861 Liberty double eagle is an available Type One issue, but it does become scarce at the MS62 grade level. This attractive MS62 example is especially well-preserved for the assigned grade, with lustrous orange-gold surfaces and sharply detailed design elements throughout. PCGS has graded 53 numerically finer examples (5/19). NGC ID# 269G, PCGS# 8932

1861-S Twenty Dollar, AU58
Original Luster, CAC Approval

3226 1861-S AU58 PCGS. CAC. The 1861-S double eagle is scarce in the upper AU grades and rare in Mint State. This near-Mint coin is vibrantly lustrous and frosty with only a trace of high-point friction. Original yellow-gold luster reveals olive-gold overtones on the worn points. This piece is CAC approved, placing it a step above the majority of coins in AU58. Population: 64 in 58 (4 in 58+), 33 finer. CAC: 19 in 58, 12 finer (5/19). NGC ID# 269K, PCGS# 8935

**1862-S Twenty Dollar, AU58
Repunched Date**

- 3227 1862-S AU58 PCGS. Breen-7214.** Medium S. Repunched date, apparent within the loops of 86. While small quantities of 1862-S double eagles were found among the S.S. *Brother Jonathan* and S.S. *Republic* treasures, this issue remains elusive in higher circulated grades and is scarce-to-rare in full Mint State. This is a pleasing, partly lustrous example with medium yellow-gold color and a hint of rose in the recessed areas. The surfaces are moderately abraded. Ex: *Dallas Signature* (Heritage, 11/2005), lot 4474. NGC ID# 269N, PCGS# 8938

**1862-S Double Eagle, MS60
Rarely Offered in Mint State**

- 3228 1862-S MS60 PCGS.** Medium S. Despite shipwreck yields and European repatriations, the 1862-S remains scarce in Uncirculated condition. A significant majority of survivors grade between XF40 and AU58, and only a handful of coins exist above MS61. Mint luster glows around the legends and central motifs of this yellow-gold No Motto twenty. Myriad abrasions explain the technical assessment. Population: 3 in 60, 25 finer (5/19). NGC ID# 269N, PCGS# 8938

**1863-S Twenty Dollar, MS61
Elusive in Mint State**

- 3229 1863-S MS61 PCGS.** In Mint State, the 1863-S double eagle is significantly scarcer than its mintage of nearly 1 million coins would suggest. We rarely handle a coin finer than MS61. This piece displays frosty rose-gold and greenish luster with bold design elements. Light, scattered abrasions define the grade but do not detract. Population: 38 in 61, 26 finer (6/19). NGC ID# 269R, PCGS# 8940

**1864 Twenty Dollar, AU50
Sought-After No Motto Issue**

- 3230 1864 AU50 PCGS.** The 1864 is a challenging No Motto issue with a surviving population of fewer than 500 coins. Prior to the discovery of 17 Uncirculated examples on the S.S. *Republic*, the 1864 was essentially unknown in Mint State, attesting to the issue's conditional rarity. This AU50 double eagle appears to have survived above sea level. Its moderately marked yellow-gold surfaces show signs of short-term circulation, with friction over the high points. The design recesses retain partial mint luster. NGC ID# 269S, PCGS# 8941

**1864-S Double Eagle, MS61
Elusive Issue in Mint Condition**

- 3231 1864-S MS61 PCGS.** From a mintage of 793,660 pieces, the 1864-S Liberty double eagle is an elusive Type One issue in all Mint State grades. Most high-grade examples have been recovered from shipwrecks in relatively recent times, but we have no information about the origin of this piece. This impressive MS61 example displays well-detailed design elements, with just a trace of the usual softness on the prongs of the coronet. The vivid orange-gold surfaces radiate vibrant mint luster on both sides and show the expected number of minor contact marks for the grade. Overall eye appeal is strong for the issue. Population: 28 in 61, 18 finer (5/19). NGC ID# 269T, PCGS# 8942

**1867 Twenty Dollar, MS62
Attractive Luster and Color
Few Finer Pieces Are Known**

- 3232 1867 MS62 PCGS.** This Type Two Philadelphia issue is remarkably scarce in Mint State grades above MS61, and it is a grand rarity — out of reach for most collectors — above MS62. This MS62 coin is scarce but collectible. A hint of reflectivity in the central fields heightens the appeal of the frosty cartwheel effect, and grade-limiting abrasions are minor. Rose-gold interior color cedes to brighter yellow-gold margins. Population: 57 in 62 (4 in 62+), 5 finer (6/19). NGC ID# 269Z, PCGS# 8951

1867 Double Eagle, MS62
Slightly Reflective Fields, Rare Finer

- 3233 1867 MS62 PCGS.** PCGS and NGC combined report only eight 1867 double eagles numerically finer than MS62, and even coins in this grade are scarce. The piece offered here displays original cartwheel luster with a hint of reflectivity in the fields. The margins have lovely yellow-gold color, which transitions to warmer rose-gold across the interiors. Population: 57 in 62 (4 in 62+), 5 finer (6/19). NGC ID# 269Z, PCGS# 8951

1876-CC Twenty Dollar, MS60
Early Generation Holder

- 3236 1876-CC MS60 NGC. Variety 3-D,** a scarce die pair with the CC mintmark widely spaced on the reverse. As a date, the 1876-CC is one of the few Carson City issues that is collectible by most enthusiasts in Mint State, although such coins are still moderately elusive. This piece displays frosty mint luster and a bold strike. The obverse has amber toning in the fields, while the reverse is uniformly yellow-gold. Housed in a prior generation holder. NGC ID# 26AW, PCGS# 8977

1873-S Twenty Dollar, Frosted MS62+
Scarce in This Grade, CAC

- 3234 1873-S Closed 3 MS62+ PCGS. CAC.** Although slightly more available than its Open 3 counterpart, the 1873-S Closed 3 double eagle is scarce at lower Mint State levels and virtually unseen in Select or finer grades. This Plus-graded example with CAC endorsement is rare in its own right — fully lustrous with attractive, orange-gold color and not too many bagmarks. The strike is sharp throughout. A tiny rim ding below 3 in the date is noted, but not outside the context of the grade. Population: 7 in 62+, 3 finer. CAC: 16 in 62, 0 finer (6/19). NGC ID# 26AL, PCGS# 8969

1877-CC Liberty Double Eagle, AU55
Unusually Smooth Surfaces

- 3237 1877-CC AU55 NGC. Variety 1-A.** Variety 1-A exhibits several interesting features, including a die line from star 10 to the rim and some clash marks at the ear on the obverse. The reverse shows multiple die lines after the S in DOLLARS and a single line after the E in AMERICA. This lightly worn, lightly abraded example retains much of its original mint luster and eye appeal. NGC ID# 26AZ, PCGS# 8983

1875-CC Double Eagle, MS60
Variety 2-B

- 3235 1875-CC MS60 NGC. Variety 2-B.** Diagonal die lines fill the mintmark space on the reverse and that die was mated with six different obverse dies. The date is placed farther right than usual. This frosty Mint State piece has hints of orange overtones with small ebony toning splashes on the obverse. NGC ID# 26AT, PCGS# 8974

1877-CC Liberty Double Eagle, AU58
First Type Three Issue

3238 1877-CC AU58 NGC. Variety 1-A. The design of the double eagle was modified to the Type Three motif in 1877, with the denomination spelled out as TWENTY DOLLARS. This was the only major design change that occurred during the Carson City Mint's years of operation. Mintage of double eagles declined somewhat at the Carson City facility in 1877, to 42,565 pieces, and few examples were saved for numismatic purposes. Today, the 1877-CC is scarce in the higher ranges of AU, and Mint State specimens are rare.

This attractive near-Mint specimen exhibits just a trace of high-point wear on the sharply detailed design elements. The vivid orange-gold surfaces retain much of their original mint luster and show only a few scrapes and roller marks on the obverse. Overall eye appeal is outstanding for the grade. NGC has graded 24 numerically finer examples (5/19). NGC ID# 26AZ, PCGS# 8983

1878 Double Eagle, MS63+
Scarce This Fine
Rare With the CAC Endorsement

3239 1878 MS63+ PCGS. CAC. The 1878 is the second Philadelphia issue in the Type Three double eagle series. Type Three coins show smaller letters on the reverse border legends to allow for the denomination to be fully spelled out as TWENTY DOLLARS. Type One and Two coins have the denomination abbreviated as TWENTY D. The 1878 is frequently available in Mint State, but most collectors will have to settle for an abraded coin no finer than MS62. Select examples are scarce, and only a few higher-grade pieces are known. This CAC-approved MS63+ coin displays a sharp strike and luminous, shimmering mint luster. Original wheat-gold, peach, and lilac hues are visible over each side and are intricately intertwined when viewed under a loupe. A few small reed marks on the obverse define the grade but are unobtrusive. Population: 50 in 63 (3 in 63+), 8 finer. CAC: 9 in 63, 2 finer (5/19). NGC ID# 26B3, PCGS# 8985

1878-S Double Eagle, High-End MS62+
Former D.L. Hansen Coin

3240 1878-S MS62+ PCGS. CAC. Ex: AWA. Small S. As is the case for many double eagles of this period, locating an example of the 1878-S any finer than this high-end MS62+ coin will prove extremely challenging. There is no doubt the quality and surface preservation exceed expectations for this grade level. Deep yellow-gold surfaces show lighter accents of rose and vibrant mint frost throughout. Fully struck. PCGS reports 13 finer submissions. CAC: 12 in 62, 0 finer (4/19).

Ex: D.L. Hansen Collection; Internet Auction #1006 (David Lawrence Rare Coins, 4/2018), lot 1266. NGC ID# 338K, PCGS# 8987

1879-CC Liberty Twenty, AU53
Low-Mintage, Branch Mint Issue

3241 1879-CC AU53 NGC. Variety 1-A. The 1879-CC Liberty double eagle claims a modest mintage of 10,708 pieces. Fortunately for present-day collectors, a hoard of XF-AU specimens surfaced in Europe in the 1990s, making the issue more available than the small production total would suggest. The 1879-CC is still elusive in finer grades, however, making this AU53 coin a good balance of quality and value.

The coin offered here is an impressive AU53 example, with some light wear on the well-detailed design elements and lightly abraded orange-gold surfaces. Much original mint luster remains intact in sheltered areas and the overall presentation is most attractive. NGC ID# 338L, PCGS# 8989

1882-CC Double Eagle, AU55
Pleasing Reddish-Gold Color

- 3242 1882-CC AU55 NGC. Variety 1-B.** Partial mint luster glows around the sharply struck devices of this reddish-gold Choice AU double eagle. Liberty's cheek and curls show a hint of rub. Small marks have no effect on the eye appeal of this original Carson City twenty dollar. The 1882-CC claims a mintage of 39,140 coins. Three die varieties are known, this one showing a gouge before Liberty's eye and a slightly upward-slanting mintmark with cracks through the legends. NGC ID# 26BF, PCGS# 8997

1884-CC Double Eagle, MS61
Lustrous, Colorful Surfaces

- 3243 1884-CC MS61 PCGS. Variety 1-A.** The only known die pair for the 1884-CC double eagle, exhibiting a diagnostic intersection of die lines on the lower neck. A large portion of the 81,139-coin mintage was exported overseas for foreign trade payments, and those coins are slowly making their way back to the U.S. for present-day collectors. The dusky high-point color is frequently encountered on these repatriated gold coins. This lovely Mint State piece exhibits luminous yellow-gold surfaces and rose overtones. Far finer than the average certified grade of AU53. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, MS62
Only Seven Coins Finer at PCGS

- 3244 1884-CC MS62 PCGS. Variety 1-A.** The appeal of the Carson City Mint and its coinage is almost inherently understood by collectors. The Nevada facility was relatively short-lived, produced many low-mintage issues, and was deeply connected with the gold and silver mining operations that were so fundamental to Western expansion. In 1884, the CC-mint manufactured 81,139 double eagles. They were intended for local circulation and export. The few Mint State survivors that exist are purely the result of chance. Most derive from overseas sources, where the coins sat in vaults rather than being sent to the melting pot for recoinage.

This frosty orange-gold twenty displays a crisp impression. Each side has a number of bagmarks and other grazes and abrasions, but none are overly distracting. There are only seven finer grading events at PCGS (5/19). NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, MS62
High-End Nevada Mint Type Coin

- 3245** 1884-CC MS62 PCGS. **Variety 1-A.** Among the four mints involved in the production of this largest circulating denomination, none are more popular year after year than that of Carson City, Nevada. The facility struck double eagles on and off from its opening in 1870 until its final year of operation in 1893. That includes 81,139 twenty dollar gold pieces minted in 1884. The 1884-CC represents one of the most collectible Carson City double eagles, but it is scarce in MS62 and rarely made available any finer. Bagmarks peppered over each side fail to diminish the eye appeal of this frosty example. Rich yellow-gold color and bold motifs throughout. Population: 82 in 62 (7 in 62+), 7 finer (6/19). NGC ID# 26BK, PCGS# 9001

1890-CC Twenty Dollar, MS60
Partially Prooflike Surfaces

- 3246** 1890-CC MS60 NGC. **Variety 1-A.** Substantial reflectivity remains despite moderate abrasions across lustrous, orange-gold surfaces. This popular Carson City issue has sharply struck devices that show no trace of circulation, although numerous tiny bagmarks suggest a long stay in storage with some intervening transit and handling. The eye appeal is excellent for an MS60 coin. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS61
Remarkably Lustrous Surfaces

- 3247** 1890-CC MS61 PCGS. **Variety 1-A.** The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

1891 Double Eagle, AU53
Reflective Fields, Rich Color
A Rarity Among Type Three Twenties

3248 1891 AU53 PCGS. PCGS estimates that about only 100 examples of this issue survive from the mintage of 1,390 coins. Almost none of these are in Mint State, and PCGS reports just 43 coins overall. This About Uncirculated example is sharp and has only light high-point wear. The fields are deeply prooflike, although the open areas have light chatter from a brief time in circulation. Rich peach-gold color takes on a more olive-gold hue when the reflective fields are tilted away from a light. Eye appeal is outstanding.

The 1891 is one of the last ultra-low-mintage Philadelphia issues in this series. It is many times scarcer than the Carson City issue, whose mintage is 5,000 coins. San Francisco struck more than 1.2 million double eagles in 1891. The rare Philadelphia coin is a key date among Type Three double eagles. Population: 4 in 53, 27 finer (5/19). NGC ID# 26C2, PCGS# 9016

1893-CC Liberty Double Eagle, MS62
Lustrous, Colorful Surfaces

3249 1893-CC MS62 PCGS. Variety 2-A. The B in J.B.L. is over the right side of the 8 in the date, identifying Variety 2-A. A small mintage of 18,402 Liberty double eagles was accomplished at the Carson City Mint in 1893, the final year of coinage operations at the famous Western facility. Many of the coins were used to settle large accounts in foreign trade and the 1893-CC has turned up frequently in European holdings in recent times, making the issue more available than the modest production total would suggest. It is still quite elusive in grades above MS62, however.

The present coin is an impressive MS62 example, with well-detailed design elements that show the slightest trace of softness on the tiara. The pleasing orange-gold surfaces radiate vibrant mint luster and exhibit the expected number of minor contact marks for the grade. PCGS has graded 24 numerically finer examples (5/19). NGC ID# 26C9, PCGS# 9023

**1903 Double Eagle, MS65+
Ideal for High-End Type**

3250 1903 MS65+ PCGS. CAC. The 1903 double eagle is one of the most-available dates of the Liberty Head series, a result of large hoards that surfaced over the past few decades, even though the mintage was a moderate 287,200 pieces. This coin seems too well-preserved for a hoard coin, although it might be a fortunate survivor from an unopened bag that returned from foreign shores.

Radiant cartwheel luster rolls across this high-end, CAC-endorsed Gem. Sharply struck design features and nicely preserved surfaces further heighten the eye appeal. There are no annoying copper alloy spots (although the date is prone to them). Historically, the 1903 a great choice for Liberty Head type and it will be challenging to improve on this Plus-graded example. Population: 15 in 65+, 5 finer. CAC: 36 in 65, 0 finer (5/19).

Ex: *New York Signature* (Heritage, 11/2013), lot 3916. NGC ID# 26CW, PCGS# 9043

**1904 Twenty Dollar, MS66+
Surprisingly Scarce This fine**

3251 1904 MS66+ NGC. This double eagle issue is famous for its widespread availability, but Premium Gems, especially those with a Plus designation, and conditionally scarce. Superb Gems are much rarer than most collectors realize. There are only two finer examples at NGC and three at PCGS (6/19). Glowing sun-gold surfaces emit frosty luster from each side. The devices exhibit a complete impression, and abrasions are practically unseen. NGC ID# 26CY, PCGS# 9045

**1906-S Double Eagle, MS65
One of the Finest We Have Handled**

3252 1906-S MS65 PCGS. There is little to suggest that the 1906-S double eagle, with its mintage of more than 2 million coins, is anything other than plentiful through most grade levels. However, that is only true through MS64. It quickly becomes a condition rarity in MS65, and just a single PCGS-graded MS67 coin is numerically finer. Clean and frosty peach-gold surfaces exhibit an eye-catching cartwheel effect. The strong strike is commensurate with the coin's overall excellent preservation. There are only a few small bagmarks mostly on the reverse. Population: 5 in 65 (1 in 65+), 1 finer (6/19). NGC ID# 26F6, PCGS# 9051

PROOF LIBERTY DOUBLE EAGLE

1895 Twenty Dollar, PR55
Collectible 19th Century Proof

3253 1895 PR55 PCGS. CAC. JD-1. Only 51 proof double eagles were struck in 1895, and less than half of those are believed to survive, suggesting that not all of the coins were originally sold to collectors. PCGS estimates a survival of 20 to 24 pieces, although John Dannreuther's estimate in *United States Proof Coins, Volume IV* is just 16 to 20 examples. In either case, the PCGS certified population of 23 coins is likely inflated by resubmissions.

This is one of four proofs reported by PCGS in AU grades, evidently spending a brief period of time in circulation shortly after its issue. The date position and deeply mirrored fields are correct for the proof dies, and the slight high-point friction on the devices and in the open areas of the fields leaves all details sharp. Both sides have a number of abrasions from coin-to-coin contact, although eye appeal remains pleasing, as the CAC endorsement suggests. Population: 1 in 55, 12 finer. CAC: 1 in 55, 2 finer (5/19).

Ex: *Houston Signature* (Heritage, 12/2008), lot 2580, which realized \$8,050. NGC ID# 26EG, PCGS# 9111

HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim Twenty Dollar, MS61
Deep Reddish Patina

3254 1907 High Relief, Wire Rim MS61 NGC. When one looks at the result of the sculptural excellence seen on the High Relief double eagle, it should not come as a surprise that the figure of Liberty was the result of many reworked versions. Saint-Gaudens often borrowed from his previous commissions, and that is the case with the figure of Liberty on the High Relief. The head was modeled after his Nike. That bust was in turn taken from his Sherman group with Liberty leading General Sherman. The work on the initial figures of Victory (later Liberty) and General Sherman went through many generations of changes. Louise Hall Tharp wrote that while Saint-Gaudens was in Paris in the late-1890s and working on this commission, his wife Augusta wrote to friends that Augustus was "doing the Sherman cloak all over again and she was 'making lots of little cloaks' for him to put on small experimental models, arranging the folds differently on each. When he finally found the right effect, no one would ever dream that such simple lines could have cost him so much time and trouble to achieve." The same meticulous attention to detail also went into the drapery folds on the High Relief double eagle. This is a more-affordable example of this beautifully designed coin. The surfaces show deep reddish patina and one notable scuff is located in the right obverse field; otherwise, there is just the normal slight signs of coin-to-coin contact one would expect of an MS61. NGC ID# 26F2, PCGS# 9135

1907 Twenty Dollar High Relief, MS61
Wire Rim

- 3255** 1907 High Relief, Wire Rim MS61 NGC. In the decades following the Civil War, hundreds of statues were erected in town squares throughout the country to heroes on both sides of that mighty conflict. With so many statues commissioned in such a relatively short time span, artistic quality varied widely. Augustus Saint-Gaudens is well-known for his sculptures of three Civil War heroes: Admiral David Farragut, Colonel Robert G. Shaw, and General W. T. Sherman. In each case, the heroes depicted show a high degree of accomplishment and understanding of each subject. William Duffy, in *Augustus Saint-Gaudens, American Sculptor of the Gilded Age*, writes that, “his works stand out for their quiet dignity and inherent strength of character.” That critique is equally applicable to Saint-Gaudens’ ten and twenty dollar gold coins. The bust of Nike on the ten dollar and the modified figure of Victory on the double eagle certainly possess dignity and strength of character, qualities that are not easily imbued in statuary or on coinage. The fact that these qualities are so easily seen by even the most casual observer undoubtedly accounts for the continued popularity of Saint-Gaudens’ coinage, especially the High Relief twenty dollar, the closest American coinage has come to sculpture in coined form. This particular coin fully displays that sculptural quality with the figures of Liberty and the eagle prominently raised from the curvature of the fields. Numerous small, but individually insignificant abrasions are scattered across each side, accounting for the grade. The bright surfaces show just a hint of greenish patina. Fully struck, of course. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS62
High Relief, Wire Rim

- 3256** 1907 High Relief, Wire Rim MS62 PCGS. The December 1907 issue of *The Numismatist* addressed protests in the newspapers concerning the removal of “In God We Trust” from the new High Relief twenty dollar gold pieces designed by Augustus Saint-Gaudens. The author disagreed with the protests, arguing that the motto was introduced at a time of great national crisis and was inappropriate during peacetime:

“Forty odd years of peace, growth, and corporation building puts a different aspect on the case, and places us indifferent of celestial influences. Take out the twenty centuries old eagle of Egypt and ‘E Pluribus Unum’ from the reverse of the new coin and in their places put a modern first class battle ship and the legend ‘In Our Navy We Trust.’ Then we will have something strictly up to date and distinctly Rooseveltian.”

Nautical motifs aside, the coins are “distinctly Rooseveltian” in character, for both their impressive High Relief detail, and their overt symbolism is strongly tied to the sense of American progressivism around turn of the century. Today, examples are prized for exactly that: their beauty and historical significance. This example has rich, satiny mint luster and minimal contact marks that are widely scattered over each side and individually insignificant. Fully struck central design elements add to the outstanding eye appeal. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS63

An Ancient Greek Figure of Nike

Adapted to Modern Coinage

PROOF HIGH RELIEF DOUBLE EAGLE

1907 High Relief Twenty, PR61

Struck From an Ultra High Relief Collar

3257 1907 High Relief, Wire Rim MS63 PCGS. CAC. It was President Theodore Roosevelt who challenged sculptor Augustus Saint-Gaudens to redesign American coinage along the lines of the artistry and high relief seen in coins from ancient Greece. Saint-Gaudens had commissions years into the future, but with some reluctance he accepted Roosevelt's request (how could he say no to the president?). Both men knew something about the coins of ancient Greece, and just in case Saint-Gaudens overlooked anything of importance the president sent the sculptor a book with numerous plates of ancient Greek coins. Saint-Gaudens grasped the essential as well as the more subtle aspects of coinage from Hellenistic times. Greek city-states had a rivalry between them, not only in how to express their wealth, but also in how to best demonstrate their artistic talent and commemorate victories. Coinage was the logical way to spread the news of such victories, and a high degree of artistic excellence was used to do so. The goddess Nike was a common figure on Greek coinage, a figure used to crown the victories of athletes and kings. This familiar, emotive symbol was a familiar one to Augustus Saint-Gaudens, who adapted the Nike of Samothrace at the top of the Grand Staircase in the Louvre to the figure of Liberty leading General Sherman and later Liberty (Nike) striding into the new 20th century. This Select example displays bright surfaces and a full strike in all areas with no obvious or detracting evidence of coin-to-coin contact. NGC ID# 26F2, PCGS# 9135

3258 1907 High Relief PR61 NGC. Proof High Reliefs are one of the most divisive issues in U.S. numismatics. Generally opinion falls into either the "yes" or "no" categories with little uncertainty or middle ground allowed by either side. PCGS is obviously in the "no" camp as they do not certify proof High Reliefs, and NGC is obviously in the "yes" camp as they have graded more than 250 High Reliefs as proofs. Among the determinants for proofs, according to NGC, is a "distinctive texture and satiny luster" according to Scott Schechter, but more specifically it was the use of the collar that was used to strike the Edge 3 Ultra High Reliefs in March-April 1907 and again on December 31 of that year. The distinctive characteristics of this edge collar are detailed in our recently published *Saint-Gaudens Double Eagles* reference. Three pages of enlarged photos show the die characteristics of this collar. Unfortunately, this particular coin was encased in an older NGC holder that grips the edge tight and does not allow viewing of the edge. The PR61 designation is derived from careless handling that resulted in light hairlines and a long, angling scratch in the left obverse field. The surfaces are otherwise bright with an even reddish patina. NGC ID# 28AX, PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1911-D Twenty Dollar, MS66+
Seldom Seen This Fine

- 3259** 1911-D MS66+ PCGS. 30th Anniversary Green Label Holder. The 1911-D Saint-Gaudens double eagle is available in MS66, but finer pieces — especially those in PCGS holders — are rare. This Premium Gem is one of just 31 Plus-graded coins that stand apart from their peers as particularly fine for the grade. Sharpness is outstanding on the torch and Liberty's fingers, and both sides are radiantly lustrous. The bright yellow-gold surfaces are largely unabraded. PCGS lists 10 finer representatives (5/19). NGC ID# 26FK, PCGS# 9158

1924-D Double Eagle, MS64+
Semikey Mintmarked Issue
Rare Any Finer

- 3260** 1924-D MS64+ PCGS. CAC. The 1924-D remains a prime Saint-Gaudens rarity in high Uncirculated grades, despite an infusion of lesser Mint State pieces from various small hoards and isolated European repatriates that give the 1924-D a reputation for availability among other "elite" mintmarked Saints. President Roosevelt's Gold Recall eliminated nearly the entire 3 million+ mintage, although perhaps 1,200 or so pieces survive in all grades.

This Plus-graded and CAC-endorsed near-Gem stands head and shoulders above most 1924-Ds. Vibrantly lustrous, orange-gold surfaces display a sharp strike and only a few isolated, tiny ticks. The frosted surfaces appear smooth and crisply detailed in-hand, with only a touch of weakness at the Capitol dome. Just a dozen coins are certified numerically finer at PCGS. Population: 13 in 64+, 12 finer. CAC: 15 in 64, 3 finer (5/19). NGC ID# 34VF, PCGS# 9178

1926-S Double Eagle, Scarce MS65

3261 1926-S MS65 PCGS. This former rarity is now thought to exist to the extent of a couple thousand coins. Most of those survivors fall within the MS62 to MS64 range, while Gems are legitimately scarce. Of the 2 million 1926-S double eagles minted, perhaps 60 pieces exist in MS65 or better condition. For the past few years, appearances of such coins have taken place at the anemic rate of one or two per year.

Frosty mint luster washes over luminous, minimally marked peach-gold surfaces. A few coppery alloy spots appear on the obverse. Strike detail is good. A die crack travels through the beak down to the rays. Population: 40 in 65 (2 in 65+), 4 finer (6/19). NGC ID# 26GF, PCGS# 9185

1927 Double Eagle, MS66

3262 1927 MS66 PCGS. A splendid peach-gold Premium Gem. Lustrous and sharply struck with exemplary surfaces. Tiny gray flecks are noted on the left obverse, near the top of the rays. The obverse is minutely die doubled, evident on the designer's monogram. NGC ID# 26GG, PCGS# 9186

1929 Twenty Dollar, MS63
Late-Series Key, Scarce in All Grades

3263 1929 MS63 PCGS. Recent research by Roger Burdette in the reference work *Saint-Gaudens Double Eagles*, suggests that about 350 1929 double eagles survive. Most of the nearly 1.8 million-coin mintage never left Mint custody and was melted down in the 1930s. Burdette records the transfer of 1,000 coins to the Treasury, which were one source of coins paid out to individually collectors and other requestors. Some coins were also released through the Philadelphia Mint Cashier.

As with the other late-series Saints, the 1929 was not recognized as a rarity until the Gold Recall of 1933, when collectors realized how few coins had escaped the Mint. Most survivors are in Mint State, as the issue never circulated to a meaningful extent, and the typical grades of coins offered at auction are MS63 and MS64. Although finer pieces exist for the patient and well-heeled collector, attractive mid-level pieces are ideal for most collecting purposes. The present coin, housed in a green label MS63 holder, is much more eye-appealing than the grade suggests. Frosty, luminous butter-gold surfaces yield bold design elements and remarkably few abrasions, particularly on the obverse, where the fields are virtually flawless and little contact is visible on the high points of Liberty's figure. NGC ID# 26GL, PCGS# 9190

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67
Just 24,214 Coins Distributed

- 3264 1893 Isabella Quarter MS67 PCGS.** Issued in conjunction with the World's Columbian Exposition in Chicago, the 1893 Isabella design is the sole quarter denomination in the classic commemorative series, which runs from 1892 to 1954. High-grade examples are always in high demand among commemorative specialists. This frosted and richly lustrous Superb Gem excels in both surface quality and eye appeal, with colorful border toning around brilliant, frost-white centers. The strike is needle-sharp on the obverse portrait and the reverse distaff, strand of wool, and spindle. Population: 56 in 67 (7 in 67+), 7 finer (6/19). NGC ID# BYJ9, PCGS# 9220

1900 Lafayette Dollar, MS65+
Sharp, Satiny Type Coin

- 3265 1900 Lafayette Dollar MS65+ PCGS.** CAC. DuVall 1-B. The pick-up points for DuVall 1-B are the position of the branch in relation to the date and a tiny die dot on the second L in DOLLAR. The first bottom leaf of the branch points between the 19. Lafayette dollars were struck in December 1899. The small 1900 date on the reverse refers to the erection of the Lafayette memorial statue in Paris, France. This high-end Gem example of the commemorative coin is well-struck and satiny with a dusting of lilac and olive toning on each side. There are no distracting abrasions. NGC ID# BYKW, PCGS# 9222

1937 Antietam Half Dollar, MS68
Among the Finest at PCGS and CAC
Attractive Tab Toning

- 3266 1937 Antietam MS68 PCGS.** CAC. Congress authorized the coinage of 50,000 Antietam half dollars, although the majority of that coinage was later melted as unsold. Only 18,028 pieces were distributed (including assay coins). This commemorative is now popular with collectors, although top-grade examples are decidedly rare. Offered here is a CAC-approved MS68 coin. None are finer at PCGS or CAC (5/19). The central obverse is brilliant, while the borders display deep amber and crimson tab toning. The reverse has similar color, although olive-gold toning covers the center. Population: 25 in 68 (4 in 68+), 0 finer. CAC: 17 in 68, 0 finer (5/19). NGC ID# BYF4, PCGS# 9229

1936-S Columbia Half Dollar, MS68
Colorful Border Toning

- 3267 1936-S Columbia MS68 PCGS.** CAC. Columbia, South Carolina sesquicentennial halves were struck at all three mints for a single year. The distribution of the 1936-S was virtually identical to the 1936-D: 8,000 circulation strikes plus a handful of coins for assay. Frosty, minimally toned interiors merge with pastel toning at the rims, including shades of magenta, orange, yellow, green, and blue. Population: 14 in 68 (2 in 68+), 0 finer. CAC: 8 in 68, 0 finer (5/19). NGC ID# BYGE, PCGS# 9293

1922 Grant Half Dollar, MS66
Scarcer With Star Variant

- 3268 1922 Grant With Star MS66 PCGS.** Only 4,256 Grant Memorial half dollars were distributed in 1922 with an incuse star in the obverse field above GRANT. This issue is significantly scarcer than the No Star variant, whose distribution reached 67,405 pieces. Surviving Star coins are scarce in MS66 and rare finer. The central obverse of this piece and nearly the entire reverse are brilliant, with shades of crimson, golden-orange, and forest-green appearing in the obverse margins. There are only five finer examples at PCGS (5/19). NGC ID# BYPP, PCGS# 9307

1921 Missouri Half Dollar, MS67
Tied for Finest Certified

3269 1921 Missouri MS67 NGC. Struck to commemorate the 100th anniversary of Missouri's statehood, the 1921 Missouri Centennial half dollar claims an estimated distribution of 20,800 pieces. Two varieties of the issue were struck, one with the incuse inscription 2★4, to symbolize Missouri's status as the 24th state, and a "Plain" variety, with no inscription. The two varieties are about equally available in an absolute sense, but the "Plain" version is known in higher grades.

This spectacular "Plain" Superb Gem is tied with three other coins at NGC for the title of finest certified at either of the leading grading services, regardless of variety (6/19). The design elements are sharply detailed and the impeccably preserved surfaces are lustrous and appealing. Attractive shades of lavender and greenish-gold toning enhance the terrific eye appeal. NGC ID# BYH2, PCGS# 9330

1920 Pilgrim Tercentenary Half, MS67+
Incredible Eye Appeal

3270 1920 Pilgrim MS67+ PCGS. CAC. Sharply struck with an intense speckling of orange and tan-brown toning, this high-end Superb Gem Pilgrim ranks among the top two dozen pieces known. Vibrant mint luster penetrates the comprehensive toning, illuminating the rich coloration while revealing glimpses of sparkling silver surfaces that lie beneath the dramatic patina. The PCGS Plus designation and CAC endorsement confirm the spectacular eye appeal and needle-sharp strike. Population: 65 in 67 (14 in 67+), 2 finer. CAC: 25 in 67, 0 finer (6/19). NGC ID# BYHR, PCGS# 9359

COMMEMORATIVE GOLD

1904 Lewis and Clark Gold Dollar, MS66+
Glowing Frosty Surfaces

3271 1904 Lewis and Clark Gold Dollar MS66+ PCGS. This is the slightly more collectible Lewis and Clark gold dollar issue compared to the 1905. Nevertheless, examples are scarcely seen as fine as this glowing yellow-gold Premium Gem awash in frosty mint luster. The typical areas of die erosion are present in the fields on each side, but there are no abrasions to report. PCGS counts 29 higher grading events (6/19). NGC ID# BYLE, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS66+
Lustrous and Sharply Detailed

3272 1904 Lewis and Clark Gold Dollar MS66+ PCGS. CAC. The 1904 Lewis and Clark gold dollar claims a distribution of 10,025 pieces, making it more available than its 1905 counterpart. This Plus-graded Premium Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is terrific. PCGS has graded 29 finer examples (6/19). NGC ID# BYLE, PCGS# 7447

MODERN BULLION COINS

1995-W Silver Eagle
PR70 Ultra Cameo

- 3273** 1995-W Silver Eagle PR70 Ultra Cameo NGC. A brilliant and flawless specimen that demonstrates unsurpassable contrast between the glassy fields and icy devices. A full strike adds to the immense quality. The 1995-W was a special proof issue to commemorate the 10th year of the silver eagle program. Unlike the 1995-P proof, which could be individually purchased from the U.S. Mint at a modest cost, the 1995-W was only available as part of a five-piece set with the four denominations of proof gold eagles. Most silver eagle collectors boycotted the issue, and mintages amounted to only 30,125 pieces. Prices promptly climbed, and the 1995-P became the key to the silver eagle series, a status it still holds today despite additional special issues over the years, and a scarce muling of a 2008-W obverse with a Reverse of 2007. NGC ID# CFWX, PCGS# 9887

1995 Quarter-Ounce Gold Eagle, MS70
Rare Top-Grade PCGS Coin

- 3274** 1995 Quarter-Ounce Gold Eagle MS70 PCGS. The 1995 quarter-ounce Gold Eagle is scarce in certified MS70 condition, which is the essential grade for Registry Sets. Particularly rare are coins in PCGS holders. This example displays flawless yellow-gold mint luster and finely textured, satiny surfaces. PCGS lists only 23 submissions this fine (6/19). NGC ID# 26MB, PCGS# 9890

TERRITORIAL GOLD

A. Bechtler Gold Dollar, MS62
K-24, 27G., 21C.

- 3275** (1842-1850) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 PCGS. K-24, R.3. Orange-rose shades enrich this lovely and evenly struck Bechtler type coin. Magnified examination fails to locate noticeable contact, but a thin line is present on the denomination side border between 1 and 6 o'clock. The fields are semiprooflike and attractive. The Plain Edge variant is the most often seen for this issue, ideal for type collectors. Listed on page 399 of the 2020 *Guide Book*. Population: 13 in 62, 7 finer (5/19). NGC ID# 2B99, PCGS# 10040

**1852 Humbert Octagonal Fifty, AU50
Reeded Edge, 887 Thous., K-11**

- 3276 1852 Humbert Fifty Dollar, Reeded Edge, 887 Thous., AU50 NGC. K-11, R.5.** Kagin-11 is the final octagonal fifty issued by the U.S. Assay Office of Gold under the direction of Moffat & Co., with the legend AUGUSTUS / HUMBERT / UNITED / STATES / ASSAYER / OF GOLD / CALIFORNIA / 1852 encircling the eight-sided margin. On subsequent issues (under Curtis, Perry & Ward), wording was changed to: UNITED / STATES / ASSAY / OFFICE / OF GOLD / SAN FRANCISCO / CALIFORNIA / 1852. Some other minor design changes were made upon the retirement of Moffat from the U.S. Assay Office in February 1852.

The Assay Office of Gold minted a vast number of fifty dollar pieces throughout 1852, but most were melted once the San Francisco Mint began producing Federal gold coins two years later. This is a splendid About Uncirculated K-11 example, with lemon-gold color and orange accents surrounding the eagle motif. The obverse has a few delicate hairlines and tiny marks, and the rims show some minor knocks, but luster lingers within the wings and legends, and the "target" reverse is especially sharp. Listed on page 402 of the 2020 *Guide Book*. NGC ID# ANKE, PCGS# 10217

CALIFORNIA FRACTIONAL GOLD

**1853 Liberty Octagonal Dollar
Extremely Rare BG-521
Mint State Details**

- 3277 1853 Liberty Octagonal 1 Dollar, BG-521, R.8 — Obverse Cleaned — NGC Details. Unc.** This M. Deriberpie early Period One variety is so rare that the Breen-Gillio Second Edition lists only two examples, and shows the soldered Jay Roe example as its plate coin. BG-521 shares an obverse die with BG-522, and a reverse die with BG-520. Without any die cracks evident, we can only speculate why so few have survived. The well struck and unmarked apricot-gold surfaces are slightly glossy from a mild cleaning. The sole example certified by NGC (6/19). NGC ID# 2BLK, PCGS# 10498

COINS OF HAWAII

**1883 Hawaii Dollar, MS64
Gold and Gunmetal-Blue Toning**

- 3278 1883 Hawaii Dollar MS64 PCGS. CAC.** The mintage of 500,000 coins for the 1883 Hawaiian silver dollar is misleading. Many of those pieces struck at the San Francisco Mint were eventually melted, and coins this well-preserved are scarce and in high demand by collectors of Hawaiiana. Dappled olive-gold and gunmetal-blue toning covers each side with splashes of brilliance interspersed. Ticks are faintly visible beneath the original overlay, mostly on King Kalakaua's upper cheek. Population: 24 in 64 (3 in 64+), 22 finer. CAC: 9 in 64, 8 finer (5/19). NGC ID# 2TGD, PCGS# 10995

PATTERNS

1865 With Motto Half Dollar in Silver
Judd-429, PR66

- 3279 1865 Half Dollar, Judd-429, Pollock-502, Low R.7, PR66 PCGS. The obverse die is the traditional Liberty Seated design adopted for regular coinage in 1865. The reverse features the familiar perched eagle with scroll and motto above that was adopted for regular issues in 1866. Struck in silver with a reeded edge. Unlike previous years when With Motto coinage was produced, some of the 1865 halves may be actual transitional pieces. About a dozen examples are known in silver with a similar number in copper. Much original brilliance remains, especially on the reverse; while each side shows light blue and rose toning as well. Fully struck. NGC ID# 29JF, PCGS# 60614

1866 'Dutch' 5 Five Cents in Copper
Judd-490, PR67+★ Brown Cameo

- 3280 1866 Shield Five Cents, Judd-490, Pollock-578, Low R.7, PR67+★ Brown Cameo NGC. Shield design obverse, similar to that adopted, but with a smaller motto and date divided at the base of the shield. Knobbed or "Dutch" 5 inside a laurel wreath on the reverse. Struck in copper with a plain edge. The Brown designation should not deter bidders from this terrific pattern. The fields are deeply reflective, and even through the color the Cameo contrast is abundantly clear. Equally impressive is the two-toned, brown and blue patina on each side that is brightly backlit by the unfathomably deep mirrors. The surfaces are essentially defect-free. From The Bob Simpson Collection / ANA Signature (Heritage, 8/2010), lot 3712. NGC ID# 29KU, PCGS# 60686

1870 Seated Quarter in Copper
Judd-884, PR65+ Red

- 3281 1870 Quarter Dollar, Judd-884, Pollock-982, R.7, PR65+ Red PCGS. CAC. Liberty is seated facing left, supporting a shield with her right hand. Her left hand holds an olive branch. The obverse border has 13 stars, and the date is in the exergue. A free-standing Liberty pole is in the background. The reverse is from a regular-issue Liberty Seated quarter dollar die. Struck in copper with a reeded edge. Judd-884 is a great rarity in full Red, with only two pieces certified as such at PCGS, and this is the finest (5/19). This intricately struck, unabraded, and flashy Gem is primarily orange-red with a few scattered minute gray flecks. NGC ID# 29WS, PCGS# 81128

1875 Quarter Eagle in Copper
Judd-1434, PR64 Brown

- 3282** 1875 Quarter Eagle, Judd-1434, Pollock-1577, High R.7, PR64 Brown PCGS. Regular dies Coronet quarter eagle from 1875. Struck in copper with a reeded edge. Only four or five pieces are believed extant and a couple are gilt (for obvious reasons). There could be no legitimate reason to strike a quarter eagle in copper, so the inescapable conclusion is these were produced for sale to collectors. Another two or three pieces were struck in aluminum. This is a non-gilt piece, and while labeled Brown by PCGS, there is a surprising presence of original, yellow-red luster (although admittedly it is subdued). The fields are still brightly mirrored and this coin is fully struck. Housed in an old green label PCGS holder. NGC ID# 2ABV, PCGS# 61741

1882 Aluminum Liberty Nickel
Judd-1689, PR64

- 3283** 1882 Liberty Head Five Cents, Judd-1689, Pollock-1891, High R.7, PR64 PCGS. CAC. Similar to the adopted design of the 1883 No Cents nickel, with the addition of the motto IN GOD WE TRUST at the upper obverse border. The obverse stars are arranged seven left and six right. Struck in aluminum with a plain edge. Only six examples are believed known in aluminum with an additional two dozen estimated in nickel. The surfaces are bright and the fields highly reflective, as always with aluminum patterns, with the addition of frosted devices, another "as always" feature on aluminum pieces. Slightly hazy on each side. NGC ID# 2AKB, PCGS# 62094

EARLY PROOF SETS

1891 Four-Piece Silver Proof Set, PR64-PR66
All NGC Certified

- 3284** 1891 Four-Piece Silver Proof Set, PR64-PR66 NGC. All four coins are certified by NGC. The set includes:

Dime PR66. Design elements are sharp and fields are deeply reflective, under attractive shades of cerulean-blue and pale jade toning.

Quarter PR65. Sharply detailed and well-preserved, with mirrored fields and highlights of cerulean-blue, lavender-gray, and pale jade toning.

Half Dollar PR65+. This Plus-graded Gem exhibits sharply detailed devices and deeply mirrored fields, with highlights of cerulean-blue and sea-green patina.

Dollar PR64. Sharply detailed and lightly marked, with vivid shades of lavender-gray, cerulean-blue, and pale jade toning. Deeply reflective fields shine through the patina. (Total: 4 coins)

1902 Six-Piece Proof Set, PR65-PR66 All PCGS Certified

3285 1902 Six-Piece Proof Set, PR65-PR66 PCGS. All six coins are PCGS certified. This high-grade set includes:

Cent PR65 Red and Brown. CAC. Reddish-brown and blue coloration is seen over each side.

Nickel PR66. CAC. Bright and untuned with only slight contrast evident between the fields and devices.

Dime PR65. Deep mauve-gray toning covers each side, but at the right angle the proof mirrors flash through.

Quarter PR65. Deep sea-green and russet toning is scattered over each side with strong mirroring present in the fields.

Half Dollar PR66. CAC. The mirrored fields are especially bright and vibrant, made all the more apparent by the light toning present on each side.

Dollar PR66+. CAC. Deep blue-gray toning subdues the proof mirrors on the obverse, except around the outermost rim. The reverse, however, is rose colored the the reflectivity fully flashes through the patina. (Total: 6 coins)

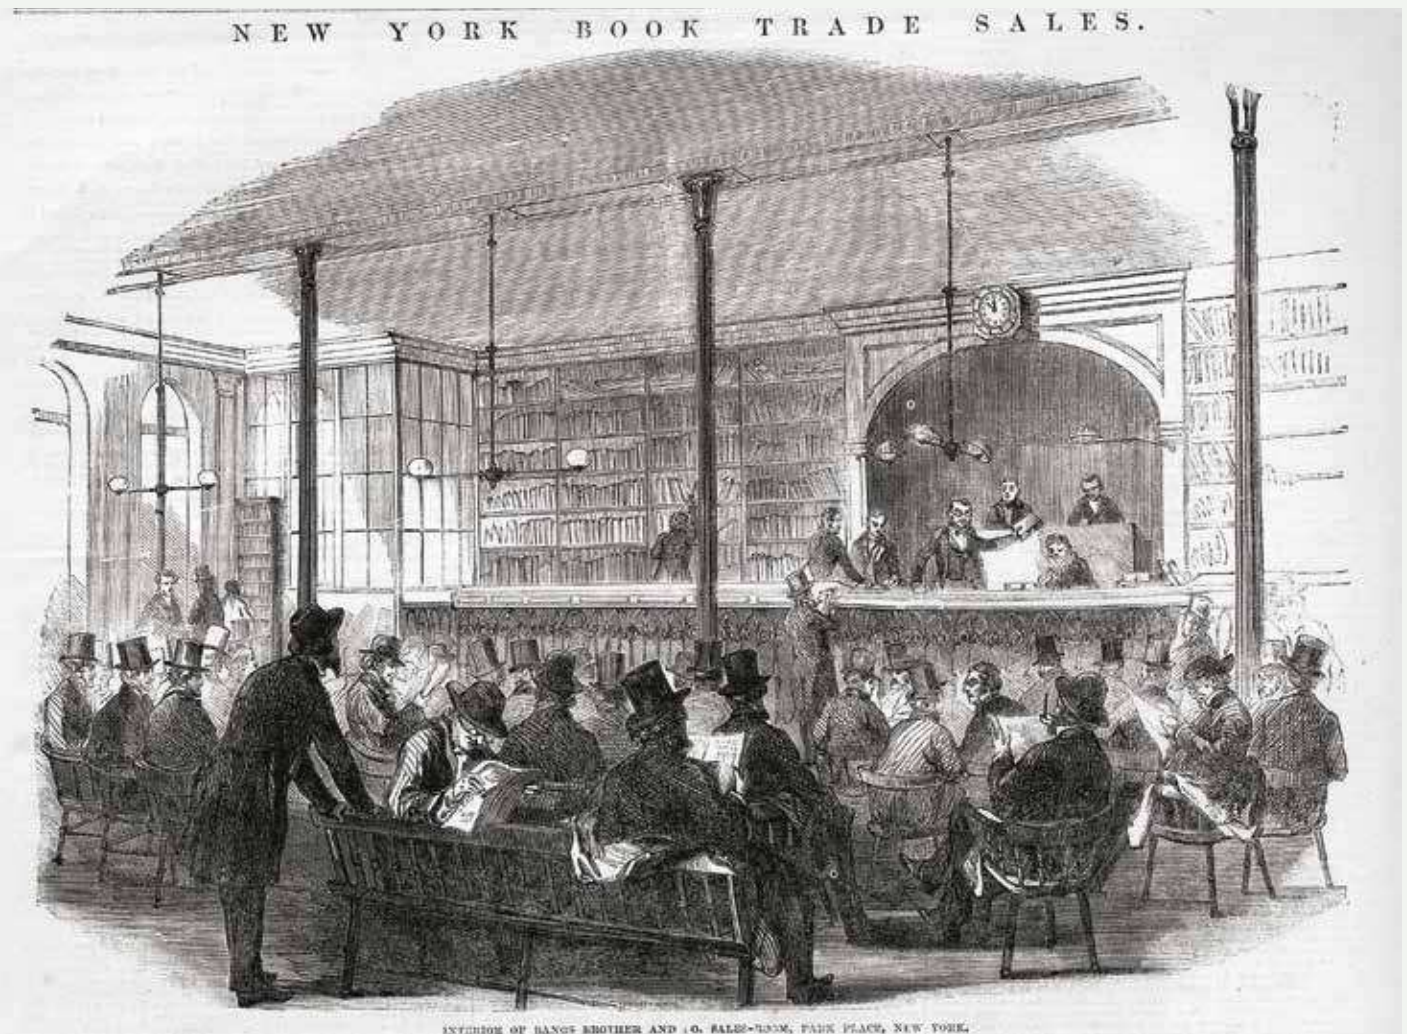

INDIAN PEACE MEDAL

Andrew Jackson Indian Peace Medal
Silver, XF Details, Julian-IP-16

3286 1829-Dated Andrew Jackson Indian Peace Medal, Silver — Rim Damage, Cleaned — NGC Details. XF. Julian-IP-16. 51 mm. The first reverse, with the leftmost finger pointing to the F in FRIENDSHIP. A replacement reverse die was made in 1846, which shows that finger pointing to the letter R. J-IP-16 was the smallest size of the three sizes, intended for Indian chiefs of lesser importance. The variety is rare in both silver and bronzed copper, though the bronze examples tend to appear in higher grades, since they were acquired by collectors. The silver pieces were issued holed to Native Americans, who wore them to demonstrate their recognition by the Federal government. The silver medals are generally encountered in worn condition, often with problems. The present specimen is mildly glossy, and has lumpy rims from edge knocks, but will be welcomed by specialists of the Indian Peace medal series.

End of Session One

SESSION TWO

COLONIALS

1787 Massachusetts Cent, MS62 Brown Scarce Ryder 4-C

- 3287** 1787 Massachusetts Cent, Arrows in Left Talon, MS62 Brown NGC. Ryder 4-C, W-6100, Low R.4. A glossy medium brown commonwealth copper. No marks are more than incidental, and the high points show only slight blending. The "Bowed Head" Ryder 4-C is a somewhat better variety, identified by die flaws near the W in WEALTH and the M in MASSACHUSETTS. Listed on page 61 of the 2020 *Guide Book*. NGC ID# 2B25, PCGS# 302

1785 Nova Constellatio Copper, MS63 Brown Pointed Rays, Large Date, Crosby 3-B

- 3288** 1785 Nova Constellatio Copper, Pointed Rays, Large Date, MS63 Brown NGC. Crosby 3-B, W-1895, R.2. Crosby-3 represents one of the more collectible Nova Constellatio copper varieties. This Select Uncirculated example is in a typically late die state with heavy rust lumps throughout the obverse. Both sides are smooth with areas of appealing mahogany-brown and golden-orange color. A popular colonial type. Listed on page 56 of the 2020 *Guide Book*. Census (all Pointed Rays, Large Date varieties): 2 in 63 Brown, 5 finer (5/19). NGC ID# 2AZ3, PCGS# 813

HALF CENTS

- 3289** 1793 C-3, B-3, R.3, Fair 2 NGC. CAC. Although well-worn, this is a charming example with remarkably problem-free medium brown surfaces. Most of the legends can be discerned beneath a strong light. The top half of the date is clear. A single-year type coin struck during the first year of U.S. Mint coinage. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

1793 C-4 Half Cent, Good 4 Appealing for the Grade

- 3290** 1793 C-4, B-4, Low R.3, Good 4 PCGS. The legends, fraction, and date blend to the edges, and the coin shows heavy, smooth wear overall, but the surfaces are essentially problem-free. Pleasing chocolate-brown color has a slight reddish tinge, and spreads evenly across both sides. Numerous light marks and abrasions are visible under magnification. The Cohen-4 variety has long stems and a short 7 in the date, although neither of those identifiers are particularly clear on this well-worn coin. Our EAC grade AG3. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

1793 Half Cent, VG8 C-4, Single-Year Type

- 3291** 1793 C-4, B-4, Low R.3, VG8 NGC. The first-year Liberty Cap half cent faces left, unlike its 1794 to 1797 successors. This mahogany-brown example appears to be sharper than the designated grade. Liberty's eye and the wreath berries are clear. The surprisingly unabraded surfaces are microgranular throughout. Certified in a circa-2000 holder. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

- 3292** 1794 High Relief Head, C-9, B-9, R.2, VG10 PCGS. The radial crack through the cap is present, but the holder makes impossible to confirm whether a die break is at 6:30 on the reverse. A pleasing representative with all legends sharp except for HALF CENT, which is nonetheless partly present. The walnut-brown surfaces exhibit only minor granularity. Our EAC grade VG7. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

- 3293** 1797 Plain Edge, 1 Above 1, C-1, B-1, R.2, VF30 PCGS. Manley Die State 2.0. Close inspection reveals a delicate vertical crack from the B in LIBERTY to the top of the portrait. This deep brown representative is only lightly abraded and shows minimal surface granularity. The upper reverse dentils are absent, but the rest of the design displays even wear. Most examples of the variety are in Very Good or lower grades. The midgrade half cent will please the devoted specialist. Our EAC grade VF20. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

**1802/0 Half Cent, Fine 12
Reverse of 1802, C-2**

- 3294** 1802/0 Reverse of 1802, C-2, B-2, R.3, Fine 12 PCGS. Manley Die State 2.0, struck before the obverse die was lapped to remove rust. Die States 1 and 2 have the curl left of the date closed with internal detail, while later die states have the curl open. The more available of two die pairs for the year, though it is still scarce in an absolute sense. This appealing Fine example has luminous chocolate-brown surfaces that show glimpses of violet and cinnamon. Each side is minimally marked for the amount of wear present. The central reverse shows weakness that is typical of nearly all known examples. Our EAC grade VG8. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

**1803 C-3, B-3 Half Cent, MS60 Brown
Later Die State**

- 3295** 1803 Widely Spaced 3, C-3, B-3, R.1, MS60 Brown NGC. Manley Die State 4.0. The obverse and reverse cracks are fully extended on this example from a late, but not the latest, die state. This lovely piece has pleasing chocolate-brown surfaces with a small patch of maroon patina in the left obverse field. Our EAC grade AU55. NGC ID# 222E, PCGS# 35134 Base PCGS# 1060

**1804 C-13, B-10 Half Cent, MS63 Brown
Plain 4, No Stems**

- 3296** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Brown PCGS. CAC. Manley Die State 2.0. Dentilation is absent on the obverse, and faintly visible from 12 o'clock to about 7 o'clock on the reverse. A pleasing Choice Mint State half cent, exhibiting lustrous light brown on the obverse, and mostly chocolate-brown on the reverse, with a crescent of lighter brown that matches the obverse. Our EAC grade MS60. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

**1806 Half Cent, MS62 Red and Brown
Large 6, Stems, C-4, B-4**

- 3297** 1806 Large 6, Stems, C-4, B-4, R.1, MS62 Red and Brown PCGS. Manley Die State 1.0. The wreath has stems, some recutting shows on the 6, and there is no berry below the first T in STATES, identifying the popular C-4, B-4 variety. This attractive MS62 example is well-centered and well-detailed, with a touch of softness on the leaves in the wreath. The lightly marked surfaces show a mix of light brown and original red patina, and significant amounts of original mint luster remain intact. Our EAC grade AU55. NGC ID# 222J, PCGS# 35201 Base PCGS# 1100

**1809/6 Half Cent, MS64 Brown
Cohen-5, 9 Over Inverted 9**

- 3298** 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS64 Brown NGC. Manley Die State 3.0. Tan and mahogany colors alternate across this well preserved late die state example. A pleasing piece for the copper specialist. The variety is not a true overdate, since the Draped Bust design was in use throughout 1806. Instead, the die sinker entered the final date digit upside down, recognized the error, and entered it again in the correct position. Our EAC grade MS60. Ex: Baltimore Signature (Heritage, 7/2003), lot 5113; Robert Bowling Collection / Central States Signature (Heritage, 5/2004), lot 5090, which realized \$1,552.50. NGC ID# CZEZ, PCGS# 35233 Base PCGS# 1126

- 3299** 1828 12 Stars, C-2, B-3, R.2, MS64 Brown NGC. Manley Die State 2.0. A smooth and lustrous chocolate-brown example with sea-green undertones. The borders display occasional russet freckles. Manley speculates that the customary 13th star was omitted for aesthetic reasons, instead of an engraver's oversight. The date was entered too far right, which would have been more obvious with the presence of a star near the hair curl. Our EAC grade AU55. NGC ID# 222W, PCGS# 35264 Base PCGS# 1150

**1828 C-3, B-2 Half Cent, MS65 Red and Brown
Scarce Early Die State**

- 3300** 1828 13 Stars, C-3, B-2, R.1, MS65 Red and Brown PCGS. Manley Die State 2.0 with Star 7 recut and a long spine from the leaf over the H in HALF. Rich orange surfaces have slight mellowing of the original mint color with delicate brown toning and myriad trivial spots on each side that fail to limit the numerical grade of this important half cent. This lovely piece is tied with nine others for the finest 13 Stars coin that PCGS has certified in Red and Brown, with two graded MS65 Red, and a single MS66 Brown graded numerically finer (5/19). Our EAC grade MS63. NGC ID# 222V, PCGS# 35262 Base PCGS# 1148

**1835 Half Cent, MS65 Red and Brown
C-1, B-1, The Usual Early Die State**

- 3301** 1835 C-1, B-1, R.1, MS65 Red and Brown PCGS. CAC. Manley Die State 1.0, with daggerlike die clashing visible at Liberty's lower throat and multiple clashing within the wreath. Intense blue and brown overtones temper orange mint luster that glows warmly from the margins. Our EAC grade MS60. Population (for all varieties): 30 in 65 Red and Brown, 1 finer. CAC: 21 in 65, 1 finer (6/19). NGC ID# 5LLC, PCGS# 35289 Base PCGS# 1169

**1835 Half Cent, MS64 Red
Popular C-1, B-1 Variety**

- 3302** 1835 C-1, B-1, R.1, MS64 Red PCGS. Manley Die State 1.0, with clash marks at the throat, from chin to nose and inside the wreath. The leaf pair below the left side of I in UNITED identifies the C-1, B-1 variety. This attractive Choice example displays sharply detailed design elements and well-preserved original red surfaces with a few microscopic specks of carbon on the reverse. Our EAC grade MS64. NGC ID# 2233, PCGS# 35290 Base PCGS# 1170

LARGE CENTS

**1793 Chain Cent, AG3
AMERICA, Sheldon-3**

- 3303** 1793 Chain, AMERICA, S-3, B-4, Low R.3, AG3 PCGS. A tan-brown example of the introductory cent type. The chain, denomination, and fraction are bold. AMERICA is sharp, LIBERTY is readable, the date is well worn, and UNITED STATES OF is faint. We note a minor rim bump at 5 o'clock, and a few light thin marks near 10 o'clock. The surfaces are slightly glossy but minimally granular. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1793 Wreath Cent, VG8
Medium Brown S-8, B-13 Variety**

- 3304** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VG8 PCGS. Medium brown with hints of olive-gray and tan-gold toning. All legends are fully legible except CENT, although many letters and digits are worn near the rim. Each side has a couple of thin marks, none of which distract. Essentially free from verdigris, unusual for the type and grade. Our EAC grade Good 4.
Ex: *Central States Signature* (Heritage, 4/2008), lot 65; *Central States Signature* (Heritage, 4-5/2016), lot 3057. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

**1793 S-10 Cent, VF Details
Constant Obverse Die Defect**

- 3305** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4 — Obverse Repaired — NGC Details. VF. The defect at the obverse border at 3 o'clock is characteristic of the S-10 die marriage and is found on all known examples. This piece has smooth surfaces that are the result of light obverse tooling or smoothing. Close examination reveals tooling marks on the obverse and reverse rims, along with a few well-blended scrapes on the reverse. Both sides have pleasing mahogany-brown color and excellent eye appeal. Our EAC grade VG7.

- 3306 1793 Wreath, Vine and Bars Edge, S-11a, B-16a, High R.4, Good 4 PCGS.** A nicely defined example of the middle first-year cent design. The legends are mostly readable, though the fraction and parts of OF AMERICA are faint. The medium brown surfaces show occasional granularity. The early die state without clash marks near the profile. Housed in a green label holder. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 35465 Base PCGS# 1347

**1793 Wreath Cent, VF Details
S-11c, Lettered Edge**

- 3307 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Environmental Damage — PCGS Genuine. VF Details.** A well-defined deep mahogany brown first-year cent. All legends are bold except for the fraction. The portrait shows plenty of hair detail, and the wreath berries are distinct. A hair-thin horizontal mark is noted beneath Liberty's eye, the reverse has a minor rim bump at 7:30, and the obverse is lightly granular with flaking near the date. Our EAC grade VG8.

- 3308 1794 Head of 1794, S-22, B-6, R.1, VF20 PCGS.** The familiar Mounds Reverse variety, identified by a rising field on the reverse near the upper right portion of the wreath. This is a mahogany-brown cent with olive-green toning on the portrait high points. The surfaces are minutely granular and display occasional slender marks. STATES OF is weak, as made. Certified in a green label holder. Our EAC grade Fine 12.
Ex: ANA Signature (Heritage, 8/2014), lot 3079, which realized \$1,762.50. NGC ID# 223P, PCGS# 35531 Base PCGS# 901374

**1799/8 S-188, B-2 Cent, VG Details
Important Overdate Variety**

- 3309 1799/8 S-188, B-2, R.4 — Corrosion — NGC Details. VG.** Finely granular surfaces have deep-brown fields and steel-gray devices for a cameolike appearance, with the generally bold legends and motifs benefiting from the contrast. Microporosity earns the NGC net grade but does not significantly hamper the overall definition of this key date cent. Our EAC grade Good 5.
- 3310 1812 Large Date, S-288, B-3, R.2, AU50 NGC.** Breen Die State III, clashed and flowlined. This burgundy-brown example has generally smooth surfaces with partial luster in the fields. Wear on the devices is light and eye appeal is pleasing. A suitable Classic Head type coin. Our EAC grade VF30. NGC ID# 224W, PCGS# 36505 Base PCGS# 1564

- 3311 1828 Large Narrow Date, N-2, R.2, MS62 Brown PCGS.** Die State A. N-2 shows the BER in LIBERTY recut. This Mint State example displays a bold strike and satiny olive-brown patina. Grade-limiting abrasions are trivial and invisible without a loupe. A pleasing lower-end Mint State Matron Head type coin. Our EAC grade XF45.
Ex: Long Beach Signature (Heritage, 6/2016), lot 3059, which realized \$1,292.50; Dallas Signature (Heritage, 3/2018), lot 3348, which realized \$1,380. PCGS# 36877 Base PCGS# 1654

- 3312 1843 Petite Head, Large Letters, N-4, R.1, MS64 Brown PCGS.** Grellman Die State a. The lump under right base of 1 is clear, as are the lines from dentils near star 12. This transitional variety combines the Petite Head motif with the new Large Letters reverse in a sole die marriage of the type for 1943. This is a sharply struck early die state to represent the N-4 variety, with deep, reddish-brown surfaces and pale-gold at the reverse rim. A few tiny flecks are seen on each side, along with some patchy granularity near E of ONE and below NT of CENT. Our EAC grade MS64. Population: 5 in 64 Brown, 3 finer (6/19). NGC ID# 2269, PCGS# 403922 Base PCGS# 1847

- 3313 1850 N-7, R.2, MS66 Red and Brown NGC.** Grellman Die State b, with a number of nice Mint State examples known, such as this Premium Gem that has full mellow red color, changing to light brown at the outer borders. This is an excellent example for a type collection. Our EAC grade MS65. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

- 3314 1853 N-25, R.1, MS66 Red and Brown PCGS.** Grellman Die State b. The high points and open fields are cobalt-blue, while peach-red occupies protected regions. Only unimportant imperfections emerge beneath a loupe. A few star centers are incomplete, and portions of the wreath show blending opposite Liberty's shoulder. Our EAC grade MS64. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

- 3315 1856 Slanted 5, N-3, R.1, MS65+ Red and Brown PCGS. CAC.** Grellman Die State e. Lengthy die cracks on both sides allow ready attribution. A sharply struck and virtually unabraded Gem with distributed minute carbon and attractive eye appeal. Fire-red outlines design elements and is more prominent on the reverse. Open areas are gunmetal-blue. Our EAC grade MS63. PCGS# 406201 Base PCGS# 1923

FLYING EAGLE CENT

**1857 Flying Eagle Cent, MS65
First Year of Regular Issue**

- 3316 1857 MS65 PCGS.** Soft mint luster issues from tan-gold surfaces. Each side is incompletely struck from clashed and cracked dies, but there are virtually no marks to report on this Gem Flying Eagle cent from the first year of regular issue. While nearly 17.5 million coins were minted, only 23 examples are graded numerically finer at PCGS (5/19). NGC ID# 226P, PCGS# 2016

INDIAN CENTS

1860 Cent, MS66+ Radiant Copper-Nickel Type Coin

- 3317 1860 MS66+ PCGS. CAC.** On another day, this Plus-graded Premium Gem might have been considered for an even finer grade, although there is a tiny mark on Liberty's eyebrow and a small speck near the 1 in the date. Even so, CAC recognition is wholly warranted. The lowest headdress feathers are a touch weak at the tips, but there are no other points of strike deficiency. Luster is frosty and untouched. Rich tan-gold color includes wisps of yellow around the borders, adding to the already exceptional aesthetic merit. Population: 63 in 66 (9 in 66+), 11 finer. CAC: 26 in 66, 5 finer (5/19). NGC ID# 227F, PCGS# 2058

- 3318 1862 MS66+ PCGS. CAC.** An intricately detailed, high-end Premium Gem with CAC endorsement. A blend of peach-gold, copper-orange and light rose colors adorn each side. The reverse die is shattered, showing numerous cracks throughout the wreath. PCGS lists only 14 finer 1862 Indian Head cents (5/19). NGC ID# 227H, PCGS# 2064

1863 Cent, MS66+ Copper-Nickel Type Coin

- 3319 1863 MS66+ PCGS.** The 1863 is one of the most plentiful copper-nickel Indian cent issues, although examples are scarce in Premium Gem condition and nearly uncollectible finer. This Plus-graded coin is tied for the finest at PCGS (6/19). It is razor-sharp and virtually flawless aside from some unobtrusive pepper specks in the upper right reverse quadrant. Lovely rose-gold hues adorn the centers, ceding to richer peach-orange margins. Population: 98 in 66 (35 in 66+), 0 finer (6/19). NGC ID# 229D, PCGS# 2067

- 3320 1870 Shallow N, FS-901, MS65 Red and Brown PCGS. CAC.** Some 1870 Indian cents are from a hub with the N in ONE lightly entered at the bottom, and coins from these dies are scarce. This Gem Red and Brown coin displays a bold strike and satin luster. Original copper-orange luster enlivens the fields, with areas of chestnut and burgundy toning that earn the Red and Brown designation. NGC ID# 227U, PCGS# 408018 Base PCGS# 2098

- 3321 1873 Open 3 MS65 Red PCGS.** The second of two date variants for this year, the 3 is noticeably wider on the left side than the Closed 3 variety. Early Indian cents are challenging to locate with intact mint color, and this piece displays bright yellow-tinged red mint luster. A bit softly struck on the tips of the feathers in the headdress. Population: 27 in 65 (1 in 65+) Red, 6 finer (6/19). NGC ID# 227Y, PCGS# 2108

1873 FS-101 Cent, AU50 Famous Doubled LIBERTY

- 3322 1873 Doubled LIBERTY, Snow-1, FS-101, AU50 PCGS.** Listed on page 117 of the 2020 *Guide Book*, the FS-101 Doubled LIBERTY ranks among the best known and most valuable die varieties of the Indian cent series. Only the 1888/7 is considered more desirable. The present tan-brown example displays dramatic die doubling on LIBERTY, as well as Liberty's eye and the spines of headdress feathers. Circulation wear is minimal, though we note unobtrusive obverse field marks near UNITED and the AM in AMERICA. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

1877 Cent, AU58 Attractive Key-Date Survivor

- 3323 1877 AU58 NGC.** The low mintage of just 852,500 pieces stands in stark contrast to the huge, multimillion-piece mintages of the surrounding years, giving the 1877 a cachet no other Indian cent enjoys. This is a glossy, near-Mint State example, with pleasing deep-brown color and minor marks from the brief time in circulation. The central strike is sharp, while the peripheries are not quite as well-struck (as typical for the issue). NGC ID# 2284, PCGS# 2127

1877 Indian Cent, MS62 Brown Old Green Label Holder

- 3324 1877 MS62 Brown PCGS.** A deep brown example of this low-mintage key. Only the most inconsequential marks are present, although the strike is slightly soft on the date, shield, and shoulder. A couple of shallow mint-made strike-throughs reside on the left obverse field. Encased in an old green label holder. Ex: *Dallas Signature (Heritage, 10/2006)*, lot 182, which realized \$3,220. NGC ID# 2284, PCGS# 2127

3325 1894 MS66 Red PCGS. Eagle Eye Photo Seal, card included. This lustrous high-grade cherry-red cent is essentially unabrased. Perusal beneath a lens reveals only minute and infrequent carbon. The centers exhibit subtle olive-green hues. Population: 41 in 66 (9 in 66+) Red, 1 finer (5/19). (Total: 2 coins) NGC ID# 228N, PCGS# 2189

3326 1894 MS66 Red PCGS. Sharply detailed throughout, the mint luster is full red but there is a slight variance in hue from obverse to reverse. A few light speckles of carbon can be seen on each side. Significantly scarcer in this grade than post-1900 dates. Population: 41 in 66 (9 in 66+) Red, 1 finer (6/19). NGC ID# 228N, PCGS# 2189

3327 1903 MS66+ Red PCGS. CAC. The mint red luster is thick over both sides and undimmed by the passage of 116 years. Well-struck throughout with no detracting abrasions or spots. NGC ID# 228Y, PCGS# 2216

3328 1903 MS66+ Red PCGS. CAC. Booming luster and a bold strike attest to the quality of this high-grade olive-green and orange-gold cent. Inspection beneath a loupe locates only minuscule carbon. The fields exhibit an orange-peel texture, characteristic of long-in-use dies. As of (5/19), PCGS has certified 14 coins as MS66+ Red, with only 13 finer. NGC ID# 228Y, PCGS# 2216

3329 1909-S MS65 Brown PCGS. The 1909-S Indian cent has a lower mintage than any Lincoln business issue, even the famous 1909-S VDB. The present mark-free Gem has a steel-gray center and a variegated russet-brown border. The strike is crisp except on the upper headress feather tips. NGC ID# 22B4, PCGS# 2238

PROOF INDIAN CENTS

3330 1859 PR64 PCGS. From a first-year mintage of 800 pieces, this attractive Choice proof exhibits sharply detailed design elements throughout. The well-preserved copper-red and honey surfaces include hazily reflective fields on the obverse. PCGS has graded 88 numerically finer examples (5/19). NGC ID# 2299, PCGS# 2247

1864 Copper-Nickel Cent, PR66 Cameo Exceptional Quality

3331 1864 Copper-Nickel PR66 Cameo PCGS. Proof examples of the 1864 copper-nickel cent are struck from slightly rotated dies. Rick Snow adds: "The quality of this issue is typically exceptional, with deep mirrors and cameo devices relatively easy to locate." Coins this fine are scarce, while finer examples are conditionally rare. A rich copper-orange hue dominates each side. The mirrored fields and razor-sharp motifs deliver eye-catching contrast. Population: 11 in 66 Cameo, 1 finer in this category (5/19). NGC ID# 229E, PCGS# 82265

3332 1866 PR65 Red Cameo PCGS. Bright golden-red is seen over each side of this deeply reflective proof, and there is an area of deeper crimson-red in the center of the obverse. The devices are pleasingly frosted, a bonus that provides a strong cameo contrast over the splendidly preserved, glassy surfaces. A few minute lint marks and a couple of planchet flakes are noted in the right obverse field. Population: 9 in 65 (1 in 65+) Red Cameo, 4 finer (5/19). NGC ID# 229J, PCGS# 82287

1867 Indian Cent, PR65 Red Rare Cameo Example

3333 1867 PR65 Red Cameo PCGS. The 2020 *Guide Book* estimates the mintage of 1867 proof Indian cents at 850-1,100 examples and examples in PR65 condition, with the Red designation, are decidedly rare. This delightful Gem proof exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The well-preserved surfaces show some diagonal streaks in the original red patina. Population: 8 in 65 Red Cameo, 3 finer (6/19). NGC ID# 229K, PCGS# 82290

1871 Cent, PR66 Red and Brown Among the Finest at PCGS

3334 1871 PR66 Red and Brown PCGS. Tightly packed speckles of bluish-brown and brick-red patina mellow the fire-orange surfaces of this softly reflective Premium Gem proof. The strike is needle-sharp. This is a Bold N reverse, although the 1871 proofs come with both Shallow N and Bold N reverses. Just 960 proofs were issued. Neither PCGS nor NGC show any proofs finer than the PR66 grade. PCGS Population: 11 in 66 Red and Brown, 0 finer (6/19). NGC ID# 229P, PCGS# 2301

1877 Cent, PR63 Brown Flashy Key Date

3335 1877 PR63 Brown NGC. Rose, violet, blue, and green accents complement this flashy 1877 PR63 Brown cent. Trivial contact marks determine the grade, and the strike is predictably razor-sharp. A total of 900 proof cents were struck in 1877. They often stand in for their circulation-strike counterparts in high-grade sets. Minor coinage was limited across the board in 1877. There were enough coins in commercial channels to meet the demands of a slumping economy. NGC ID# 229W, PCGS# 2318

**1877 Cent, PR64 Red
Reverse Cameo Contrast**

- 3336 1877 PR64 Red PCGS.** This razor-sharp near-Gem proof displays mirrored fields with subtle cameo contrast on the reverse. The obverse has some milky patination that prevents a Cameo designation, although both sides of the coin are almost entirely copper-orange in color. A few carbon flecks are visible beneath a lens. Population: 41 in 64 Red, 37 finer (6/19). NGC ID# 229W, PCGS# 2320

- 3337 1880 PR66 Red PCGS. Snow-PR3.** The 1 is lightly repunched, and the bottoms of the 80 digits appear broken. A high-grade peach-gold Premium Gem. Sharply struck and prominently mirrored with a small flan flake (as made) at the reverse center. Carbon is limited to the field between the UN in UNITED, and the headdress above the Y in LIBERTY. NGC ID# 229Z, PCGS# 2329

- 3338 1882 PR66 Red PCGS. Snow-PR4.** Lime-green and apricot-gold hues dominate this flashy and fully impressed specimen. Carbon is confined to a few pinpoint flecks on the reverse exergue. Only a tiny percentage of proof survivors are comparable in quality. Population: 16 in 66 Red, 5 finer (5/19). NGC ID# 22A3, PCGS# 2335

- 3339 1883 PR67 Brown NGC. CAC. Snow-PR6.** The 3 is lightly repunched north. Deep sea-green and ruby-red colors bathe the obverse. The reverse has a lilac border and a peach-gold center. A pristine and aesthetically pleasing high-grade specimen. CAC: 8 in 67, 0 finer (5/19). NGC ID# 842U, PCGS# 2336

- 3340 1884 PR67 Red and Brown Cameo NGC. CAC. Snow-PR4.** A fully bright and highly attractive Superb Gem with exquisite design details and deeply mirrored fields. Each side exhibits an opposite toning scheme. The obverse presents a cherry-red center with bright gold at the border. The reverse has a golden center with cherry-red at the border area. As expected of the grade, there are no spots or mentionable marks.
Ex: Orlando Signature (Heritage, 1/2006), lot 3075, which realized \$2,070.

**1884 Indian Cent, Impressive PR67 Red
None Certified Finer at PCGS or NGC**

- 3341 1884 PR67 Red PCGS.** Orange-red and sun-gold illuminate this intricately struck Superb Gem. No marks are evident, and a strong loupe detects only inconsequential carbon. Spotted proof cents from the 1880s are readily obtained, but specimens of the present quality are unquestionably rare. Encapsulated in a green label holder. Population: 11 in 67 Red, 0 finer (6/19).
Ex: ANA Signature (Heritage, 7/2008), lot 1161; Central States Signature (Heritage, 4/2009), lot 1211. NGC ID# 22A5, PCGS# 2341

- 3342 1886 Type One PR67 Brown NGC. Snow-PR3.** The lowest headdress feather points between IC in AMERICA. Minor repunching appears in the loop of the 6, and a die lump is noted on the T in CENT. This glossy, nearly flawless Superb Gem proof cent offers chocolate-brown surfaces with marvelous rose-violet accents. Census: 9 in 67 Brown, 0 finer in this category (5/19). NGC ID# 22A7, PCGS# 2345

- 3343 1895 PR66 Red PCGS. Snow-PR4.** The mirrored surfaces are mostly orange or lemon-gold, though the right reverse displays cherry-red and sea-green shades. Sharply struck and practically void of carbon. The flag of the 1 is repunched north. This die pair also struck cents for commerce (Snow-7). NGC ID# 22AH, PCGS# 2374

- 3344 1905 PR66 Red PCGS.** Razor-sharp definition is evident on all design elements of this magnificent Premium Gem, with well-preserved original red surfaces and deeply mirrored fields. Overall eye appeal is terrific. Population: 18 in 66 (1 in 66+) Red, 3 finer (6/19). NGC ID# 22AU, PCGS# 2404

LINCOLN CENTS

- 3345 1909-S VDB MS64 Red and Brown PCGS.** An attractive Choice specimen of this sought-after, first-year key, with well-detailed design elements and well-preserved surfaces that show a mix of original red and light brown patina. Satiny mint luster adds to the strong eye appeal. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS66
Luminous Red and Brown Example**

- 3346 1909-S VDB MS66 Red and Brown PCGS.** Smooth, luminous satin luster illuminates blended gold, bronze, and olive-brown hues on this Premium Gem 1909-S VDB Lincoln cent. Fully struck design elements and an absence of noticeable carbon spotting further heighten the appeal. As the key date in the series, the S-VDB realizes unparalleled popularity. High-grade examples such as this are important Registry Set acquisitions. NGC ID# 22B2, PCGS# 2427

- 3347 1909-S VDB MS64 Red PCGS.** The 1909-S VDB Lincoln cent is the low-mintage key to the series. This impressive Choice example offers well-detailed design elements and vibrant mint luster throughout. The well-preserved original red surfaces show a few microscopic specks of carbon on both sides.
From The Dunleavy Collection. NGC ID# 22B2, PCGS# 2428

**1909-S/S Lincoln Cent, MS66+ Red
S Over Horizontal S Guide Book Variety**

- 3348 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS.** This splendid, high-end Premium Gem example of the popular S Over S repunched mintmark variety is sharply struck and highly lustrous, with essentially mark-free, chestnut-gold surfaces. A loupe reveals only the occasional tiny fleck — mostly confined to the reverse — while eye appeal is extraordinary, as indicated by the PCGS Plus designation and CAC endorsement. Only a few pieces exist any finer. Population: 22 in 66+ Red, 3 finer (6/19). NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

- 3349 1914-D — Altered Surfaces — PCGS Genuine. Unc Details.** A sharply detailed example of this low-mintage key, with no mentionable surface imperfections. The surfaces retain some traces of original mint luster, despite an unnatural sheen that overlays a mix of light brown and red patina.

**1914-S Cent, MS64+ Red
Scarce S-Mint, Challenging Any Finer**

- 3350 1914-S MS64+ Red PCGS. CAC.** A lovely orange-gold representative of an early and conditionally rare branch mint issue. A lens reveals a few minuscule obverse flecks. The strike is good save for blending near the top of the O in ONE. The dual honors of CAC endorsement and the PCGS Plus designation are important recommendations for this high-end Choice Uncirculated 1914-S. PCGS reports just 52 finer examples. Population: 8 in 64+ Red, 52 finer. CAC: 12 in 64, 7 finer (5/19). NGC ID# 22BJ, PCGS# 2476

**1926-S Cent, MS65 Red and Brown
Virtually Unobtainable Finer**

- 3351 1926-S MS65 Red and Brown NGC.** Full Red coins are virtually non-existent, so for almost all collectors the question is how much surviving red luster remains on the highest-graded coin obtainable? This piece displays an impressive amount. Most of the obverse is cherry-red and each side is just slightly mellowed. While not absolutely full, the strike details are significantly stronger than seen on many high-grade 1926-S cents. There are no distracting marks on either side. This piece represents an important opportunity for the Lincoln cent collector. Census: 30 in 65 Red and Brown, 2 finer (5/19). NGC ID# 22CL, PCGS# 2574

- 3352 1929 MS67+ Red PCGS.** Massively produced with more than 185 million pieces struck, the 1929 is not one of the scarcer issues from the 1920s but it is surprising that not more than 76 pieces have been certified in MS67 with none finer at each service (5/17). Unlike the deep cherry-red seen on many examples, the obverse on this piece is several shades lighter than the reverse. NGC ID# 22CU, PCGS# 2596

- 3353 1932 MS67 Red PCGS.** This magnificent Superb Gem Lincoln cent exhibits sharply detailed design elements and virtually pristine original red surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is terrific. Population: 43 in 67 (3 in 67+) Red, 0 finer (5/19). NGC ID# 85ZB, PCGS# 2623

**1940-D Cent, MS67+ Red
Beautiful Original Color
Only One Coin Certified Finer**

- 3354 1940-D MS67+ Red PCGS. CAC.** Although plentiful in MS67 Red, the 1940-D Lincoln cent is rare with a Plus designation in this grade, and there is just one finer Red coin at PCGS and NGC combined. This piece is CAC endorsed. Satiny luster glows deep orange-gold across the interiors, with thin ribbons of green and lilac clinging to the extreme outer peripheries. A visually delightful Registry coin. Population: 24 in 67+ Red, 1 finer. CAC: 31 in 67, 0 finer (5/19). NGC ID# 22DU, PCGS# 2689

**1943-D Steel Cent, Lustrous MS68
Top-Grade Registry Coin**

- 3355 1943-D MS68 PCGS. CAC.** The 1943-D steel cent is plentiful through MS67, but it becomes scarce in MS68 and is unknown numerically finer (5/19). This piece is CAC endorsed, an attribute that few top-grade steel cents from any of the three mints have. Luster is satiny, untoned, and essentially flawless as far as the human eye can tell. Many high-end steel cents have reflective fields, although this piece earns the top grade with pure preservation, being lustrous throughout. NGC ID# 22E6, PCGS# 2714

- 3356 1943-S MS68 PCGS.** A scarce top-grade example of this steel alloy war issue, showing satiny mint luster and brilliant surfaces. Trivial strike weakness affects the O in ONE and the upper edge of the motto IN GOD WE TRUST, but the centers are sharp. A carbon spot on Lincoln's neck becomes less visible at certain angles. Population: 91 in 68, 0 finer (5/19). NGC ID# 22E8, PCGS# 2717

**1943-S Steel Cent, MS68
Registry-Grade CAC Coin**

- 3357 1943-S MS68 PCGS. CAC.** The 1943-S steel cent is scarce in MS68, and it is rare this fine with CAC endorsement. The coin offered here displays bright, untuned surfaces and a sharp strike. The fields are semiprooflike with parallel die striations (mint made). Eye appeal is outstanding. Population: 98 in 68, 0 finer. CAC: 40 in 68, 0 finer (5/19). NGC ID# 22E8, PCGS# 2717

**1945 Cent, MS67+ Red
Top-Grade at PCGS and CAC**

- 3358 1945 MS67+ Red PCGS. CAC.** Frosty luster shimmers across each side of this carbon-free Superb Gem, one of a dozen Plus-graded coins in this grade with no finer pieces at PCGS (5/19). The interiors are deep copper-orange, while the borders display lighter golden color. An exceptional piece. Population: 12 in 67+ Red, 0 finer. CAC: 25 in 67, 0 finer (5/19). NGC ID# 22EG, PCGS# 2734

**1951-S Cent, MS67+ Red
Tied for Finest at PCGS**

- 3359 1951-S MS67+ Red PCGS. CAC.** Luminous copper-orange mint luster is especially frosty and well-preserved, showing not even a single discernible abrasion. A few microscopic pepper specks are visible in the left obverse field with a loupe. Plus-graded MS67 Red coins are rare at PCGS, and this coin is also among the finest 1951-S cents with CAC endorsement. Population: 31 in 67+ Red, 0 finer. CAC: 48 in 67, 0 finer (5/19). NGC ID# 22F5, PCGS# 2794

**1955 Cent, MS63+ Brown
Doubled Die Obverse**

- 3360 1955 Doubled Die Obverse, FS-101, MS63+ Brown PCGS. CAC.** Luster is especially luminous on this piece, earning the PCGS Plus designation. Olive-brown and mahogany surfaces yield bluish toning on each side, and no bothersome abrasions are seen. The CAC endorsement sets this piece apart from its peers as a collector-grade Mint State doubled die representative (5/19). NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Cent, MS64 Brown
Attractive CAC Coin**

- 3361 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** Lustrous burgundy-brown surfaces yield bluish overtones on each side, with tinges of original copper-orange color in the protected peripheral areas. This is a sharp example of the 1955 doubled die cent, and it has above-average eye appeal for the grade, as CAC recognizes. Easily one of the most attractive Brown coins that we have seen in this grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS64+ Brown
Doubled Die Obverse, CAC Approved**

3362 1955 Doubled Die Obverse, FS-101, MS64+ Brown PCGS. CAC. This high-end Choice example nears a Red and Brown designation, as substantial rose-red and copper-orange hues penetrate an overlay of olive and violet toning. The outstanding color and satiny luster easily earn a Plus grade and a CAC green label. This piece rivals the eye appeal of many Gem Brown coins, and indeed, it nearly is one. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3363 1961-D MS67 Red PCGS. The dies were noticeably striated, resulting in bright semiprooflikeness on each side. The surfaces are bright, of course, with richly variegated colors that is especially noticeable on the obverse. Population: 14 in 67 (1 in 67+) Red, 0 finer (6/19). NGC ID# 22G2, PCGS# 2875

**1972 FS-101 Cent, MS67 Red
Doubled Die Obverse**

3364 1972 Doubled Die Obverse, FS-101, MS67 Red NGC. Broad doubling on the date, LIBERTY, and IN GOD WE TRUST makes FS-101 the most desirable variety for the year. Lustrous brick-red surfaces display sharp motifs, clean fields, and an area of lavender color at the central reverse. Minor chatter occurs on the lower part of Lincoln's bust. Census: 17 in 67 Red, 0 finer (6/19). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**1972 Doubled Die Cent, MS67 Red
FS-101, Obvious Registry Set Coin**

3365 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. Wide doubling on the date and legends makes this *Cherrypickers'* variety an eagerly sought issue among modern Lincoln cents. The Superb Gem surfaces provide spectacular eye appeal, with vibrant, cherry-red color, lilac highlights, and ebullient mint luster throughout both sides. A few tiny, tin and/or zinc alloy spots are visible under a loupe, but they do not detract from the splendid surface quality and bold visual allure. Multiple stages of die doubling exist for the 1972, but this FS-101 example represents the most dramatic of all. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

3366 1995 Doubled Die Obverse, FS-101, MS69 Red NGC. LIBERTY and IN GOD WE exhibit "very strong doubling," as described by *Cherrypickers'*. The variety was widely publicized early, and many examples were saved, but examples of the present superlative quality are rare. The radiant orange-gold surfaces approach perfection. Census: 26 in 69 Red, 0 finer (5/19). NGC ID# 22JS, PCGS# 38105 Base PCGS# 3127

PROOF LINCOLN CENTS

3367 1909 PR66 Red and Brown NGC. A spectacular Premium Gem example of this first-year matte proof issue, with lustrous original red surfaces that have mellowed to light chestnut in a few areas. The design elements are sharply detailed throughout. Census: 20 in 66 Red and Brown, 1 finer (5/19). NGC ID# 22KS, PCGS# 3304

3368 1911 PR65 Red PCGS. Attractive golden-orange and reddish color complements the matte fields texture of this Gem Red 1911 proof Lincoln cent. A few scattered carbon flecks are present on the obverse but hardly disturb the pleasing appearance. Population: 23 in 65 Red, 13 finer (5/19).
Ex: Central States Signature (Heritage, 4/2001), lot 5957, which realized \$3,220; Baltimore Signature (Heritage, 7/2003), lot 5753, which realized \$3,220. NGC ID# 22KU, PCGS# 3311

**1936 Satin Finish Cent, PR66 Red
Spectacular Preservation and Appeal**

3369 1936 Type One—Satin Finish PR66 Red PCGS. Lovely rose-gold, peach, and copper-pink hues adorn the pristine surfaces of this Satin Finish proof, complementing full definition of the design elements and rims. Faint die striations are visible in the fields beneath a loupe, which are characteristic of the Satin proofs. This high-end Red coin is conditionally scarce, and just one finer example is reported at PCGS (6/19). NGC ID# 22L2, PCGS# 3332

- 3370 1937 PR67 Red PCGS.** This high-end, Superb Gem proof has fire-orange surfaces with deeply mirrored fields around sharp devices, providing exceptional eye appeal. As one of just 32 examples graded so fine at PCGS, with none finer, this is a prime candidate for the Set Registry program. Population: 32 in 67 Red, 0 finer; 5 in 67 Red Cameo, 0 finer (5/19). NGC ID# 22L7, PCGS# 3338

**1937 Lincoln Cent, PR67 Red Cameo
One Finer at NGC and PCGS Combined**

- 3371 1937 PR67 Red Cameo NGC.** The Cameo designation is only grudgingly given by either service to survivors of the 9,320-piece 1937 proof mintage. The overwhelming majority of proofs show no field/device contrast whatsoever. This Superb Gem Cameo gets an assist from the liquidlike mirrored fields, which surround satiny raised motifs that display a thin skin of mint frost. The immaculate surfaces radiate flame-orange glow, with no more than three or four inconsequential flecks under the scrutiny of a lens. Census: 8 in 67 Cameo (4 in 67★), 1 finer (5/19). NGC ID# 22L5, PCGS# 83338

TWO CENT PIECES

**1864 Two Cent Piece, MS65 Red and Brown
Scarcer Small Motto Variant**

- 3372 1864 Small Motto MS65 Red and Brown NGC.** The two cent piece made its debut in 1864 and the Small Motto variety is one of the most challenging issues of the series. This impressive Gem example offers sharply detailed design elements, with some spidery die cracks through the letters of the reverse legend. The well-preserved surfaces show a mix of light brown and original red toning. Census: 53 in 65 (1 in 65+) Red and Brown, 16 finer (6/19). NGC ID# 22N8, PCGS# 3580

**1864 Two Cent Piece, MS66+ Red and Brown
CAC-Approved Large Motto Coin**

- 3373 1864 Large Motto MS66+ Red and Brown PCGS. CAC.** Rich, original fire-orange and cherry-red hues cover this high-end Premium Gem Large Motto type coin, yielding just a hint of chestnut toning on the high points of the wreath that prevents a full Red designation from PCGS — in fact, the eye appeal of this Red and Brown coin exceeds that of many two cent pieces that we have seen with Red designations. The strike is sharp and luster abounds. A few flecks of carbon only appear beneath a loupe. Population: 49 in 66 (4 in 66+) Red and Brown, 0 finer. CAC: 35 in 66, 0 finer (6/19). NGC ID# 22N9, PCGS# 3577

**1867 Two Cent, MS65 Red
Conditionally Rare**

- 3374 1867 MS65 Red PCGS.** Gem Red two cent pieces are difficult to find, regardless of the date. This 1867 has a population of just a few dozen coins, including possible duplication. Only four numerically finer coins are certified. The surfaces are satiny and copper-gold with peach-orange tints. Well-struck design elements add to the appeal. Population: 30 in 65 (2 in 65+) Red, 4 finer (5/19). NGC ID# 22NB, PCGS# 3593
- 3375 1870 MS65+ Red and Brown PCGS. CAC.** Mintages declined each year after a large production in 1864 and 1865 with only 861,250 pieces struck in 1870. The original red on this coin is just mellowed a few shades, still leaving the surfaces with significant original mint luster. The strike details are a bit soft, but there are almost no traces of carbon that can be found. Population: 43 in 65 (1 in 65+) Red and Brown, 8 finer. CAC: 21 in 65, 4 finer (6/19). NGC ID# 22NE, PCGS# 3607

PROOF TWO CENT PIECES

- 3376 1869 PR66+ Brown NGC.** Attractive aquamarine and lavender undertones grace this fully struck and unblemished Premium Gem. The reflective fields and squared-off dentils confirm proof status. Scarce in the present quality, since only 600+ proofs were issued. NGC ID# 274Y, PCGS# 3639

**1870 Two Cent, PR66 Red
Collectible Proof Issue**

- 3377 1870 PR66 Red NGC.** The area below WE shows signs of lapping, as on all 1870 proof two cent pieces. Each side displays unsurprisingly strong detail, with amber-red and copper-orange color. A carbon spot occurs within the lower right wreath leaves. The *Guide Book* reports a mintage of 1,000+ proofs for the issue. Census: 14 in 66 (1 in 66+) Red, 2 finer (6/19). NGC ID# 274Z, PCGS# 3644

- 3378 1872 PR66 Brown PCGS. CAC.** Date collectors in 1872 obviously had difficulty finding a high-grade example of the business strike 1872 (and most collectors at the time preferred proofs anyway), and as a result the Mint struck a higher-than-usual number of proofs with an estimated 950 pieces believed produced. This high-grade example is labeled Brown, but just the slightest tilt beneath a light reveals significant underlying mint red. Each side appears carbon-free. Population: 10 in 66 Brown, 0 finer. CAC: 4 in 66, 0 finer (6/19). NGC ID# 2752, PCGS# 3648

- 3379 1872 PR66 Red and Brown NGC. CAC.** A delightful Premium Gem proof from a mintage of 950 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields. The well-preserved surfaces show a mix of original red and light brown patina. Census: 36 in 66 (1 in 66★) Red and Brown, 7 finer. CAC: 21 in 66, 0 finer (5/19). NGC ID# 2752, PCGS# 3649

THREE CENT SILVER

- 3380 1851-O MS64 PCGS.** A softly frosted near-Gem example of the New Orleans issue, a favorite date among three cent silver collectors. This piece is lightly struck on the shield, although no die lapping is evident in the recesses of the C on the reverse, which is normally prominently lapped. Delicate golden toning completes the visual characteristics. NGC ID# 22YY, PCGS# 3665

**1861 Three Cent Silver, Lustrous MS67
High-Grade Type Three Example**

- 3381 1861 MS67 NGC.** Almost a half-million pieces were struck of the 1861, but today a mere five dozen examples survive in high grade in spite of the small size of these coins (which lends itself to higher preservation). This is a remarkably well-preserved example that displays thick mint frost beneath the smoky-gray patina seen over each side. Die clash marks are apparent and there is just the slightest bit of strike softness is noted on the reverse leaves, but there are no obvious abrasions. Census: 30 in 67 (1 in 67★), 7 finer (5/19). NGC ID# 22ZA, PCGS# 3679

**1863 Three Cent Silver, MS64
Heavily Clashed Reverse**

- 3382 1863 MS64 NGC.** Ex: Richmond Collection. The 1863 silver three cent piece claims a mintage of just 21,000 pieces. This attractive Choice specimen is sharply detailed in most areas, but the reverse is heavily clashed and shows just a touch of softness on the arrows and ribbon. The well-preserved surfaces display a mix of satiny mint luster and prooflike reflectivity in the fields, with highlights of golden-tan and magenta toning. Census: 25 in 64, 31 finer (6/19). NGC ID# 22ZD, PCGS# 3682

PROOF THREE CENT SILVER

- 3383 1873 PR64 PCGS.** The final issue in the series was limited to a proof-only production of 600 pieces. Flashy fields under violet and golden toning deliver the eye appeal expected of a near-Gem proof. Minimal contact for the grade. Encapsulated in an old green label holder. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

- 3384 1884 XF45 PCGS.** The 1884 is one of the primary keys to the series (1,700 coins struck) along with the 1885 and the two proof-only issues. Some lucky collector pulled this piece out of circulation after a short stint in the channels of commerce. It shows light high-point rub, but the design elements remains pinpoint-sharp. Population: 14 in 45, 38 finer (4/19). NGC ID# 2766, PCGS# 3752

**1885 Three Cent Nickel, AU55
1,000 Circulation Strikes**

- 3385 1885 AU55 PCGS.** The 1,000 three cent nickels produced for circulation in 1885 represent the lowest mintage in the series, excluding the proof-only issues. In fact, this is one of the lowest-mintage issues in all of American numismatics. This nickel-gray key date retains strong detail on the curls, denomination, and wreath. Friction and abrasions are trivial. Population: 11 in 55, 63 finer (4/19). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

- 3386 1876 PR66 Ultra Cameo NGC.** Examples are fairly obtainable in higher grades, but pieces qualifying for the Ultra Cameo designation are the opposite. This impressive Premium Gem exhibits intensely frosty mint luster on the devices over deeply mirrored fields. Both sides are essentially brilliant, with just a hint of champagne toning. Census: 8 in 66 Ultra Cameo, 3 finer (5/19). NGC ID# DA69, PCGS# 93772

**1877 Three Cent Nickel, PR66 Cameo
CAC-Certified Key to the Series**

- 3387 1877 PR66 Cameo NGC. CAC.** The 1877 is instantly recognizable as the key to the three cent nickel series. It is a proof-only issue (as is the 1878) with a low mintage that is estimated around 900 pieces. This is an especially attractive example whose surfaces are notably free from contact marks or other imperfections. Just the slightest hint of pinkish patina is seen on each side. Otherwise, the devices are frosted and contrast starkly against the depth of mirrored reflectivity in the fields. Census: 64 in 66 Cameo (6 in 66+, 5 in 66★), 28 finer. CAC: 50 in 66, 18 finer (5/19). NGC ID# 275X, PCGS# 83773

**1879 Three Cent Nickel, PR68
Top-Grade Registry Coin**

- 3388 1879 PR68 PCGS.** Available in lower grades, the 1879 proof three cent nickel is scarce in Superb Gem condition, and only a handful of pieces are known in PR68. This top-grade Registry coin displays fully struck design elements and a hint of cameo contrast. Delicate iridescence adorns the surfaces. Eye appeal is outstanding. Population: 4 in 68, 0 finer; 1 in 68 Cameo, 0 finer (5/19). NGC ID# 275Z, PCGS# 3775
- 3389 1880 PR67 Cameo PCGS. CAC.** The design elements of this spectacular Superb Gem proof are strongly impressed, but the reverse exhibits some incomplete detail, due to lapping. The impeccably preserved surfaces include deeply reflective fields that contrast boldly with the frosty devices. Population: 12 in 67 (2 in 67+) Cameo, 0 finer. CAC: 11 in 67, 0 finer (6/19). NGC ID# 5E5S, PCGS# 83776

**1881 Three Cent Nickel, PR68
Top-Grade CAC Registry Coin
Beautiful Light Toning**

- 3390 1881 PR68 PCGS. CAC.** An otherwise available proof three cent nickel, the 1881 becomes conditionally rare at the PR68 level, and no numerically finer coins are reported (5/19). That offered here is one of just two coins for the grade with CAC endorsement. Each side displays a balance of satin luster and reflectivity, complementing a tinge of ice-blue and delicate lavender toning. Eye appeal is outstanding. Population: 5 in 68, 0 finer; 4 in 68 Cameo, 0 finer. CAC: 2 in 68, 0 finer (5/19). NGC ID# 2763, PCGS# 3777

PROOF SHIELD NICKELS

- 3391 1873 Closed 3 PR67 NGC.** Proof 1873 nickels are available through Gem condition but comparable Superb Gems are rare with merely 10 submissions reported by the two major services. Soft yellow-gold patina at the margins frames ice-blue and lilac centers, and the design elements are expectedly sharp. Both sides display impeccable preservation. Census: 5 in 67, 0 finer (5/19). NGC ID# 5KX3, PCGS# 3827
- 3392 1876 PR67 NGC.** Fully struck and pristine, this marvelously preserved Superb Gem exhibits lovely toning variations over each side, in pastel shades of gold, lavender, and steel-blue. The fields are only mildly reflective, but the attractive coloration and exquisite preservation of the piece make that seem less important. The majority of extant proof 1876 Shield nickels fall into the PR60-PR64 grade range. Census: 6 in 67 (1 in 67+, 1 in 67★), 0 finer (5/19). NGC ID# 4S39, PCGS# 3830

LIBERTY NICKELS

**1888 Liberty Nickel, MS66
Seldom Seen Any Finer**

- 3393 1888 MS66 PCGS. CAC.** The 1888 Liberty nickel claims a mintage of 10.7 million pieces, but the issue is rare at the MS66 grade level, and finer coins are virtually unobtainable. This spectacular Premium Gem exhibits well-detailed design elements and the impeccably preserved, lustrous surfaces are blanketed in attractive shades of lavender-gray and pale gold toning. Population: 26 in 66 (4 in 66+), 2 finer. CAC: 15 in 66, 0 finer (6/19). NGC ID# 2774, PCGS# 3849

- 3394 1894 MS66 PCGS.** This spectacular Premium Gem Liberty nickel exhibits well-detailed design elements, with just a trace of softness on some star centers. The virtually pristine lustrous surfaces are blanketed in shades of lavender-gray and golden-tan toning. Population: 45 in 66 (9 in 66+), 2 finer (6/19). NGC ID# 2779, PCGS# 3855

**1903 Liberty Nickel, MS67
Tied for Finest at NGC**

- 3395 1903 MS67 NGC.** This spectacular Superb Gem exhibits sharply detailed design elements in most areas, with just a trace of softness on the lower wreath. The impeccably preserved surfaces radiate vibrant mint luster, under delicate shades of lavender-gray and pale gold toning. Overall eye appeal is terrific. Census: 4 in 67, 0 finer (6/19). NGC ID# 277E, PCGS# 3864

PROOF LIBERTY NICKELS

- 3396 1893 PR65 Deep Cameo PCGS. CAC.** Every minute detail of this Gem Deep Cameo proof is fully struck, and the cameo contrast is spectacular. The CAC endorsement is well earned. Neither side of this conditionally rare proof 1893 Liberty nickel is toned. Population: 3 in 65 Deep Cameo, 6 finer. CAC: 2 in 65, 5 finer (5/19). NGC ID# 2783, PCGS# 93891

- 3397 1902 PR67+ PCGS.** Wispy gold toning appears on the brilliant gray surfaces of this Superb Gem Liberty nickel that features a sharp strike and fully mirrored fields. Population: 22 in 67 (4 in 67+), 0 finer (6/19). NGC ID# 278C, PCGS# 3900

**1910 Nickel, Colorfully Toned PR68
None Finer at Either Service**

- 3398 1910 PR68 NGC.** Well-mirrored and supremely attractive, this splendidly toned nickel easily qualifies as one the finest-known 1910 proofs. Rich lilac toning glistens with tangerine-gold accents at the borders on the obverse, while the reverse is, if anything, more resplendent with a radiant rose center, surrounded by lavender and pale-gold hues. The strike is razor-sharp throughout both sides. Census: 6 in 68 (1 in 68★), 0 finer (5/19). NGC ID# 278L, PCGS# 3908

BUFFALO NICKELS

- 3399 1913-D Type Two MS66 PCGS. CAC.** A delightful Premium Gem example of the popular Type Two design, with well-detailed design elements and well-preserved, lustrous surfaces that display subtle highlights of lavender, ice-blue, and sea-green toning. Population: 92 in 66 (5 in 66+), 17 finer. CAC: 34 in 66, 6 finer (6/19). NGC ID# 254M, PCGS# 3922

**1915-S Buffalo Nickel, MS65+
Elusive Issue in High Grade**

- 3400 1915-S MS65+ PCGS. CAC.** From a mintage of 1.5 million pieces, the 1915-S Buffalo nickel is an elusive issue in MS65 condition. This impressive Plus-graded Gem exhibits well-detailed design elements, with some localized softness on the hair above the braid, but sharp definition on the bison's head. The well-preserved, lustrous surfaces are lightly toned and appealing. PCGS has graded 41 numerically finer examples (6/19). NGC ID# 22R9, PCGS# 3929

**1920 Nickel, Lightly Toned MS66+
Elusive CAC-Approved Example**

- 3401 1920 MS66+ PCGS. CAC.** This high-end 1920 Premium Gem displays both the PCGS Plus designation and CAC endorsement, which places it in the upper tier among all MS66 pieces that survive. Struck from clashed dies, the motifs retain strong definition amid attractive rose and gold highlights. The satin-smooth and lustrous surfaces show virtually no marks or abrasions. Population: 17 in 66+, 19 finer. CAC: 49 in 66, 2 finer (6/19). NGC ID# 22RP, PCGS# 3944

- 3402 1923-S MS64+ NGC. CAC.** The 1923-S is one of the strike rarities from the 1920s, and this piece is one of the better-struck coins available, especially in this grade. Subtle iridescence is seen over each side of this bright, satiny example. Definitely high-end for the grade. NGC ID# 22RW, PCGS# 3950

**1929-D Buffalo Nickel, MS66+
Registry Set Quality**

- 3403 1929-D MS66+ PCGS.** Satiny mint luster glistens on this high-end Premium Gem, showing areas of light gold, peach, sea-green, lilac, and russet toning. Typical strike weakness affects the hair above the Indian's braid and the bison's shoulder. The 1929-D is scarce in this grade and rare with the Plus designation. Finer coins are out of reach for most collectors. Population: 88 in 66 (10 in 66+), 5 finer (5/19). NGC ID# 3EDW, PCGS# 3967

- 3404 1930 MS67 PCGS.** Outstanding mint luster is the primary calling card of this Superb 1930 nickel. The strike is slightly better than average and there are no obvious abrasions (nor would any be expected at this grade level). Pale lilac centers are surrounded with golden peripheral patina. Population: 42 in 67 (1 in 67+), 0 finer (5/19). NGC ID# 22SH, PCGS# 3969

**1935 Nickel, Luminous MS67+
Among the Finest at CAC**

- 3405 1935 MS67+ PCGS. CAC.** Although moderately available in MS67, the 1935 Buffalo nickel is rare in this grade with a Plus designation and a CAC green label. Only two finer coins are reported at PCGS (5/19). This piece displays delicate lilac, rose-gold, and ice-blue luster with near-flawless surfaces. Moderate strike weakness affects the centers and there are light metal flowlines in the fields from die wear. CAC: 45 in 67, 0 finer (5/19). NGC ID# 22SN, PCGS# 3974

**1935 FS-801 Nickel, MS62
Doubled Die Reverse, CAC**

- 3406 1935 Doubled Die Reverse, FS-801, MS62 PCGS. CAC.** The *Cherrypickers'* book suggests this doubled die reverse 1935 nickel is extremely rare in any grade above VF, and that only about 10 pieces are known in Mint State. This is a lustrous, Uncirculated nickel-gray example — sharply doubled on E PLURIBUS UNUM and FIVE CENTS. The obverse shows a bit of weakness above the braid knot and the central hair strands, although all else is sharp and the eye appeal is strong. This is the sole CAC example we know of. Population: 2 in 62, 1 finer (5/19). NGC ID# 22SN, PCGS# 38465 Base PCGS# 93974

**1936 Nickel, MS67+
CAC-Approved Registry Coin**

- 3407 1936 MS67+ PCGS. CAC.** A thin veneer of ice-blue and beige patina occupies the obverse, while the reverse is covered by faint beige-gold toning. The surfaces are well-preserved with no mentionable marks and they radiate dazzling luster. Surprisingly elusive in this grade, with just two coins graded finer by PCGS (5/19).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5644, which realized \$920; ANA Signature (Heritage, 3/2007), lot 328, which realized \$920. NGC ID# 22SS, PCGS# 3977
- 3408 1936-D MS67+ PCGS.** An amazing Superb Gem, this 1936-D nickel has pristine nickel-gray surfaces with a sharp strike and brilliant, frosty mint luster. Exceptional eye appeal. Population: 98 in 67 (10 in 67+), 3 finer (6/19). NGC ID# 22ST, PCGS# 3978

**1937 Buffalo Nickel, MS68
Top-Grade Type Coin**

- 3409 1937 MS68 NGC.** A brilliant, satiny coin with nearly flawless preservation. This is among the finest-certified 1937 Buffalo nickels. A touch of strike softness at the top of the Indian's braid and the bison's shoulder is a minor attribute. The 1937 has a lot of popularity as a type coin. Although rare in MS68, it is at least collectible in this grade — something many other issues in the series cannot claim. Census: 15 in 68 (2 in 68+, 2 in 68★), 0 finer (6/19). NGC ID# 22SX, PCGS# 3980
- 3410 1937-D Three-Legged, FS-901, MS61 NGC.** Rich golden-brown toning blankets the subdued carbon-free surfaces. Contact is confined to a tick on the Indian's chin. All diagnostics are present for this key variety, including a granular appearance to the bison's back leg. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982
- 3411 1937-D Three-Legged, FS-901, MS62 PCGS.** Though several other issues have their polished die varieties, the 1937-D Three-Legged nickel is by far the most famous and dramatic. The bison's leftmost foreleg is absent, aside from the hoof. This is a coruscating steel-gray and straw-gold example without any consequential marks.
Ex: Central States Signature (Heritage, 5/2007), lot 1660, which realized \$3,335.
From The Dunleavy Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D Buffalo Nickel, MS68
None Certified Numerically Finer**

- 3412 1938-D MS68 NGC.** From a mintage of 7 million pieces, the 1938-D Buffalo nickel is a plentiful issue in high grade and a popular choice of type collectors. This incredible MS68 specimen is sharply detailed in most areas, with just a trace of softness on the hair above the braid. The virtually flawless surfaces radiate satiny mint luster, with highlights of ice-blue and emerald-green toning. Census: 36 in 68 (1 in 68+, 8 in 68★, 1 in 68+★), 0 finer (6/19). NGC ID# 22T2, PCGS# 3984

PROOF BUFFALO NICKELS

- 3413 1914 PR66+ PCGS. CAC.** The 1914 is one of the best-made proof issues, and as a result it is one of the most popular issues in the series. This is a bright, satiny example with finely textured fields. Fully struck, of course, with no mentionable flaws on either side. NGC ID# 278T, PCGS# 3991

**1936 Type One Nickel, PR68
Nicely Toned Satin Finish Example**

- 3414 1936 Type One — Satin Finish PR68 PCGS.** The initially unpopular Satin Finish was replaced with a Brilliant Finish partway through the year. Both Type One and Type Two proofs are about equally available, with the Satin proofs being slightly more collectible in PR67 and PR68. Wisps of golden-amber grace the obverse. The reverse features gold, rose, green and blue patina. There are only one or two points of contact. Population: 50 in 68 (3 in 68+), 2 finer (5/19). NGC ID# 278X, PCGS# 3994

- 3415 1936 Type Two — Brilliant Finish PR67 NGC.** Chromelike silver devices stand out from the deeply mirrored translucent, ivory-gold fields of this outstanding Superb Gem brilliant proof. The strike and surfaces seem absolutely flawless, with spectacular eye appeal. The brilliant proofs offer quite a contrast to their satin-finish Type One counterparts — eagerly collected then and now. Few examples are finer. NGC ID# 278Y, PCGS# 3995

JEFFERSON NICKEL

- 3416 1945-S MS68 PCGS.** Final year of the wartime issues, characterized by the large mintmark above Monticello. This exceptional piece shows the usual strong strike that is inherent in these silver coins (although not quite complete on the steps on this piece). Pale ice-blue interiors are surrounded by warm golden-brown peripheral color. Population: 3 in 68, 0 finer (6/19). NGC ID# 22TZ, PCGS# 4027

EARLY HALF DIME

**1800 V-1, LM-1 Half Dime, XF45
Well-Detailed Liberty Portrait**

- 3417 1800 V-1, LM-1, R.3, XF45 NGC.** The date numerals are sharp on this early die state example. Some die bulging on the reverse weakens the stars and clouds above the eagle, but the obverse is well-defined. There is a shallow linear depression across Liberty's neck. Little wear is present on this Draped Bust type coin. Old-time olive-gray and lilac toning covers each side, producing pleasant eye appeal. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

BUST HALF DIMES

**1832 Capped Bust Half Dime, MS66
V-1, LM-3 Variety**

- 3418 1832 V-1, LM-3, R.1, MS66 NGC.** A spectacular Premium Gem representative of this popular variety, with star 12 repunched and a defective M in AMERICA. The design elements are sharply detailed and the well-preserved surfaces are blanketed in attractive shades of lavender-gray and sea-green toning. Satiny mint luster shines through the patina. Census (for the variety): 2 in 66, 0 finer (6/19). NGC ID# 232E, PCGS# 38665 Base PCGS# 4279

**1832 Half Dime, Sparkling MS66
V-8, LM-5, Splendid Multicolor Toning**

- 3419 1832 V-8, LM-5, R.1, MS66 PCGS.** Iridescent ruby-red, aquamarine, and butter-gold hues encompass this satiny, sharply struck, and coruscated Premium Gem. Both sides are richly iridescent, interrupted by only a few minuscule wispy abrasions hidden in the left obverse field's toning. The second S in STATES is filled, as is the upper half of the N in UNITED. The U in UNITED has a triple-punched base — defining characteristics of the LM-5 variety. The eye appeal and surface quality are incredible. NGC ID# 232E, PCGS# 38667 Base PCGS# 4279

SEATED HALF DIMES

1838-O No Stars Half Dime, MS62 Inaugural New Orleans Issue

- 3420** 1838-O No Stars MS62 PCGS. The 1838-O is a popular, scarce Seated half dime issue. Only 70,000 pieces were struck, and it is by the far the rarer of the two No Stars issues. It also represents the debut coinage of the New Orleans Mint. This coin displays olive-gray and russet toning with some strike softness on Liberty's head, the wreath bow, and the upper wreath. A few small marks in the right obverse field determine the grade. NGC ID# 232N, PCGS# 4314

1848 Half Dime, MS65 Toned Medium Date Coin

- 3421** 1848 Medium Date MS65 PCGS. The date is up against the bottom of the rock base, but it does not overlap it as it does on Large Date coins. The 1848 half dime as a whole is rare in Gem condition and nearly uncollectible finer. This piece displays a sharp strike and satiny mint luster. Pleasing rose-gold, sea-green, blue, and violet toning covers each side. Eye appeal is outstanding. Population (Medium Date): 3 in 65 (1 in 65+), 1 finer (5/19). NGC ID# 233A, PCGS# 4338

1850 Seated Half Dime, MS67 Tied for the Finest at NGC

- 3422** 1850 MS67 NGC. The 1850 half dime, despite a mintage of nearly 1 million coins, is elusive in top grades. This Superb Gem presents a bold strike. Lovely gold and iridescent toning resides on frosty and fully lustrous silver surfaces. A single PCGS example has earned a higher numerical grade. Census: 7 in 67, 0 finer (6/19). NGC ID# 233F, PCGS# 4345
- 3423** 1856-O MS65 PCGS. An absolutely gorgeous Gem, this New Orleans half dime exhibits brilliant and frosty silver luster, and is essentially untuned, save for a hint of gold along the borders. Population: 6 in 65 (1 in 65+), 3 finer (6/19). NGC ID# 233R, PCGS# 4364

1857-O Half Dime, MS66+ Strong Eye Appeal

- 3424** 1857-O MS66+ PCGS. CAC. Exquisite eye appeal and exemplary preservation characterize this marvelous New Orleans Premium Gem. Green, blue, violet, and gold hues merge from the rims to the centers. Both sides are strongly struck, but especially the obverse. Overall quality is seemingly unimprovable, though a handful of coins are graded higher. Population: 14 in 66 (3 in 66+), 6 finer. CAC: 10 in 66, 5 finer (6/19). NGC ID# 233T, PCGS# 4366

1868-S Half Dime, MS66 Among the Finest Certified

- 3425** 1868-S MS66 NGC. This moderately elusive San Francisco issue becomes genuinely rare in MS65, and just a handful of pieces are known in MS66. None are finer. This Premium Gem displays satiny luster with a hint of light champagne color. The strike is sharp and the preservation is outstanding. Census: 5 in 66, 0 finer (6/19). NGC ID# 234P, PCGS# 4393

PROOF SEATED HALF DIME

- 3426** 1859 PR65+ NGC. Flynn-RPD-001. The date is repunched south, most apparent on the base of the 1. The 1859 is one of the few issues with the Pollock-engraved obverse subtype, identified by hollow-centered stars and a different rendition of Liberty. The subtype was also used on the 1859 and 1860 transitional patterns. A sharply struck and unmarked Gem with golden-brown, aquamarine, and rose-red toning. NGC ID# 235P, PCGS# 4438

EARLY DIME

1797 JR-1 16 Stars Dime, Good 6 Die Break at Date

- 3427** 1797 16 Stars, JR-1, R.4, Good 6 PCGS. The Small Eagle reverse was used on the dime only in 1796 and 1797. Only two varieties are known for the latter issue, which are easily differentiated by the number of peripheral stars on the obverse. The 16 Stars *Guide Book* variety is the more plentiful of the two, although it is still elusive. This piece shows advanced wear that weakens portions of the borders, although the central devices are boldly outlined with some hair and feather detail remaining. The steel-gray surfaces show light marks under a loupe, consistent with the grade. NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

BUST DIMES

- 3428** 1809 JR-1, R.4, Fine 15 NGC. The sole die pair for the date. Most of the delicate reverse die cracks associated with the 1809 appear absent, though they may not be visible due to wear. A stone-gray example with minimally marked and minutely granular surfaces. Jules Reiver owned one of the most extensive collections of early U.S. die varieties.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 29447, which realized \$747.50. NGC ID# 236U, PCGS# 38771 Base PCGS# 4486

- 3429** 1821 Small Date, JR-8, R.2, AU58+ PCGS. CAC. This lovely near-Mint Capped Bust dime has frosty mint luster and wisps of gold toning on the antique silver-gray surfaces, exhibiting trivial handling marks and microscopic hairlines of no consequence. An impressive example. Population for all 1821 Small Date varieties: 10 in 58, 22 finer (6/19). NGC ID# 236Y, PCGS# 38798 Base PCGS# 94496

1832 JR-2 Dime, MS64 Brilliant With Almond-Gold Accents

- 3430** 1832 JR-2, R.2, MS64 PCGS. CAC. Die markers include star 1 above the tip of the bust, star 8 low relative to the cap, and the second T in STATES above IB. Pale almond-gold patina around the edges complements this brilliant, attractively frosted Capped Bust dime — a perfect near-Gem for type representation. NGC ID# 4FAE, PCGS# 38856 Base PCGS# 4521

SEATED DIMES

- 3431** 1840 Drapery AU55 PCGS. CAC. Seated Liberty dimes of 1840 are known in two subtypes, No Drapery and With Drapery, the latter as offered here being much rarer. At his website, Gerry Fortin enumerates eight No Drapery varieties and just one With Drapery variety. This Choice AU example is brilliant and lustrous with attractive gold and blue toning. Population: 11 in 55, 10 finer. CAC: 5 in 55, 4 finer (6/19). NGC ID# 2383, PCGS# 4578

1843-O Dime, XF40 Scarce in XF or Better

- 3432** 1843-O F-101, R.3, XF40 NGC. CAC. A key date in XF or better condition. This example is light to medium gray with dappled olive toning, and shows relatively good detail for an issue that is almost always weakly or unevenly struck. The stars along the left obverse border are weak, in sharp contrast to those along the right border. Census: 5 in 40, 6 finer. CAC: 4 in 40, 6 finer (6/19). NGC ID# 2389, PCGS# 537816 Base PCGS# 4584

- 3433** 1863 F-101a, R.5, MS64 PCGS. Only 14,000 circulation-strike dimes were struck in 1863 and such pieces are considerably scarcer than their proof counterparts. This near-Gem exhibits deep rose-gold interiors with blue peripheral accents. A bit of high-point softness can be seen, but there are no obvious abrasions that deserve mentioning. Population: 7 in 64, 14 finer (6/19). NGC ID# 239K, PCGS# 538200 Base PCGS# 4637

1868 Seated Liberty Dime, MS66 Attractive Original Toning Tied for Finest Known

- 3434** 1868 F-107, R.4, MS66 PCGS. Mint State examples of the 1868 Seated Liberty dime are rare, most frequently seen only in MS63 and MS64, with occasional appearances of Gems. This Premium Gem coin is one of the finest pieces certified (5/19). Original multicolor toning on each side complements softly frosted luster and bold devices. Neither side has mentionable abrasions. Population: 4 in 66, 0 finer (5/19). NGC ID# 239W, PCGS# 538229 Base PCGS# 4647

- 3435** 1873 Open 3, No Arrows MS64 PCGS. CAC. Rich antique-gray surfaces exhibit splashes of gold toning on this Choice Mint State 1873 No Arrows dime from the Open 3 logotype. Higher Mint State survivors are rarely encountered. Population: 5 in 64 (1 in 64+), 1 finer. CAC: 2 in 64, 0 finer (6/19). NGC ID# 23AB, PCGS# 4660

1874 Seated Liberty Dime, MS65
Popular Arrows Design

- 3436** 1874 Arrows MS65 NGC. A spectacular Gem representative of the short-lived Arrows design, with well-detailed design elements and well-preserved surfaces with much prooflike reflectivity in the fields. Highlights of sea-green and cerulean-blue toning enhance the outstanding eye appeal. The Arrows at the date indicate a change in weight, first instituted in 1873. Census: 22 in 65, 31 finer (6/19). NGC ID# 23BK, PCGS# 4668

PROOF SEATED DIMES

- 3437** 1863 F-101, R.4, PR65 PCGS. CAC. Rich sea-green, tan-gold, and lavender toning blankets this lovely Gem dime. The strike is close to full, although a few grains are incomplete within the upper left reaches of the cereal wreath. The proof mintage was just 460 pieces. Housed in a first generation "rattler" holder. CAC: 6 in 65, 9 finer (5/19). NGC ID# 23BS, PCGS# 539011 Base PCGS# 4756

1866 Seated Dime, Toned PR67
Subtle Field-Device Contrast

- 3438** 1866 F-102, R.3, PR67 NGC. The proof 1866 Seated dime is elusive at the Superb Gem grade level, with or without cameo contrast. This beautifully toned example is awash in hues of mint-gold, ocean-blue, and lavender-gray. The design elements are bold and frosty, showing modest contrast even through the rich patina. Census: 7 in 67 (3 in 67★), 2 finer (5/19). NGC ID# 23CP, PCGS# 539017 Base PCGS# 4759

1869 Dime, PR66 Cameo
Among the Finest Known

- 3439** 1869 PR66 Cameo PCGS. CAC. A spectacular Premium Gem proof Seated Liberty dime, with the Cameo designation, one of only five coins so graded by PCGS, with one finer (5/19). The present coin exhibits fully detailed design elements that contrast boldly with the deeply mirrored fields. Only 600 pieces were minted. Ex: Long Beach Signature (Heritage, 9/2010), lot 5125. NGC ID# 23CT, PCGS# 84762

1880 Dime, PR67 Cameo
Rich Peripheral Toning

- 3440** 1880 PR67 Cameo PCGS. CAC. The 1880 dime saw a mintage of 1,355 proofs, of which PCGS and NGC have both certified just over 600 examples (minus resubmissions and crossovers); the two services have seen about 170 Cameo pieces. This Superb Gem Cameo displays medium intensity cobalt-blue, lavender, and golden-tan patination around the borders, yielding to brilliant surfaces in the centers. Crisply struck, frosted devices appear to stand above deeply mirrored fields. Immaculately preserved throughout. Population: 9 in 67 Cameo, 0 finer. CAC: 6 in 67, 0 finer (5/19). Ex: Central States Signature (Heritage, 5/2007), lot 346. NGC ID# 23D5, PCGS# 84777

- 3441** 1884 PR67 PCGS. The business strike 1884 Seated dime production was plentiful at more than 3.3 million pieces, but only 875 proofs were struck, down considerably from some earlier proof mintages in the series. This Superb Gem proof offers moderate surface contrast, mostly brilliant but with an even layer of golden color on each side. The strike is sharp over surfaces that are virtually contact-free. Population: 16 in 67 (2 in 67+), 3 finer (6/19). Ex: Summer FUN Signature (Heritage, 7/2012), lot 3446. NGC ID# 23D9, PCGS# 4781

BARBER DIMES

1902-S Dime, Lustrous MS66+ Only Two Coins Finer

- 3442 1902-S MS66+ NGC.** Splashes of greenish-tan patination visit the lustrous surfaces of this high-end Premium Gem. The design elements are sharply impressed and neither side reveals mentionable marks. The 1902-S is rare in this level of preservation; NGC and PCGS combined report only 16 coins in MS66 and a paltry two examples finer. Census: 5 in 66 (2 in 66+), 1 finer (5/19).
Ex: FUN Signature (Heritage, 1/2017), lot 3847, which realized \$4,935. NGC ID# 23EL, PCGS# 4829

- 3443 1914-S MS66+ PCGS. CAC.** A satiny Premium Gem, this S-Mint dime exhibits brilliant silver surfaces and splashes of dark toning near the borders. The obverse is nearly prooflike. Population: 19 in 66 (3 in 66+), 3 finer in MS66 and 2 finer (6/19). NGC ID# 23FV, PCGS# 4867

MERCURY DIMES

1919-D Dime, MS64 Full Bands Better Denver Issue

- 3444 1919-D MS64 Full Bands PCGS.** A sharp, satiny near-Gem example with russet and golden-olive toning in the recesses and crevices. Surprisingly few abrasions are present, although the luster is not quite vibrant enough to warrant Gem classification. The 1919-D Mercury dime is scarce with Full Bands. PCGS has seen only 22 such coins finer than the present (5/19). NGC ID# 23H9, PCGS# 4925

1921-D Dime, MS64 Full Bands A Key to the Series

- 3445 1921-D MS64 Full Bands NGC.** This well-known key date takes second place in the series after the illustrious 1916-D. Here is a Choice Uncirculated example with the added benefit of Full Bands definition. Brilliant surfaces are satiny and well-defined. A graze on Liberty's jaw is all that precludes an even higher grade. From a mintage that barely exceeds 1 million coins. NGC ID# 23HF, PCGS# 4937

- 3446 1923 MS67+ Full Bands PCGS. CAC.** A vibrantly lustrous, high-end CAC coin — ideal for Registry collectors. This coin is frosty and virtually flawless, showing even a sharp central strike. Rich orange-gold toning in the right obverse margin also covers much of the reverse, attesting to the originality of the surfaces. PCGS lists only seven finer Full Bands coins. CAC: 28 in 67, 4 finer (6/19). NGC ID# 23HG, PCGS# 4939

1927-D Mercury Dime, MS64 Elusive Full Bands Example

- 3447 1927-D MS64 Full Bands PCGS.** This attractive Choice Mercury dime exhibits sharply detailed design elements, with Full Bands definition on the fasces. The lightly marked surfaces radiate vibrant mint luster, with subtle hints of pale jade toning. Overall visual appeal is outstanding. From a mintage of 4.8 million pieces. Population: 57 in 64 (1 in 64+) Full Bands, 54 finer (6/19). NGC ID# 23HV, PCGS# 4963

1935-S Mercury Dime, MS67+ Full Bands One Finer Full Bands Coin at PCGS

- 3448 1935-S MS67+ Full Bands PCGS. CAC.** A substantial mintage of 15.8 million Mercury dimes was accomplished at the San Francisco Mint in 1935, but the issue is definitely scarce in MS67 condition, and finer coins are virtually unobtainable. This Plus-graded Superb Gem exhibits sharply detailed design elements, with fully split and rounded bands, and impeccably preserved lustrous surfaces. PCGS has graded a single specimen finer with the Full Bands designation (6/19). NGC ID# 23JE, PCGS# 4997

- 3449 1937-S MS67+ Full Bands PCGS.** Apple-green and autumn-brown toning endow the peripheries of this lustrous and well struck Superb Gem. A lower mintage issue with a production under 10,000,000 pieces. The obverse appears immaculate, and the reverse shows only a hint of contact. PCGS has certified a mere ten pieces as MS67+ Full Bands, and only three pieces finer (5/19). NGC ID# 23JL, PCGS# 5009

**1938-D Mercury Dime, MS68 Full Bands
Registry-Grade Condition Rarity**

- 3450 1938-D MS68 Full Bands PCGS.** The Condition Census for Full Bands 1938-D dimes tops out in MS68+, but there is only one coin in this grade with a Plus designation at PCGS. A small group of 20 MS68 Full Bands PCGS coins represent the finest possible examples typically available to collectors. Such is this piece. It displays vibrant, frosty mint luster with a delicate pastel tinge, save for around portions of the borders where sun-gold and orange appears. The surfaces are virtually flawless. Population: 21 in 68 (1 in 68+) Full Bands, 0 finer (5/19). NGC ID# 3DAC, PCGS# 5013

**1938-S Dime, MS67+ Full Bands
Registry-Grade Example**

- 3451 1938-S MS67+ Full Bands PCGS.** CAC. Traces of iridescent lilac and champagne color grace the luminous surfaces of this frosty Superb Gem, an ideal Registry coin of incredible quality. The strike is sharp, especially in the centers. PCGS has seen only eight finer Full Bands submissions. CAC: 73 in 67, 1 finer (5/19). NGC ID# 23JP, PCGS# 5015
- 3452 1939 MS67+ Full Bands PCGS.** CAC. This high-grade example shows bright, vibrant mint luster across each side. One is tempted to call it brilliant, but the perfectionist will notice the tiniest streak of golden on the lower reverse. Fully struck in all areas. NGC ID# 23JR, PCGS# 5017

**1939-D Mercury Dime, MS68+ Full Bands
Essentially Unimprovable Toned Specimen**

- 3453 1939-D MS68+ Full Bands PCGS.** CAC. The 1939-D is known on occasion for its flamboyant toning, although this CAC-endorsed, Plus-graded Superb Gem takes the spectacular coloration to a new level. Variegated shades of deep-aquamarine, violet, cherry-red, and amber-orange decorate the obverse, while the reverse is brilliant within a frame of orange-gold rims. The coin is virtually unmarked and fully struck from stem to stern. NGC ID# 23JS, PCGS# 5019

**1940-S Dime, MS68 Full Bands
Brilliant Semiprooflike Fields**

- 3454 1940-S MS68 Full Bands PCGS.** In MS68 Full Bands, even plentiful Mercury dime issues such as the 1940-S become challenges. This piece is struck from polished dies that still show crisscrossing striations (mint made) but also significant reflectivity. The coin is brilliant and sharp. Fewer than a dozen MS68 Full Bands examples of this issue are reported and none are numerically finer. Population: 9 in 68 (1 in 68+) Full Bands, 0 finer (5/19). NGC ID# 23JW, PCGS# 5027

**1942-S Dime, MS67+ Full Bands
Elusive CAC-Approved Registry Coin**

- 3455 1942-S MS67+ Full Bands PCGS.** CAC. Although plentiful in MS67 Full Bands, the 1942-S is rare this fine with a Plus designation, and seldom is a CAC-approved coin encountered. This piece features both distinctions. Only six coins are finer at PCGS (5/19). Each side has a bold strike and remarkably vibrant, frosty mint luster. A tinge of gold around the borders frames the silver-white interiors. CAC: 75 in 67, 1 finer (5/19). NGC ID# 23K7, PCGS# 5043
- 3456 1942-S MS67+ Full Bands PCGS.** CAC. Large S. A brilliant wartime Superb Gem that boasts a crisp strike and potent luster. Pristine save for delicate contact on the right reverse field. As of (5/19), PCGS has certified 22 pieces as MS67+ with only 6 finer. CAC: 75 in 67, 1 finer (5/19). NGC ID# 23K7, PCGS# 5043

PROOF MERCURY DIME

- 3457** 1939 PR68★ NGC. A magnificent PR68 Mercury dime, with sharply detailed design elements and deeply mirrored fields throughout. The virtually flawless surfaces are brilliant and the outstanding eye appeal is attested by the Star designation. Census: 84 in 68 (1 in 68+, 12 in 68★), 0 finer (6/19). NGC ID# 5AMD, PCGS# 5074

PROOF ROOSEVELT DIME

1983 No S Dime, PR70 Ultra Cameo
Glaring Mint Oversight

- 3458** 1983 No S PR70 Ultra Cameo NGC. The 1983 No S proof dime takes 36th place in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. The authors explain, "the nature of the oversight is what makes these coins so interesting to collectors, and the rarity of the error makes them valuable." As usual, brilliant surfaces showcase dramatic black-and-white contrast. Each side is pristine. Census: 8 in 70 Ultra Cameo, (6/19). NGC ID# 28ZN, PCGS# 95265

TWENTY CENT PIECES

- 3459** 1875-CC MS61 NGC. BF-2, R.1. From a mintage of 133,290 pieces, the 1875-CC is the only collectible twenty cent piece from the famous Carson City Mint, because the 1876-CC is a great rarity. This well-struck MS61 example shows a touch of the usual softness on the eagle's breast. The lustrous, lightly toned surfaces are mildly abraded for the grade. NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent, Frosty MS66
High-End Type Coin

- 3460** 1875-S MS66 PCGS. BF-5, R.2. BF-5 is known in a late die state with a shattered reverse and a rim cud below the date on the obverse. This piece lacks the obverse rim cud, and while the reverse is extensively cracked, the breaks are not as prominent as they are in a later die state. The 1875-S is scarce in MS66 and a major rarity any finer, but it is the most plentiful issue in the series so well-preserved — thus its appeal as a high-end type coin. This example displays shimmering original luster with golden interiors and blue-green borders. Some strike softness is noted on several border stars and the upper edge of the eagle's left (facing) wing. Population: 78 in 66 (11 in 66+, 7 finer (5/19). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR63 Cameo
Frosty All-Brilliant Surfaces

- 3461** 1876 PR63 Cameo NGC. BF-3, R.4. This die pair with the 7 positioned over the space between two dentils was used to strike proofs and, later, circulation strikes. The frosted design elements stand out in stark contrast against the reflective fields. This all-brilliant PR63 Cameo twenty cent derives from a mintage of 1,150 specimens. NGC ID# 27H3, PCGS# 85304

EARLY QUARTER

1806/5 B-1 Quarter, Sharp XF40
Popular Overdate Variety

- 3462** 1806/5 B-1, R.2, XF40 PCGS. Tompkins Die State 2/3. The usual clashed and cracked die state. Glimpses of luster fill the legends and curls of this attractive better-grade early quarter. Free from any remotely distracting contact. B-1 is the sole 1806 overdate variety, and it displays an obvious underdigit that can be seen with the unaided eye.
Ex: FUN Signature (Heritage, 1/2015), lot 4527, which realized \$3,525. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

BUST QUARTERS

- 3463** 1818/5 B-1, R.2, AU55 NGC. Tompkins Die State 2/2, clashed. Of the 10 Browning 1818 quarter varieties, only B-1 and B-3 are overdates, sharing the same obverse die; nonetheless, the overdate feature is faint or nonexistent on B-3 coins due to the die state, making B-1 the only visible overdate for this issue. The fields and devices of this piece are generally slate-gray, but the margins offer deep fire-red, forest-green, and golden-brown toning. The curls and claws display light wear, but luster beckons from the plumage, and there are no reportable marks. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323
- 3464** 1818 B-4, R.2, AU55 PCGS. Tompkins Die State 5/4, terminal. Two prominent radial cracks on the obverse extend from the rim at 11:30 and 4:30, and the reverse is cracked through the D in UNITED. This piece shows little wear but has glossy surfaces with light gray-gold patina. A few minor contact marks appear beneath a loupe. NGC ID# 23RH, PCGS# 38945 Base PCGS# 5322
- 3465** 1821 B-1, R.3, AU50 PCGS. Tompkins Die State 1/1. The borders exhibit pastel tan-gold toning, while the fields and motifs are pearl-gray. A well-defined example that displays luster throughout the legends, feathers, and curls. A loupe reveals scattered small digs and a minor reverse rim nick at 8:30. NGC ID# 23RM, PCGS# 38963 Base PCGS# 5331

3466 1821 B-4, R.3, AU55 PCGS. Tompkins Die State 1/1, without a crack through the E in UNITED. Apple-green toning accompanies the rims, while the remainder of the coin displays lavender and russet shades. The upper stars show softness but the strike is generally bold. The surfaces are semiprooflike and surprisingly free from marks.

Purchased from Dick Osburn, 12/2007, for \$2,400; Denis W. Loring Capped Bust Quarter Collection; FUN Signature (Heritage, 1/2019), lot 3170. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

3467 1828 25 Over 50C, B-3, R.5, Fine 12 PCGS. Tompkins Die State 1/1. B-3 is the 25 Over 50C *Guide Book* variety, a key date in the Capped Bust quarter series. This circulated collector coin displays moderate wear but has smooth surfaces. Each side displays deep olive-gray, lilac, and russet toning. NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

SEATED QUARTERS

1876 Quarter Dollar, MS66+ Frosty Motto Type Coin

3468 1876 MS66+ PCGS. Type Two Reverse. A magnificent Seated type coin featuring frosty mint luster, sharp details, and exemplary preservation. Plum-red and bluish toning appears throughout the peripheries. Interesting clash marks from Liberty's shield appear beneath the eagle's beak. The 1876, a common date overall, is conditionally scarce in this grade. Finer pieces are rare. NGC ID# 23V2, PCGS# 5501

3469 1884 MS65 PCGS. CAC. Briggs 1-A. All 8,000 circulation strikes were produced using this single set of dies. The original toning that covers each side includes shades of lavender, blue, green, and orange. Strike definition is good, though we note a trace of incompleteness over a few of the highest design points. Population: 16 in 65, 34 finer. CAC: 6 in 65, 14 finer (5/19). NGC ID# 23VG, PCGS# 5516

3470 1885 MS66+ PCGS. Briggs 2-B. There is a small die lump under the top arrowhead. Each side of this lovely Seated quarter is completely toned in primarily gunmetal-gray and tan-gold patina. Elements of blue and lavender on the reverse heighten the appeal. Central strike definition is bold with a hint of incompleteness on the stars and olive leaves. As expected for a coin in this amazing state of preservation, marks are unimportant. Only 13,600 circulation strike quarters were produced in 1885. Population: 18 in 66 (3 in 66+), 4 finer (5/19). NGC ID# 23VH, PCGS# 5517

PROOF SEATED QUARTERS

1857 Seated Liberty Quarter, PR64 Early and Better Proof Date

3471 1857 PR64 PCGS. CAC. Briggs 7-G. Proof mintages are unknown for any issue prior to 1859, but that of the 1857 quarter is likely small. The PCGS estimate of 75 to 100 surviving proof 1857 quarters is likely generous. PCGS and NGC combined report only 65 grading events for this issue, including possible duplication. This example has light golden toning and nicely mirrored fields. The strike shows minor weakness on the eagle's leg feathers and the fletchings. Population: 10 in 64, 4 finer; 2 in 64 (1 in 64+) Cameo, 1 finer. CAC: 6 in 64, 5 finer (5/19). NGC ID# 23WJ, PCGS# 5553

1861 Quarter Dollar, PR65+ Beautifully Toned No Motto Type Coin

3472 1861 PR65+ PCGS. Briggs 7-E. Most proof 1861 Seated Liberty quarters grade no finer than PR64. This rare Plus-designated Gem displays deeply reflective fields and vivid amber, blue, gold, and mint-green toning. A fully struck No Motto proof type coin, highly eye-appealing. Population: 8 in 65 (1 in 65+), 6 finer; 1 in 65 Cameo, 2 finer (5/19). NGC ID# 23WN, PCGS# 5557

1872 Seated Quarter, PR66 Cameo Rarely Seen Any Finer

3473 1872 PR66 Cameo NGC. This lovely Premium Gem Cameo proof ranks among the high-grade examples from a mintage of 950 coins, while only about half of the proof production survives to the present day. Delicate gold and blue toning appears on the mostly brilliant silver surfaces of this lovely Seated Liberty quarter. Sharply struck, frosted motifs contrast boldly with the mirrored fields. Census: 6 in 66 Cameo, 7 finer (6/19). NGC ID# 23X5, PCGS# 85571

1883 Seated Quarter, PR67
Beautiful Toning, Splendid Eye Appeal

- 3474 1883 PR67 NGC.** A splendidly toned, crisply struck, and essentially pristine Superb Gem proof. Both borders exhibit bands of sea-green and sky-blue patina, while the centers display dappled violet-red and tan-gold shades. A low-mintage date due to ceaseless silver dollar production — just 1,039 pieces were struck, of which maybe 3% survive in this condition or finer. Census: 14 in 67 (1 in 67+, 1 in 67★), 3 finer (5/19).

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 692, which realized \$3,450. NGC ID# 23XF, PCGS# 5584

1885 Quarter Dollar, PR67+
Remarkable Surface Quality

- 3475 1885 PR67+ PCGS. CAC. Briggs 3-B.** This nearly perfect Superb Gem proof displays dusky gray and russet toning over deeply reflective fields. The right-hand stars are not fully defined but the remainder of the design is sharp. The 1885 proof is in high demand due to the low 13,600-coin mintage of its circulation strike counterpart. Population: 4 in 67 (2 in 67+), 0 finer; 11 in 67 (1 in 67+) Cameo, 2 finer; 3 in 67 (2 in 67+) Deep Cameo, 0 finer. CAC: 3 in 67, 0 finer (5/19). NGC ID# 23XH, PCGS# 5586

- 3476 1888 PR66 Cameo PCGS.** A moderate proof mintage of 832 quarters was struck in 1888, and while high-grade survivors can be found with little difficulty, Cameo examples are seldom seen. This Premium Gem exhibits well-struck devices that strongly contrast with the deeply mirrored, seemingly undisturbed fields. A light golden hue warms each side, only adding to the overall visual appeal. Population: 7 in 66 Cameo, 1 finer (5/19).
 Ex: FUN Signature (Heritage, 1/2004), lot 6057; Brian Loncar Collection, Part II / Long Beach Signature (Heritage, 6/2014), lot 3736. NGC ID# 23XL, PCGS# 85589

PROOF BARBER QUARTERS

1893 Barber Quarter, PR67+
Vivid Multicolor Toning

- 3477 1893 PR67+ PCGS. CAC.** Only 792 proof Barber quarters were struck in 1893, the second year of the design. This Plus-graded Superb Gem exhibits sharply detailed design elements and deeply mirrored fields throughout. Vivid shades of cerulean-blue and emerald-green toning enliven the impeccably preserved surfaces. Eye appeal is terrific. Population: 19 in 67 (1 in 67+), 4 finer. CAC: 14 in 67, 4 finer (6/19). NGC ID# 2428, PCGS# 5679

- 3478 1897 PR66+ PCGS.** This Plus-graded Premium Gem proof exhibits sharply detailed design elements and deeply reflective fields throughout. The impeccably preserved surfaces are visited by vivid shades of magenta, cerulean-blue, and sea-green toning. Population: 27 in 66 (1 in 66+), 12 finer (6/19). NGC ID# 242C, PCGS# 5683

- 3479 1897 PR66 Cameo PCGS.** This Premium Gem proof with stark black-and-white Cameo contrast serves as evidence that during the final years of the 19th century the Mint was churning out some of the highest-quality specimens it had to that point. Both sides are brilliant and free of contact. From a mintage of 731 proofs. Population: 20 in 66 (2 in 66+) Cameo, 17 finer in this category (5/19). NGC ID# 242C, PCGS# 85683

1898 Barber Quarter, PR67
735 Pieces Struck

- 3480 1898 PR67 NGC.** A meager mintage of 735 proof Barber quarters was accomplished in 1898, making the issue quite elusive at the PR67 grade level. This delightful Superb Gem exhibits sharply detailed, frosty design elements and impeccably preserved surfaces, with deeply reflective fields. Shades of powder-blue, lavender, and pale green toning visit both sides. Census: 20 in 67, 19 finer (6/19). NGC ID# 242D, PCGS# 5684

- 3481 1903 PR66 Cameo PCGS.** Deep Cameo examples of the proof 1903 quarter are almost uncollectible for many enthusiasts, putting heightened demand on high-end Cameos. This Premium Gem displays stark white-on-black contrast and fully rendered details. Liquidlike mirroring in the fields captivates the viewer. Population: 14 in 66 (1 in 66+) Cameo, 21 finer; 0 in 66 Deep Cameo, 2 finer (5/19). NGC ID# 242J, PCGS# 85689

1907 Barber Quarter, PR67 Cameo
575 Pieces Struck

- 3482** 1907 PR67 Cameo NGC. Only 575 proof Barber quarters were struck at the Philadelphia Mint in 1907 and few Cameo examples are available, due to the all-brilliant finish used on proofs of this era. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the unusually frosty devices. Census: 16 in 67 Cameo (2 in 67★), 4 finer (6/19). NGC ID# 242N, PCGS# 85693

1912 Barber Quarter, PR67
Only 700 Examples Minted

- 3483** 1912 PR67 PCGS. The Philadelphia Mint struck a meager mintage of 700 Barber quarters in 1912. This delightful Superb Gem proof exhibits sharply detailed, frosty design elements and deeply mirrored fields on both sides. Strong elements of contrast are present, though unacknowledged. The brilliant surfaces are virtually flawless. Population: 11 in 67 (1 in 67+), 4 finer (6/19). NGC ID# 242U, PCGS# 5698

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, Fine 12
Collector-Grade Example

- 3484** 1916 Fine 12 PCGS. A collector-grade Fine 12 example of the first-year key, showing slate-gray surfaces with deeper russet toning along portions of the reverse border. The top of the date blends into the step from wear, although all four numerals are clearly discernible. Midgrade 1916 Standing Liberty quarters are scarce and in high demand. NGC ID# 43XR, PCGS# 5704

1918 Standing Liberty Quarter, MS67
Rare and Underrated, Nearly Full Head

- 3485** 1918 MS67 PCGS. The 1918 Standing Liberty quarter is a rarity in Superb Gem condition. The certified population figures support the reality that the 1918 is extremely rare in MS67 non-Full Head, and undervalued within the context of the series. This representative showcases bold detail on the shield, date, stars, and eagle. Liberty's head is at least 80% complete. Splashes of amber, gold, and sea-green toning appear on each side over frosty lavender-blue luster. Population: 3 in 67, 0 finer (5/19).
Ex: Jay Cline Collection - FUN Signature (Heritage, 1/2016), lot 4991, which realized \$3,055. NGC ID# 3TWT, PCGS# 5720

1918/7-S Quarter Dollar, VF25
Attractive Collector Coin

- 3486** 1918/7-S FS-101 VF25 NGC. The overdate feature is visible on this midgrade coin despite weakness of the date numerals. Wear is light, and the satiny pewter-gray surfaces are pleasantly original. Collector-grade 1918/7-S Standing Liberty quarters are rare with original surfaces and attractive color. This piece will interest the specialist, as other VF coins of comparable quality are almost never seen. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1920-D Quarter, MS64 Full Head
Smooth Satin Surfaces

- 3487** 1920-D MS64 Full Head PCGS. The 1920-D is a hidden semikey in the Standing Liberty quarter series with Full Head definition. This Choice example is satiny and well-preserved, showing impressive sharpness on the shield rivets and Liberty's head. The top of the date is weak as usual, although this is a secondary attribute to the head and shield. Population: 52 in 64 (3 in 64+) Full Head, 56 finer (6/19). NGC ID# 243F, PCGS# 5737

1920-S Standing Liberty Quarter, MS62 Full Head

- 3488 1920-S MS62 Full Head NGC.** This impressive MS62 specimen shows a touch of the usual softness on some shield rivets, but enough head detail is present to qualify for the Full Head designation. The lightly marked, lustrous surfaces are visited by highlights of golden-brown and lavender-gray toning. From a mintage of 6.3 million pieces, the 1920-S is elusive with Full Head definition. Census: 13 in 62 (1 in 62+) Full Head, 52 finer (5/19). NGC ID# 243G, PCGS# 5739

- 3489 1923 MS67 PCGS. CAC.** A brightly lustrous Superb Gem with pale rose and peach shadings gracing surfaces that remain largely silver-white. Well-defined save for the usual trouble spots on Liberty's head and shield.
Ex: *FUN Signature (Heritage, 1/2010)*, lot 2665. NGC ID# 243J, PCGS# 5742

- 3490 1923-S AU50 PCGS.** The 1923-S Standing Liberty quarter is an elusive issue in the series, from a small mintage of 1.3 million pieces. This lightly worn, lightly abraded AU specimen retains traces of original mint luster and some highlights of lavender and pale gold toning. NGC ID# 243K, PCGS# 5744

- 3491 1923-S AU55 NGC.** This is an attractive collector-grade coin with hints of natural luster in the satiny recesses. Each side displays champagne-tinted pewter-gray toning and slightly high-point wear. Liberty's head is a trifle weak as usual on this issue, although the date numerals are clear. The 1923-S is a sought-after key date in circulated grades. Few examples are seen with original surfaces. NGC ID# 243K, PCGS# 5744

- 3492 1923-S — Cleaned — PCGS Genuine. Unc Details.** The 1923-S ranks among the scarcest issues of the series. The mintage was only 1,360,000 pieces, and relatively few were saved, since most collectors at that time lived east of the Mississippi. This satiny olive-gray example appears unblemished but has slightly subdued surfaces. Liberty's head is a trifle weak at the ear area, but the date is sharp.

- 3493 1930 MS66+ Full Head PCGS. CAC.** The Plus designation and CAC green label combination sets this Premium Gem apart from its peers. Each side is softly frosted and well-preserved with attractive pastel and multicolor toning in the margins. The centers are light golden. The usual weakness is noted on the shield rivets and the leading edge of the eagle's left (facing) wing, but Liberty's head and toes are needle-sharp. NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

- 3494 1932-S MS65 PCGS.** Satiny luster yields light golden toning, which is most prominent around the borders on this Gem 1932-S quarter. The coin is well-struck, and a small mark on Washington's neck is the only abrasion of note. The 1932-S is scarce in this grade, and with only four finer coins at PCGS, collector demand is further heightened for MS65 examples. NGC ID# 2449, PCGS# 5792

- 3495 1941-S MS67+ PCGS. CAC.** Just over 16 million S-mint quarters were struck in 1941 and none have been certified finer than MS67+ at PCGS (6/19). The surfaces display bright, shimmering mint luster with light, scattered toning around the margins on each side. NGC ID# 244Z, PCGS# 5816

- 3496 1941-S MS67+ PCGS. CAC.** Bright cartwheel luster rolls around each side unimpeded by the abrasions usually encountered. The centers are brilliant with light golden toning around the margins. Only 16 million pieces were struck. CAC: 46 in 67, 0 finer (5/19). NGC ID# 244Z, PCGS# 5816

1950 Quarter Dollar, MS67+ Top-Grade CAC Registry Coin

- 3497 1950 MS67+ PCGS. CAC.** The 1950 Washington quarter is occasionally available in MS67 in an NGC holder, but PCGS coins are seldom offered this fine, and CAC green labels are rare. This Plus-graded Superb Gem is tied for the finest 1950 quarter dollar certified. It shows olive and russet border toning on the obverse with iridescence across the interior. The reverse is uniformly light golden. Strike sharp and outstanding preservation make this piece important as a type coin as well as a Registry Set candidate. Population: 71 in 67 (12 in 67+), 0 finer. CAC: 38 in 67, 0 finer (6/19). NGC ID# 245S, PCGS# 5841

- 3498 1976-D Doubled Die Obverse, FS-101, MS65 PCGS.** FS-101 is easily the most significant die variety of the Bicentennial type. LIBERTY is nicely die doubled, and IN GOD WE TRUST also shows a minor spread. FS-101 is clearly scarce, since most examples in NGC and PCGS holders are in circulated grades. In fact, the present lot is the single finest certified (5/19). The stone-gray surfaces are smooth save for a single delicate diagonal line on Washington's neck. PCGS# 146087 Base PCGS# 5897

EARLY HALF DOLLARS

- 3499 1802 O-101, T-1, R.3, VF20 NGC.** One pair of dies was used for half dollar coinage in 1802. Mint records indicate a mintage of only 29,890 coins, making this issue sought-after in all grades. The VF coin offered here displays deep sea-green, gold, and amber toning in the fields with light gray devices. Wear is even and eye appeal is outstanding for the grade. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1806 O-120 Draped Bust Half, AU53 Pointed 6, Stem in Claw, CAC

- 3500 1806 Pointed 6, Stem, O-120, T-28, R.3, AU53 PCGS. CAC.** Tompkins Die State 2/1. A relatively early die state of this popular variety, before any die breaks march across the shield center. This CAC-approved example is refreshingly unabraded and displays consistent, original cream-gray toning. Evenly struck throughout both sides and highly appealing. NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

**1807 Draped Bust Half Dollar, AU58
O-109a, Peripheral Die Cracks**

- 3501** 1807 Draped Bust, O-109a, T-2, R.3, AU58 NGC. Tompkins Die State 3/2. Both sides exhibit peripheral die cracks in this die state. Near-Mint surfaces are satiny and untuned, showing barely a trace of friction. The centers are weakly struck as usual for this issue, although the border stars are bold. This is the final year of coinage for the Draped Bust design, popular among type collectors. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

BUST HALF DOLLARS

- 3502** 1808 O-107, R.3, MS61 NGC. Die markers for this collectible 1808 variety include a die break in front of Liberty's neck, two times protruding from the scroll between the D in UNITED and the first S in STATES, and a group of tiny die dots in the field near the left shield corner. This Uncirculated coin displays a sharp central strike and is only slightly weak on the right-hand stars. Each side has deep ocean-blue and lilac-gray toning. NGC ID# 4DMU, PCGS# 39370 Base PCGS# 6090
- 3503** 1809 Normal Edge, O-106, R.3, AU58 NGC. The usual die state of this variety, showing a peripheral die crack through the left-hand stars. Metal flowlines affect the border fields, although barely a brush of friction is evident over the central devices. Some strike weakness is seen on the eagle's left wing. Neither side is toned and luster abounds in the fields. NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092
- 3504** 1810 O-101a, R.1, AU58 NGC. A network of peripheral die cracks on each side and heavy clash marks are among the diagnostics of this collectible die marriage. Offered here is a near-Mint coin with substantial luster remaining in the fields. Barely a trace of friction is evident on the devices, and each side displays warm golden toning. The obverse has additional olive-green and russet patina in the margins. Research by Steve Herrman (with assistance from a member of the Bust Half Nut Club) confirms that this is the plate coin from the 1967 first edition of the Overton reference. An ideal collector coin in an ideal collector grade. NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095
- 3505** 1811 Small 8, O-108a, R.2, AU58 NGC. CAC. The late die state with a crack beneath and through UNITED. A dusky cream-gray Borderline Uncirculated Bust half dollar that shows refreshingly few signs of contact. A hint of wear on Liberty's curls precludes a Mint State assessment. NGC ID# 8Z63, PCGS# 39432 Base PCGS# 6097
- 3506** 1811 Small 8, O-110a, R.1, AU58 NGC. The date numerals slant to the left on this variety, and on the reverse the AM in AMERICA are joined at their bases. This near-Mint coin displays satiny luster in the fields with delicate russet-gold toning. The central devices are well-struck, although the left-hand border stars are incomplete. NGC ID# 24EU, PCGS# 39435 Base PCGS# 6097
- 3507** 1814 O-103, R.1, AU58 NGC. A heavy vertical die line connects the left end of the reverse scroll to the eagle's left (facing) wing, readily identifying the Overton-103 die variety. This near-Mint coin is heavily clashed on both sides, diagnostic of a late die state. Luster glistens in the fields and recesses, and light russet toning warms each side. Barely a trace of high-point friction is discernible. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

- 3508** 1817 O-107, R.3 — Questionable Color — PCGS Genuine. Unc. Details. Deep forest-green borders bound rose-red and olive-gold centers. Lustrous and surprisingly unabraded. The borders are well struck, though the eagle's neck curls are incompletely impressed. The many die cracks across the reverse periphery are usual for O-107.

- 3509** 1818/7 Large 8, O-101, R.1, AU58 NGC. One of two Large 8 overdate varieties for this issue, identified by a gap in the dentils below the C in 50C. This lilac-gold and sea-green near-Mint coin displays partial satin luster and light high-point wear. Eye appeal is pleasing for the grade. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

**1829 O-112 Half Dollar, MS64
Distinctive Variegated Toning**

- 3510** 1829 Small Letters, O-112, R.1, MS64 PCGS. Stone-gray, cobalt-blue, tobacco-brown, and lavender toning embraces this satiny and well-preserved near-Gem. Silver luster shines through openings in the attractive, multicolor toning. The strike is sharp except on star 6. O-112 is distinctive for its cluster of parallel and diagonal die lines below star 13. An impressive Capped Bust type coin, seldom seen any finer for the variety.
Ex: Houston Money Show (Heritage, 12/2015), lot 4375. NGC ID# 24FS, PCGS# 39795 Base PCGS# 6154

**1831 Bust Half, Richly Toned MS64
O-101 Condition Census Coin**

- 3511** 1831 O-101, R.2, MS64 PCGS. The spacing of the date and the horizontal and vertical lines extending beyond the borders of the shield are useful in identifying this available die pair. Much luster covers both sides, which are richly toned in grayish-bronze shades with pinkish-gold accents joined by ice-blue overtones, a no-question near-Gem coin, beautiful and high-end for the grade. This O-101 is tied within the Condition Census for the variety behind two full Gem coins.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3697. NGC ID# 24FV, PCGS# 39837 Base PCGS# 6159

- 3512** 1832 Small Letters, O-115, R.1, MS63 PCGS. CAC. The PLUR in PLURIBUS is weakly struck as usual on this coin, although most other design elements are well-defined. Luster revolves in the fields amid dusky olive-gold and grayish toning. Abrasions are minimal with few immediately obvious, hence the CAC endorsement. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

REEDED EDGE HALF DOLLAR

- 3513 1837 GR-20, R.3, MS63 PCGS.** The reverse shows considerable die wear at the margins, with loss of dentils and flowlines within the legend, yet this is an early strike for the GR-20 variety, lacking die cracks. Silver luster glows beneath a speckling of golden-gray toning. Otherwise, this Select Uncirculated example has only a few small marks and no distracting abrasions. The 3 and 7 in the date are noticeably recut, visible along the tops of the numerals. NGC ID# 24G4, PCGS# 531068 Base PCGS# 6176

SEATED HALF DOLLARS

1839 Half Dollar, AU50 Single-Year No Drapery Type, CAC

- 3514 1839 No Drapery, WB-101, Die Pair 4, R.4, AU50 PCGS. CAC.** Two tiny die lines behind Liberty's heel determine the variety, although the lines are faint and require a strong loupe. Always in demand as a one-year type, the 1839 No Drapery design was quickly modified to add three folds of drapery beneath Liberty's elbow, and the rock support was narrowed significantly below star 1. This lightly toned About Uncirculated example is a rare recipient of CAC endorsement, with dappled golden-gray toning that deepens to iridescent shades at the borders including golden-brown and blue accents. Population (all No Drapery varieties): 26 in 50, 93 finer. CAC: 5 in 50, 20 finer (6/19). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 3515 1854 Arrows, WB-101, MS64 PCGS.** A slate-gray near-Gem with hints of lilac and ice-blue patina. This Arrows type coin is well-struck and uncommonly free of abrasions. Double clash marks appear near the raised elbow, and both borders display multiple cracks. A conditionally rare two-year design subtype. Population: 37 in 64 (1 in 64+), 12 finer (5/19). NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

- 3516 1857-S Medium S, Blundered Date, WB-103, Die Pair 3, R.4, AU55 NGC.** While not an especially scarce variety, this is an interesting one nevertheless with two repunched serifs of a 1 west of the 1 in the date. An outline of mint luster is readily apparent surrounding the devices on each side, even through the medium-density golden-brown toning. Sharply struck. NGC ID# 24HU, PCGS# 572107 Base PCGS# 6292

- 3517 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401—Obverse Graffiti — NGC Details. Unc.** A die crack from the right of star 7 runs south to the bridge of Liberty's nose, through the chin, and to the shoulder, confirming the famous obverse die that was used in its next pairing to strike the four known original "CSA reverse" Confederate half dollars. This naturally toned example has Uncirculated details, with lightly etched graffiti in the right field that reads "O. M. June 21st 1875." Both sides are sharp and attractive, and otherwise problem-free.

- 3518 1874 Large Arrows, WB-102, MS64 PCGS.** Mottled blue and slate-gray toning shares surface area with satiny silver luster on both sides of this near-Gem Large Arrows half. The final issue of a two-year type, the 1874 is scarce in MS64 condition and rare any finer. This Choice example is sharply struck on the obverse stars with only minor weakness on Liberty's hair strands and the eagle's left (facing) talon. PCGS reports just 23 finer coins (5/19). Ex: *Long Beach Signature (Heritage, 6/2016), lot 3923.* NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

- 3519 1882 WB-101 MS64 NGC.** This variant shows the point of the 2 centered over a dentil. Actually this is a proof die that was pressed into service to produce strikes for circulation after striking proofs. The predictable result is significant reflectivity in the fields with almost brilliant centers and scattered gray-rose and lilac toning around the margins. Census: 14 in 64 (2 in 64+), 21 finer (6/19). PCGS# 572265 Base PCGS# 6364

PROOF SEATED HALF DOLLARS

- 3520 1869 PR64 PCGS. CAC. WB-101.** This early With Motto date had a mintage limited to 600 proofs. This is a deeply reflective example that displays rich blue and rose toning scattered over each side, but deeper around the margins. Population: 67 in 64 (2 in 64+), 22 finer. CAC: 10 in 64, 9 finer (6/19). NGC ID# 27U4, PCGS# 6427

- 3521 1881 PR64 Cameo NGC.** NGC has not certified any Ultra Cameo proofs of this date, and Cameos are a fraction of the survivorship. The near-Gem offered here is well-struck and starkly contrasted. Just a touch of weakness is visible on the eagle's left (facing) foot. Each side has a hint of dusky light golden patina. Census: 31 in 64 Cameo (1 in 64+, 1 in 64★), 39 finer (5/19). NGC ID# 27UG, PCGS# 86442

- 3522 1887 PR64 Cameo PCGS.** This Choice Cameo proof 1887 Seated Liberty half dollar has fully mirrored fields and frosty, lustrous silver devices, resulting in excellent field-to-device contrast. Delicate gold toning is limited to the rims and denticles on each side of this beauty. Population: 19 in 64 (1 in 64+) Cameo, 21 finer (6/19). NGC ID# 27UP, PCGS# 86448

1888 Half Dollar, PR66+ Impeccably Preserved, Pastel Toning

- 3523 1888 PR66+ NGC.** A 12,000-coin mintage is marginally higher than other half dollar issues from this decade, but it is minuscule in the larger context of the Seated Liberty half dollar series. Blended mauve, lilac, and powder-blue patina covers each side with splashes of deeper toning mostly on the obverse. Preservation is impeccable. Census: 12 in 66, 6 finer in non-Cameo (5/19). NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

- 3524 1895-S MS64+ NGC.** The 1895-S is readily obtained in well-circulated condition, but near-Gems are highly elusive. The fields on the present piece are semiprooflike and exhibit myriad fine die lines. Golden-brown and blue-green toning is limited to the margins. Minor contact on the portrait is all that limits the grade. Census: 34 in 64 (3 in 64+, 1 in 64★), 17 finer (5/19). NGC ID# 24LU, PCGS# 6473

- 3525 1904-O MS62 PCGS.** Natural shades of blue, orange, and red-violet color serve to augment the appeal of this MS62 Barber half dollar and conceal grade-limiting ticks on each side. Strike definition is remarkably strong for the O-mint, including on the right shield-wing juncture. Population: 7 in 62, 43 finer (5/19). NGC ID# 5EPG, PCGS# 6499

**1904-O Barber Half, MS64
Challenging at This Level or Finer**

- 3526 1904-O MS64 NGC.** Seldom seen or offered in full Gem Uncirculated, this near-Gem 1904-O displays a brilliant and lustrous obverse, paired with a nicely border-toned reverse. Both sides show nearly mark-free, frosted surfaces and a sharp strike, with only minor weakness at the shield/wing junction. The certified population is remarkably low at the MS64 level or finer, regardless of grading service. Census: 13 in 64, 6 finer (5/19). NGC ID# 5EPG, PCGS# 6499

- 3527 1911 MS65 PCGS. CAC.** A scarce Gem example of this otherwise plentiful Philadelphia issue, rare with the CAC endorsement. Brilliant, shimmering mint luster cascades over each side, revealing only a few faint luster grazes. Excellent sharpness is enjoyed on all design elements. Population: 50 in 65 (1 in 65+), 18 finer. CAC: 12 in 65, 4 finer (5/19). NGC ID# 24ND, PCGS# 6521

PROOF BARBER HALF DOLLARS

- 3528 1894 PR65 NGC.** A total of 972 proofs were struck, but perhaps only 10% of those survive in Gem proof or finer grades. This is a brilliant-white PR65 example, with flashy mirrored fields and lightly frosted central devices. The obverse strike is sharp, while the reverse shows only brief softness at the upper-right shield junction and adjacent feathers. Census: 40 in 65 (1 in 65★), 47 finer (5/19). NGC ID# 24NW, PCGS# 6541

1894 Half Dollar, Brilliant PR67 Cameo

- 3529 1894 PR67 Cameo NGC.** A mintage of 972 proofs ranks among the highest totals in the series, second only to the first-year 1892. This all-brilliant Superb Gem delivers the pronounced white-on-black contrast collectors enjoy. Raised design elements are richly frosted and surrounded by reflective fields. The obverse features a complete impression, while minor incompleteness occurs on the eagle's neck and the right shield-wing juncture. Census: 14 in 67 Cameo (1 in 67+), 2 finer (6/19). NGC ID# 24NW, PCGS# 86541

- 3530 1895 PR65 Cameo PCGS.** The sharply detailed, frosty design elements of this attractive Gem proof contrast boldly with the deeply mirrored fields and the well-preserved surfaces are brilliant and appealing, with some faint highlights of pale jade toning in selected areas. Population: 14 in 65 (2 in 65+) Cameo, 27 finer (5/19). NGC ID# 24NX, PCGS# 86542

- 3531 1897 PR64 Cameo PCGS.** Noticeable contrast exists between the frosted motifs and reflective, largely brilliant fields. A few daubs of dusky patina are seen. A total of 731 proof half dollars were struck in 1897 — a time of extraordinary production standards. Clean except for a thin pincscratch across the upper cheek. Population: 27 in 64 (2 in 64+) Cameo, 48 finer (5/19). NGC ID# 24NZ, PCGS# 86544

- 3532 1902 PR65 PCGS.** Glimmering fields display liquid mirroring on this Gem proof, warmed by light golden toning that deepens to amber along the right obverse border. The obverse is sharp, although the right side of the reverse eagle is poorly defined. From a mintage of 777 pieces. Population: 34 in 65, 44 finer (5/19). NGC ID# 24P6, PCGS# 6549

- 3533 1905 PR66 PCGS.** Classic deep blue, violet, and gold tones cover nearly the entirety of this Premium Gem proof, save for a wedge of brilliance on the obverse. Limited contrast is the norm for this period. Pristine fields remain flashy beneath the overlay. One of 727 proof halves minted in 1905. Population: 31 in 66 (1 in 66+), 17 finer (6/19). NGC ID# 24P9, PCGS# 6552

**1911 Half Dollar, PR65 Cameo
Excellent Contrast**

- 3534 1911 PR65 Cameo NGC.** This lovely Barber half dollar, a Gem Cameo proof, has excellent field-to-device contrast that shines through delicate gold toning. The strike is bold and the deeply mirrored fields are pristine with no contact marks are hairlines on either side. Census: 9 in 65 Cameo (1 in 65★), 18 finer (6/19). NGC ID# 6UPG, PCGS# 86558

**1912 Half Dollar, PR66
Reflective and Lightly Toned**

- 3535 1912 PR66 NGC.** Golden-toned overall with variations from pale champagne to light russet-gold. The devices display considerable frost, such that the surfaces have nearly a Cameo appearance on the reverse, though the obverse falls short. Carefully preserved and visually excellent. The usual strike weakness is noted on the eagle's right (facing) wing junction. Census: 15 in 66 (1 in 66+), 15 finer; 5 in 66 (1 in 66+) Cameo, 4 finer (5/19). NGC ID# 24PG, PCGS# 6559

**1914 Barber Half, PR66
Magnificent Eye Appeal**

- 3536 1914 PR66 PCGS.** The extremely low mintage of circulation strikes was accompanied by a series-low mintage of just 380 proofs, many of which were hoarded by speculators. The largest such hoard — over 100 proofs — saw the accumulation cleaned, further reducing availability of pristine, high-grade specimens. This Premium Gem is essentially brilliant with liquidlike mirrors and razor-sharp devices. Faint, translucent pale-gold toning assures originality of the spectacular surfaces. Population: 24 in 66 (2 in 66+), 16 finer (6/19). NGC ID# 24PJ, PCGS# 6561

WALKING LIBERTY HALF DOLLARS

- 3537 1916-S MS64 PCGS. CAC.** An attractive example of this popular first-year issue. The mint luster shines brightly through light toning that is apparent over each side. Sharply struck with full definition on the hand of Liberty. NGC ID# 24PN, PCGS# 6568

**1917-S Half Dollar, MS64+
Reverse Mintmark**

- 3538 1917-S Reverse Mintmark MS64+ PCGS. CAC.** This frosty, high-end near-Gem Reverse Mintmark coin displays original luster. Speckled russet toning is visible around the margins, leaving the interiors bone-white for the most part. The usual strike softness affects Liberty's branch hand and the eagle's trailing leg, but the coin is generally well-struck elsewhere. No mentionable abrasions are evident. NGC ID# 24PU, PCGS# 6573

- 3539 1918 MS64 PCGS.** Light to medium golden-brown toning endows this wartime Walker, and is especially prominent at the borders. The eagle's breast shows a narrow streak of struck-in grease, but the strike is excellent, and both sides are nearly devoid of contact. NGC ID# 24PX, PCGS# 6574

**1920-S Half Dollar, MS63
Remarkably Lustrous Surfaces**

- 3540 1920-S MS63 NGC.** One would expect a higher percentage of surviving Uncirculated 1920-S halves since the mintage was in excess of 4.6 million pieces. However, it is likely that only 175-225 coins are extant in MS63 condition today. This is an especially lustrous example that displays subtle golden-rose color on the obverse with a brilliant reverse. The strike is above-average, but as always is less than complete. NGC ID# 24R5, PCGS# 6582

**1923-S Half Dollar, MS63
Better S-Mint Walker**

- 3541 1923-S MS63 PCGS.** The brilliant and lustrous surfaces of this 1923-S show remarkably few marks for the assigned grade, while satiny mint luster glows across the smooth-silver fields and devices. The '23-S strike is often weak, averaging about 50% on the head and throughout the central elements, yet this example is noticeably sharper than that. Both the branch hand and the eagle's trailing leg show some definition, albeit faint. Liberty's head gown lines lack only the highest details. NGC ID# 24R9, PCGS# 6586

**1927-S Half Dollar, MS64
Seldom Offered Finer**

- 3542 1927-S MS64 PCGS.** The 1927-S is a slightly better date in high grade, particularly so above MS64. This near-Gem is untoned and satiny with heavy die polishing lines (mint made) in the fields. The devices show strike softness on Liberty's branch hand and the eagle's trailing leg as usual. There are no mentionable abrasions. NGC ID# 24RA, PCGS# 6587

1927-S Half Dollar, MS64
Important Walking Liberty Issue

- 3543 1927-S MS64 PCGS.** The San Francisco Mint was the only facility that struck half dollars for circulation between the years of 1922 and 1928, and they only minted such pieces in 1923, 1927, and 1928. Additional half dollars were coined at Denver and San Francisco in 1929, and at San Francisco in 1933. Clearly there was little demand for the denomination in commerce during that period of a dozen years. This 1927-S half dollar is a brilliant Choice Mint State example with untoned silver surfaces, an average strike, and trivial marks. NGC ID# 24RA, PCGS# 6587

1928-S Walking Liberty Half, MS65
Remarkably Strong Strike for the Issue

- 3544 1928-S MS65 PCGS.** The 1928-S is both an absolute rarity (only 1.9 million pieces struck) as well as a bonafide strike rarity. This unquestioned Gem shows most of the definition on the skirt lines of Liberty and good detail on the eagle's feathers. The mint luster is bright and frosted, with just a speckling of pale, russet-gold patina present. Population: 66 in 65 (4 in 65+), 9 finer (5/19). NGC ID# 24RB, PCGS# 6588
- 3545 1929-S MS65+ PCGS.** The 1929-S Walker is usually available in MS65, but only 10 such pieces are Plus-graded at PCGS (5/19). This example is well-struck with original mint luster and only a few minute contact marks. Mottled bronze-gold toning covers portions of the obverse, leaving the reverse light golden. NGC ID# 24RD, PCGS# 6590
- 3546 1934-S MS65 PCGS.** A delightful Gem Walking Liberty half dollar, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show subtle highlights of jade and lavender toning. The 1934-S is elusive in finer grades. NGC ID# 24RH, PCGS# 6594
- 3547 1935-D MS66 PCGS.** The 1935-D Walking Liberty half dollar is scarce in this grade and nearly unknown finer. The present coin displays especially luminous, untuned mint luster and excellent preservation. Only a touch of strike softness is seen on Liberty's head and branch hand. NGC ID# 24RK, PCGS# 6596

1938-D Half Dollar, MS67
None Numerically Finer at NGC or PCGS

- 3548 1938-D MS67 NGC.** The 1938-D is a low-mintage, high-survival issue in the Walking Liberty series, although at the Superb Gem level only a few coins are certified (none finer than the MS67 category). This is a brilliant MS67 example with sparkling, satin-smooth luster and a sharp strike rim-to-rim. A few glimpses of faint-gold toning appear on nearly brilliant-white, pristine surfaces. A glass reveals die polish lines that are invisible to the unaided eye, suggestive of an early strike from fresh dies. Census: 25 in 67 (2 in 67+, 4 in 67★), 0 finer (5/19). NGC ID# 24RV, PCGS# 6605
- 3549 1941-S MS66+ PCGS. CAC.** This strike-challenged, late-date semikey issue is collectible in MS66 but becomes scarce in MS67. Normal incompleteness on the branch hand, Liberty's head, and the eagle's trailing leg is minor. The coin displays attractive frosty mint luster under shades of violet, crimson, gold, lavender, and blue toning. Only nine submissions finer at PCGS (6/19). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

FRANKLIN HALF DOLLARS

1948 Franklin Half Dollar, MS67
Registry Grade Full Bell Lines Example

- 3550 1948 MS67 Full Bell Lines PCGS.** The Franklin half dollar made its debut in 1948, with a mintage of just over 3 million pieces. This spectacular Superb Gem is among the finest survivors, with sharply detailed design elements that show full definition on the bell lines. The impeccably preserved surfaces are lustrous and appealing, under a dusting of lavender-gray and golden-tan toning. Population: 18 in 67 (1 in 67+) Full Bell Lines, 0 finer (5/19). NGC ID# 24SR, PCGS# 86651

**1951-S Half Dollar, MS67
Splendidly Toned**

3551 1951-S MS67 PCGS. Tied for finest-known at PCGS, with none numerically finer at NGC as well, this beautifully toned 1951-S is a strong Registry candidate for any toned Franklin half set. Forest-green shades meld with amber-orange and pale-rose hues for outstanding eye appeal. Mint-fresh luster illuminates the Superb Gem surfaces. Population: 13 in 67, 0 finer (5/19). NGC ID# 24T2, PCGS# 6660 Base PCGS# 6660

3552 1952-S MS66 Full Bell Lines PCGS. The 1952-S Franklin half is scarce in this grade with Full Bell Lines, and finer pieces are prohibitively rare. Offered here is a brilliant, frosty example with a sharp strike and shimmering, unabraded luster. An ideal Registry coin. Population: 62 in 66 (8 in 66+) Full Bell Lines, 3 finer (5/19). NGC ID# 24T5, PCGS# 86663

3553 1958 MS67 Full Bell Lines PCGS. CAC. Type One, with four flattened feathers to the left of the eagle's perch. This impressive Superb Gem exhibits well-detailed design elements, with some localized softness in some areas, but fully defined bell lines. The impeccably preserved surfaces are blanketed in shades of magenta and sea-green toning. Population: 23 in 67 (2 in 67+) Full Bell Lines, 0 finer. CAC: 11 in 67, 0 finer (6/19). NGC ID# 24TH, PCGS# 86674

**1961 Franklin Half Dollar, Brilliant MS66
Rare Full Bell Lines Example**

3554 1961 MS66 Full Bell Lines PCGS. Smooth and brilliant with frosty, silver-white surfaces and an extra-sharp strike, this 1961 with Full Bell Lines is rare in Premium Gem condition and unknown in numerically finer FBL grades. The high-luster surfaces show only the most minuscule marks under a strong loupe. Registry Set enthusiasts will be hard-pressed to exceed this flashy, splendid example of a date that almost never comes this sharp. Population: 19 in 66 (4 in 66+) Full Bell Lines, 0 finer (5/19). NGC ID# 24TN, PCGS# 86680

3555 1961-D MS66 Full Bell Lines PCGS. This Premium Gem Full Bell Lines representative is one of the finest 1961-D Franklin halves extant, making this an important offering for advanced series specialists. Light green and yellow hues cling to the rims, surrounding brilliant centers that show fully struck devices. According to Rick Tomaska: "This is a very, very rare coin in either MS66 or MS66 FBL, and demand greatly exceeds the minuscule supply of these coins." Population: 34 in 66 (2 in 66+) Full Bell Lines, 0 finer (5/19). Ex: ANA Signature (Heritage, 8/2015), lot 5273. NGC ID# 24TP, PCGS# 86681

**1962 Half Dollar, MS66 Full Bell Lines
None Finer at Either Service**

3556 1962 MS66 Full Bell Lines PCGS. The 1962 Franklin half is a scarce coin in certified MS66 regardless of the grading service, and it is rare when it possesses Full Bell Lines such as this outstanding Premium Gem. Brief glimpses of ephemeral almond-gold toning around the margins are barely visible on the otherwise stark, silver-white surfaces. Only a few microscopic marks are seen under magnification. Population: 19 in 66 Full Bell Lines, 0 finer (5/19). NGC ID# 24TR, PCGS# 86682

3557 1962-D MS66 Full Bell Lines PCGS. A sharply detailed Premium Gem, this 1962-D Franklin half has Full Bell Lines definition and well-preserved, vibrant mint luster. A few delicate hints of pale gold toning enhance the eye appeal. With no finer Full Bell Lines coins certified, this piece will be on the radar of Registry Set collectors. Population: 46 in 66 (1 in 66+) Full Bell Lines, 0 finer (5/19). Ex: ANA Signature (Heritage, 8/2017), lot 5214, which realized \$1,645. NGC ID# 24TS, PCGS# 86683

3558 1962-D MS66 Full Bell Lines PCGS. CAC. Only a few handfuls of Full Bell Lines 1962-D Franklin halves trickle into grades finer than MS65. This Premium Gem is among the finest at PCGS, a sharp, frosty coin with dappled olive-green and medium russet toning laid over each side. Peering through the patina with a glass, only a few insignificant ticks are observed. Population: 47 in 66 (2 in 66+) Full Bell Lines, 0 finer. CAC: 7 in 66, 0 finer (5/19). NGC ID# 24TS, PCGS# 86683

3559 1963-D MS66 Full Bell Lines PCGS. The obverse has dense jade-green, crimson, and magenta toning, while the reverse is brilliant. This high-end 1963-D half dollar is sharp and displays Full Bell Lines definition. The lustrous surfaces are devoid of distractions aside from a thin graze on Franklin's cheek. PCGS lists only a single finer Full Bell Lines representative (5/19). Ex: Central States Signature (Heritage, 5/2005), lot 7905, which realized \$1,265. NGC ID# 24TU, PCGS# 86685

PROOF FRANKLIN HALF DOLLARS

**1950 Franklin Half Dollar, PR67+
First-Year Franklin Proof**

3560 1950 PR67+ PCGS. CAC. Only 51,386 proof half dollars were struck in 1950, the first year proofs were offered with the Franklin design. This Plus-graded Superb Gem exhibits razor-sharp definition on all the design elements and the fields are moderately reflective. The impeccably preserved surfaces show only the faintest suggestions of toning and the overall eye appeal is terrific. PCGS has graded just one numerically finer example (5/19). NGC ID# 27VA, PCGS# 6691

3561 1952 PR68 NGC. This spectacular PR68 specimen offers sharply detailed design elements throughout. The impeccably preserved surfaces are brilliant and appealing, with deeply reflective fields. NGC has graded six numerically finer examples (5/19). NGC ID# 27VC, PCGS# 6693

3562 1952 PR67★ Cameo NGC. The 1952 proof Franklin half dollar is rare in Ultra Cameo grades, and Cameo coins are scarce when found as fine as this piece. It has brilliant, well-contrasted surfaces and mirrored fields. Sharp definition and frosty luster characterize the devices, providing ample eye appeal. NGC lists a dozen finer Cameos (5/19). NGC ID# 27VC, PCGS# 86693

1956 Type One Half, PR68 Cameo

3563 1956 Type One PR68 Cameo PCGS. CAC. The Type One halves are distinguishable by having four feathers to the left of the eagle's perch instead of three. This coin is brilliant throughout and, as far as we can tell, it is flawless. Noticeable cameo contrast is seen on each side. Population: 59 in 68 (1 in 68+) Cameo, 0 finer. CAC: 44 in 68, 0 finer (5/19). NGC ID# 24TV, PCGS# 86686

3564 1956 Type One, FS-901, PR68 Cameo NGC. The wing feathers on the small reverse eagle are softly defined on the Type One 1956 proof, which is scarcer overall than the Type Two issue. This high-end Cameo is especially challenging in this grade. Each side is brilliant and virtually flawless, showing softly frosted motifs and liquidlike mirroring in the fields. NGC lists 18 numerically finer Cameos (6/19). NGC ID# 24TV, PCGS# 510120 Base PCGS# 86686

3565 1956 Type Two PR69 Deep Cameo PCGS. A spectacular PR69 example of the more available Type Two variety, with fully struck, frosty design elements that contrast profoundly with the deeply mirrored fields. The impeccably preserved brilliant surfaces are one tick away from perfection. Population: 77 in 69 Deep Cameo, 0 finer (5/19). NGC ID# 24TW, PCGS# 96697

3566 1959 PR68 Cameo PCGS. CAC. A stunning Superb Gem Cameo proof, this Franklin half dollar exhibits deeply mirrored fields with cameo contrast on both sides. The preservation is simply outstanding, with only two Cameos reported finer at PCGS. Population: 69 in 68 Cameo, 2 finer. CAC: 36 in 68, 0 finer (5/19). *Ex: Long Beach Signature (Heritage, 2/2017), lot 4467, which realized \$1,997.50.* NGC ID# 27VJ, PCGS# 86700

KENNEDY HALF DOLLARS

3567 1965 MS67 PCGS. This Superb Gem is one of the finest regular-issue 1965 Kennedy halves certified, and it is rare as such. The ideal Registry coin, it displays lovely pastel lilac and powder-blue toning across the centers, with vivid rainbow hues around the borders. The strike is sharp and there are no mentionable abrasions. A true Registry-quality example. Population: 23 in 67, 0 finer (5/19). NGC ID# 27WJ, PCGS# 6708

3568 1984-D MS67 PCGS. A number of 1984-D Kennedy halves have been certified in hopes of receiving a high grade, although few have earned a Superb Gem designation. This piece is among the finest certified. Satiny luster complements a bold strike, leaving the interiors with pastel blue and lavender toning, surrounded by gold, russet, and olive at the borders. An ideal Registry coin. Population: 17 in 67 (1 in 67+), 0 finer (5/19). NGC ID# 24V5, PCGS# 6746

EARLY DOLLARS

3569 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Tooled — PCGS Genuine. VF Details. The introductory Flowing Hair silver dollar was struck for only two years. Since the 1794 is out of reach for most collectors, the 1795 is always in demand from early type collectors. A mid-grade dove-gray example with attractive surfaces aside from a cluster of scratches between OF and AMERICA. A reverse flan flaw at 1 o'clock appears to be of mint origin.

1795 Flowing Hair Dollar, Fine 15 B-5, BB-27, Three Leaves

3570 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 PCGS. Bowers Die State III. Light, silver-gray toning deepens slightly around the raised devices of this popular Three Leaves variety. The motifs are sharply defined for the Choice Fine grade, with some definition on Liberty's major hair curls and above-average sharpness throughout the eagle's wing feathers. The surfaces are faintly microporous, and a few remnant adjustment marks exist below Liberty's ear. Housed in an old green label holder. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1797 10x6 Stars Silver Dollar, VF25 Large Letters, B-3, BB-71

3571 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS. Bowers Die State III. The high points are stone-gray, but the remainder of the coin is richly patinated in blended forest-green and autumn-brown shades. Ideal for the collector who prizes originality. Minor adjustment marks (as made) cross portions of the reverse, and an unimportant rim knock is noted near the ER in AMERICA. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 Silver Dollar, VF Details
Small Eagle, 15 Stars, B-2, BB-81**

3572 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3 — Smoothed — PCGS Genuine. VF Details. Bowers Die State II. Stone-gray toning deepens around the raised devices, with microgranular surfaces and areas of light porosity. The fields show signs of smoothing, in part to minimize Mint-made adjustment marks that angle in from the upper left obverse border. Solid VF definition remains throughout both sides despite the surface irregularities. The scarce 15 Stars, Small Eagle variety is always in demand, regardless of condition.

3573 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3, VF30 NGC. Bowers Die State II. BB-111 develops heavy obverse die cracks in its later stages, although this example shows just a faint hint of mounding below the chin that precedes a strong crack from star 13 to the chin underside. Even brownish-gray toning covers both sides, with several small marks visible under a loupe. The motifs retain strong definition for the modest VF30 grade. NGC ID# 24X6, PCGS# 40028 Base PCGS# 40018

3574 1799 Irregular Date, 13 Stars Reverse, B-13, BB-151, R.5, VF20 PCGS. Bowers Die State II, with die lumps inside the E in STATES. This Irregular Date variant represents the scarcest die marriage for the entire year (R.5, 40 to 75 pieces extant, per Bowers). Strike softness occurs on Liberty's upper curls and the central portion of the eagle, but wear from circulation appears minimal for the grade. Light stone-gray patina with hints of luster around the motifs and scattered shallow marks. Housed in a green label holder. NGC ID# 24X7, PCGS# 40044 Base PCGS# 6880

3575 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, VF30 NGC. Bowers Die State II. Irregular Date obverse with the upright of the E in STATES centered over the cloud. Dusky sea-green and stone-gray toning adorns each side. A few stars above the eagle are softly brought up, but all letters in E PLURIBUS UNUM are clear. Only lightly abraded for the assigned grade.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4319, where it realized \$2,300. NGC ID# 24X7, PCGS# 40045 Base PCGS# 6880

3576 1799 7x6 Stars, B-5, BB-157, R.2 — Cleaned — NGC Details. XF. Bowers Die State II. Blue-green and lavender undertones emerge across deep gunmetal-gray surfaces. A lightly abraded and well-defined Heraldic Eagle type coin. The eagle's breast feathers are worn, but the wings and curls exhibit considerable definition. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

3577 1799 7x6 Stars, B-10, BB-163, R.2, VF35 NGC. Bowers Die State III, with a die crack through the first T in STATES. A die lump in the drapery above the first 9 in the date and the star point in the eagle's mouth identify the BB-163 variety. This Choice VF specimen retains most interior detail intact on the design elements and the battleship-gray surfaces are lightly abraded. A crossover sticker from ICG accompanies the lot. (Total: 2 coins) NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

3578 1799 7x6 Stars, B-10, BB-163, R.2, VF35 ANACS. Bowers Die State II. A faint die crack beneath ICA in AMERICA extends across the eagle's claw and branch to the tailfeathers. This is an ideal midgrade Large Eagle type coin, with attractive and original golden-gray toning and sharp definition on the well-centered obverse and reverse. Glimpses of mint luster remain despite 25 points of smooth, high-point wear, with minimal marks and pleasing eye appeal. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 B-10, BB-163 Dollar, XF45
Richly Toned, 7x6 Stars**

3579 1799 7x6 Stars, B-10, BB-163, R.2, XF45 PCGS. Bowers Die State III. This usual die state features reverse cracks through the first T in STATES, OF, and under the last A in AMERICA. Key identifiers for the BB-163 die variety include a die lump in the drapery above the first 9 in the date and the tip of reverse star 12 in the eagle's mouth. Deep blue toning encircles the borders, golden accents glow around the motifs, and the other areas show lighter steel-gray patina. This minimally circulated 18th century dollar enjoys strong remaining detail. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 Bust Dollar, Richly Toned AU50
B-8b, BB-165, Advanced Die Stage**

3580 1799 7x6 Stars, B-8b, BB-165, R.3, AU50 NGC. Bowers Die State III. Like many Bust dollars, BB-165 examples are generally attainable up to the XF level, and then there is a sharp reduction in availability. This appealing About Uncirculated representative is notable for its smooth, problem-free surfaces and its rich, original coloration. Gunmetal-blue and brownish-gray shades combine with chestnut-gold undertones. Mint luster shines through the rich patina — especially at the margins. The strike is crisp except at the central field stars above the eagle's head, a BB-165 striking characteristic that is often seen in its later die stages. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1801 B-1, BB-211 Dollar, XF45
Rare Terminal Die State

- 3581** 1801 B-1, BB-211, R.3, XF45 PCGS. Bowers Die State V. The rare terminal state. The 1 is distant from the curl, and an arrowhead is centered under the U. Although it is not a major rarity, the 1801 silver dollar is clearly scarcer than the other dates in the Draped Bust, Heraldic Eagle set. This pleasing Choice XF example has attractive pewter-gray color with lighter tan and golden toning on each side. The only surface disturbances worthy of note are a couple of planchet depressions on the neck of Liberty and a single circular one on the chin.

Ex: *Central States Signature* (Heritage, 5/2007), lot 927; *FUN Signature* (Heritage, 1/2011), lot 3964. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

SEATED DOLLARS

1844 Seated Dollar, AU58
Better Low-Mintage Date

- 3582** 1844 AU58 NGC. OC-1, R.2. Osburn-Cushing Die State c/c. A Top 30 Variety. The low mintage of 20,000 pieces makes the 1844 issue a popular early date in the Seated series, while variety specialists note “quad stripes” die doubling on the obverse shield and the wildly misplaced digits 18 in Liberty’s gown as the primary points of interest. This near-Mint example displays reflective fields and sharp star centers, with original, dappled brownish-gray and steel-blue toning. A scattering of tiny marks and light high-point wear do not inhibit the substantial eye appeal. Census: 41 in 58, 20 finer (5/19). NGC ID# 24YE, PCGS# 6930

1849 Silver Dollar, MS62
Natural Multicolor Toning

- 3583** 1849 MS62 PCGS. OC-2, R.2. Osburn-Cushing Die State a/b. The reverse is slightly rotated counterclockwise. Deep-russet and charcoal-gray toning alternates with silver-gray areas on both sides of this Uncirculated dollar. Amid instances of old build-up, the obverse strike is sharp, although the reverse definition weakens at the eagle’s beak, leg, and left (facing) talons. A few tiny marks and abrasions exist in and around patchy areas of toning. Population: 11 in 62, 41 finer (5/19). NGC ID# 24YL, PCGS# 6936

1849 Seated Dollar, MS63
Scarce in Better Uncirculated Grades

- 3584** 1849 MS63 PCGS. OC-2, R.2. Osburn-Cushing Die State b/b. Deep, iridescent toning blankets the reflective fields of this Select Uncirculated 1849 silver dollar. The strike is razor-sharp on both sides, with only a few light bagmarks well-hidden by the patina. Pale-gold and blue shades predominate, with a burst of ruby-red at Liberty’s lower gown. Just two circulation strike die pairs were employed to produce the 62,000-piece mintage. This coin is housed in an old generation blue label PCGS holder with the barcode on the back. Population: 20 in 63, 21 finer (6/19). NGC ID# 24YL, PCGS# 6936

- 3585** 1859 AU58+ NGC. OC-3, High R.3. OC Die State a/a. This is a plate coin for the OC-3 variety in *Liberty Seated Dollars, A Register of Die Varieties*. The large mintage of 255,700 pieces is deceptive, because the 1859 is a scarce issue in About Uncirculated and finer grades. Many coins went to the Orient, where they were melted for their silver content. Rich lilac-gray and tan patina bathes this well-struck near-Mint dollar. Some wispy pinscratches outline the eagle device and crisscross over a small planchet flaw in the upper-left reverse field. NGC ID# 24YZ, PCGS# 6946

- 3586** 1860-O MS61 PCGS. OC-2, R.1. Osburn-Cushing Die State b/c. This attractive Mint State example exhibits well-detailed design elements, with a touch of the typical softness on the star centers. The lustrous, brilliant surfaces are lightly marked for the grade. NGC ID# 24Z3, PCGS# 6950

- 3587** 1865 Doubled Die Reverse, FS-801, AU50 PCGS. OC-1, High R.4. A Top 30 Variety. The serifs of the U in UNITED are boldly repunched. Since design elements were hubbed except for the date, and since the variety appears only on OC-1, we concur with the Osburn-Cushing advice to “leave it to the error experts to explain it.” A lightly circulated gunmetal-gray, powder-blue, and wheat-gold example of this low mintage Civil War date. Housed in a green label holder. PCGS# 416925 Base PCGS# 6955

3588 1870-CC VF25 NGC. OC-7, R.5. Osburn-Cushing Die State a/a. One of two close CC mintmark varieties for the 1870, with a diagnostic die line from the tip of the arrow feather above the eagle's left (facing) talon. This is a pleasing midgrade example of the inaugural Carson City Seated dollar. Brownish-gray toning lightens to silver-gray at the design high points, with all of the devices well-defined. A few tiny rim nicks are noted on the reverse. Amazingly, nine different die pairs were required to strike the low mintage of just 12,462 pieces. NGC ID# 24ZE, PCGS# 6964

PROOF SEATED DOLLARS

1871 Seated Liberty Dollar, PR64
Richly Toned, Terrific Eye Appeal

3589 1871 PR64 NGC. OC-P1, R.2. Osburn-Cushing Die State a/a. Readily available in both circulation strike and proof formats, the 1871 saw a proof mintage of 960 pieces — with somewhat less than half of those surviving in all proof levels combined. Even at the near-Gem grade, the 1871 offers collectors a reasonable number of Choice proofs. Some proofs retain spectacular toning such as the present example, with rich and vibrant shades of cobalt-blue and violet over glassy, reflective fields. Frosted central devices show glints of pale-gold. A few delicate hairlines disappear beneath the attractive toning, while the extra-sharp motifs confirm special care when the coin was struck. Census: 30 in 64, 26 finer (6/19). NGC ID# 252T, PCGS# 7019

1872 Seated Dollar, PR62
Collectible Late-Date issue

3590 1872 PR62 NGC. OC-P1, R.2. A Top 30 Variety. All 1872 Seated dollar proofs display a doubled die reverse with prominent doubling on IN GOD WE TRUST. The reverse was later used to strike 1873 OC-P1 proofs. Osburn and Cushing estimate 575 of the 900 1872 proofs originally minted survive. Blue and lavender tones dominate the obverse, while the former covers most of the reverse. Trivial hairlines and ticks reside beneath the toning. NGC ID# 252U, PCGS# 7020

TRADE DOLLARS

1873-CC Trade Dollar, AU55
Original Toning, Conditionally Scarce

3591 1873-CC AU55 NGC. Only light wear is evident on this Choice AU Carson City Trade dollar, although deep olive-gray and russet toning on each side subdues remaining field luster. The strike is sharp and eye appeal is outstanding for a viewer who appreciates old-time patina. The first-year Trade dollar from Carson City is rare in Uncirculated grades, and AU pieces are scarce. NGC ID# 252X, PCGS# 7032

1874-CC Trade Dollar, MS63
Lustrous and Smooth

3592 1874-CC MS63 PCGS. Tall CC. Period after FINE. An impressive Select Carson City trade dollar that boasts dynamic luster and a sharp strike. Marks are refreshingly absent. A few light powder-blue and russet-brown freckles adorn the obverse. Lapped near the bale of cotton, as issued. Population: 47 in 63 (3 in 63+), 25 finer (6/19). NGC ID# 2532, PCGS# 7035

1876 Trade Dollar, MS64+
CAC-Approved Type Coin

3593 1876 Type One Obverse, Type One Reverse, MS64+ PCGS. CAC. Substantial cartwheel luster illuminates the satiny fields and devices of this high-end near-Gem, complementing a light golden tint on each side and minimal abrasions. Stars 11 to 13 are weak, but this coin is otherwise well-struck. Type collectors frequently seek an attractive 1876 Trade dollar. The issue is usually available through MS64, and high-end examples such as the present occasionally make appearances to excite bidders at auction. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

PROOF TRADE DOLLARS

1875 Trade Dollar, PR64 Cameo Type One Reverse

- 3594** 1875 PR64 Cameo NGC. Type One Reverse. Proof examples of the 1875 Trade dollar are frequently encountered. However, they are in higher demand than most other dates due to the scarcity of circulation strikes that survive from a low mintage, and are considered one of the keys to the series. This lovely Cameo proof has excellent contrast with brilliant silver mirrors within a frame of peripheral gold and iridescent toning. Census: 26 in 64 Cameo (1 in 64+), 18 finer (6/19). NGC ID# 27YL, PCGS# 87055

1877 Trade Dollar, PR64 Cameo Violet and Peach-Gold Patina

- 3595** 1877 PR64 Cameo PCGS. Violet and peach-gold patina drapes the reflective, contrasted surfaces of this near-Gem proof Trade dollar — one of 510 such coins minted in 1877. The complete strike detail seen here is expected but not always found on Trade dollar proofs. Minor contact explains the grade but has no effect on the excellent aesthetic appeal. Population: 21 in 64 (3 in 64+) Cameo, 9 finer in this category (5/19). NGC ID# 27YN, PCGS# 87057
- 3596** 1880 PR62 Cameo PCGS. A pleasing lower-end Cameo, showing brilliant, modestly contrasted surfaces. Strike softness affects Liberty's head and many of the peripheral stars, but the reverse eagle is sharp. Hairlines in the fields ensure that this proof Trade dollar is within the grasp of many type collectors. NGC ID# 27YS, PCGS# 87060

1880 Trade Dollar, PR64 Cameo Popular Proof-Only Issue

- 3597** 1880 PR64 Cameo PCGS. The Trade dollar was only struck in proof format in 1880 and speculator-demand resulted in a large proof mintage of 1,987 pieces. This impressive Choice proof exhibits sharply detailed design elements in most areas, with just a touch of softness on some of the right-side stars. The deeply mirrored fields contrast boldly with the frosty design elements. Faint highlights of pale gold toning add to the outstanding eye appeal. Population: 67 in 64 (5 in 64+) Cameo, 60 finer (6/19). NGC ID# 27YS, PCGS# 87060

1883 Trade Dollar, PR62 Cameo Flashy and Attractively Toned

- 3598** 1883 PR62 Cameo PCGS. The flashy-mirrored surfaces of this nicely contrasted proof Trade dollar show a modicum of delicate hairlines beneath vibrant, reddish-gold toning that deepens at the borders. Struck during the final year of public sale of the proof-only issues, the 979-piece mintage saw some of its number melted or spent in 1884, helping to make the 1883 scarcer than its 1878-1882 predecessors. This sharply struck Cameo has great eye appeal for the assigned grade. NGC ID# 27YV, PCGS# 87063

MORGAN DOLLARS

- 3599** 1878 7TF Reverse of 1879 MS65 PCGS. The Reverse of 1879, or Third Reverse as it is called in the *Guide Book*, displays a slanted top arrow feather. This type is more difficult to locate in high grades than any of its 1878 counterparts. Lovely rainbow toning covers each side without obscuring the radiant mint luster underneath. Strongly struck at the centers. NGC ID# 253L, PCGS# 7076

1878 7TF Morgan, Toned MS66
Reverse of 1879

- 3600** 1878 7TF Reverse of 1879 MS66 PCGS. The Reverse of 1879 hub shows the top fletching slanted, rather than parallel to the others, and the eagle's breast is more convex. This Premium Gem example displays warm, peach-gold toning across the central obverse with sea-green and blue border hues. The reverse is near-brilliant. Well-struck design elements and frosty luster add to the eye appeal, and there are no bothersome abrasions. Population: 41 in 66 (3 in 66+), 1 finer (5/19). NGC ID# 253L, PCGS# 7076

1878-CC Morgan Dollar, MS66
Popular First-Year CC-Mint Issue

- 3601** 1878-CC MS66 PCGS. A spectacular Premium Gem representative of this first-year, branch mint Morgan dollar, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are mostly brilliant, with a few subtle hints of lavender and golden-tan toning. Eye appeal is terrific. PCGS has graded only six numerically finer examples (6/19). NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Lightly Toned, Lustrous Example

- 3602** 1878-CC MS66 PCGS. The Carson City Mint struck more than 2.2 million silver dollars in 1878, the first year of the Morgan design. The 1878-CC is reasonably available in grades up to the MS66 level, but finer coins are condition rarities. This impeccably preserved Premium Gem is sharply detailed and lustrous, under pleasing shades of lavender-gray and golden-tan toning. PCGS has graded six numerically finer examples (6/19). NGC ID# 253M, PCGS# 7080

- 3603** 1879 MS66 PCGS. This delightful Premium Gem is sharply detailed in most areas, with just a trace of blending on the hair above the ear. The impeccably preserved brilliant surfaces radiate vibrant mint luster with outstanding eye appeal. PCGS has graded seven numerically finer examples (6/19). NGC ID# 253S, PCGS# 7084

1879-CC Silver Dollar, MS61
VAM-3A 'Capped Die' Variety

- 3604** 1879-CC Capped Die, VAM-3A, MS61 NGC. CAC. A Top 100 Variety. Lightly toned and lustrous with distributed wispy abrasions and parallel roller marks (as made) across Liberty's ear. The late die state with a slender gouge (as coined) through the base of the first A in AMERICA. The "Capped Die" variety was created when a Mint worker entered myriad tiny chips into a reverse die to conceal evidence of the first mintmark impression, from a punch intended for Seated denominations. The popularity of the variety is enhanced by the semikey rarity of the '79-CC as an issue. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC VAM-3 Dollar, MS62
'Capped Die' Large Over Small CC

- 3605** 1879-CC Capped Die, VAM-3, MS62 PCGS. A Top 100 Variety. The Capped Die 1879-CC is in constant demand in all grades. This example is well-struck and brilliant, showing vibrant mint luster with a few abrasions on Liberty's cheek that limit the grade. The fields are well preserved. In 1965, Leroy Van Allen reported the variety as a Large over Small CC, and it is listed in the *Guide Book* as such. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1880 Morgan Dollar, MS66+
Registry-Grade Example

- 3606** 1880 MS66+ PCGS. This Plus-graded Premium Gem Morgan dollar exhibits well-detailed design elements, with just a trace of blending on the hair strands above Liberty's ear. Vivid shades of lavender-gray and sea-green toning enhance the well-preserved surfaces and vibrant mint luster shines through the patina. Eye appeal is outstanding. PCGS has graded no numerically finer examples in this category (6/19). NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar, MS66+
Clashed Dies**

- 3607** 1880 MS66+ PCGS. Clash marks are visible at the usual places, including Liberty's chin and lips, and on the reverse. This example has frosty luster and untuned surfaces with excellent eye appeal. It is tied for the finest that PCGS has certified (5/19), and it will appeal to Registry collectors.
Ex: Central States Signature (Heritage, 4/2014), lot 4661, which realized \$3,055.
From The Dumleavy Collection. NGC ID# 253Y, PCGS# 7096

**1880/79-CC Morgan Dollar, MS66
VAM-4, Reverse of 1878**

- 3608** 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66 PCGS. A Top 100 Variety, showing the obvious remnants of a 79 within and around the 80 in the date. This Premium Gem example is brilliant and well-struck with characteristically frosty mint luster. Eye appeal is outstanding. The Reverse of 1878 overdate is scarce in this grade and unknown numerically finer in a PCGS holder (6/19). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 3609** 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. A Top 100 Variety, VAM-5 is one of the most prominent overdates in the Morgan dollar series. The remnants of a 7 are clearly visible within the second 8. This Premium Gem is frosty and brilliant, with blazing cartwheel luster and a sharp strike. Eye appeal is outstanding. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1880-CC Morgan Silver Dollar, MS66
8/High 7 Variety, VAM-5**

- 3610** 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC. A Top 100 Variety. The reverse is fully prooflike, and the obverse is nearly so, giving this brilliant 1880-CC an edge over other Premium Gem examples. The second 8 in the date is punched over 7, with the original 7 punched high — its "ears" show above the 8. The obverse is paired with a slanted arrow Reverse of '79, where a prominent die gouge exists above the top arrow feather. CAC endorsement accompanies this reflective, sharply struck and minimally abraded Carson City dollar. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1880-CC Morgan Dollar, MS66
VAM-5, 8 Over High 7**

- 3611** 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. CAC. A Top 100 Variety. The counterpart to VAM-4, showing a strong 80/79 overdate paired with the Reverse of 1879. This Premium Gem example is frosty on the devices and prooflike in the fields. Both sides showcase warm golden toning, although the obverse has additional orange, violet, and ocean-blue toning around the border. Scarce this fine and rare finer. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

**1880-CC Silver Dollar, MS66+
Rainbow Crescent Toning**

- 3612** 1880-CC MS66+ PCGS. CAC. A beautifully toned, frosty example of this popular Carson City Morgan, boasting a Plus designation from PCGS and a green sticker from CAC. Although a trace of strike softness occurs on the central high points, the level of preservation is outstanding. Under a loupe, only a small mark near Liberty's mouth and a few grazes in the adjacent field preclude a Superb Gem classification. This coin is essentially color-free aside from vivid rainbow toning that arcs along the left obverse margin, providing impressive eye appeal. NGC ID# 2542, PCGS# 7100

3613 1880-CC MS65+ Prooflike PCGS. The fields are deeply reflective on this Plus-graded Gem, providing modest cameo contrast on each side. Frosty devices are well-struck, and the coin is entirely brilliant. Prooflike 1880-CC dollars are scarce in this grade and rare finer. NGC ID# 2542, PCGS# 7101

3614 1880-CC MS64 Deep Mirror Prooflike PCGS. CAC. A brilliant, cameo-contrasted near-Gem with fully mirrored fields and frost-white devices. Sharp central detail and a lack of major abrasions add to the eye appeal. Deep Mirror Prooflike 1880-CC dollars are scarce in finer numeric grades. NGC ID# 2542, PCGS# 97101

1880-S Dollar, MS68★ Undesignated Reflectivity in the Fields

3615 1880-S MS68★ NGC. Medium S. The obverse is prooflike and features obvious cameo contrast between the frosty portrait and the glassy field. The reverse is semiprooflike. The borders display light gold toning. The fields are immaculate, and the devices possess only the faintest grazes.

Ex: Long Beach Signature (Heritage, 9/2007), lot 2385. NGC ID# 2544, PCGS# 7118

3616 1880/9-S VAM-11 MS65+ Deep Mirror Prooflike PCGS. CAC. A Hot 50 Variety. VAM-11 is the 1880/9-S variety listed in the *Guide Book*. VAM-11 is not to be confused with the VAM-8 and VAM-9 1880/79-S *Guide Book* variety. VAM-11 is memorable for its die fill within the 0, though its repunched mintmark is also of interest. This virtually brilliant Gem has smooth, dazzling mirrors and minor facial grazes. Population: CAC: 6 in 65, 2 finer (5/19). PCGS# 41508 Base PCGS# 97123

3617 1881 MS66 PCGS. The mintage for the 1881 was high, but the quality of coins encountered is highly variable. This particular piece displays bright, frosted mint luster and there are no obvious abrasions. Brilliant throughout. NGC ID# 2546, PCGS# 7124

3618 1881-CC MS66+ PCGS. CAC. A Plus-graded Premium Gem example of this popular branch mint issue, with well-detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster throughout. The overall eye appeal is terrific. NGC ID# 2549, PCGS# 7126

1881-S Morgan Dollar, MS68 Glittering Type Coin

3619 1881-S MS68 PCGS. Characteristic of most MS68-graded 1881-S dollars, this brilliant Morgan has semiprooflike fields and satiny devices. A 10x loupe fails to reveal a single noteworthy flaw, with even the sharpness of the strike being impressive. The 1881-S is among the most plentiful dates in the series and an ideal choice for type collectors seeking a Morgan dollar in the lofty MS68 grade. PCGS lists two finer non-Prooflike coins, plus five Prooflike pieces and one Deep Mirror Prooflike coin in MS68 (6/19). NGC ID# 2549, PCGS# 7130

1881-S Morgan Dollar MS66+ Deep Mirror Prooflike

3620 1881-S MS66+ Deep Mirror Prooflike PCGS. VAM-3. The 1881-S Morgan dollar is plentiful even in high Mint State grades, but not when that criterion is combined with the Deep Mirror Prooflike designation. Most DMPL examples of the date certified are around MS64. This MS66+ coin shows optimal deep contrast between frosty fields and reflective devices on surfaces that show no trace of toning. A couple of reeding marks appear in the center of Liberty's cheek, the sole mentionable contact. nicer DMPL example would be difficult to find. Population: 93 in 66 (6 in 66+) Deep Mirror Prooflike, 7 finer (5/19). NGC ID# 2549, PCGS# 97131

3621 1882-CC MS66 Prooflike PCGS. CAC. Many 1882-CC silver dollars entered collector hands during the 1970s GSA auctions. But only a tiny percentage were comparable in quality with the present Premium Gem. Stone-white surfaces are well struck and void of reportable imperfections. CAC: 24 in 66, 0 finer (5/19). NGC ID# 254B, PCGS# 7135

3622 1882-O MS66 PCGS. Attractive toning is one of the main draws of this Premium Gem. Also of note is the bright, underlying satin-like mint luster. The strike details are also above average, but not quite complete. Seldom is an 1882-O encountered so fine. NGC ID# 254C, PCGS# 7136

3623 1882-S MS67+ PCGS. CAC. The Plus designation sets this coin apart from the majority of MS67s, and the CAC green label further adds to its appeal. Indeed, the surfaces are vibrantly lustrous and virtually fault-free. A crescent of light golden toning graces the right obverse margin, although the coin is otherwise sharp and brilliant. NGC ID# 254F, PCGS# 7140

1884 Morgan Dollar, MS67 Lovely Obverse Toning

3624 1884 MS67 NGC. This Superb Gem 1884 Morgan silver dollar exhibits vibrant gold and peripheral blue toning over the entire obverse, with brilliant and untuned reverse luster, save for peripheral gold toning limited to the dentils and rim. The strike is bold with nearly complete hair detail over Liberty's ear, and full breast feathers on the reverse. Census: 36 in 67 (3 in 67★), 1 finer (6/19). NGC ID# 254L, PCGS# 7150

3625 1884 MS66 Prooflike PCGS. The mintage of more than 14 million pieces should indicate ready availability of Prooflikes; yet such pieces are in a distinct minority of the 1884 dollars encountered. This is an all-brilliant example with deeply reflective fields and attractive, contrasting white devices. Population: 11 in 66 (2 in 66+) Prooflike, 1 finer (6/19). NGC ID# 267J, PCGS# 7151

- 3626 1884 MS65 Deep Mirror Prooflike PCGS. VAM-2.** A scarcely seen Deep Mirror Prooflike Gem of this otherwise plentiful Philadelphia issue, showing frosty motifs and noticeable cameo contrast on each side. The strike is sharp, and grade-limiting abrasions are light, posing little distraction. Only a trace of toning denies full brilliance. Population: 38 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (5/19).
Ex: *Houston Money Show Signature* (Heritage, 12/2015), lot 3848, which realized \$3,525. NGC ID# 45WD, PCGS# 97151

**1884-CC Silver Dollar, MS67+
Obverse-Toned Registry Candidate**

- 3627 1884-CC MS67+ NGC.** The obverse displays blended olive-green, gold, lilac, and turquoise toning, leaving the reverse largely brilliant. This Superb Gem 1884-CC dollar is better struck in the centers than many examples are, although for the grade, this degree of quality is essential. No mentionable abrasions appear beneath a loupe. NGC has seen a handful of Prooflike and Deep Prooflike coins in this grade, although only two coins — both non-Prooflike pieces — are graded finer at that service (5/19). NGC ID# 8BBF, PCGS# 7152
- 3628 1885 MS67 PCGS. CAC.** Blazing frost-white mint luster cascades over the nearly flawless surfaces of this CAC-approved 1885 Morgan dollar. The strike is sharp and each side displays just a hint of reflectivity in the fields. Eye appeal is simply exceptional. NGC ID# 254R, PCGS# 7158
- 3629 1885-CC MS66+ PCGS.** A brilliant, high-end Premium Gem example of this popular Carson City issue, showing all of the blazing cartwheel luster and mint frost that collectors have come to expect from high-end CC-mint dollars. A clean cheek on Liberty and a sharp central strike add to the eye appeal. NGC ID# 254S, PCGS# 7160
- 3630 1885-CC MS66+ PCGS.** A frosty, vibrantly lustrous high-end Premium Gem example of this popular Carson City issue, showing a bold central strike and exceptional preservation. The interiors are brilliant, with tinges of yellow-gold clinging to the extreme outer peripheries. NGC ID# 254S, PCGS# 7160
- 3631 1885-S MS64 Prooflike PCGS.** While the 1885-S is a commonly encountered dollar with several bags from the holdings of LaVeré Redfield, few are known with prooflike surfaces. The is a deeply reflective example with noticeable frost over the devices. The strike is complete. Population: 59 in 64 (2 in 64+) Prooflike, 13 finer (6/19). NGC ID# 254U, PCGS# 7165
- 3632 1886-O MS63 PCGS.** A high mintage but conditionally challenging issue, the 1886-O is extremely rare as a Gem. Select examples are much more affordable. The present lightly toned piece exhibits vibrant luster and pleasing preservation. The eagle's breast and the hair above the ear are incompletely impressed. NGC ID# 254W, PCGS# 7168
- 3633 1887 MS66 PCGS.** An extraordinary Premium Gem, this lovely Morgan dollar has brilliant rainbow toning over the entire obverse and more than one-third of the reverse, with frosty silver luster beneath. Sharply struck with pristine surfaces. NGC ID# 27Y3, PCGS# 7172

**1887 Morgan, MS66 Deep Mirror Prooflike
Brilliant Cameo Contrast**

- 3634 1887 MS66 Deep Mirror Prooflike PCGS.** The 1887 Morgan claims a mintage of nearly 20 million pieces, but Premium Gem Deep Mirror Prooflike examples are rare. The present coin is magnificent, displaying sharp details in most areas with just a touch of softness on the hair above the ear. The frosty devices show an uncommon degree of contrast with the deeply mirrored fields. No numerically finer DMPL coins are reported. Population: 42 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (5/19).
Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3998, which realized \$2,760; *New York Signature* (Heritage, 11/2013), lot 4309, which realized \$2,820. NGC ID# 254Y, PCGS# 97173

**1888-O 'Scarface' Dollar, MS62
VAM-1B4, Late Die State**

- 3635 1888-O Scarface, VAM-1B4, MS62 PCGS.** A Top 100 Variety. The VAMworld.com website says it perfectly, the late (VAM-1B3) to very late (VAM-1B4) die states of this popular variety are the true "Scarface" VAMs, and command significant premiums over the earlier die states. Here the die break starts at the rim and runs through the dot, downward onto the cheek and touching the lower hair, but the lowest part of the "scar" is not yet quite as heavy as on the latest die state, even though it certainly runs all the way across the cheek and neck. This is a lustrous representative with a dusky silver-gray obverse. The reverse displays blushes of rose-red and sea-green. As usual for this popular variety, the centers are softly struck. Ex: *Central States Signature* (Heritage, 4/2012), lot 5591; *National Money Show Signature* (Heritage, 2-3/2014), lot 4017. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184
- 3636 1888-S MS65 PCGS.** Moderately available in MS65, the 1888-S Morgan dollar is scarce finer. This collectible Gem displays a sharp strike, although some faint roller marks (mint made) remain on Liberty's jaw. The fields are nearly prooflike, complementing gold and violet toning in the margins. NGC ID# 2557, PCGS# 7186
- 3637 1888-S MS65 PCGS.** The obverse of this lovely Gem 1888-S Morgan dollar exhibits intense gold and iridescent toning, while the reverse has brilliant central luster within a frame of gold and blue peripheral toning. Finer pieces are scarce. NGC ID# 2557, PCGS# 7186
- 3638 1888-S MS65 PCGS.** The 1888-S Morgan dollar is prized for its low mintage of 657,000 pieces. This brilliant Gem is well-detailed and brightly lustrous. PCGS has graded 48 numerically finer examples (5/19).
Ex: *ANA National Money Show Signature* (Heritage, 2-3/2014), lot 4829. NGC ID# 2557, PCGS# 7186

- 3639 1889 MS65 Deep Mirror Prooflike PCGS.** The 1889 Morgan dollar was produced in huge numbers, but examples with prooflike surfaces are elusive. This lovely Gem displays well-detailed frosted design elements that contrast sharply with the deeply reflective fields. A few minor contact marks in the fields do not detract from the outstanding eye appeal. Population: 39 in 65 (1 in 65+) Deep Mirror Prooflike, 4 finer (5/19).
Ex: *National Money Show Signature* (Heritage, 2-3/2014), lot 4831. NGC ID# 3VWX, PCGS# 97189

**1889-CC Silver Dollar, XF45
Collector-Grade Example**

- 3640 1889-CC XF45 NGC.** A deeply toned collector-grade example of the Morgan dollar key, showing russet, olive-gray, and bronze-gold patina over satiny surfaces. Little wear is present, but the absence of significant luster keeps this coin from an AU designation. The 1889-CC is elusive in XF condition with original patina. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, XF45
Above-Average Preservation**

- 3641 1889-CC XF45 PCGS. CAC.** The Carson City Mint had been closed more than four years when coinage resumed in late 1889. The local economy apparently absorbed the issue, since the typical survivor we have handled over the past 25 years averages VF29.3. Examples exist in Mint State, but they are few relative to other CC-mint Morgan issues. The present pearl-gray and chestnut-gold Choice XF dollar displays ample remaining luster and problem-free surfaces.
Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1123; *National Money Show Signature* (Heritage, 2-3/2014), lot 4019. NGC ID# 2559, PCGS# 7190

- 3642 1889-CC — Reverse Scratched — NGC Details. AU.** Just a touch of wear is evident on the high points of the design elements of this low-mintage branch mint key and the surfaces retain traces of original mint luster, under low-intensity shades of lavender-gray and golden-tan toning. A long thin scratch, parallel to the eagle's wing in the right reverse field, constitutes the noted damage. NGC ID# 2559, PCGS# 7190
- 3643 1889-CC — Rim Filing — NGC Details. AU.** Other than the obvious problem of rim filing there are no other obvious surface distractions on this key Carson City dollar. Each side is brilliant with no mentionable abrasions. Only 350,000 dollars were struck in the CC mint in 1889 and examples are sought after in all grade levels. NGC ID# 2559, PCGS# 7190

- 3644 1890-S MS66 PCGS.** The 1890-S is much scarcer in Premium Gem condition than its mintage of more than 8.2 million coins would suggest. Finer coins are prohibitively rare. This piece is brilliant and displays radiant cartwheel luster. A couple of faint grazes in the left obverse field are all that prevent an even finer grade. NGC ID# 255F, PCGS# 7202

- 3645 1891 MS65 PCGS.** Vivid shades of golden-gray and sea-green toning visit the pleasing surfaces of this impressive Gem, with vibrant mint luster and well-detailed design elements underneath. Only minor signs of contact are evident. PCGS has graded three numerically finer non-Prooflike examples (5/19). NGC ID# 255G, PCGS# 7204

**1891-CC Silver Dollar, MS65
VAM-3, 'Spitting Eagle'**

- 3646 1891-CC 'Spitting Eagle,' VAM-3, Top 100, MS65 PCGS. CAC.** A Top 100 Variety that earns its moniker from a small lump in the reverse field just below the eagle's beak. As a date, the 1891-CC Morgan dollar is elusive at the Gem grade level, and especially finer. This piece is frosty and well-struck save for the usual area of flatness just above the ear. Tinges of amber and ocean-blue toning appear occasionally around the borders, leaving this coin brilliant across the interiors. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1891-O Morgan Dollar, MS65
Rarely Seen Finer**

- 3647 1891-O MS65 NGC.** From a substantial mintage of nearly 8 million pieces, this impressive Gem exhibits a typical strike for a New Orleans issue, with just a touch of softness on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster with hints of lavender-gray and sea-green toning. Census: 76 in 65 (1 in 65+, 2 in 65★), 3 finer (5/19). NGC ID# 255J, PCGS# 7208

1891-S Morgan Dollar, MS66
Scarce in High Mint State Grades

3648 1891-S MS66 PCGS. The 1891-S is a slightly better date in high grade, but it becomes particularly scarce in MS66. Fewer than a dozen finer coins are reported at PCGS and NGC combined. This PCGS coin displays a bold strike and remarkably clean surfaces beneath mottled lilac-gray and champagne toning. PCGS has seen eight higher-grade submissions (5/19).

From The Dunleavy Collection. NGC ID# 255K, PCGS# 7210

3649 1892-CC MS62 PCGS. CAC. A brilliant, well-struck example of this late Carson City issue, showing frosty cartwheel luster. Scattered abrasions limit the grade, but the coin earns a CAC green label, which is a scarce sight on low-end Uncirculated 1892-CC dollars. NGC ID# 255M, PCGS# 7214

3650 1892-CC MS62+ NGC. CAC. A hint of reflectivity in the fields and a strong cartwheel effect earn this coin a Plus designation and CAC endorsement. Scattered abrasions on the obverse prevent a finer grade. Typical of the 1892-CC, this coin displays strike weakness at the centers. Eye appeal is pleasing. NGC ID# 255M, PCGS# 7214

3651 1892-CC MS63 PCGS. A few hints of sea-green and rose-gold toning visit the peripheries of this impressive Select specimen. The design elements are well-detailed, with just a trace of blending on the hair above the ear, and the lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 255M, PCGS# 7214

3652 1892-CC MS63 NGC. Frosty, original mint luster cartwheels freely around minimally abraded surfaces on this Select 1892-CC Morgan dollar. The interiors are brilliant, while small tinges of copper-gold toning appear around the outer peripheries. Eye appeal is outstanding for the grade. NGC ID# 255M, PCGS# 7214

3653 1892-CC MS63 NGC. VAM-12. Liberty's chin exhibits minor die doubling. VAMworld.com credits Mark Kimpton as the 2002 discoverer. This thoroughly lustrous Select Carson City dollar displays light peripheral golden-brown patina. The strike is good, and marks are fewer than anticipated. Encapsulated in a former generation holder. NGC ID# 255M, PCGS# 7214

3654 1892-CC MS63 PCGS. An impressive Select Morgan dollar from the famous Carson City Mint, this coin offers sharply detailed design elements and lightly marked surfaces, with vibrant mint luster throughout. Three tarnished areas on the obverse rim are the only flaws of note. NGC ID# 255M, PCGS# 7214

1892-O Silver Dollar, MS65
Few Finer Pieces Are Known

3655 1892-O MS65 PCGS. This Gem 1892-O Morgan is about as fine as the issue is typically available, and Liberty's cheek is particularly clean. Nonetheless, the strike is weak — almost unavoidable on this New Orleans issue — and mint-made roller marks remain visible on the portrait with weakness above the ear and on the eagle's breast. Although nearly untuned, there are hints of light golden color on each side. PCGS lists only eight numerically finer non-Prooflike coins (5/19). NGC ID# 255N, PCGS# 7216

3656 1892-S AU53 NGC. The 1892-S is among the scarcest Morgan dollar issues in AU or better grades. This representative displays peripheral bands of bright luster. The breast feathers show wear, but the stone-gray surfaces exhibit few marks, aside from ticks on the reverse rim at 4 o'clock. NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, AU55
Second Rarest S-Mint Morgan

3657 1892-S AU55 PCGS. The 1893-S Morgan dollar is the famous key issue to the series, while the 1892-S is also a key in higher grades. This Choice AU example will make a nice addition to nearly any collection of these coins. The surfaces are pleasing with only a few scattered marks on each side. Light field reflectivity is visible beneath delicate gold toning. NGC ID# 255P, PCGS# 7218

3658 1893 MS63 PCGS. VAM-2. A conservatively assessed example of the low-mintage 1893 silver dollar (378,000 coins). Untoned and lustrous with pleasing surfaces and minor strike softness at the centers. VAM-2 is a specialist-familiar variety that shows minor repunching above the 3 in the date. NGC ID# 255R, PCGS# 7220

3659 1893 MS64 PCGS. VAM-3. Morgan dollar production was low across the board in 1893, with only 378,000 coins manufactured at the Philadelphia facility. The issue is elusive but obtainable in MS64, and scarce in MS65. Mostly brilliant and brightly frosted surfaces display excellent preservation and good detail. A blush of tan-gold and steel-blue toning colors the left obverse. NGC ID# 255R, PCGS# 7220

**1893 Silver Dollar, MS65
Better Philadelphia Issue**

- 3660 1893 MS65 PCGS.** The availability of the 1893 Morgan grows slim in MS65, and the date is incredibly rare by Morgan dollar standards in MS66. This Gem displays the barest trace of golden peripheral toning, with softly frosted luster across the brilliant interiors. Minor strike softness on the eagle's breast and the hair above Liberty's ear is typical of the issue. PCGS lists a half dozen finer submissions (5/19).
From The Dunleavy Collection. NGC ID# 255R, PCGS# 7220

**1893-CC Dollar, AU58
Final-Year Carson City Issue**

- 3661 1893-CC AU58 NGC.** Golden-tinged silver surfaces show abundant mint frost on the devices with much field reflectivity and nearly full cartwheel luster remaining on each side. Scattered light marks attest to a short spate in circulation; the only singular mark is a small dig on the lower eagle's breast.
Ex: Exclusively Internet Auction (Heritage, 6/2003), lot 13787; Central States Signature (Heritage, 4/2014), lot 4905. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS60
Old Green Holder With CAC Approval**

- 3662 1893-CC MS60 PCGS. CAC.** The final-year 1893-CC claims a mintage of 677,000 coins, but the issue is decidedly scarce in Mint State, especially when compared to the strong collector demand for Uncirculated pieces. This typically struck example is all-brilliant with the sole exception of pale gold toning along the right obverse border. The reverse is far cleaner than the grade suggests. Certified in an old green label holder with CAC endorsement. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62
Low-Mintage Branch Mint Issue**

- 3663 1893-CC MS62 PCGS.** The Carson City Mint suspended coinage operations in 1893, but not before a modest mintage of 677,000 Morgan dollars was accomplished. This impressive MS62 example displays well-detailed design elements, with just a touch of the usual blending on the hair strands above the ear. The surfaces are appropriately marked for the grade and both sides radiate vibrant satiny mint luster. Two areas of tarnish are evident on the obverse rim. NGC ID# 255S, PCGS# 7222

**1893-O Silver Dollar, MS62
Unusually Attractive for the Grade**

- 3664 1893-O MS62 NGC.** This 1893-O Morgan dollar's eye appeal defies both the grade and the issue's reputation. Vibrantly lustrous, frosty surfaces yield an intense cartwheel effect on the obverse and semiprooflike fields on the reverse, while vivid sky-blue and amber-gold peripheral hues surround lovely champagne interiors. Scattered abrasions on the obverse limit the grade but are secondary to the outstanding visual appeal. Better-struck than expected.
Ex: FUN Signature (Heritage, 1/2016), lot 6033. NGC ID# 255T, PCGS# 7224

**1893-O Dollar, MS62
Good Strike and Luster**

- 3665 1893-O MS62 NGC.** Dynamic cartwheel luster sweeps untuned and nicely struck surfaces. The fields are refreshingly unmarked. Liberty's cheek and neck display delicate grazes that are commensurate for the grade. Among New Orleans Morgan dollar issues, the 1893-O has the lowest mintage, and is second-rarest behind only the 1895-O. NGC ID# 255T, PCGS# 7224

1893-S Silver Dollar, Fine 12
Collector-Grade Key Date

- 3666** 1893-S Fine 12 PCGS. A collector-grade example of this famous key date. Most of the coin is cream-gray, though areas of deep gunmetal toning accompany portions of the borders. The wings display considerable plumage detail, and the inner hair detail is also prevalent. Relatively unabraded and a worthy addition to an advanced holding of the series. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, VF Sharpness
Rarest Business Strike Issue

- 3667** 1893-S — Cleaned — NGC Details. VF. Evenly dispersed dove-gray toning covers both sides of this smoothly worn yet pleasing Morgan dollar — always in demand regardless of condition, the inarguable key to the series. This example shows no overt abrasions or marks. Faint hairlines beneath the toning indicate an old cleaning, which subtly subdues the otherwise well-defined surfaces, but for many collectors this is an ideal '93-S to fill that important void in a circulated set.

1893-S Morgan Dollar, XF Details

- 3668** 1893-S — Cleaned — PCGS Genuine. XF Details. Hints of luster remain in the most protected areas of the fields on this lightly circulated 1893-S dollar, although hairlines on each side are evidence of an old cleaning. The surfaces are lilac-gray with gold undertones, and there are limited abrasions. A collectible example of the lowest-mintage date in the series.

1893-S Morgan Dollar, AU53
Appealing Surfaces, Luster Remains

- 3669** 1893-S AU53 PCGS. VAM-2. Moderate luster remains in protected portions of the fields throughout this About Uncirculated 1893-S dollar, and each side shows a cast of light golden toning that corresponds to light, high-point wear. The pleasing surfaces are relatively smooth, and eye appeal is excellent for the grade. The right-leaning mintmark and numerous die lines above the eagle's right (facing) shoulder junction confirm the VAM-2 variety.

Attractive AU-level 1893-S dollars are in constant demand among Morgan dollar enthusiasts, as they represent the highest level of preservation available to most collectors. In Mint State, the 1893-S is rare in the context of the series, and in the finer Mint State levels, examples of this date are trophy coins that headline major auctions. For most collectors, this attractive AU piece will be a highlight of a great collection. Population: 88 in 53, 94 finer (5/19). NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS61
Lightly Toned Collector Coin

3670 1894 MS61 NGC. A pleasing lower-end Uncirculated example of this semikey Philadelphia issue, with satiny luster and warm peach-gold toning. The coin is well-struck with light, scattered abrasions. The Philadelphia Mint struck only 110,000 silver dollars for circulation in 1894, marking the lowest production total for the series from this mint.

From The Dunleavy Collection. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS62
In an Old Green Label Holder

3671 1894 MS62 PCGS. The 1894 dollar's mintage of 110,000 coins is the second-lowest in the series, with only the 1893-S having a lower production total. It is the scarcest Philadelphia circulation strike, and it is a semikey date in high grades. This is a pleasing lower-end Mint State example. Each side is sharp and satiny with champagne-tinted silver-gray luster. Abrasions are remarkably light and unobtrusive for the grade. Housed in an old green label holder. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS62
Brilliant and Lustrous

3672 1894 MS62 PCGS. Brilliant, radiant mint luster engulfs this Mint State 1894 Morgan dollar. Central sharpness is above average for the issue, although a few small abrasions on Liberty's cheek prevent a finer designation. Nonetheless, eye appeal is pleasing for the grade. The availability of this semikey issue declines in finer states of preservation. NGC ID# 255V, PCGS# 7228

1894 Dollar, AU53 Prooflike
Rare With Reflective Fields

3673 1894 AU53 Prooflike NGC. The 1894 is one of the most challenging Morgan dollars to acquire with reflective fields. NGC has seen only 17 Prooflike coins in all grades, plus two Deep Prooflike pieces. This AU53 coin is the second-lowest-graded Prooflike 1894 dollar at NGC. Light high-point wear on the devices also visits the open areas of the fields, but much of the latter are deeply reflective. The coin is brilliant aside from rose-gold peripheral toning, and there are no major abrasions. NGC ID# 255V, PCGS# 7229

3674 1894-O MS62 PCGS. Like the 1886-O and 1896-O, the 1894-O is available in circulated grades but surprisingly scarce in Mint State. This lustrous representative has only a hint of golden toning. Marks are minimal for the MS62 level, save for a solitary horizontal line on the cheek. The centers are lightly brought up, usual for the New Orleans issue. NGC ID# 255W, PCGS# 7230

3675 1895-O AU55 NGC. The '95-O is the key New Orleans issue in most grades, though the mintage is 50% higher than the 1893-O. This untoned example is refreshingly unabraded. The borders and motifs exhibit luster, and only light wear is apparent at the center of the eagle's breast. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Minimally Marked

3676 1895-O AU58 PCGS. The 1895-O is thought to be the third-rarest Morgan dollar in Uncirculated grades, and it ranks among the top dozen or so scarcities in near-Mint condition, too. This AU58 1895-O has the eye appeal, luster, and surface quality of a low-to-mid level Mint State coin, but slight rub is visible on the high points of Liberty's cap, hair curls, and eagle's breast. Only a few light bagmarks exist on the lightly toned silver surfaces, with traces of reddish-gold at the rims. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58
Semiprooflike Fields**

- 3677 1895-O AU58 PCGS.** The 1895-O, with its low mintage of 450,000 pieces, is another issue whose production was stunted by the repeal of the Sherman Silver Purchase Act in 1893. This near-Mint example represents the finest quality within the grasp of budget-restricted collectors, as Mint State pieces are scarce and expensive. This coin displays well-struck design elements and prooflike fields. Trivial friction over the highest points of the design limits the grade, while each side displays a hint of champagne toning.
Ex: FUN Signature (Heritage, 1/2016), lot 6059. NGC ID# 255Y, PCGS# 7236

- 3678 1895-O AU55 Prooflike NGC.** The 1895-O enjoys well-earned status as the rarest New Orleans Morgan dollar issue. Only a tiny percentage of survivors are certified as Prooflike, mostly in AU grades. This cream-gray representative displays ample field flash, along with a good strike and the anticipated number of unimportant abrasions. One narrow diagonal mark is noted on Liberty's jaw. Census: 25 in 55 Prooflike, 45 finer (5/19).
Ex: Central States Signature (Heritage, 5/2005), lot 9875, which realized \$2,760. NGC ID# 255Y, PCGS# 7237

**1895-S Morgan Dollar, MS62
Better S-Mint, 400,000 Pieces Struck**

- 3679 1895-S MS62 NGC. CAC.** The reverse is fully prooflike, and the obverse nearly so, giving this CAC-endorsed 1895-S an extra measure of eye appeal. Frosted surfaces show a bold strike, although not entirely sharp on some of Liberty's hair strands above the ear. Most important, the usual bagmarks that plague most 1895-S dollars are either well-hidden or nonexistent. Just 400,000 pieces were struck, and for many collectors the '95-S is the only realistic option for a Mint State date set. Bits of pale-russet toning add to the appeal. NGC ID# 255Z, PCGS# 7238

**1896-S Dollar, MS63
Scarce Late-Date, S-Mint Issue**

- 3680 1896-S MS63 PCGS.** A thin band of russet-brown toning sits inside the rims of this otherwise brilliant and sharply struck 1896-S Morgan. Most of the 5 million-piece mintage either circulated in the West or was melted by authority of the Pittman Act, although LaVerre Redfield's hoard of silver dollars provided several hundred Mint State pieces back into collector's hands. This example is brightly lustrous with semireflective fields. A few light marks and abrasions that account for the grade. NGC ID# 2564, PCGS# 7244

- 3681 1897-O MS62 PCGS. CAC.** A lustrous, CAC-approved Mint State example of this better New Orleans issue, showing natural smoke-gray surfaces that have a tinge of gold throughout. The coin is well-struck for a New Orleans product of the 1890s, and grade-limiting abrasions are light and scattered. NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63
Pleasing for the Grade, Scarce Any Finer**

- 3682 1897-O MS63 PCGS.** The 1897-O quadruples in value just one rung higher on the grading scale, making this solid Select Uncirculated example an opportunistic acquisition for the astute bidder. Sharply struck with frosted cartwheel luster, this scarce O-mint Morgan shows only slight blending of the hair strands above the ear. Marks are widely spaced and tiny. The coin is untuned with plenty of silver flash beneath the frosted fields and devices. NGC ID# 2565, PCGS# 7248

- 3683 1897-S MS66+ PCGS. CAC.** Luminous, frosty mint luster engulfs this high-end 1897-S Morgan dollar, illuminating a hint of field reflectivity. The obverse is light golden in color, while the reverse displays deeper sun-orange, lilac, green, and silver-blue patina. The usual strike weakness is noted above Liberty's ear, but it is minor on this coin. CAC: 92 in 66, 6 finer (5/19). NGC ID# 2567, PCGS# 7250

- 3684 1897-S MS66 Prooflike NGC.** This glittering Prooflike Premium Gem displays noticeable contrast between the lightly frosted devices and the distinctly reflective fields. A minimally toned marvel with a hint of cartwheel luster. Census: 24 in 66 (2 in 66 ★) Prooflike, 2 finer (5/19).
Ex: ANA National Money Show Signature (Heritage, 2-3/2014), lot 4935. NGC ID# 267S, PCGS# 7251

3685 1898 MS66+ Prooflike PCGS. CAC. This flashy, high-end Premium Gem is well-struck with glimpses of orange toning that contribute to the eye appeal. Mirrored fields contrast against devices blanketed in a thin layer of mint frost. Production quality at the Philadelphia Mint was at its apex during the final years of the 19th century, on full display here. Population: 31 in 66 (6 in 66+) Prooflike, 3 finer. CAC: 9 in 66, 0 finer (6/19). NGC ID# 2568, PCGS# 7253

3686 1898-O MS67 Prooflike NGC. A fabulous coin with shimmering, prooflike fields. The surfaces are nearly perfect with a smooth, unblemished cheek on Liberty. Essentially brilliant overall. Just a lovely type coin and unexcelled in Prooflike by both of the major certification services. Census: 5 in 67 Prooflike, 0 finer (5/19). Ex: *Baltimore Signature* (Heritage, 7/2003), lot 8872; *National Money Show Signature* (Heritage, 4/2006), lot 1167; *National Money Show Signature* (Heritage, 2/2014), lot 4938. NGC ID# 2569, PCGS# 7255

1898-S Silver Dollar, MS66 Only Four Finer at PCGS

3687 1898-S MS66 PCGS. CAC. A lovely Premium Gem, this 1898-S Morgan silver dollar exhibits frosty mint luster and pristine, untuned silver surfaces. An important condition rarity, this example is a top quality survivor from the mintage of 4.1 million coins. Population: 100 in 66 (12 in 66+), 4 finer. CAC: 24 in 66, 1 finer (6/19). NGC ID# 256A, PCGS# 7256

1899-S Dollar, MS66 Cartwheel Mint Frost, Total Brilliance

3688 1899-S MS66 PCGS. The certified population of 1899-S Morgan dollars tanks in higher grades, forcing most collectors to opt instead for an attractive Premium Gem like the present example. Cartwheel mint frost and total brilliance are captivating. The fields are clean and the devices strongly rendered. Two reeding marks on the nose and a graze on the brow serve as the only identifying imperfections. PCGS lists 11 higher submissions (6/19). NGC ID# 256D, PCGS# 7262

3689 1900-O MS67 PCGS. Superb Gem 1900-O Morgan dollars are scarce, and none are designated Prooflike or Deep Mirror Prooflike at PCGS. This top-grade non-Prooflike Registry coin displays softly frosted luster — brilliant across the interiors with orange-gold border toning. Strike sharpness is slightly above average for the New Orleans Mint. NGC ID# 256F, PCGS# 7266

3690 1900-O MS67 NGC. A scarce Premium Gem example of this New Orleans issue, showing satiny, untuned luster and exceptional preservation. The hair above Liberty's ear is well-defined, although there is considerable weakness on the eagle's breast. No numerically finer pieces are listed at NGC. Census: 82 in 67 (4 in 67+, 1 in 67★, 1 in 67+★), 0 finer (5/19). NGC ID# 256F, PCGS# 7266

3691 1900-O/CC VAM-8B, Top 100, MS65+ PCGS. A Top 100 Variety. Heavy die clashing around Liberty's portrait confirms the VAM-8B variety, while the CC under mintmark is clearly visible beneath the primary O, surrounded by numerous rust lumps. This Plus-graded Gem example is sharply struck and mostly brilliant, showing wisps of golden-gray patina on the obverse and an area of rich tan-brown toning on the reverse. NGC ID# 256G, PCGS# 133961 Base PCGS# 7268

3692 1900-S MS66 PCGS. The 1900-S is usually available in mint condition, but collectors seeking a Premium Gem example will encounter difficulty. This piece is toned in original champagne hues with frosted mint luster delivering the backlight. A distinct lack of abrasions is the hallmark of the grade, and trivial weakness on the hair above Liberty's ear is virtually unnoticed. PCGS has seen four Superb Gems finer (5/19). NGC ID# 256H, PCGS# 7270

3693 1901 Doubled Die Reverse, VAM-3, AU53 PCGS. A Top 100 Variety. Among the best-known die marriages of the Morgan dollar series. The eagle's arrows and tail feathers are strongly die doubled north. Most survivors of this *Guide Book* variety are in VF to AU grades. The present partly lustrous example is lightly abraded and displays blushes of medium charcoal toning. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

3694 1903 MS67 PCGS. A razor-sharp strike is one of the hallmarks of this Superb Gem dollar. The other is the quality of the surfaces, which feature a notable lack of abrasions, vibrant mint luster, and daubs of thin toning. The coin is mostly brilliant, however. Most importantly for Registry Set builders, no examples of the 1903 are numerically finer at PCGS (5/19). NGC ID# 256R, PCGS# 7284

3695 1903-S AU55 PCGS. The 1903-S is a scarce, late-date S-mint that is a pricey item in mint condition. This is an attractive Choice AU example that retains significant portions of hard, satiny mint luster. Much brilliance remains with occasional spotty golden patina present. NGC ID# 256T, PCGS# 7288

3696 1903-S AU55 NGC. Long established as a semikey issue, the 1903-S had a relatively low mintage of under 1.3 million pieces, and it ranks among the top dozen or so issues in the series in overall scarcity. This Choice About Uncirculated example retains a pleasing amount of mint luster throughout the sharply struck surfaces. A scattering of light bagmarks and wispy lines are visible under the loupe, but they do not detract from the lightly toned, silver-gray appeal. NGC ID# 256T, PCGS# 7288

1904 Dollar, MS65+ Clean for the Grade

3697 1904 MS65+ PCGS. CAC. This Philadelphia Morgan dollar issue is far scarcer than the 1904-O but more available than the 1904-S. Minimally toned, mostly brilliant centers awash in soft mint frost give way to rings of gold, violet, and blue patina around the margins. The cheek and fields are smooth, and the strike is crisp. PCGS reports 54 finer grading events. CAC: 57 in 65, 6 finer (6/19). NGC ID# 256U, PCGS# 7290

**1904 Dollar, Colorful MS66
A Great Registry-Worthy Offering**

- 3698 1904 MS66 PCGS.** Little attention was paid to the 1904 until recent decades, when its status as a condition rarity became solidified. Most examples are poorly struck with dull surfaces and numerous bagmarks. This Premium Gem dollar is a welcome exception, with beautiful multicolor patina in shades of sea-green, ice-blue, violet, and gold. Bright mint luster percolates through the toning. The strike is far above-average despite a hint of softness on the breast feathers. This is a great chance for the advanced collector to acquire one of the finest certified examples of this late-date emission. Population: 52 in 66 (4 in 66+), 1 finer (5/19). NGC ID# 256U, PCGS# 7290

**1904-S Morgan, Brilliant MS63
Better Date in High Grade**

- 3699 1904-S MS63 PCGS.** The 1904-S is a better date among 20th century Morgan dollars, especially in Mint State. This Select example strikes a compromise between affordability and quality. Both sides are brilliant and radiantly lustrous, with semiprooflike reflectivity in the obverse fields. The strike is above average, and only some light abrasions on Liberty's cheek prevent a finer grade. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, Choice Uncirculated
Far Finer Than Usually Seen**

- 3700 1904-S MS64 PCGS.** Mint luster throughout this Choice Uncirculated San Francisco dollar is satiny rather than typically frosted. It glistens softly from silver surfaces lightly toned in blushes of golden color around the marginal devices. Central detail is characteristic, while the overall preservation is significantly better than the usually-encountered Choice XF representative. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, Brilliant MS64
Bright, Semireflective Fields**

- 3701 1904-S MS64 PCGS. CAC.** The 1904-S is a scarce, semikey issue and a standout rarity in high grades among late-date Morgans. Much of the challenge of this issue derives not from a low mintage (2.3 million pieces struck) but because of the soft strike and poor luster seen on most surviving examples. This is a bright coin with semireflective fields. The central strike definition is a bit lacking, but certainly better than most surviving 1904-S dollars. Brilliant throughout. NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLAR

- 3702 1888 PR62 NGC.** The design elements of this attractive PR62 specimen are sharply detailed throughout and the fields are deeply mirrored, with some minor hairlines on both sides. The lightly marked surfaces show highlights of pink, with a few microscopic amber alloy specks on the reverse. From a mintage of 832 pieces. NGC ID# 27ZH, PCGS# 7323

PEACE DOLLARS

- 3703 1923 MS67 NGC.** The 1923 is scarce in MS67, but it is one of the few Peace dollars collectible in such fine condition. It is popular as a type coin. This piece displays vibrant, frosty cartwheel luster and lovely golden toning. A sharp strike complements remarkably clean surfaces, producing strong eye appeal. No numerically finer 1923 silver dollars are certified (6/19). NGC ID# AMPA, PCGS# 7360

**1923-D Peace Dollar, MS66
Registry Set Contender**

- 3704 1923-D MS66 PCGS.** The 1923-D Peace dollar claims a mintage of 6.8 million pieces, making the issue scarce in MS66 condition and virtually unobtainable any finer. This delightful Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on the leading edge of the eagle's wing. The well-preserved, lustrous surfaces are blanketed in shades of golden-brown and lavender toning. PCGS has graded only one numerically finer example (6/19). NGC ID# 257G, PCGS# 7361

1924 Peace Dollar, MS67
Frosty and Sharp, Only Two Coins Finer

- 3705 1924 MS67 NGC.** The 1924 is among the more plentiful Peace dollar issues in high grade, suitable for type representation. This Superb Gem displays a bold strike and champagne-tinted, frosty mint luster. There are no distracting abrasions. Only one numerically finer example each are reported by NGC and PCGS. Census: 97 in 67 (5 in 67+, 1 in 67★), 1 finer (5/19).
Ex: Central States Signature (Heritage, 4/2017), lot 4839, which realized \$2,352.35. NGC ID# 257J, PCGS# 7363

1924 Dollar, MS67
Only One Coin Finer at NGC

- 3706 1924 MS67 NGC.** The 1924 Peace dollar is scarce in MS67 and nearly unknown finer. In fact, this grade is usually the finest that the Peace dollar type in general is available. The present coin is sharp and radiantly lustrous. A hint of light golden toning graces each side, complementing virtually flawless preservation. Some faint die rust is visible in the obverse fields under a loupe. Census: 97 in 67 (5 in 67+, 1 in 67★), 1 finer (5/19). NGC ID# 257J, PCGS# 7363

1927-D Peace Dollar, MS65
Rare Any Finer, CAC Approved

- 3707 1927-D MS65 PCGS. CAC.** Ranked as the second-scarcest Uncirculated issue in the Peace dollar series (behind the 1934-S), the 1927-D's low mintage of 1.2 million pieces is only part of the story. Most of the mintage entered circulation, while bags of Uncirculated coins often received rough handling. This lightly toned, original Gem displays a few small areas of tan-brown toning over pearlescent-silver, softly lustrous surfaces. The strike is bold-to-sharp, and the surfaces are remarkably unabraded. CAC endorsement adds to the appeal. PCGS reports just 17 numerically finer pieces (6/19). NGC ID# 257T, PCGS# 7371

- 3708 1934 MS66 PCGS.** An elusive Premium Gem example of this late-series Philadelphia issue, showing a bold strike and brilliant cartwheel luster. A small tick mark on Liberty's cheek appears to be all that keeps this coin from Superb Gem consideration. PCGS lists a half dozen numerically finer 1934 Peace dollars (5/19). NGC ID# 257Y, PCGS# 7375

1934-S Dollar, MS63
Strong and Frosty

- 3709 1934-S MS63 PCGS.** Select Uncirculated with above-average detail and frosty mint luster. Subtle dappled gold and pastel-blue patina graces the largely brilliant surfaces. A handful of minor abrasions appear on the obverse, though that side appears clean overall. The grade-defining mark appears on the reverse, where it crosses the eagle's lower tailfeathers.
Ex: Atlanta Signature (Heritage, 8/2001), lot 6857; FUN Signature (Heritage, 1/2007), lot 7559, where it brought \$3,450. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS63
Green Label Holder

- 3710 1934-S MS63 PCGS.** Light champagne toning graces this lustrous and impressively smooth key-date Peace dollar. The cheek is especially clean. The strike is good, although the centers show minor incompleteness. A tiny spot is noted on the eagle's leg. Encapsulated in a green label holder.
Ex: Central States Signature (Heritage, 5/2007), lot 5165, which realized \$3,737.50. NGC ID# 257Z, PCGS# 7377

1934-S Dollar, MS63
'Doubled Tiara,' VAM-3

- 3711 1934-S Doubled Tiara, VAM-3, MS63 PCGS.** A Top 50 Variety. Die doubling is noticeable on the rays in Liberty's tiara. This lustrous key-date representative is pleasantly free from relevant marks, and is originally toned in delicate ice-blue and almond-gold. A sharply defined example.
Ex: National Money Show Signature (Heritage, 3/2008), lot 1269; Summer FUN Signature (Heritage, 7/2016), lot 4279. NGC ID# 257Z, PCGS# 133782 Base PCGS# 7377

- 3712 1935 MS66 PCGS.** A well-struck and lustrous representative of the final Philadelphia issue. Light almond-gold toning dominates, though the borders display glimpses of russet patina. The obverse is exceptionally free from marks, while the reverse shows occasional moderate contact. NGC ID# 2582, PCGS# 7378

**1935 Peace Dollar, MS66+
Tied for Finest at PCGS**

- 3713 1935 MS66+ PCGS.** PCGS has not certified any 1935 Peace dollars in Superb Gem condition, and the population of Premium Gems is no doubt inflated by resubmissions and attempts to get a coin into an MS67 holder. This MS66+ coin is as good as it gets for PCGS Registry Set collectors. It is vibrantly lustrous and untuned, showing a bold strike and clean surfaces. Population: 71 in 66+, 0 finer (5/19). NGC ID# 2582, PCGS# 7378

SUSAN B. ANTHONY DOLLAR

**1979-P Susan B. Anthony Dollar, MS67
FS-301, Wide Rim
Top-Grade Registry Candidate**

- 3714 1979-P Wide Rim, FS-301, MS67 PCGS.** The rim is wide on this variety, and it can be easily distinguished from the Narrow Rim variant by the close proximity of the date to the rim. Only 20 coins are certified in MS67 at PCGS and none are finer (5/19), making the present coin important for Registry collectors. It is sharply struck and satiny with no noteworthy abrasions. Each side displays attractive multicolor toning in pastel hues. NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

GOLD DOLLARS

- 3715 1851-C XF40 PCGS. Variety 1.** A splendid green-gold Charlotte type coin whose sharpness and eye appeal surpasses its numerical grade. Satin luster outlines design elements. The fields display minor shallow strike-throughs, usual for the remote North Carolina facility. Encapsulated in an old green label holder. NGC ID# 25BL, PCGS# 7514
- 3716 1853 MS65 NGC. CAC.** A lovely orange-gold and rose Gem type coin, CAC-approved in a prior generation holder. One small mark in the field near Liberty's nose denies virtual perfection for this Type One gold dollar. CAC: 55 in 65, 35 finer (5/19). NGC ID# 25BU, PCGS# 7521

**1853 Gold Dollar, MS66
Gleaming Example of the Type**

- 3717 1853 MS66 PCGS.** Full stars, curls, and wreath leaves define this gleaming Premium Gem. Frosted yellow-gold surfaces display extraordinarily clean fields and terrific eye appeal. Gold dollars were struck in massive quantities during the early 1850s, when silver was largely driven out of circulation. More than 4 million pieces were minted in 1853. Population: 71 in 66 (9 in 66+), 13 finer (5/19). NGC ID# 25BU, PCGS# 7521

**1853 Gold Dollar, MS66+
Highly Lustrous Type Coin**

- 3718 1853 MS66+ PCGS.** This is a sharp, remarkably well-preserved Type One gold dollar, showing luminous yellow luster and near-flawless surfaces. Several peripheral die cracks on the obverse denote an advanced die state, although neither side has the oft-seen clash marks. The 1853 is rare in MS66, but more plentiful than many other issues. The PCGS Plus designation sets this Premium Gem apart from others at its grade level, and finer pieces are rare. Population: 9 in 66+, 13 finer (6/19). NGC ID# 25BU, PCGS# 7521

- 3719 1855 Type 2 MS62 PCGS. CAC.** A lightly abraded wheat-gold example. The strike is good save for blending on the 8 in the date. The fields are prominently clashed. The Philadelphia Mint struck the Type Two design for just two years, and nice Mint State examples are scarce. CAC has confirmed only 46 pieces as MS62 (5/19). NGC ID# 25C4, PCGS# 7532

**1857-C Gold Dollar, AU55
Elusive Charlotte Issue**

- 3720 1857-C AU55 NGC. Variety 1.** This is a satiny, apricot-gold example of a challenging Charlotte issue. The coin is surprisingly unabraded aside from a small dig above the O in DOLLAR, and the surfaces are microgranular in places, as coined. The strike is about normal for the Southern branch facility, but UNITED STATES OF AMERICA is bold. Just 13,280 pieces were produced. Census: 54 in 55, 48 finer (5/19). NGC ID# 25CE, PCGS# 7545

1857-S Gold Dollar, MS61
Rare in Uncirculated Grades

- 3721 1857-S MS61 NGC.** The 2011 Bowers' *Guide Book of Gold Dollars* echoes David Akers comment that "I would be surprised if more than 15 to 20 Uncirculated examples are known." Even in About Uncirculated conditions, the 1857-S is rare. This lustrous and semireflective yellow-gold coin is ranked solidly within the cherished Mint State category, housed in an MS61 holder. Marks are limited to a few delicate hairlines that visit each side, while the devices are sharply struck and the high points are free of wear. The bow loops are fully formed, and the bowknot shows above-average definition. Census: 10 in 61, 6 finer (5/19). NGC ID# 25CG, PCGS# 7547

1858 Gold Dollar, MS65
Condition Rarity This Fine

- 3722 1858 MS65 NGC.** The 1858 gold dollar is a relatively plentiful issue in grades up to the MS64 grade level, but finer coins are condition rarities. This delightful Gem exhibits sharply detailed design elements in most areas, but the first 8 and the 5 in the date are weakly impressed. The well-preserved orange-gold surfaces are lustrous and appealing. Census: 4 in 65, 2 finer (5/19). NGC ID# 25CH, PCGS# 7548

1862 Gold Dollar, MS66
Rarely Seen Finer

- 3723 1862 MS66 PCGS. CAC.** Miraculously, this 1862 gold dollar does not show clash marks, nor does it appear to be lapped. Faint die striations in the fields are likely from the initial die preparation, meaning this is a moderately early strike. CAC endorsed in MS66, it displays a sharp strike and satiny yellow-gold luster. The 1862 is scarce in this grade and it is rarely found finer. Population: 40 in 66 (4 in 66+), 7 finer. CAC: 19 in 66, 9 finer (6/19). NGC ID# 25CW, PCGS# 7560

1866 Gold Dollar, MS64
Rare CAC-Recognized Example

- 3724 1866 MS64 PCGS. CAC.** This low-mintage, early Type Three issue (7,130 pieces struck) is scarce in MS64 and finer grades, and such coins are rarely seen with CAC approval. This near-Gem displays satiny, bright yellow-gold surfaces and sharp devices. Clash marks are visible as usual, with some die lapping also evident. There is a hint of reflectivity in the fields as a result of the lapping. Population: 19 in 64 (2 in 64+), 31 finer. CAC: 7 in 64, 11 finer (6/19). NGC ID# 25D2, PCGS# 7565

1867 Gold Dollar, MS64
Semiprooflike, Conditionally Scarce

- 3725 1867 MS64 NGC.** In Choice condition, Mint State 1867 gold dollars are rare, and finer pieces are out of reach for most collectors. This near-Gem is well-struck and semiprooflike with finely striated fields, a product of polished dies and a low mintage (5,200 coins). Moderately heavy clash marks are present on both sides. Each side has rich yellow-gold patina and lacks bothersome abrasions. Census: 11 in 64 (1 in 64+, 1 in 64★), 8 finer (5/19). NGC ID# 25D3, PCGS# 7566
- 3726 1877 MS64 PCGS. CAC.** An elusive near-Gem example of this low-mintage Philadelphia issue (3,900 coins struck). Both sides are boldly struck with warm honey-gold color and semiprooflike fields. No obtrusive abrasions are present. Population: 24 in 64, 36 finer. CAC: 2 in 64, 17 finer (6/19). NGC ID# 25DF, PCGS# 7578

1879 Gold Dollar, MS67
Lovely Color and Reflectivity

- 3727 1879 MS67 PCGS.** Despite a mintage of only 3,000 coins, the 1879 gold dollar was saved in large enough quantities to be obtainable to a certain extent today. This Superb Gem example is among the finest surviving, with well-defined motifs set against semiprooflike fields that display warm rose and yellow-gold hues. Light clash marks are present on the reverse and LIBERTY is partially effaced by die polishing on the obverse. Population: 12 in 67 (1 in 67+), 0 finer (5/19).
Ex: Central States Signature (Heritage, 4/2015), lot 6042. NGC ID# 25DH, PCGS# 7580

1881 Gold Dollar, Reflective MS67
Shimmering Light-Gold Example

- 3728 1881 MS67 PCGS. CAC.** Struck from dies that were also used for some proofs, this Superb Gem 1881 has the date positioned partly left of O in DOLLAR, and the 8s recut within the loops. A small-but-adequate mintage of 7,620 pieces makes the 1881 an available date in the gold dollar series, in part because many pieces were hoarded upon issue. Reflective fields add an attractive sheen to pale greenish-gold surfaces, with a needle-sharp strike on both sides. Two or three incidental, tiny ticks are seen with a loupe, but do not distract in the least. CAC: 35 in 67, 25 finer (6/19). NGC ID# 25DK, PCGS# 7582

1883 Gold Dollar, MS67
Lovely Type Coin

- 3729 1883 MS67 PCGS.** This incredibly well-preserved 1883 is somewhat reflective in the fields but also satiny. The devices have good luster. Rich peach-yellow and golden hues adorn each side. A sharp late-series gold dollar such as this is a popular type coin. Although the 1883 is more plentiful than its 10,800-coin mintage would suggest, it is rarely seen finer than the current piece. NGC ID# 25DM, PCGS# 7584

- 3730 1889 MS67 PCGS.** Final-year gold dollars are eminently collectible in high grades (many were saved), and therefore popular for type purposes. The low mintage of 28,950 coins is also attracts collectors. Shimmering yellow-gold surfaces present near-complete design detail and exceptional preservation throughout both sides of this frosted example. There are just 10 finer examples at PCGS (6/19). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

1836 Two and a Half, MS62+
Script 8, Attractive Surfaces

- 3731 1836 Script 8 MS62+ NGC. Breen-6143, Variety 11, R.2.** Head of 1835. An attractive semiprooflike caramel-gold example. Smooth save for a few ticks on the rims near 9 o'clock. The centers are incompletely impressed, characteristic of Variety 11. A late die state with interesting cracks on both sides. The Script 8 and Bold 8 varieties are both available by the standards of the six-year type. NGC ID# 25FU, PCGS# 7694

1836 Quarter Eagle, Radiant MS62
Block 8, Second Head of 1837

- 3732 1836 Block 8 MS62 NGC. Breen-6144, Second Head of 1837, Variety 15, R.2.** Although the 1836 Block 8 variant is estimated to have a mintage just one-fourth of its Script 8 counterpart, the two varieties are listed in the 2020 *Guide Book* at the same value, and both types are available to collectors. Uncirculated examples are elusive. This is the Second Head of 1837 design — scarce as a type — with smooth and lustrous, greenish-gold surfaces. The eagle shows slight weakness below the wing, although all else is sharp. Census: 21 in 62 (1 in 62+), 16 finer (5/19). NGC ID# 25FU, PCGS# 97694

1839-O Quarter Eagle, AU55
First New Orleans Gold Coin

- 3733 1839-O AU55 PCGS. Variety 27.** High Date, Wide Fraction. Both dies show evidence of lapping, and minor clash marks are noted inside Liberty's ear. The reverse has a die crack through the olive branch to the I in UNITED, and other minor cracks through the tops of letters in STATES. Neither die was used elsewhere in the series. This Choice AU example shows trivial handling marks on its still-lustrous yellow-gold surfaces, with a minor scrape and strike weakness at the lower reverse. Population: 26 in 55, 61 finer (5/19). NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

- 3734 1843-O Small Date, Crosslet 4 MS61 NGC. Variety 4.** Ex: *S.S. New York*. The *S.S. New York* shipwreck occurred in 1846, and the 2008 distribution of its recovery provided a plethora of early Liberty gold from four different mints. This New Orleans example has light green-gold surfaces that are smooth aside from faint marks on the cheek. Luster dominates the borders and fills the devices. Ex: *Long Beach Signature* (Heritage, 9/2010), lot 5196, which realized \$1,955. NGC ID# 25GR, PCGS# 7731

1844-C Quarter Eagle, AU55
Scarce-to-Rare Charlotte Gold

- 3735 1844-C AU55 NGC. Variety 1.** Scarce in all grades and rare in Mint State, this Choice About Uncirculated 1844-C represents an important opportunity for any branch mint gold specialist. The coin is softly struck on the eagle as always seen, while the obverse seems to grade several points higher than the reverse. Medium greenish-gold surfaces show scattered tiny marks and bits of cloudy orange toning. Census: 24 in 55, 27 finer (5/19). NGC ID# 25GU, PCGS# 7735

1848-D Liberty Quarter Eagle, AU55
Lightly Abraded, Lustrous Example

- 3736 1848-D AU55 NGC. Variety 10-N.** From a mintage of 13,771 pieces, the 1848-D Liberty quarter eagle is one of the more available D-mint issues, but it is still elusive, and somewhat undervalued, in high grade. This Choice AU specimen exhibits some light wear on the well-detailed design elements and the lemon-yellow surfaces are lightly abraded, with much of their original mint luster still intact. Census: 32 in 55, 57 finer (5/19). NGC ID# 25HC, PCGS# 7751

1850-D Two and a Half, AU58
Excellent for Type

- 3737 1850-D AU58 NGC. Variety 13-N.** The 1850-D is the most available Dahlonega quarter eagle struck during the 1850s. The bright yellow-gold surfaces of this high-end AU specimen retain a fair amount of luster, and exhibit better-than-average strike definition. A few minuscule marks are scattered about. Census: 36 in 58, 15 finer (5/19). Ex: *ANA Signature* (Heritage, 8/2007), lot 2853, where it brought \$5,750. NGC ID# 25HJ, PCGS# 7757

1851-C Quarter Eagle, AU55+
Rarely Encountered Finer

- 3738 1851-C AU55+ NGC. Variety 1.** Despite higher population figures, only a handful of Mint State examples are known of this issue, and Choice AU pieces like the present example are in high demand. Struck from the only known die pair, this example has considerable luster and excellent eye appeal with minimal scattered marks. Census: 17 in 55, 33 finer (6/19). NGC ID# 25HM, PCGS# 7760

- 3739 1852-O AU58 NGC. Variety 1**, mintmark positioned to the right above the fraction. The 1852-O quarter eagle is scarce in AU58 and rare in Uncirculated condition. This coin displays bright yellow-gold luster and satiny surfaces. Some strike weakness is noted on the eagle's left (facing) leg, although no measurable wear is observed. Census: 148 in 58 (4 in 58+, 1 in 58★), 34 finer (5/19). NGC ID# 7HX8, PCGS# 7766

**1854 Quarter Eagle, MS64+
Overlooked Rarity at This Grade, CAC**

- 3740 1854 MS64+ PCGS. CAC.** While the 1854 is moderately available in most grades, Gem examples are rare. This frosted, straw-gold near-Gem carries CAC endorsement as part of its appeal, with lustrous Choice surfaces and an overall sharp strike. Marks are minimal, limited to a pair of tiny, light abrasions in the upper-left obverse field. Astute bidders will notice PCGS has certified just two coins with the Plus designation at the MS64 level. Population: 38 in 64 (2 in 64+), 10 finer. CAC: 7 in 64, 5 finer (6/19). NGC ID# 25HX, PCGS# 7769

**1863-S Quarter Eagle, AU53
Scarce, Low-Mintage Issue**

- 3741 1863-S AU53 PCGS.** Other than double eagles, no gold denominations had large mintages in 1863 regardless of the mint. Just 10,800 quarter eagles were struck in San Francisco, most of which were lost to attrition during circulation. About Uncirculated examples are scarce, and Mint State survivors are rare. This AU53 coin displays brassy-gold color with reddish-gray accents at the margins. The motifs retain sharp definition. We note several light pinscratches around the portrait, and a tubular strike-through just left of the date. Population: 1 in 53, 13 finer (6/19). NGC ID# 25K3, PCGS# 7799

**1872 Quarter Eagle, Reflective MS61
3,000 Coins Struck, Underrated Issue**

- 3742 1872 MS61 PCGS.** Of the 3,000 quarter eagles struck in 1872, maybe 100 pieces survive, including 10 or 12 examples in Mint State. This MS61 could understandably be mistaken for a proof, the fields being deeply reflective and the devices fully struck. Yellow-gold surfaces are predictably abraded, and a small lamination occurs above Liberty's nose. Population: 4 in 61, 4 finer (5/19). NGC ID# 25KK, PCGS# 7815

**1873 Liberty Quarter Eagle, MS65
Scarcer Closed 3 Variety**

- 3743 1873 Closed 3 MS65 PCGS.** The 1873 Liberty quarter eagle with the Closed 3 in the date is more elusive than its Open 3 counterpart, which was struck later in the year. This delightful Gem exhibits well-detailed design elements, with just a touch of the usual softness on the eagle's left (facing) leg. The well-preserved orange-gold surfaces are lustrous and appealing. Population: 16 in 65 (1 in 65+), 3 finer (6/19). NGC ID# 25KN, PCGS# 7818

- 3744 1878 MS65 NGC.** Dynamic luster, a sharp strike, and exemplary preservation proclaim the quality of this lovely khaki-gold Gem. Mintages of Liberty quarter eagles rose in 1878, perhaps in anticipation that gold coin would return to East Coast circulation that year. Census: 34 in 65 (3 in 65+), 10 finer (5/19). *Ex: Internet Coin Auction (Heritage, 11/2014), lot 23917, which realized \$1,299.55.* NGC ID# 25KY, PCGS# 7828

**1878 Quarter Eagle, MS66
Frosty Peach-Gold Type Coin**

- 3745 1878 MS66 PCGS.** The Mint struck 286,240 quarter eagles in 1878, making this one of the most collectible dates in the series. Examples only become scarce in Gem condition and rare at this high level. Strongly defined peach-gold surfaces emit glowing mint frost from each side. No marks to mention. Population: 11 in 66 (2 in 66+), 3 finer (6/19). NGC ID# 25KY, PCGS# 7828

1883 Liberty Quarter Eagle, AU55
Elusive, Low-Mintage Issue

- 3746 1883 AU55 NGC.** The 1883 Liberty quarter eagle boasts a meager mintage of 1,920 pieces, making the issue scarce-to-rare in all grades today. This impressive Choice AU specimen exhibits some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster in sheltered areas. Census: 8 in 55, 41 finer (6/19). NGC ID# 25L7, PCGS# 7835

- 3747 1897 MS66 NGC.** The butter-gold surfaces show a shimmering mint frost and fully struck design features. There are a few tiny marks on each side visible with a glass, but none are apparent to the unaided eye. Census: 48 in 66 (1 in 66+, 1 in 66★), 18 finer (5/19).
Ex: Dallas Signature (Heritage, 11/2003), lot 7318; New York Signature (Heritage, 10/2014), lot 4246. NGC ID# 25LM, PCGS# 7849

- 3748 1905 MS67 PCGS.** A common date, popular as a type coin, the 1905 Liberty quarter eagle is conditionally elusive in MS67, and fewer than a dozen finer coins are known — five at PCGS, six at NGC (5/19). This piece is luminous and frosty. Natural wheat-gold luster complements a sharp strike, and neither side has a mentionable contact mark. NGC ID# 267S, PCGS# 7857

PROOF LIBERTY QUARTER EAGLES

1893 Quarter Eagle, PR61 Cameo
Sharp With Intense, Rich-Gold Color

- 3749 1893 PR61 Cameo NGC. CAC. JD-1, R.5.** The proof mintage was about average for early 1890s proof gold, with 106 pieces struck and perhaps 50 to 60 pieces known in all grades. Cameo examples are scarce among the survivors, and those with CAC endorsement are clearly in the minority. A few delicate hairlines and tiny marks pull the grade down a notch or two on this well-mirrored and contrasted proof. Fully struck, while intense rich-gold color adds eye appeal. Census: 2 in 61 Cameo, 9 finer. CAC: 1 in 61, 2 finer (5/19). NGC ID# 288G, PCGS# 87919

1901 Quarter Eagle, PR62
First Generation Holder

- 3750 1901 PR62 PCGS. JD-1, R.4.** The 1901 quarter eagle is a perfect issue for collectors targeting a single Liberty Head two and a half dollar type coin in proof format. The Mint struck 223 pieces that year — the highest total in the long-running series. Slightly dusky yellow-gold surfaces exhibit partial contrast and a few hairlines. The razor-sharp strike is impressive. Encapsulated in a first generation holder. NGC ID# 7KFZ, PCGS# 7927

1903 Quarter Eagle, PR58
Just 197 Proofs Issued

- 3751 1903 PR58 PCGS. CAC. JD-1, R.4.** Although it spent a brief moment in circulation, this colorful and well-mirrored proof shows only minor signs of handling and no impairment. Areas of lilac color accent the vibrant orange-gold surfaces, while the motifs retain their needle-sharp strike. A few tiny field ticks pose little distraction at the PR58 level. CAC endorsement confirms the overall quality and eye appeal. NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

- 3752 1908 MS65 NGC.** First-year Indian Head quarter eagles are popular type coins, as the 1908 is one of the few pre-1925 issues that is readily available in Gem condition. The coin offered here is satiny and well-struck with natural wheat-gold mint luster. The fields are especially well-preserved. NGC ID# 288Y, PCGS# 7939

**1908 Two and a Half, MS65
CAC-Approved Type Coin**

- 3753 1908 MS65 PCGS. CAC.** This Gem 1908 Indian quarter eagle was likely among the many pieces set aside as a novelty during the first year of issue for this type, or perhaps it was set aside by a knowledgeable collector. Luster is especially luminous with rich wheat-gold color and attractively preserved fields. The strike is generally sharp. First-year Indian gold pieces are highly sought-after as type coins, although this quarter eagle issue becomes somewhat scarce finer than the present grade. NGC ID# 288Y, PCGS# 7939

**1909 Indian Head Quarter Eagle, MS65
Elusive CAC-Approved Coin**

- 3754 1909 MS65 PCGS. CAC.** Impressively sharp details complement satiny, unabraded fields on this Gem 1909 Indian quarter eagle. Each side has rich yellow-gold color and is remarkably attractive. The 1909 is collectible in MS65, although CAC-approved coins are scarce. Finer pieces rarely come on the market. NGC ID# 288Z, PCGS# 7940

**1910 Two and a Half, MS65
Rarely Offered Finer**

- 3755 1910 MS65 NGC.** The 1910 quarter eagle becomes scarce in MS65, and examples are rarely seen in higher grades. This Gem is well-struck and satiny with yellow-gold mint luster. The fields are especially well-preserved, considering this type's tendency to be abraded. NGC lists 17 finer representatives (5/19). NGC ID# 289Z, PCGS# 7941

**1911-D Indian Quarter Eagle, XF40
Strong Eye Appeal for the Grade**

- 3756 1911-D XF40 PCGS.** This piece must have been quite a find for the fortunate collector who plucked it from circulation many years ago. The coin is housed in a previous generation green label holder. Wear on the surface high points determines the XF40 grade, although marks are nearly absent and strong strike definition remains. Deep straw-gold color displays areas of bright-gold luster for considerable eye appeal, and the D mintmark is fully outlined for easy visibility. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU55
Diagnostic Partial Wire Rim**

- 3757 1911-D AU55 NGC.** The faint outline of a softly impressed mintmark confirms this is an example of the famous low-mintage key date, one of 55,680 pieces struck. A partial wire rim is also diagnostic. Yellow-gold surfaces exhibit well-struck, lightly worn motifs and shallow field marks. There are some faint hairlines and minor rim bumps, but nothing significant. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU55
Sharp Mintmark**

- 3758 1911-D AU55 PCGS.** The mintmark is sharp despite light high-point wear. This well-detailed 1911-D quarter eagle displays satiny straw-gold luster with expected field chatter. The coin is quite pleasing for the grade. This key issue is usually available, but most of the upper-AU-level representatives on the market show unnaturally bright surfaces from being dipped or otherwise cleaned. This example will please many collectors in that regard.
Ex: FUN Signature (Heritage, 1/2017), lot 6649, which realized \$4,230. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Indian, AU58
Attractive, Well-Defined Example

- 3759 1911-D AU58 NGC.** This is the near-Mint example collectors need to complete an otherwise Mint State set of this popular, low-mintage series. The surfaces are bright, reddish-gold and retain generous amounts of mint luster. As such, it would visually blend in with an otherwise Uncirculated set. The mintmark is fully formed, and there are no obvious or detracting abrasions. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Indian, AU58
Sharp and Attractive Key Issue

- 3760 1911-D AU58 NGC.** The Indian quarter eagle series is eminently collectible for all, which translates into spirited competition for the better dates in the series. The 1911-D trumps all in that regard. The low mintage of 55,680 pieces makes the '11-D the unquestioned key except in the highest Uncirculated grades, where a few other issues are equally rare. This near-Mint example displays good orange-gold color with strong eye appeal. The mintmark is bold, while the grade is confirmed by light high-point wear and a few minor marks. The diagnostic wire rim is sharply visible at the upper-right quadrant. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS61
Indian Head Key

- 3761 1911-D MS61 NGC.** The mintmark is sharp on this coin, complementing bold definition of the devices. The diagnostic wire rim along the right-hand obverse is prominent. Each side displays satiny wheat-gold luster with delicate olive overtones, attesting to the originality of the surfaces. The 1911-D is the only absolute key date in the Indian quarter eagle series. Attractive low-end Uncirculated examples are highly sought-after. NGC ID# 7KR7, PCGS# 7943

- 3762 1912 MS64 PCGS.** Smoothly frosted, sharply struck tan-gold surfaces display lilac accents below the Indian's chin and within the eagle's plumage. Marks or abrasions are nearly nonexistent on either side, with surface quality suggestive of an even finer grade. Only slight softness at the lower headdress argues against a full strike. NGC ID# 7KR8, PCGS# 7944

- 3763 1912 MS64 NGC.** A Choice caramel-gold Indian type coin that boasts smooth surfaces and sweeping luster. The strike is crisp except on the eagle's shoulder. In MS65, the 1912 is out of reach for most collectors, but near-Gems are reasonably priced. NGC ID# 7KR8, PCGS# 7944

1913 Quarter Eagle, MS65
Rarely Seen Finer

- 3764 1913 MS65 PCGS.** Satiny mint luster displays pleasing straw-gold color on this Gem 1913 quarter eagle, with few signs of contact in the elevated fields. The strike is a trifle soft on the lower headdress feathers, although the eagle's wing is well-defined. PCGS has seen only nine numerically finer examples (5/19). NGC ID# 7KR9, PCGS# 7945

- 3765 1914 MS63 NGC.** A collectible Select example of this conditionally better semikay. The coin is well-struck and satiny with bright yellow-gold luster. Scattered light abrasions are not bothersome. Only 240,000 quarter eagles were struck at Philadelphia in 1914, and this issue is a condition key in MS65. NGC ID# 7KRA, PCGS# 7946

1914 Two and a Half, MS64
Elusive CAC Example

- 3766 1914 MS64 PCGS. CAC.** Although plentiful in MS64, the 1914 Indian quarter eagle is a condition key just one point finer. A minority of MS64 coins are CAC approved, and these bring premiums at auction. The coin offered here displays sharp details and satiny straw-gold mint luster. The fields are surprisingly free of singular abrasions, barely missing a Gem designation. CAC: 86 in 64, 9 finer (6/19). NGC ID# 7KRA, PCGS# 7946

- 3767 1914-D MS64 NGC.** A well-struck coin with luminous wheat-gold mint luster. Neither side has bothersome abrasions and eye appeal is excellent for the grade. Struck from a late die state with a radial crack on the reverse that runs through the mintmark. The 1914-D is a key date just one grade finer. NGC ID# 2899, PCGS# 7947

**1915 Quarter Eagle, MS65
Exemplary Mint Luster**

3768 1915 MS65 NGC. Peach-orange and green-gold hues intermingle on this Gem 1915 quarter eagle, complementing luminous satin mint luster and sharply detailed devices. A few tiny marks in the reverse field above the eagle are all that deny an even finer grade on this attractive Indian Head type coin. NGC lists 12 finer representatives (5/19). NGC ID# 7KRC, PCGS# 7948

3769 1925-D MS65+ NGC. The fields are beautifully preserved and luminous on this high-end Gem type coin. Rich orange-gold, peach, and lilac hues adorn each side. A loupe reveals strike softness on the lower headdress feathers, although the eye appeal is unaffected. Finer 1925-D quarter eagles are scarce. NGC ID# 7KRD, PCGS# 7949

**1925-D Two and a Half, MS65+
Choice Luster and Color**

3770 1925-D MS65+ PCGS. CAC. Remarkably well-preserved, satiny mint luster engulfs this high-end Gem, a type coin with remarkable eye appeal and undeniably original surfaces. Rich peach-gold and yellow hues adorn each side, and the only mentionable strike weakness is seen on the lower headdress feathers. The 1925-D is plentiful overall, but few Gems carry a Plus designation and CAC endorsement. Population: 47 in 65+, 39 finer. CAC: 128 in 65, 2 finer (6/19). NGC ID# 7KRD, PCGS# 7949

**1929 Quarter Eagle, MS65
Final Indian Head Issue**

3771 1929 MS65 PCGS. This is the last issue in the Indian quarter eagle series, and one of the most plentiful overall, ideal for type purposes. It is the only easily obtained gold coin dated 1929. Both sides of this Gem exhibit frosty yellow-gold luster with bold design motifs and exceptional eye appeal. A condition rarity, with only five finer PCGS certified coins (5/19).
Ex: Long Beach Signature (Heritage, 6/2013), lot 5640, which realized \$3,965.63. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

3772 1854-O XF40 PCGS. Variety 2. The dies are lapped as usual, although the strike is sharp across all design elements. Light wear leaves most details intact and the surfaces have minimal abrasions. Light olive-gold patina is appealing, adding to the appeal of this collector-grade New Orleans type coin. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar Gold, XF45
Popular Mintmarked First-Year Issue**

3773 1854-O XF45 NGC. CAC. Variety 2. Struck from the usual heavily lapped reverse die, with resultant loss of detail on the bow above the knot on the lower reverse. This Choice XF example shows a few small planchet flakes that did not strike out of the obverse at the time of manufacture. Otherwise, the coin is lightly marked with attractive reddish-tinted surfaces. Scarce with CAC endorsement. CAC: 19 in 45, 39 finer (5/19). NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU55
Sole O-Mint Issue of the Denomination**

3774 1854-O AU55 NGC. Variety 2. Always a collector-favorite, the 1854-O is a first-year issue as well as the only O-mint three dollar. Just 24,000 pieces were struck. A considerable number of coins were set aside — no doubt as curiosities — and thus, examples are available today. This pleasing AU example displays bright, green-gold surfaces with just the thinnest traces of luster still evident around the devices. An oval-shaped planchet void is located to the right of the denomination on the reverse, but it is not distracting. Struck from the often-seen lapped reverse die. NGC ID# 25M5, PCGS# 7971

3775 1855-S XF40 PCGS. A better branch mint issue, the 1855-S three dollar gold piece is more elusive in the upper circulated grades than many Philadelphia coins with similar mintages. The 1855-S has a production total of 6,600 pieces. This XF coin displays bright tan-gold color and moderate detail. There are hints of satin luster in the peripheral fields. NGC ID# 7K5D, PCGS# 7973

3776 1856-S AU50 NGC. Medium S, with a small die break below the LL in DOLLARS, as usual. A pleasing About Uncirculated example of this San Francisco issue, surviving from a mintage of 34,500 pieces. The bright yellow-gold surfaces are only lightly marked and have well-detailed design elements. NGC ID# 25M9, PCGS# 7975

3777 1861 XF40 PCGS. CAC. A scarce Civil War date with a commercial mintage of only 5,959 pieces. Rich orange-gold luster accompanies design recesses. The obverse field and high points are gunmetal-blue. No marks merit mention. Encapsulated in a green label holder. CAC: 2 in 40, 27 finer (5/19). NGC ID# 7K5N, PCGS# 7982

**1874 Three Dollar Gold, MS64
Popular Type Issue**

3778 1874 MS64 PCGS. From a mintage of 41,800 pieces, the 1874 three dollar gold piece is a relatively available issue in the series and a popular choice of type collectors. The issue becomes scarce in MS64 condition, however, and finer coins are rare. This impressive Choice example offers well-detailed design elements, with just a trace of softness on the ribbon knot. The lightly marked yellow-gold surfaces are lustrous and appealing. PCGS has graded 22 numerically finer examples (6/19). NGC ID# 7KDE, PCGS# 7998

3779 1878 MS61 NGC. Each side presents well-struck motifs and light wheat-gold color. Frosty mint luster similarly appears throughout. Peppered abrasions are what prevent this three dollar type coin from achieving a higher grade.
From The Chinook Collection, Part II. NGC ID# 25MZ, PCGS# 8000

3780 1878 MS61 PCGS. A belief that parity between gold and paper money would restore demand for three dollar gold coins led to the year's high mintage. This well-struck Uncirculated example maintains radiant luster and luminous straw-gold color. Slightly soft on the ribbon bow and expectedly abraded.
From The Chinook Collection, Part II. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64
Lustrous Type Coin**

3781 1878 MS64 PCGS. Characteristically luminous mint luster illuminates near-Gem surfaces on this 1878 three dollar gold piece, complementing the exceptional preservation. Although the wreath bowknot is predictably weak, the obverse of the coin displays pleasing sharpness. The availability of this issue shrinks in grades finer than the present coin. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64
CAC-Approved Type Coin**

3782 1878 MS64 PCGS. CAC. The 1878 three dollar gold piece is available in MS64, although CAC-approved coins are scarce. This example boasts an above-average strike and the luster shimmers when rotated beneath a light. Delicate rose-gold and peach hues complement a lack of major abrasions, earning this type coin a high degree of eye appeal. NGC ID# 25MZ, PCGS# 8000

3783 1888 MS61 PCGS. Only 5,000 three dollar gold pieces were struck in 1888. While this mintage is not abnormally low for the series, it does attract collector interest, especially for Mint State pieces. This example is typically weak on the wreath bowknot, but all other design elements are sharp. The fields are semiprooflike and display warm orange-gold and peach-yellow color. Only light surface chatter prohibits a finer grade. Housed in a green label holder. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar Gold, MS64+
Late-Series Type Coin**

3784 1888 MS64+ PCGS. Only 5,000 three dollar gold pieces were struck in 1888, but this penultimate issue experienced little circulation and is readily available in Mint State. The challenge comes in locating a high-end example, such as this Plus-graded near-Gem. It displays impressive sharpness and has shimmering greenish-gold mint luster. No singular abrasions are apparent. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLE

1800 BD-5 Half Eagle, XF Details Late Die State

- 3785** 1800 BD-5, High R.3 — Altered Surfaces — PCGS Genuine. XF Details. Bass-Dannreuther Die State e/c, cracked on both sides. BD-5 is a moderately plentiful early half eagle variety, ideal for type sets. This coin has XF details, although the bright yellow-gold surfaces are faintly textured and muted, suggesting a cleaning or other alteration. Wear is light at this grade level, and only minor strike weakness is evident on the horizontal shield lines.

LIBERTY HALF EAGLES

1845 Five Dollar, MS62 Smooth, Attractive Surfaces

- 3786** 1845 MS62 PCGS. The mintage was large for a mid-1840s half eagle (417,099 pieces), yet Uncirculated examples of the 1845 Philadelphia five are scarce. This sharply struck MS62 has impressive, finely grained fields and strong eye appeal. The coin shows only a few tiny marks, except for one small but notable scrape above the eagle's head that, no doubt, influences the assigned grade. All else is sharp and lustrous. Flashy orange-gold color with deep-orange accents suggest an even finer Mint State designation. Population: 24 in 62 (5 in 62+), 22 finer (5/19). NGC ID# 25TB, PCGS# 8223
- 3787** 1845-D AU50 PCGS. Variety 14-H. The rarer of two known 1845-D half eagle varieties, showing the date high and well-centered under the bust. Luster outlines the legends and devices of this lightly circulated apricot-gold representative. A loupe reveals only unimportant contact. The 1845-D is among the more plentiful Dahlonega half eagles, ideal for collectors seeking a single piece from this mint. NGC ID# 25TC, PCGS# 8224

1846-D Half Eagle, AU53 Scarcer Normal Mintmark Variety

- 3788** 1846-D AU53 NGC. Variety 15-H. Doug Winter splits the 1846-D half eagle into two distinct listings in *Gold Coins of the Dahlonega Mint*, third edition — the Normal Mintmark and Repunched Mintmark, which the Southern gold specialist notes are often collected as two separate issues. The Normal Mintmark variant is slightly scarcer overall, with fewer than 225 pieces believed known. This AU example displays good detail and has smooth, satiny straw-gold surfaces. Hints of luster remain in the protected peripheral fields. Census: 18 in 53, 44 finer (5/19). NGC ID# 25TH, PCGS# 8228

- 3789** 1847-C VF35 PCGS. CAC. Variety 1. With a comparatively large mintage of 84,151 pieces, the 1847-C is a logical choice for Charlotte gold type collectors. This Choice VF example displays CAC endorsement, with olive-gold surfaces and reddish-tan accents. A tiny rim nick below 8 in the date is of little importance. Circulation wear has long minimized any marks, leaving smooth fields that surround well-detailed devices. NGC ID# 25TN, PCGS# 8233

1849 Half Eagle, Bright MS61 Rarely Seen in Mint State

- 3790** 1849 MS61 NGC. The 25 Uncirculated grading events at NGC are almost certainly inflated. The 1849 half eagle is undoubtedly a rare and underappreciated issue in any level of Mint State, and high-end examples are seldom offered. This bright yellow-gold MS61 survivor showcases razor-sharp detail on the stars, wing feathers, and olive leaves. The date, neck feathers, and fletchings are slightly softer, and chatter limits the technical grade. Census: 10 in 61 (1 in 61+), 13 finer (5/19). NGC ID# C5XC, PCGS# 8240

**1849-D Five Dollar, AU55
Better D-Mint Issue in High Grade**

- 3791 1849-D AU55 NGC. Variety 25-S.** The Dahlonega Mint struck 39,036 half eagles in 1849, using four different die combinations. This variety shares its obverse with another die pairing, but it is the only use of the reverse that shows the mintmark touching both the branch stem and the fletching. In AU55, the 1849-D is scarce, and higher-grade pieces are rarely offered. This example displays partially lustrous green-gold surfaces and an above-average strike. Light field chatter hardly detracts. Census: 35 in 55, 25 finer (5/19). NGC ID# C5XE, PCGS# 8242

**1854-C Weak C Half Eagle, XF45
Rare, Eye-Catching Charlotte Five**

- 3792 1854-C XF45 NGC.** The Weak C variant shows a mintmark less bold than the other 1854-C variety, but it is still well-perceptible. Half eagles of both types are among the rarer Charlotte fives from the 1850s, despite an adequate mintage of nearly 40,000 coins. This wheat-gold example shows relatively few abrasions on both sides, plus moderate wear. The strike is fairly soft on Liberty's hair and on the arrow fletchings on the reverse, yet this Choice XF piece offers a great deal of eye appeal for such a rare coin. Census: 10 in 45, 24 finer (7/16).
Ex: The Twelve Oaks Collection (Heritage, 9/2016), lot 13699. NGC ID# 25UH, PCGS# 8257

- 3793 1854-O AU58 NGC. Variety 1.** The mintmark is almost entirely over the V in FIVE on this variety. The New Orleans Mint struck 46,000 half eagles in 1854, but most circulated extensively, as gold typically did in the South prior to the Civil War. Uncirculated examples of this issue are rare, and high-end AU coins are scarce. This near-Mint example boasts remarkably smooth yellow-gold surfaces and moderate reflectivity in the protected portions of the fields. There is some minor strike softness on the hair curls around Liberty's face, but the coin is otherwise well-defined. Census: 36 in 58, 11 finer (5/19). NGC ID# 25UM, PCGS# 8259

**1858-C Five Dollar, AU55
Faintly Lustrous Surfaces**

- 3794 1858-C AU55 NGC. Variety 1.** Even though 38,856 pieces were struck of the 1858-C from two die pairings, only 275-375 examples are estimated to have survived. Of those survivors, possibly 200-275 pieces are VF or XF, placing strong price pressure on the certified AU pieces. This is a bright half eagle that shows noticeable traces of mint luster around the devices on each side. The devices are well-defined, but each side is peppered with numerous small abrasions. NGC ID# CLAK, PCGS# 8277

**1858-D Five Dollar, AU50
Copper-Orange Color**

- 3795 1858-D AU50 NGC. Variety 43-HH.** Probably between 200 and 300 1858-D half eagles survive from an original mintage of 15,362 coins. This About Uncirculated example displays copper-orange color with myriad alloy spots, including two prominent ones on Liberty's cheek and right of the date. The star radials are clear and the other elements are well-defined, except for the fletchings. A hint of reflectivity exists in fields. NGC ID# CBBT, PCGS# 8278

**1859-C Half Eagle, AU50
Minimally Abraded**

- 3796 1859-C AU50 PCGS. Variety 1.** This Charlotte half eagle issue of middle availability becomes very scarce in AU50 and rare in the upper About Uncirculated grade levels. As always, detail is much stronger on the obverse than the reverse, where a strike-through is seen from the second S in STATES to the eagle's head. Abrasions are fairly minor over olive-gold surfaces, save for a rim nick above star 8. From a mintage of 31,847 coins. NGC ID# 25VC, PCGS# 8281

**1859-C Five Dollar, AU53
Original Surfaces**

- 3797 1859-C AU53 NGC. Variety 1.** Only two die varieties are known, this variant shows small openings in the 8s in the date. All examples share a common reverse that used an improperly annealed die, thus the central reverse definition is always blurry. Both sides display original reddish-gold color and there are numerous small abrasions scattered about. The original mintage was 31,847 pieces, and two-thirds of the 175-225 survivors are VF or XF. NGC ID# 25VC, PCGS# 8281

**1860-C Half Eagle, XF40
Variety 1, The Only Dies**

- 3798 1860-C XF40 PCGS. Variety 1.** This is the only known die marriage for the issue that had a mintage of 14, 813 coins. A collectible XF example, this piece has the typical blurred eagle on the reverse, the result of improper annealing when the die was made. Despite inconsequential, grade-consistent marks, this piece has excellent eye appeal. Population: 11 in 40, 87 finer (5/19). NGC ID# B2AC, PCGS# 8285

**1875-S Five Dollar, AU55
Low-Mintage, Scarce in All Grades**

- 3799 1875-S AU55 NGC.** Fewer than 100 1875-S half eagles are believed extant from the small 9,000-coin mintage. One — an MS60 NGC coin — is called Uncirculated. This Choice AU example displays sharp detail and bright yellow-gold surfaces with trivial wear. Scattered abrasions on each side are light and unobtrusive. Census: 10 in 55, 6 finer (5/19). NGC ID# 25WV, PCGS# 8338

- 3800 1882-CC AU50 NGC. Variety 1-A.** A well-detailed Carson City half eagle with original olive-gold patina — some russet flecks on the obverse and hints of luster in the peripheral fields of both sides attest to that. The 1882-CC is collectible in AU grades and popular with Carson City type collectors. NGC ID# 25XH, PCGS# 8359

- 3801 1882-CC AU53 NGC. Variety 1-A.** Considerable peach-gold luster fills the borders of this lightly abraded Carson City half eagle. Liberty's cheek and the left obverse field display olive-green hues. The strike shows softness on the eagle's neck plumage, but wear from circulation is minimal.
From The Dunleavy Collection. NGC ID# 25XH, PCGS# 8359

**1882-CC Half Eagle, AU58
Ideal Carson City Type Coin**

- 3802 1882-CC AU58 NGC. Variety 1-A.** The mintage of 82,187 pieces is much higher than for earlier CC-mint half eagles, a fact reflected in the issue's availability in Mint State, as well as the higher circulated grades. This apricot-gold piece is well-struck, with just a trace of rub and no visible impairments. Minimally marked surfaces retain soft mint luster. NGC has graded only 28 numerically finer examples (5/19).
Ex: Central States Signature (Heritage, 4/2010), lot 3653. NGC ID# 25XH, PCGS# 8359

- 3803 1890 AU58 PCGS.** The 1890 half eagle is an underrated Philadelphia issue. Only 4,240 coins were struck, and Mint State survivors are rare. This near-Mint coin is itself scarce. The fields are semiprooflike where light rub is not present. Slight strike weakness appears on the eagle's neck, the fletchings, and the hair curls around Liberty's face. Appealing for the grade. Population: 13 in 58, 20 finer (5/19). NGC ID# 25Y2, PCGS# 8375

- 3804 1890 AU58 PCGS.** A scarce near-Mint example of this low-mintage Philadelphia issue (4,240 coins struck). The fields are reflective beneath peach-gold, amber, and lilac patina, and the central devices exhibit above-average definition. This issue is underappreciated in high grade, being rare finer than the present example. Population: 13 in 58, 20 finer (5/19). NGC ID# 25Y2, PCGS# 8375

- 3805 1890-CC MS61 NGC. Variety 1-A.** Mint State 1890-CC fives are scarce. This piece displays satiny yellow-gold luster and a bold strike. There are no significant abrasions, although light field chatter prevents a finer grade from NGC. A pleasing lower-end Mint State Carson City half eagle. NGC ID# C5XF, PCGS# 8376

- 3806 1891-CC MS61 PCGS. Variety 1-A.** Carson City type collectors whose sets lacks an Uncirculated half eagle should consider the present nicely struck representative. The pumpkin-gold and apple-green surfaces are less abraded than expected, and display the original "dirty gold" look prized by specialists.
From The Dunleavy Collection. NGC ID# 25Y5, PCGS# 8378

- 3807 1891-CC MS62 NGC. Variety 2-A.** Two obverse and one reverse dies were used to strike 208,000 half eagles at the Carson City Mint in 1891. The top of the second 1 is slightly repunched on this variety. Frosty, medium yellow-gold surfaces exhibit light chatter. Central strike detail is strong. Good for type. NGC ID# 25Y5, PCGS# 8378

- 3808 1891-CC MS62 NGC. CAC. Variety 1-A.** In the late die state of this variety, with light peripheral cracks on each side. Bright yellow-gold luster illuminates sharp design elements, and grade-limiting abrasions are light and unobtrusive save for a horizontal mark near the D in UNITED. The 1891-CC is an available Carson City issue, popular among collectors seeking a single coin from this mint. NGC ID# 25Y5, PCGS# 8378

- 3809 1894-O MS61 NGC. Variety 1.** The mintmark is centered over the V in FIVE on this variety. As a date, the 1894-O half eagle is seldom offered in Mint State, coming from a mintage 16,600 coins. This piece displays sharp details and partly reflective fields with rich honey-gold color. Light surface chatter determines the grade. Census: 73 in 61 (1 in 61★), 16 finer (5/19). NGC ID# 25YE, PCGS# 8388

1901/0-S Liberty Half Eagle, MS65
Popular Guide Book Overdate

- 3810 1901/0-S FS-301 MS65 PCGS.** The remnants of an undertype 0 are visible beneath the final digit in the date, identifying the popular *Guide Book* and *Cherrypickers* variety. This spectacular Gem displays sharply detailed design elements throughout, with some faint peripheral die cracks on both sides. The well-preserved orange-gold surfaces are lustrous and appealing. Population: 23 in 65 (2 in 65+), 4 finer (6/19). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

- 3811 1906-S MS64 PCGS. CAC.** The 1906-S is considerably more difficult to obtain in high grades than 1906 half eagles from the Philadelphia or Denver mints. This near-Gem is remarkably smooth with frosty mint luster and warm honey-gold color. Nearly fully struck, except on the highest points of Liberty's curls. Population: 44 in 64 (4 in 64+), 18 finer. CAC: 11 in 64, 5 finer (5/19). NGC ID# 25ZB, PCGS# 8415

INDIAN HALF EAGLES

- 3812 1909 MS64 PCGS.** The 1909 Indian half eagle is reliably sharp and lustrous with good eye appeal, popular as a type coin. It is, however, scarce finer than MS64. This collectible Choice example displays satiny wheat-gold luster and clean fields, with characteristically sharp detail. NGC ID# 28DH, PCGS# 8513
- 3813 1909 MS64+ PCGS.** The Plus designation sets this piece apart from its peers, and the rich lemon-gold surfaces are especially luminous with minimal abrasions. The 1909 five is typically a sharp issue, and this coin upholds that reputation. Eye appeal is outstanding. NGC ID# 28DH, PCGS# 8513
- 3814 1909-D MS64+ PCGS. CAC.** With a mintage of more than 3.4 million coins, the 1909-D half eagle is a popular type coin. This Plus-graded CAC piece displays a bold strike and smooth, softly frosted orange-gold surfaces with traces of olive toning on the high points of the devices. NGC ID# 28DJ, PCGS# 8514
- 3815 1911 MS64 PCGS.** The 1911 five is scarce finer than MS64, but this near-Gem is accessible. Glistening orange-gold luster shows only slight evidence of contact, and the devices are well-detailed. More than 900,000 examples of this issue were struck. Its elusiveness in high grade is due to the elevated fields of the design, which were subject to abrasions in bags and stacks. NGC ID# 28DP, PCGS# 8520
- 3816 1913 MS64 PCGS.** A lovely near-Gem example of this popular type coin candidate, showing light greenish-gold hues in the fields with deeper peach-orange color in the recesses. The strike is sharp and only a few small ticks are noticed beneath a loupe. NGC ID# 28DT, PCGS# 8525

- 3817 1913 MS64 PCGS.** The 1913 is among the more available issues in this short-lived series, but it is also one of the better-produced five dollar Indians. The strike definition is strong throughout, and the mint luster is surprisingly frosted with only a few small, insignificant abrasions that interrupt the flow of luster on each side. NGC ID# 28DT, PCGS# 8525

1913 Five Dollar, MS64+
Scarce With CAC Sticker

- 3818 1913 MS64+ PCGS. CAC.** Sharp devices and satiny yellow-gold surfaces earn this Plus-graded near-Gem high marks for eye appeal, which CAC recognizes. The fields are free of singular abrasions. The 1913 half eagle is usually available in MS64, but seldom with a Plus designation and CAC green label. Finer coins are scarce. NGC ID# 28DT, PCGS# 8525

1914-D Half Eagle, MS64
Satiny Mint Luster

- 3819 1914-D MS64 PCGS. CAC.** Satiny mint luster characteristic of the Denver facility washes over yellow-gold surfaces. This near-Gem 1914-D half eagle showcases strong detail on the portrait and eagle, with a slightly mushy strike on the lowest headdress feathers and on the mintmark. The fields are generally clean. Only a few small ticks occur behind the eagle's head. PCGS reports 20 higher-graded submissions (6/19). NGC ID# 28DV, PCGS# 8528
- 3820 1915 MS64 PCGS.** Satiny honey-gold color complements the minimally marked surfaces of this near-Gem 1915 half eagle. The coin is well-struck, and a few light marks in the field behind the eagle are all that deny Gem classification. The 1915 is available in this grade for type collections, although it is scarce finer. NGC ID# 28DX, PCGS# 8530

**1915 Five Dollar, MS64+
Superior for the Grade**

3821 1915 MS64+ PCGS. CAC. The penultimate Philadelphia issue in the series, the 1915 Indian half eagle is quite scarce in Gem condition, and it is rare so fine with CAC approval. This more collectible near-Gem example has a Plus designation, and it is in a minority of MS64 coins with CAC recognition. Satiny yellow-gold mint luster shows few abrasions and the devices are well-struck. NGC ID# 28DX, PCGS# 8530

3822 1916-S MS62 PCGS. A Mint State example of this final San Francisco half eagle, showing satiny orange-gold mint luster that transitions to lighter rose hues in the recesses. Scattered abrasions limit the grade but none are individually bothersome. Housed in a green label holder. NGC ID# 28DY, PCGS# 8532

**1916-S Five Dollar, MS62
Rarely Offered CAC Coin**

3823 1916-S MS62 PCGS. CAC. With Indian gold, the CAC label is of utmost importance since so few coins earn one within a given a grade. In the case of the 1916-S half eagle, there are more than 700 coins certified in MS62 between PCGS and NGC combined, but only 36 pieces are CAC endorsed. This is one of those elite three dozen. It displays luminous orange-gold luster and well-struck devices. Unlike many other low-end Uncirculated pieces, there is not a suggestion of high-point friction on this coin. Grade-limiting abrasions are minor, and eye appeal is outstanding for the MS62 level. CAC: 36 in 62, 63 finer (5/19). NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

**1842-O Ten Dollar, AU53
Challenging Early New Orleans Issue**

3824 1842-O AU53 PCGS. Variety 2. Numerous tiny marks and small abrasions are scattered across both sides of this greenish-gold ten, a situation common to virtually all surviving 1842-O eagles. The surfaces are otherwise reflective and sharply struck, with areas of mint luster throughout both sides. Just 27,400 pieces were struck — many more than the rare 1841-O, but still a limited mintage in the context of the O-mint series. Population: 14 in 53, 22 finer (6/19). NGC ID# 262N, PCGS# 8587

3825 1844-O XF45 PCGS. CAC. Variety 1. A collectible New Orleans No Motto issue generally encountered in VF to AU grades. This original dusky caramel-gold representative exhibits substantial luster and a smattering of minor marks. Encapsulated in a green label holder. CAC: 10 in 45, 21 finer (5/19). NGC ID# 554G, PCGS# 8591

3826 1844-O AU53 NGC. Variety 5. A moderately scarce O-mint ten with a mintage of 118,700 pieces. This coin has obviously original surfaces. Green-gold color is seen over each side and numerous small to medium-sized abrasions are scattered generously about, especially on the obverse. NGC ID# 554G, PCGS# 8591

3827 1845-O Repunched Date AU53 NGC. Variety 1. Variety collecting of 19th century gold coins is still developing, but this particular variety should prove to have a bright future with its obviously repunched date. Some luster remains on each side of this lightly abraded example. Even orange-gold color. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

3828 1846-O XF40 PCGS. Variety 3. The mintmark is over the EN in TEN, farther left than on the other reverse die. Each reverse is known in two die combinations. Myriad inconsequential marks appear on the light yellow-gold surfaces with traces of delicate orange toning. NGC ID# 554J, PCGS# 8595

**1846-O Liberty Eagle, AU50
Elusive Issue in High Grade**

3829 1846-O AU50 PCGS. Variety 1. The low date shows repunching on the 6 and a die crack is evident through the top of the mintmark, identifying the elusive Variety 1. From a mintage of 81,780 pieces, the 1846-O Liberty eagle is an elusive issue in high grade. This impressive AU specimen is lightly worn and the still-lustrous orange-gold surfaces exhibit the expected number of minor abrasions for the grade. Population: 6 in 50, 9 finer (6/19). NGC ID# 554J, PCGS# 8595

- 3830 1846/'5'-O XF45 PCGS. CAC. Variety 3.** Later Die State, showing no repunching on the mintmark. This is a common variety that was once called an overdate but is actually the result of a damaged date punch. Each side is peppered with numerous small to medium-sized abrasions and thin traces of mint luster remain on the green-gold surfaces. NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

**1848-O Ten Dollar, XF40
Original Patina, Old Green Holder**

- 3831 1848-O XF40 PCGS. CAC. Variety 1.** Three die pairings are documented for the 1848-O eagle, even though the mintage was capped at 35,850 coins. Variety 1 shows the date lower than the other two varieties. This collectible XF coin displays good detail and outstanding olive-gold and deep yellow patina — exactly what collectors of old-time New Orleans gold want to see. The surfaces are smooth with slight strike weakness on the devices. Housed in an old green label holder. CAC: 2 in 40, 26 finer (5/19). NGC ID# 2634, PCGS# 8600

**1851-O Ten Dollar, AU50
50% Partial Collar Mint Error**

- 3832 1851-O — 50% Partial Collar 11 O'Clock to 5 O'Clock — AU50 PCGS. Variety 1.** The collar die was only partly deployed for the strike of the present lot. The edge is partly reeded, and partly smooth, between 11 and 5 o'clock, relative to the obverse. The smooth portion is close to the reverse, thus the obverse die must have been the hammer. Significant errors on commercial U.S. gold coins are very rare. The coin is sharp for the AU50 grade and lacks relevant marks, but the honey-gold surfaces are subdued. As always for the '51-O, a shield ring is present atop the second vertical stripe. NGC ID# 263B, PCGS# 8607

- 3833 1853/'2' AU53 PCGS.** Long considered a legitimate overdate, its status is now in question with the 2 set off in single quotes: '2'. However, this piece shows what appears to be a strong downstroke of an underlying 2 within the lower loop of the 3. This is a bright, reddish-gold example with only small abrasions on each side. Sharply struck with noticeable luster surrounding the devices. NGC ID# C82G, PCGS# 8611

**1854-S Eagle, AU58
Debut of the San Francisco Mint**

- 3834 1854-S AU58 NGC.** The government established a branch of the United States Mint in San Francisco, with operation commencing in 1854. Prior to that time, large shipments from the California gold fields were transported to New Orleans, Philadelphia, Charlotte, and Dahlonega. The cost and risk associated with those shipments was eliminated when the new facility opened. This Choice AU first-year eagle has myriad trivial surface marks but retains virtually full mint luster and excellent eye appeal. Census: 58 in 58, 8 finer (5/19). NGC ID# 263K, PCGS# 8615

**1861 No Motto Eagle, AU58
Natural Color**

- 3835 1861 AU58 NGC. Ex: First Year Civil War Hoard.** The 1861 ten dollar is one of the most collectible issues of the era, but that is not to say it is common, especially not in AU58 or above. This natural near-Mint representative retains luster around the devices, and each side displays original red-gold color with khaki accents. Predictably abraded. NGC ID# 2647, PCGS# 8633

**1862 Ten Dollar, XF45
Challenging Philadelphia Issue
Sole CAC Example for the Grade**

- 3836 1862 XF45 PCGS. CAC.** Scarce any finer, 1862 eagles were struck in relatively small quantity — just 10,960 pieces. Only a few pieces circulated. The Philadelphia Mint did not pay out any gold coins at par from 1862 through 1878, and most of the coins struck were held by the Treasury unless purchased at a premium. This Choice XF example shows myriad tiny marks across attractive, natural orange-gold surfaces. Luster remains in the recesses. The eye appeal is terrific, as confirmed by its CAC endorsement. This is the sole CAC coin at the XF45 level. Population: 29 in 45, 69 finer. CAC: 1 in 45, 17 finer (6/19). NGC ID# 2649, PCGS# 8635

3837 1868 XF40 PCGS. Gold CAC. Although the certification totals for this low-mintage issue (10,630 coins) exceed 300 submissions at PCGS and NGC combined, it is more likely that around 160 to 200 pieces survive. Profound red-gold coloration is undeniably natural. The strike is slightly uneven, and marks are peppered throughout. The only 1868 eagle with a Gold CAC sticker (5/19). Housed in a green label holder. NGC ID# 264N, PCGS# 8653

3838 1882-O AU53 PCGS. Variety 1. Some light wear shows on the high points of the well-detailed design elements of this attractive AU53 specimen, and the lustrous orange-gold surfaces show the expected number of minor abrasions for the grade. From a small mintage of 10,820 pieces. Population: 18 in 53, 64 finer (6/19). NGC ID# 55GJ, PCGS# 8697

3839 1886 MS63 NGC. The 1886 is an underrated date within the long-running Liberty eagle series. Most certified examples are in AU55 to MS62 grades. The issue is unexpectedly elusive in Select condition. This semiprooflike piece has lustrous orange-gold surfaces that display distributed minor marks consistent with the grade. NGC ID# 266F, PCGS# 8708

1888-S Liberty Ten, MS64 Tied for the Finest Certified

3840 1888-S MS64 PCGS. Although the mintage approached 650,000 coins, the 1888-S is an important condition rarity in the Liberty eagle series. This Choice Mint state example has just 15 peers at PCGS and NGC, and none are graded finer. The strike is bold and the yellow-gold surfaces exhibit brilliant and frosty mint luster. Population: 12 in 64, 0 finer (6/19). NGC ID# 266M, PCGS# 8714

3841 1891-CC AU50 NGC. CAC. Variety 1-A. A gently circulated example of this popular Carson City type issue. The eyebrow and wingtips show wear, but luster accompanies design recesses, and neither side shows any distracting marks. As of (5/19), CAC has confirmed only three examples as AU50. NGC ID# 266U, PCGS# 8720

1891-CC Ten, MS62 Carson City Type Coin

3842 1891-CC MS62 PCGS. Variety 2-B, with the mintmark centered over the N in TEN. This Mint State Carson City ten displays radiant cartwheel luster and vivid yellow-gold color. The coin is well-struck and displays only light, scattered abrasions in this grade. Finer 1891-CC tens are scarce, adding to the appeal of this coin for Carson City type collectors. NGC ID# 266U, PCGS# 8720

3843 1891-CC MS62 NGC. Variety 1-A. A hint of reflectivity in the fields amplifies radiant cartwheel luster on this Mint State 1891-CC ten. The strike is sharp, and each side displays original, honey-gold mint luster. Scattered abrasions are tiny but scattered across both sides, and determine the grade. Finer examples of this popular Carson City issue are scarce. NGC ID# 266U, PCGS# 8720

1892-CC Liberty Eagle, AU58 FS-801, Variety 1-A

3844 1892-CC Tripled Die Reverse, FS-801, AU58 PCGS. Variety 1-A Apparently, all 1892-CC Liberty eagles employ the same reverse die, with tripling on the letters in the motto IN GOD WE TRUST. The Variety 1-A is identified by repunching on the 89 in the date, under the middle loops, and some spidery die cracks through the stars on the lower right. This attractive near-Mint specimen is lightly worn and lightly abraded and the orange-gold surfaces retain traces of original mint luster. Population: 42 in 58, 38 finer (6/19). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

3845 1892-S MS63 PCGS. CAC. An impressive Select example, with sharply detailed design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. From a mintage of 115,500 pieces. Population: 88 in 63 (5 in 63+), 4 finer. CAC: 7 in 63, 0 finer (6/19). NGC ID# 266Y, PCGS# 8724

3846 1893-S MS63 NGC. While the 1893 ten dollar is widely available through MS64, the 1893-S eagle is much scarcer in all grades and rarely found finer than this Select Uncirculated example. Original orange-gold color and frosted mint luster blend over each side. Strongly struck with a touch of softness on the hair curls and bun. Census: 17 in 63, 3 finer (5/19). NGC ID# 2674, PCGS# 8728

3847 1896 MS64 PCGS. Tied for the finest that PCGS has certified, this Choice Mint State Liberty eagle has brilliant orange-gold luster and sharp design definition. Population: 26 in 64 (1 in 64+), 0 finer (6/19). NGC ID# 267B, PCGS# 8735

3848 1898 MS64 PCGS. CAC. A charming Choice Liberty ten that boasts vibrant luster and a crisp strike. Smooth aside from wispy field marks near star 4. A few thousand 1898 eagles spent the war years in foreign bank holdings, but most such pieces are in AU58 to MS63 grades. CAC: 21 in 64, 4 finer (5/19). NGC ID# 267G, PCGS# 8740

3849 1899 MS65 PCGS. The 1899 trades as a type coin at market prices in lesser grades, although that changes at the Gem level, where it becomes scarce and desirable. Any finer, the 1899 is rare. This orange-gold MS65 displays frosted wheat-gold surfaces with only a few minor marks and a needle-sharp strike. PCGS has certified just eight numerically finer pieces (6/19). NGC ID# 267J, PCGS# 8742

3850 1899 MS63 Prooflike NGC. A flashy sun-gold Select example. Only lightly abraded, though the cheek displays tiny specks of struck-in grease. Well struck aside from the final star. As of (5/19), NGC has certified 17 pieces as Prooflike, with the present lot as the single finest. NGC ID# 267J, PCGS# 78742

3851 1899-S MS64 NGC. The 1899-S has a fairly high mintage and carries a minimal premium in lower Mint State grades. But Choice examples are undeniably rare, relative to later and lower mintage issues such as the 1903-S. The present piece has vibrant luster, a good strike, and a modicum of field marks. Census: 11 in 64, 7 finer (5/19).
Ex: Long Beach Signature (Heritage, 9/2013), lot 5303, which realized \$3,818.75. NGC ID# 267L, PCGS# 8744

- 3852 1903-O MS63 PCGS. Variety 2.** An early die state example, without the cracks through the date and below the final S in STATES. The 1903-O Liberty eagle is scarce in this grade, and PCGS has seen only 25 finer submissions (5/19). Offered here is a satiny lemon-gold example with sharp detail and well-preserved surfaces. NGC ID# 267W, PCGS# 8753

INDIAN EAGLES

- 3853 1908 Motto MS64 PCGS.** The motto was Congressionally mandated and added to the newly designed ten and twenty dollar gold pieces in mid-1908, thus creating two types for the year. This is a brightly lustrous reddish-gold example that is exceptionally clean and strongly struck throughout. NGC ID# 28GJ, PCGS# 8859
- 3854 1908-D Motto MS62 PCGS.** A collectible Mint State example of this early Motto Denver issue, showing satiny wheat-gold luster and a sharp strike. Light chatter is visible under a loupe, but no singular abrasions are made known. NGC ID# 28GK, PCGS# 8860

1910-D Ten Dollar Indian, MS65 Satiny Red-Gold Surfaces

- 3855 1910-D MS65 PCGS.** This ranks among the most plentiful issues in the Indian Head eagle series, and examples are collectible though MS65 condition. Only in MS66 does the 1910-D become scarce. Reddish-gold surfaces are satiny and strongly defined. A cluster of tiny marks between the M in UNUM and the final A in AMERICA likely prevents an even higher grade. This is a lovely example to represent the popular Saint-Gaudens design. NGC ID# 28GS, PCGS# 8866

1911-D Ten Dollar, AU55 Key Denver Issue

- 3856 1911-D AU55 NGC.** Only 30,100 Indian eagles were struck at the Denver Mint in 1911, ensuring the scarcity of this issue in high grades today. Any 1911-D ten is scarce in the context of the series. This Choice AU coin displays substantial luster and bold design elements. The original, honey-gold color is visually pleasing, and the coin offers a substantial upgrade for many collections lacking a Choice 1911-D. NGC ID# 28GU, PCGS# 8869

1913-S Eagle, MS61 Radiant Original Example

- 3857 1913-S MS61 NGC.** A close rival to the 1911-D, the 1913-S Indian eagle is also an important key date in the series, boasting a low mintage of only 66,000 coins. This Mint State example shows scattered light chatter, but no obtrusive abrasions, with deep honey-gold color, vibrant frosty mint luster, and well-defined design elements. NGC has encapsulated 47 numerically finer representatives (5/19). NGC ID# 28GZ, PCGS# 8874

1913-S Ten Dollar, MS61 Better San Francisco Issue

- 3858 1913-S MS61 NGC.** The 1913-S is a semikey date with a mintage of only 66,000 pieces, and Uncirculated survivors are scarce. This lightly abraded example is well-struck and remains within the grasp of many budget-conscious collectors. The surfaces yield satiny yellow-gold luster and light chatter but lack individually significant abrasions.
Ex: Long Beach Signature (Heritage, 2/2016), lot 3417, which realized \$5,170.
From The Dunleavy Collection. NGC ID# 28GZ, PCGS# 8874

- 3859 1914 MS64 NGC.** This impressive Choice example exhibits well-detailed design elements, with a touch of the usual softness on Liberty's hair. The well-preserved orange-gold surfaces radiate vibrant mint luster on both sides. NGC has graded 54 numerically finer examples (5/19). NGC ID# 28H2, PCGS# 8875

**1914-D Ten Dollar, MS64
Rich Original Color**

- 3860 1914-D MS64 PCGS.** Scattered light abrasions may preclude Gem classification, but this richly toned Choice 1914-D Indian eagle offers exceptional visual appeal for the grade. Eye-catching orange-gold, peach, and rose hues adorn each side, complementing sharply struck design elements. The 1914-D is only moderately elusive in this grade, but PCGS has seen just 50 numerically finer submissions (5/19).
Ex: Long Beach Signature (Heritage, 9/2007), lot 3720. NGC ID# 28H3, PCGS# 8876

- 3861 1916-S MS62 NGC.** Final year of issue until the 1920-S, only 138,500 pieces were struck of the 1916-S ten dollar. This is a lovely Uncirculated example that displays bright pinkish, yellow-gold color and frosted mint luster. Sharply struck and minimally abraded for the grade. NGC ID# 28H7, PCGS# 8880

LIBERTY DOUBLE EAGLES

- 3862 1850 — Cleaned — PCGS Genuine. VF Detail.** The popular first-year Liberty double eagle, this light yellow-gold example has myriad marks, all inconsequential. The reverse shows minor die cracks through the bottoms of EN of the denomination, and through the tops of TED.

**1850 Twenty Dollar, XF45
Smooth and Partially Lustrous**

- 3863 1850 XF45 NGC.** Smooth, well-detailed surfaces on this Choice XF 1850 double eagle exhibit characteristic yellow-gold color, seen on many early double eagles that were struck from California gold. This piece retains traces of luster in the protected areas of the fields, and the eye appeal is pleasing. NGC ID# 268F, PCGS# 8902

**1850 Twenty Dollar, AU50
Attractive, Original Patina**

- 3864 1850 AU50 PCGS.** Hints of luster remain in the fields of this first-year Philadelphia double eagle. Light wear is apparent on the devices, but the major details are yet defined. Chatter in the fields accompanies the wear. This greenish-gold coin is original and visually pleasing, an excellent Gold Rush-era type coin. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU55
Some Luster Remains**

- 3865 1850 AU55 PCGS.** More than 1.1 million double eagles were struck at the Philadelphia Mint in its first year of regular issue, nearly all of which circulated to one extent or another. This is a moderately abraded About Uncirculated survivor, which retains its sharp strike and pleasing brassy-gold color. Faint orange accents visit the borders, and traces of mint luster remain among the devices for strong eye appeal. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU55
Boldly Defined Type One Example**

- 3866 1850 AU55 NGC.** The double eagle was authorized and put into production to meet the needs of commerce and to provide a medium for converting the vast quantities of gold coming out of California into usable coinage. This first-year AU55 representative saw remarkably little use, all things considered. Definition is bold, especially on the obverse, with little actual wear over the yellow-gold surfaces. There are numerous tiny marks and abrasions throughout, although none are inappropriate for the Choice About Uncirculated grade. NGC ID# 268F, PCGS# 8902

3867 1851 AU55 PCGS. Bits of deep-gray toning (popularly known as “mint grime” or dirty gold) confirm the natural surfaces of this sharp, medium-gold Type One double eagle. While numerous abrasions and small marks dot the surfaces, no marks are large or severe, and much luster remains among the crisply struck motifs. This is an original, Choice About Uncirculated example from the high-mintage second year of Philadelphia double eagle production. NGC ID# 268H, PCGS# 8904

3868 1851 AU55 PCGS. CAC. Hints of luster remain in the peripheral fields of this Choice AU Type One double eagle, complementing original olive-gold patina overall. The coin is well-struck and little-worn. Although 1851 double eagles are plentiful in AU condition, CAC-approved pieces are rare. CAC: 24 in 55, 54 finer (5/19). NGC ID# 268H, PCGS# 8904

**1851-O Liberty Twenty, XF40
Collectible O-Mint Double Eagle**

3869 1851-O XF40 NGC. Variety 1. Most New Orleans double eagles are rare, out of reach for the average collector. However, the 1851-O is usually collectible with its mintage of 315,000 coins, primarily struck from California gold. This XF coin displays good detail and lightly abraded yellow-gold surfaces. Hints of luster remain in the peripheral fields. NGC ID# 268J, PCGS# 8905

**1851-O Twenty Dollar, XF45
Choice Collector-Grade Type Coin**

3870 1851-O XF45 PCGS. Variety 2. Moderate wear on each side of this 1851-O double eagle removes most of the luster, although the surfaces show a pleasing olive-gold patina, and there are few significant abrasions. The 1851-O is among the most plentiful New Orleans double eagles, ideal for collectors seeking a single piece from the venerable Louisiana branch mint. The mintage was 315,000 coins, highest in the series from New Orleans. NGC ID# 268J, PCGS# 8905

3871 1852 AU53 PCGS. Luster remains in the fields of this early Type One double eagle, complementing bold devices that have little wear. Each displays rich lemon-gold patina with minimal abrasions. Prior to 1854, much of the gold mined in California during the Gold Rush was shipped via steamboat to New Orleans and Philadelphia for coinage. Double eagles were the primary recipients of these deposits. Housed in a green label holder. NGC ID# 268K, PCGS# 8906

**1852 Liberty Double Eagle, MS61
Popular Type One Issue**

3872 1852 MS61 PCGS. From a robust mintage of more than 2 million pieces, the 1852 Liberty double eagle is an available issue in circulated grades, but Mint State examples are elusive. This impressive MS61 specimen exhibits well-detailed design elements, with just a touch of softness on Liberty's hair and the tiara. The still-lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 60 in 61, 53 finer (6/19). NGC ID# 268K, PCGS# 8906

**1854 Double Eagle, AU58
Small Date Logotype**

3873 1854 Small Date AU58 PCGS. More than 750,000 double eagles were coined at Philadelphia in 1854, and the majority of those coins feature the Small Date logotype as offered here. This near-Mint example has scattered, grade-consistent marks on its lustrous light yellow surfaces with traces of darker patina on the high points. PCGS has only certified 38 finer examples (5/19). NGC ID# 268R, PCGS# 8911

**1855 Double Eagle, AU55
Lustrous With Rich Color**

3874 1855 AU55 NGC. Bright yellow-gold color covers each side with just a hint of reddish patina on this still partially lustrous Choice AU coin. The devices display a strong strike throughout, and each side has numerous small to medium-sized abrasions scattered about, most notably in the fields. Despite a mintage of more than 364,000 coins, the 1855 double eagle is scarce in the upper AU grades and in Mint State.
Ex: Charlotte National Money Show Signature (Heritage, 3/2007), lot 2161, which realized \$2,645; New York Signature (Heritage, 3/2012), lot 4201, which realized \$3,450. NGC ID# 268V, PCGS# 8914

- 3875 1856-S AU55 NGC. CAC.** Best known as one of the top two issues in the S.S. *Central America* hoard, we would be surprised if that was the origin of this piece. The reddish-gold surfaces retain significant mint luster around the devices, but most of the shipwreck coins were Uncirculated. Lightly abraded and well-struck. NGC ID# 2692, PCGS# 8919

**1858-S Twenty Dollar, AU58
Rarely Found Finer**

- 3876 1858-S AU58 NGC.** This San Francisco issue boasts a mintage of nearly 850,000 coins, although few Mint State pieces survive. Even in AU58, the 1858-S is a scarce coin. This piece displays lustrous fields with a hint of reflectivity, complementing sharp devices. Orange-gold color overall masks light surface chatter and eye appeal is pleasing. NGC ID# 2699, PCGS# 8925

**1858-S Liberty Double Eagle, AU58
Lustrous, Colorful Example**

- 3877 1858-S AU58 PCGS.** Despite a substantial mintage of 846,710 pieces, the 1858-S Liberty double eagle is an elusive issue in AU58 condition, and Mint State specimens are rare. This attractive near-Mint example exhibits just a trace of high-point wear on the strongly impressed design elements and the vivid orange-gold surfaces are lustrous and lightly abraded. Population: 60 in 58 (2 in 58+), 26 finer (6/19). NGC ID# 2699, PCGS# 8925
- 3878 1859-S XF40 PCGS.** A touch of wear on the devices earns this coin an XF grade, while highlights of luster in the fields offer increased eye appeal. Yellow-gold and peach-rose hues compete on each side and abrasions produce little interference. NGC ID# 269C, PCGS# 8928
- 3879 1860-S — Scratch — PCGS Genuine. XF Details.** The most prominent scratch snakes through the upper left obverse field, and a lesser one is in the lower left quadrant. A light vertical mark on Liberty's neck rounds out the noteworthy imperfections, leaving this XF-level 1860-S double eagle with generally good eye appeal and pleasing honey-gold patina.

**1860-S Liberty Double Eagle, AU58
Lustrous, CAC Approved Example**

- 3880 1860-S AU58 NGC. CAC.** The 1860-S Liberty double eagle claims a moderate mintage of 544,950 pieces and, unlike some other Type One issues, it has not been heavily represented in modern shipwreck finds. This impressive near-Mint specimen is lightly worn and lightly abraded, with much of its original mint luster still intact. NGC has graded 25 numerically finer examples (5/19). NGC ID# 269F, PCGS# 8931
- 3881 1861 AU55 NGC.** Elements of luster remain in the peripheral fields and the recesses of the portrait, while light wear keeps this No Motto type coin from a Mint State grade. Each side has light surface chatter and butter-gold color. Prior to the discovery of the S.S. *Central America* and its cache of 1856-S and 1857-S double eagles, the 1861 Philadelphia coin was the most plentiful Type One issue in high grade. It remains popular as a type coin. NGC ID# 269G, PCGS# 8932

**1861 Liberty Twenty, MS61
Pleasing Orange-Gold Surfaces**

- 3882 1861 MS61 PCGS.** The 1861 Liberty double eagle claims a substantial mintage of more than 2.9 million pieces, making it an available issue and a popular choice with type collectors. This attractive Mint State example offers sharply detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 269G, PCGS# 8932

1861-S Liberty Twenty, AU53
Lustrous Original Surfaces

- 3883 1861-S AU53 NGC.** Unlike its Paquet Reverse counterpart, which was struck early in the year, the 1861-S Liberty double eagle enjoyed an ample mintage and the issue is relatively plentiful in circulated grades. Mint State examples are elusive. This impressive AU53 specimen is lightly worn, with much original mint luster still intact. The usual number of minor abrasions are evident, but the overall presentation is quite attractive. NGC ID# 269K, PCGS# 8935

1861-S Liberty Double Eagle, AU58
Seldom Seen Any Finer

- 3884 1861-S AU58 PCGS.** From an adequate mintage of 768,000 pieces, the 1861-S Liberty double eagle is not difficult to locate in lower circulated grades, but it becomes elusive in the higher ranges of AU and Mint State examples are rare. This attractive near-Mint specimen exhibits just a trace of wear on the design elements and the lustrous orange-gold surfaces show the expected number of minor abrasions for the grade. Population: 64 in 58 (4 in 58+), 33 finer (6/19). NGC ID# 269K, PCGS# 8935

1865-S Liberty Double Eagle, AU58

- 3885 1865-S AU58 PCGS.** From a mintage of just over 1 million pieces, the 1865-S is a relatively available Type One issue and a number of high-grade specimens were recovered from the wreck of the S.S. Brother Jonathan. This impressive near-Mint specimen shows only light wear on the well-detailed design elements and the orange-gold surfaces exhibit the expected number of minor abrasions. NGC ID# 269V, PCGS# 8944

- 3886 1865-S — Obverse Damage — NGC Details. Unc.** Numerous abrasions are peppered over each side and are the only interruptions in the otherwise reddish-gold mint luster. The damage mentioned on the insert is a divot out of the obverse field by star 5. Sharply struck.

- 3887 1866-S Motto VF35 PCGS. Gold CAC.** Tall S. The inaugural Type Two double eagle from the San Francisco Mint is always popular with collectors. This is a phenomenally appealing, wholly original example with sought-after Gold CAC approval. Faint traces of mint luster emerge from the protected regions. Rich red-gold color dominates. Strike detail is typical for the type, but wear is minimal for the grade. Housed in a green label holder. Gold CAC: 1 in 35, 3 finer (5/19). NGC ID# 26B2, PCGS# 8950

1868-S Liberty Double Eagle, AU58
Always Elusive Issue in Higher Grades

- 3888 1868-S AU58 NGC.** A challenging San Francisco double eagle at the XF grade level, the 1868-S becomes scarce in near-Mint condition or finer, despite a few returning coins from European holdings. This lightly abraded example falls just short of full Mint State, with light wear visible on the hair bun and the eagle's head. Marks include small abrasions on Liberty's cheekbone and chin, with minor field chatter confined to the obverse. Frosted mint luster remains throughout both sides of this pleasing, medium-gold twenty. NGC ID# 26A4, PCGS# 8954

1868-S Liberty Double Eagle, AU58
Seldom Encountered Any Finer

- 3889 1868-S AU58 PCGS. CAC.** The 1868-S Liberty double eagle boasts a mintage of 837,500 pieces, making it relatively available in lower circulated grades, but decidedly elusive in Mint State. This attractive near-Mint specimen shows just a touch of wear on the design elements and the pleasing orange-gold surfaces exhibit the expected number of minor abrasions and chatter. Much original mint luster remains intact. PCGS has graded 68 numerically finer examples (6/19). NGC ID# 26A4, PCGS# 8954

**1870-S Double Eagle, AU58
Nearly 1 Million Coins Minted**

3890 1870-S AU58 NGC. CAC. This is the usually encountered double eagle to bear the 1870 coinage date, as the Philadelphia Mint issues are considerably scarcer, and the Carson City double eagles are extremely rare. This lovely near-Mint double eagle has rich orange-gold luster with dark patina on the high points. A few scattered marks are expected at this grade level. NGC ID# 26A9, PCGS# 8959

3891 1870-S AU58 PCGS. CAC. An impressive near-Mint example of this popular Type Two double eagle, with just the slightest trace of wear on the well-detailed design elements and pleasing orange-gold surfaces that retain much of their original mint luster. The expected number of minor abrasions are evident, but the overall presentation is quite attractive. NGC ID# 26A9, PCGS# 8959

**1871-S Double Eagle, MS60
High End for the Assigned Grade**

3892 1871-S MS60 NGC. Micro S mintmark. While the 1871-S is readily available in About Uncirculated grades, attractive Uncirculated examples are scarce. Most Mint State coins are seen in MS60 and MS61 grades. This coin is housed in a previous generation NGC holder, with lovely orange-gold color and only a few tiny marks for the assigned grade. A sharp strike adds to the impressive eye appeal, which suggests an even finer grade level may be in the offing. NGC ID# 26ND, PCGS# 8962

**1871-S Liberty Twenty, MS60
Lustrous Surfaces**

3893 1871-S MS60 PCGS. The 1871-S Liberty double eagle claims a mintage of 928,000 pieces. Like most Type Two double eagles, the 1871-S can be located easily in most circulated grades, but Mint State specimens are elusive. This impressive MS60 specimen exhibits no actual wear on the well-detailed design elements, but the lustrous orange-gold surfaces show a large number of minor contact marks and chatter in the fields. NGC ID# 26ND, PCGS# 8962

3894 1872-S MS60 NGC. Small squat S. Type Two twenties are more challenging to secure in Mint State than the Type One and Type Three designs, which emerged from shipwreck or bank hoards. This apricot-gold representative displays the expected number of small abrasions. A blush of struck-in grease (as made) crosses the first T in STATES. Housed in a circa-2000 holder. NGC ID# 26AF, PCGS# 8965

3895 1874 MS61 PCGS. A coruscating caramel-gold representative of the conditionally challenging Type Two design. The well-struck surfaces display the expected number of moderate marks, along with a small area of lilac toning near the base of the eagle's right (facing) wing. NGC ID# 26AN, PCGS# 8970

3896 1874 MS61+ NGC. A number of Uncirculated 1874 double eagles are known, but few grade finer than MS61. This is one of two Plus-graded coins at NGC in this grade. A hint of reflectivity in the fields and sharp design elements contribute to the high-end appeal, and the straw-gold coloration is original. Moderate abrasions are mainly on the obverse, including a singular mark on Liberty's cheek beneath the eye. Census: 2 in 61+, 24 finer (5/19). NGC ID# 26AN, PCGS# 8970

3897 1874-CC — Cleaned — PCGS Genuine. AU Details. Variety 2-A. A caramel-gold Carson City type coin. Luster glints from design elements, and the sole mentionable mark is a slight rim knock below the 1 in the date. Slightly subdued by cleaning, but acceptable to most collectors.

**1874-S Double Eagle, MS62+
Eye-Appealing Condition Rarity**

3898 1874-S MS62+ PCGS. CAC. Block S. This MS62+ representative with CAC approval ranks among the finest collectible examples of this conditionally scarce Type Two twenty from the S-mint — plentiful in lower Uncirculated grades but rare in MS63. Bar clash marks appear at the ear, and a coppery spot occurs in the field left of the neck. Frosty yellow-gold surfaces show scattered bagmarks, but the eye appeal remains excellent. Four coins graded higher at PCGS. CAC: 16 in 62, 1 finer (4/19). NGC ID# 26AR, PCGS# 8972

3899 1875-CC — Streak Removed — PCGS Genuine. AU Details. Variety 4-B. A sun-gold Carson City type coin that boasts a broad band of luster throughout the margins. A diagonal mark on Liberty's cheek was left from an attempt to remove a narrow streak of struck-in grease. The obverse appears mildly luminous from a past wipe.

3900 1875-CC — Cleaning — PCGS Genuine. AU Details. Variety 8-B. The butter-gold surfaces are mildly luminous from cleaning, but this Carson City double eagle will satisfy many type collectors of the legendary Old West branch facility. Both sides display a few moderate marks, and the strike shows incompleteness near the eagle's right (facing) shoulder.

**1875-S Twenty Dollar, MS62+
High-End Surfaces, Seldom Seen Finer**

3901 1875-S MS62+ PCGS. CAC. High-end for the MS62 grade, this coin carries both the PCGS Plus designation and CAC endorsement. Both awards are especially important for the 1875-S, which is seldom seen any finer than MS62 despite many European repatriates that continue to filter back to U.S. collectors. Minimally abraded orange-gold surfaces display sharply struck devices with vibrant cartwheel luster throughout smoothly frosted fields. Population: 14 in 62+, 27 finer. CAC: 28 in 62, 6 finer (5/19). NGC ID# 26AU, PCGS# 8975

3902 1876 MS61★ NGC. Undoubtedly for most collectors the most curious aspect of this coin is the Star designation at the MS61 grade level, but a quick glance explains all. The fields on each side are bright and mirrorlike, greatly enhancing the overall appearance of the piece. Each side is peppered with the abrasions one expects from this grade. Light reddish-gold color. NGC ID# 26AV, PCGS# 8976

**1876 Twenty Dollar, MS62+
Scarce Finer**

3903 1876 MS62+ PCGS. Uncirculated 1876 double eagles attract type collectors, as such coins can typically be found with ease through MS62. However, this date is scarce any finer. Offered here is a balance between availability and quality — a Plus-graded MS62 coin. Vibrant cartwheel luster engulfs each side in rich orange-gold and peach hues, while grade-limiting abrasions are light and unobtrusive. Eye appeal is outstanding. NGC ID# 26AV, PCGS# 8976

**1877-S Double Eagle, MS62
Exceptional Surface Quality**

3904 1877-S MS62 PCGS. Smooth, frosty luster belies the grade of this Uncirculated 1877-S double eagle, showing sharp detail and remarkably few abrasions. Right yellow-gold luster appeals to the viewer at all angles. This early Type Three San Francisco issue is available through MS62, but this piece is spectacular for the grade. Finer coins are scarce. NGC ID# 254B, PCGS# 8984

**1878-S Liberty Twenty, MS62
Green Label Holder, Minimal Abrasions**

3905 1878-S MS62 PCGS. Given the large mintage of more than 1.7 million pieces, the 1878-S gives double eagle collectors a challenge any finer than MS61. Bagmarks are the problem with most examples, although this coin is a sharp MS62 in the strictest sense of the grade. Housed in a previous generation green label holder, satin-smooth surfaces show hardly any marks or abrasions — none of any severity — and luster glistens beneath a haze of mint frost. Mike Fuljenz notes: "Any 1878-S that has clean surfaces is rare and very desirable," which describes this coin to a T. PCGS has certified just 13 numerically finer pieces (5/19). NGC ID# 338K, PCGS# 8987

**1882-CC Liberty Twenty, AU53
Nice Color and Luster**

3906 1882-CC AU53 NGC. Variety 1-A. The 1882-CC Liberty double eagle is an available issue in the context of the series, from a mintage of 39,140 pieces. The point of the 2 in the date is centered over a dentil and the first C in the mintmark is slightly higher than the second, identifying this piece as the somewhat scarce Variety 1-A. Just a trace of wear shows on the well-detailed design elements, and the lightly abraded orange-gold surfaces are lustrous and appealing. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58
Pleasing Straw-Gold Color

3907 1882-CC AU58 NGC. Variety 1-B. This die variety features a raised spike in front of Liberty's eye, and the second C in the mintmark is slightly higher than the first. Soft mint luster emanates from the recessed areas of the design. Each side exhibits straw-gold color and crisp detail with minimal evidence of friction. From a paltry mintage of 39,140 coins. NGC ID# 26BF, PCGS# 8997

3908 1882-S MS62 NGC. The 1882-S double eagle is moderately available in this grade, although NGC lists only 23 finer coins (5/19). The piece offered here displays radiant cartwheel luster and a sharp strike. Much of each side has peach-gold color, although wisps of rose-gold appear within the devices. NGC ID# 26BG, PCGS# 8998

1883-CC Twenty Dollar, AU53
Reflective Carson City Type Coin

3909 1883-CC AU53 NGC. Variety 2-A. This About Uncirculated Carson City double eagle displays sharp detail and bright yellow-gold surfaces. The fields are deeply reflective, which adds appeal, and abrasions are light and scattered. The 1883-CC is a more plentiful issue among Carson City twenties, popular with type collectors seeking a single example from this mint. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU55
Lustrous and Appealing

3910 1883-CC AU55 NGC. Variety 2-A, the distinctive variety with a couple of die dots between obverse stars 8 and 9, and a spike in the dentils above the E in STATES on the reverse. The 1883-CC is a plentiful Carson City double eagle, although we seldom see AU55 coins as attractive as this piece. Shimmery luster rolls through the fields when rotated, highlighting deep orange-gold patina where light wear is present. Detail is sharp and there are no bothersome abrasions. NGC ID# 26BH, PCGS# 8999

1883-S Liberty Twenty, MS63
Rare in Finer Grades

3911 1883-S MS63 PCGS. A substantial mintage of nearly 1.2 million Liberty double eagles was achieved at the San Francisco Mint in 1883, making the issue relatively available in lower Mint State grades. It becomes slightly scarce at the MS63 level, however, and finer coins are rare. This impressive Select specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 16 numerically finer examples (6/19). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, AU55
Well-Made CC-Mint Issue

3912 1884-CC AU55 PCGS. Variety 1-A. The 1884-CC is known as a well-made Carson City issue, and offers immediate appeal to any double eagle collector, from novice to seasoned specialist. This is a bright, yellow-gold example with smoothly frosted fields. Glimmers of mint luster are easily seen around the Choice About Uncirculated devices. Minimal abrasions are seen on either side. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Twenty, AU58
Strong Original Eye Appeal

3913 1884-CC AU58 PCGS. Variety 1-A. The 1884-CC twenty dollar Liberty claims a mintage of 81,139 pieces, making it an available issue and a popular choice with type collectors seeking a Type Three example for their collections. This near-Mint specimen shows little wear on the well-detailed design elements, and the surfaces are lightly abraded, including a couple of horizontal marks on the portrait. Original deep, orange-gold color adds greatly to the nearly Mint State eye appeal. NGC ID# 26BK, PCGS# 9001

3914 1885-S MS62+ PCGS. CAC. The 1885-S is one of the more available Type Three S-mint twenties. At the MS62 Plus-level this piece represents good value. Each side glows with frosted mint luster and the strike is sharply defined throughout. A few more obvious abrasions on the obverse prevent an even higher grade. NGC ID# 26BP, PCGS# 9005

**1885-S Liberty Double Eagle, MS63
Outstanding Color, Luster, and Surfaces**

- 3915 1885-S MS63 PCGS.** As one of the few double eagles from the 1880s that can be acquired in Select Uncirculated condition at a manageable price, the 1885-S is a preferred Type Three design representative and the obvious go-to choice for a date set. This smoothly frosted example alternates lilac and pale-green accents over attractive, peach-gold surfaces. Housed in a previous generation green label holder, the coin is sharply struck and displays exceptional, minimally marked fields and devices. A minor reeding mark beneath the eagle's right (facing) wing does not distract in the least. PCGS reports just 51 numerically finer certifications (5/19). NGC ID# 26BP, PCGS# 9005

**1889-CC Double Eagle, AU55
Minimally Abraded for the Grade**

- 3916 1889-CC AU55 NGC. Variety 1-A.** A small mintage of 30,945 double eagles was struck at the Carson City Mint in 1889, after a three-year hiatus in coinage operations. Despite the small production total, the 1889-CC is not difficult to locate in most grades today. This attractive Choice AU specimen is lightly worn and lightly abraded, with vibrant mint luster on both sides. NGC ID# 26BV, PCGS# 9011

**1890 Twenty Dollar, MS62
Rare CAC-Approved Example**

- 3917 1890 MS62 PCGS. CAC.** This Philadelphia issue is usually available in grades below MS63, although finer coins are scarce. This collectible MS62 example displays above-average eye appeal and luster quality for the grade, earning it a rarely awarded CAC green label. Original yellow-gold mint luster in the margins surrounds peach-orange interior hues, and each side of the coin is radiant. A sharp and appealing Type Three double eagle. CAC: 30 in 62, 4 finer (5/19). NGC ID# 26BX, PCGS# 9013

**1890-CC Twenty Dollar, AU58
Prooflike Fields**

- 3918 1890-CC AU58 PCGS. Variety 1-A.** The reverse is heavily lapped, with weakened tailfeathers and rays. Both sides are deeply prooflike with bright yellow-gold color and sharp devices. Barely any high-point friction keeps this coin from a Mint State designation, although scattered abrasions are apparent on each side. NGC ID# 26BY, PCGS# 9014

**1892-CC Liberty Double Eagle, AU55
Popular Type Three Issue**

- 3919 1892-CC AU55 NGC. CAC. Variety 1-A.** An attractive Choice AU specimen of this popular branch mint issue, with just a touch of wear on the high points and strongly impressed design elements. The lightly abraded orange-gold surfaces retain substantial amounts of original mint luster beneath its aged patina, while overall eye appeal is strong for the grade. The 1892-CC has become significantly more available in recent years, with ongoing discoveries in foreign holdings. Scarce with CAC endorsement. CAC: 7 in 55, 37 finer (5/19). NGC ID# 26C6, PCGS# 9020

**1893-CC Twenty, Choice AU
Lustrous and Attractive**

- 3920 1893-CC AU55 NGC. Variety 2-A.** The final year of double eagle coinage at Carson City produced only 18,402 coins, although quantities of this date were shipped abroad in the foreign trade and have been repatriated in recent decades. The 1893-CC double eagle is collectible, and yet this only serves to make it more popular with collectors of CC gold. This Choice AU example displays lustrous fields and rich honey-gold and orange patina. Slight rub is evident on the portrait, but all details remain visible. NGC ID# 26C9, PCGS# 9023

3921 1894 MS63★ NGC. A well struck and lightly abraded representative. Exceptional field reflectivity undoubtedly provides the reason for the elusive Star designation. NGC has certified a scant 11 pieces with a Star designation, bestowed for superior eye appeal. The roster includes 2 as MS61, 7 as MS62, 2 as MS63, and 2 as 63 Prooflike (5/19). NGC ID# 26CB, PCGS# 9025

3922 1894-S MS63+ PCGS. CAC. Medium S. From a mintage of 1 million coins, this 1894-S double eagle enjoys radiant yellow-gold surfaces accented with hints of rose color near the centers. Frosted mint luster swirls over well-struck devices and minimally abraded fields. CAC: 26 in 63, 21 finer (6/19). NGC ID# 26CC, PCGS# 9026

3923 1898-S MS64 NGC. An impressive Choice example of this popular Type Three issue, with sharply detailed design elements throughout. The well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 26CL, PCGS# 9034

3924 1899 MS64+ PCGS. A Plus-graded Choice specimen of this popular turn-of-the-century issue, with sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 69 numerically finer examples (6/19). NGC ID# 26CM, PCGS# 9035

1899-S Liberty Twenty, MS64 Rarely Seen Any Finer

3925 1899-S MS64 PCGS. The 1899-S Liberty double eagle boasts a large mintage of more than 2 million pieces, making the issue reasonably available in grades up to the MS64 level, but finer coins are rare. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces on both sides. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded four numerically finer examples (6/19). NGC ID# 26CN, PCGS# 9036

3926 1903-S MS62★ NGC. Both sides exhibit a bright prooflike finish, which undoubtedly contributes to the Star designation. The strike is uncommonly sharp also. Numerous small, but individually insignificant abrasions are seen on each side. NGC ID# 26CX, PCGS# 9044

3927 1904 MS65 NGC. A delightful Gem example of this popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces that show a mix of vibrant mint luster and prooflike reflectivity on both sides. Eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

3928 1904 MS62 Prooflike NGC. The 1904 is the most prevalent Liberty twenty issue, but examples with demonstrably reflective fields are scarce. This well-struck apricot-gold double eagle exhibits eye appeal that surpasses its numerical grade, since it lacks most of the marks associated with the MS62 level.
Ex: FUN Signature (Heritage, 1/2014), lot 10305, which realized \$2,232.50. NGC ID# 26CY, PCGS# 79045

3929 1904 MS63 Prooflike NGC. Both sides of this Select Mint State double eagle display fully mirrored surfaces and bold design motifs with light cameo contrast. A sharp strike and brilliant light yellow-gold surfaces enhance the eye appeal. The 1904 is a plentiful date overall, but Prooflike coins are less often seen.
Ex: ANA Signature (Heritage, 8/2015), lot 6517, which realized \$1,899.98. NGC ID# 26CY, PCGS# 79045

3930 1904-S MS64+ NGC. CAC. Like the 1904 Philadelphia twenty, this West Coast issue boasts a substantial mintage in excess of 5.1 million coins. However, the 1904-S is about 10 times scarcer in almost any grade than the 1904. Frosty mint luster over medium yellow-gold surfaces delivers terrific visual appeal. This high-end example shows a crisp central strike and few serious abrasions. NGC ID# 26CZ, PCGS# 9046

1907-D Twenty Dollar, MS64 Denver Liberty Head Type Coin

3931 1907-D MS64 PCGS. Frosted surfaces and well-struck motifs bolster the eye appeal of this Choice Uncirculated 1907-D, struck during the final year of the Liberty Head design. Full mint luster glows beneath smooth, nearly unabraded surfaces, with attractive straw-gold color and an unblemished cheek on Liberty. The Denver Mint struck Liberty twenties in just 1906 and 1907, a two-year type for the denomination and Mint. NGC ID# 26D8, PCGS# 9053

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Twenty, MS65 Radiant Sun-Gold Type Coin

3932 1907 MS65 PCGS. Housed in a previous generation green label holder, this Gem 1907 Arabic Numerals Saint-Gaudens twenty is one of 361,667 pieces struck late in the year. Charles Barber made many changes to the High Relief design — most with little eye for aesthetics, but with production practicality in mind. The strike is sharp, and the few tiny marks that exist require magnification to view. Rose and lilac highlights accentuate cartwheel mint luster that pulses throughout both sides. This is an excellent type coin, with exceptionally strong eye appeal. NGC ID# 26F5, PCGS# 9141

3933 1908 No Motto MS66 PCGS. A remarkably clean No Motto type coin, softly frosted with natural wheat-gold mint luster and a bold strike. Even Liberty's figure is free of most signs of contact. An outstanding type coin.

Ex: Dallas Signature (Heritage, 11/2005), lot 4712, which realized \$2,300. NGC ID# 26F6, PCGS# 9142

3934 1908 No Motto MS66 NGC. A delightful Premium Gem representative of the short-lived No Motto design, with well-detailed design elements that show just a touch of the usual softness on the eagle's belly. The virtually pristine orange-gold surfaces are lustrous and appealing. NGC ID# 26F6, PCGS# 9142

3935 1908 Motto MS63 PCGS. CAC. An impressive Select Saint-Gaudens double eagle, from the first year of the popular Motto design, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall visual appeal is outstanding. NGC ID# BNAK, PCGS# 9147

- 3936 1908-D Motto MS63 PCGS. CAC.** A lovely peach-gold example of this early and relatively low mintage Denver issue. The strike is good, and mentionable marks are limited to the top of eagle's back wing. CAC has confirmed only 22 pieces at the MS63 level (5/19). Certified in a green label holder. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Saint-Gaudens Twenty
Radiantly Lustrous MS65+**

- 3937 1908-D Motto MS65+ NGC.** The inaugural With Motto Denver issue is collectible in MS65, but just two of the coins in this grade at NGC are Plus-designated, with 14 pieces finer (5/19). This example displays excellent sharpness on Liberty's fingers and the Capitol building, and only a few trivial marks are evident on the high points of Liberty's figure. Luster is vibrant and frosty with rich yellow-gold and peach color. NGC ID# 26F9, PCGS# 9148

- 3938 1909/8 FS-301 MS61 NGC. CAC.** Apricot-gold centers are bounded by lime-green margins. This coin is lustrous and sharply struck with a number of minor abrasions consistent with the designated grade. The 1909/8 is a scarce, popular, and visually prominent overdate.
Ex: Central States Signature (Heritage, 4/2013), lot 6116, which realized \$2,232.50. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

- 3939 1909-S MS64 PCGS.** A strong strike and thick, frosty mint luster define this near-Gem, showing a remarkable dearth of abrasions for the grade. Rich yellow-gold color adorns each side. The 1909-S is collectible through MS64 but becomes more elusive in MS65 and above. Housed in an old green label holder. NGC ID# 26FE, PCGS# 9153

- 3940 1910-D MS64+ PCGS. CAC.** Softly frosted luster illuminates above-average preservation on this high-end near-Gem, complementing boldly struck design elements. The interiors display rich rose-gold patina, surrounded by yellow-gold borders. NGC ID# 26FG, PCGS# 9155

**1911 Twenty Dollar, MS64+
Beautiful Color and Luster**

- 3941 1911 MS64+ PCGS.** Available in MS64, the 1911 double eagle becomes somewhat scarce in Gem condition. This Plus-graded near-Gem balances affordability with quality. Frosty cartwheel luster abounds beneath rich yellow-gold coloration. Even the high points of Liberty's figure show little evidence of surface contact, and the strike is incredibly sharp on Liberty's fingers and the top of the torch. NGC ID# 26FK, PCGS# 9157

- 3942 1911-D MS65+ NGC.** The 1911-D is one of the more available mintmarked Saint-Gaudens twenties from this decade. The granular surfaces have an even layer of rich reddish-gold color and there are no abrasions worthy of mention. Sharply struck. NGC ID# 26FK, PCGS# 9158

**1913-S Saint-Gaudens Twenty, MS62
Low-Mintage Early Series Issue**

- 3943 1913-S MS62 NGC.** The 1913-S Saint-Gaudens double eagle claims one of the lowest mintages of the series, at just 34,000 pieces, but the early series issues were not as heavily melted as those from the late 1920s and '30s. This impressive MS62 specimen exhibits well-detailed design elements and lightly marked yellow-gold surfaces, with especially vibrant mint luster throughout. NGC ID# 26FR, PCGS# 9163

- 3944 1914-S MS65 PCGS.** A delightful Gem representative of this early series issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is outstanding. NGC ID# 82KA, PCGS# 9166

**1922-S Double Eagle, MS61
Heavily Melted S-Mint Issue**

- 3945 1922-S MS61 PCGS. CAC.** Housed in an old green label PCGS holder with CAC endorsement, this lustrous, orange-gold double eagle may be a European repatriate from France or Belgium. The obverse appears at least a grade finer than the assigned MS61 level, although some light rim marks and a handful of tiny orange alloy spots exist on the coin. Other marks and abrasions are minor. Research by Roger Burdette reveals a full 99% of the 2.6 million-piece 1922-S mintage was melted during the Gold Recall. NGC ID# 26G4, PCGS# 9174

**1922-S Saint-Gaudens Double Eagle, MS62
Less-Available Branch Mint Issue**

- 3946 1922-S MS62 NGC.** From a sizeable mintage of 2.6 million pieces, the 1922-S is not too difficult to locate at the MS62 grade level, but it is elusive in higher grades. This impressive MS62 example displays well-detailed design elements and lightly marked orange and reddish-gold surfaces that radiate vibrant mint luster throughout. NGC ID# 26G4, PCGS# 9174

- 3947 1923-D MS65 NGC.** A spectacular Gem specimen of this popular branch mint type issue, with sharply detailed design elements and lustrous orange-gold surfaces that are free of mentionable distractions. Overall visual appeal is outstanding. NGC ID# 26G6, PCGS# 9176

**1923-D Twenty Dollar, MS66
Rich Orange-Gold Color With Lavender Accents**

- 3948 1923-D MS66 PCGS. CAC.** The 1923-D is thought by many to be the ultimate type coin for the Saint-Gaudens series, and it is the large number of coins such as this one that gives it that reputation. Strong mint luster and excellent surface preservation are the prime attributes of this Premium Gem. Lavender accents are interspersed over the otherwise deep orange-gold surfaces.

Ex: Long Beach Signature (Heritage, 2/2008), lot 2824; Baltimore Signature (Heritage, 3/2009), lot 3423. NGC ID# 26G6, PCGS# 9176

- 3949 1924 MS66 PCGS.** Beginners and advanced collectors alike recognize the 1924 as an ideal issue for type purposes. Coins only become scarce at the Superb Gem level. This frosty yellow-gold example is generally well-struck, except for softness on the Capitol dome and neighboring stars. A singular tick occurs on Liberty's throat. NGC ID# 26G7, PCGS# 9177

**1924-D Twenty Dollar, MS62+
Thick Mint Luster**

- 3950 1924-D MS62+ PCGS. CAC.** It is estimated that around 1,200 pieces are extant in all grades out of the mintage of more than 3 million pieces. In the 1950s, coins that had been shipped to Canada and Europe in the 1920s began to return to the U.S. Most, however, were not high grade. This Plus-graded example displays thick mint luster and even reddish-gold coloration. A few obvious marks are scattered over each side. NGC ID# 34VF, PCGS# 9178

**1924-S Double Eagle, AU58
Ideal Strike and Surfaces**

- 3951 1924-S AU58 PCGS.** While nearly the entire mintage was eliminated in FDR's Gold Recall, enough 1924-S double eagles found their way to Europe and back again into collector hands to offset the issue's previous status as a famed melt rarity. Latest estimates suggest about 1,100 examples survived either here or abroad. This is a sharp and lustrous near-Mint coin, with surface quality and eye appeal that exceeds many technically Uncirculated pieces. Gleaming orange-gold surfaces show remarkably few abrasions for the grade. NGC ID# 26G9, PCGS# 9179

**1924-S Double Eagle, MS61
Scarce, Collector Favorite S-Mint Issue**

- 3952 1924-S MS61 NGC.** Lilac and vivid orange-gold toning glisten with frosted mint luster that permeates both sides of this scarce San Francisco twenty. Recent research by Roger Burdette suggests only about 1,100 pieces survive from a mintage topping 2.9 million pieces. Less than 10% of the original mintage was ever paid out, "a huge waste of time, resources and money" according to Burdette. The rest were melted. Surviving examples are split about 50/50 among foreign repatriates and coins from domestic distribution. This sharply struck Mint State example is lightly abraded with imposing eye appeal. NGC ID# 26G9, PCGS# 9179

**1925 Saint-Gaudens Double Eagle, MS66+
Elusive Issue Any Finer**

- 3953 1925 MS66+ NGC.** The 1925 Saint-Gaudens double eagle claims a substantial mintage of 2.8 million pieces, making the issue relatively available in high grade today. Even in MS66 condition, the 1925 is not difficult to locate, but finer coins are rare. This Plus-graded Premium Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC has graded 25 numerically finer examples (5/19). NGC ID# 26GA, PCGS# 9180

**1925-S Saint-Gaudens Twenty, AU Details
Scarcer Branch Mint Issue**

- 3954 1925-S — Scratch — PCGS Genuine. AU Details.** From a mintage of nearly 3.8 million pieces, the 1925-S Saint-Gaudens double eagle was heavily melted after the Gold Recall of 1933. Roger Burdette estimates no more than 1,500 examples survived, mostly in overseas holdings. This lightly worn orange-gold example is lustrous and lightly abraded, aside from a couple of pinscratches through the eagle's head.

COMMEMORATIVE SILVER

- 3955 1900 Lafayette Dollar MS64 NGC. DuVall 2-C.** The final S in STATES on the obverse is repunched on this variety, an available die pairing for type collectors. This near-Gem displays sharp detail and satiny mint luster. Delicate wisps of amber toning on each side complement the surface preservation. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, Silvery Gem
Clean Surfaces**

- 3956 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B.** The lowest leaf on the reverse points between 19, identifying the usual DuVall 1-B variety. The 1900 Lafayette dollar stands out as a key issue in the classic commemorative series, representing the only silver dollar in the set and distributed to the extent of only 36,026 coins. The dusky silver surfaces of this clean Gem include glints of gold around the well-struck devices. A few tiny ticks appear on Washington's portrait, but magnification is required to see them. NGC ID# BYKW, PCGS# 9222

- 3957 1935-D Arkansas MS67 PCGS. CAC.** A scarce Superb Gem example, rare with the CAC endorsement. This Registry-grade Arkansas half dollar displays satiny luster and a bold strike. Iridescent toning covers each side. Population: 57 in 67 (8 in 67+), 2 finer. CAC: 22 in 67, 2 finer (6/19). NGC ID# BYF6, PCGS# 9234

- 3958 1938 Arkansas MS67 PCGS.** This issue celebrates the centennial of Arkansas's statehood, which occurred in 1936. Only 3,156 1938 coins were distributed. Although examples are collectible through MS66, they prove conditionally scarce at the Superb Gem level. Brilliant, softly frosted interiors merge with blushes of peripheral golden color. This fully struck half dollar shows a couple of reed marks under S OF. Population: 20 in 67 (2 in 67+), 0 finer (5/19). NGC ID# BYFE, PCGS# 9245

- 3959 1938 Arkansas MS67 NGC.** The 1938 is a scarce, low-mintage year with only 3,156 pieces struck. This is a mostly brilliant coin that shows varying amounts of toning around the margin on each side. Bright mint luster. Census: 6 in 67, 0 finer (6/19). NGC ID# BYFE, PCGS# 9245

- 3960 1939 Arkansas MS66+ PCGS. CAC.** Smooth, satiny pearl-white interiors cede to gold and lilac color around the outer peripheries of this Premium Gem Arkansas half dollar. The strike is sharp and the surfaces are devoid of abrasions. Only a handful of finer pieces are known. NGC ID# BYFJ, PCGS# 9249

**1935-S Boone Half Dollar, MS67+
One Coin Finer at PCGS**

- 3961 1935-S Boone MS67+ PCGS. CAC.** A dusting of dusky lavender-gray patina covers most of this Boone half dollar. Additional glints of golden-orange, steel-blue, and crimson color complement each side. The underlying surfaces are beautifully preserved without any faults worthy of mention. This is an eye-appealing, well-struck Registry coin from a meager distribution of 2,004 pieces. Population: 47 in 67 (4 in 67+), 1 finer. CAC: 23 in 67, 1 finer (6/19). NGC ID# BYFW, PCGS# 9260

- 3962 1936 Boone MS67+ NGC. CAC.** Medium chestnut-gold patina accompanies lustrous and unabraded surfaces. An outstanding example from the middle year of the five-year type. As is always the case with Boone half dollars, the strike is essentially full. Census: 56 in 67 (2 in 67+, 2 in 67★), 8 finer. CAC: 41 in 67, 5 finer (5/19). Ex: FUN Signature (Heritage, 7/2017), lot 8062, which realized \$1,527.50. NGC ID# BYFX, PCGS# 9266

**1925-S California Half Dollar, MS68
Few Certified So Fine**

- 3963 1925-S California MS68 NGC.** One of the most iconic classic commemoratives is the California Diamond Jubilee half dollar, celebrating the 75th anniversary of California's statehood. A Forty-Niner on the obverse recalls the Gold Rush of 1849, and a walking grizzly bear — the state emblem — spans the reverse. This remarkably high-end and conditionally rare example displays satiny luster and beautiful multicolor toning. Not a single mentionable flaw is observed beneath a loupe. Census: 18 in 68 (6 in 68★, 2 in 68+★), 0 finer (5/19). NGC ID# BYGA, PCGS# 9281

**1936 Cincinnati Half, MS67
Tied for the Finest Certified**

- 3964 1936 Cincinnati MS67 PCGS.** Although Stephen Foster was a Pennsylvania native son, Cincinnati claimed him for Ohio, based on his first successful songs, written in 1848-1850 while working as a bookkeeper at his brother's Cincinnati-based steamship company. The connection to Cincinnati was tenuous at best, as was the claim that Cincinnati was the "Music Center of America," and the one-year 1936 issue was sold almost exclusively to speculators and privileged collectors. Scarce in Superb Gem condition and unknown in numerically finer grades, this MS67 example displays smooth and frosted surfaces, with softly lustrous silver-gray surfaces. Traces of tan-gold toning add eye appeal. Population: 27 in 67 (3 in 67+), 0 finer (5/19). NGC ID# BYCJ, PCGS# 9283

**1893 Columbian Half, Colorful MS67
Originally Preserved Surfaces**

- 3965 1893 Columbian MS67 PCGS.** With the Santa Maria in full sail atop two globes representing the Old World and the New World, this colorfully toned 1893 Columbian half is razor-sharp with bountiful mint luster beneath the rich patina. The obverse displays spectacular shades of aquamarine, lemon-gold, violet, and ruby-red, while the reverse adds pale lilac-gray to the palette. Both the sharp strike and smooth, glowing surfaces are undisturbed by any mentionable marks. Population: 43 in 67 (6 in 67+), 0 finer (6/19). NGC ID# BYGG, PCGS# 9297

**1935 Connecticut Half Dollar, MS67
Splendidly Toned Example With CAC**

- 3966 1935 Connecticut MS67 PCGS. CAC.** A spectacular display of original toning highlights this immaculate Superb Gem Connecticut half. A halo of sunset-gold embraces emerald-green and slate-blue shades that fill the Charter Oak obverse, while the reverse is equally impressive with a frame of vibrant tan-gold around the lustrous and pearlescent, silver-gray visage of a boldly modernistic eagle. PCGS has certified just one numerically finer example (5/19). NGC ID# BYGH, PCGS# 9299

- 3967 1936 Gettysburg MS67 NGC.** Soft mint luster and beautiful preservation adorn this exceptional Superb Gem Gettysburg half dollar. Both sides display consistent lavender-blue toning, with olive-gold and peach overtones evident in some areas. Eye appeal is outstanding. Census: 77 in 67 (6 in 67+, 6 in 67★, 2 in 67+★), 3 finer (5/19). NGC ID# BYGM, PCGS# 9305

- 3968 1936 Gettysburg MS67 PCGS.** The Gettysburg 75th Anniversary half dollar is scarce in Superb Gem condition, and this piece showcases every bit of that quality with its frosty, delicately toned surfaces. The strike is bold and eye appeal is outstanding. PCGS lists only three numerically finer pieces (5/19). NGC ID# BYGM, PCGS# 9305

**1922 No Star Grant Half Dollar, MS67
Attractive, Original Toning**

- 3969 1922 Grant No Star MS67 PCGS.** Neither the Grant With Star nor the Grant No Star has been certified finer than MS67 at PCGS, although the No Star variant is seen more frequently (as expected based on the much larger mintage). A thin ring of steel-blue at the borders of this Superb Gem example surrounds shades of reddish-tan and silver-gray at the centers, with ample mint luster illuminating impeccable surfaces. The strike is sharp, with only faint die wear visible at the highest points of Grant's hair and on a few of the leaf clusters above the cabin. NGC ID# BYGP, PCGS# 9306

- 3970 1928 Hawaiian MS64 PCGS.** Shades of golden-brown and lavender toning blanket the well-preserved surfaces of this key silver commemorative, with well-detailed design elements and satiny mint luster underneath. From a distribution of 9,958 pieces. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, Satiny Near-Gem
CAC Endorsed**

- 3971 1928 Hawaiian MS64 PCGS. CAC.** Iridescent colors play across the central devices before deepening to golden-brown and grayish-blue at the margins of this near-Gem Hawaiian half. A key to the classic commemorative series with a mintage of just 9,958 pieces, all Hawaiian halves are in strong demand among the many series collectors. This example is sharply struck with full definition of the chief's regalia as well as the mountains in the background. Soft mint luster glows beneath the attractive, light toning. NGC ID# BYGR, PCGS# 9309

- 3972 1924 Huguenot MS67 PCGS.** A beautifully toned Superb Gem, light golden in the centers with pastel lavender, sea-green, and olive hues in the margins. The strike is sharp and neither side exhibits bothersome abrasions. The Huguenot half dollar is scarce this fine, and few higher-grade pieces are known. Population: 83 in 67 (17 in 67+), 5 finer (5/19). NGC ID# BYGT, PCGS# 9314

1925 Lexington-Concord Half Dollar
Rare This Fine, Toned MS67

- 3973 1925 Lexington MS67 PCGS.** Nearly the entire 162,099-piece mintage of Lexington half dollars was sold — just 86 pieces were melted. Original pearlescent-gray toning deepens at the rims, with pale-blue accents and lovely rose-gold highlights that join a thin band of colorful iridescence at the borders. Nearly mark-free surfaces host a sharp strike on both the Minuteman and the Old Belfry. Celebrating the Lexington-Concord Sesquicentennial, this Superb Gem example is exceeded by just a single piece in numeric grade at either service. Population: 31 in 67 (5 in 67+), 1 finer (5/19). NGC ID# BYGW, PCGS# 9318

1925 Lexington Sesquicentennial Half, MS67
Impressive Preservation

- 3974 1925 Lexington MS67 PCGS.** The famous 1775 battles of Lexington and Concord were commemorated with the issuance of a special half dollar in 1925. The Sesquicentennial issue had a moderate distribution of more than 160,000 pieces, but only a few survive at the Superb Gem grade level. This example displays a bold strike and nearly flawless surfaces. A faint light golden hue warms otherwise brilliant, satiny luster on each side. Population: 31 in 67 (5 in 67+), 1 finer (5/19).
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4190, which realized \$5,287.50. NGC ID# BYGU, PCGS# 9320

- 3975 1918 Lincoln MS67 PCGS.** Light autumn-brown toning graces both sides of this lustrous and well-struck state centennial Superb Gem. Marks are confined to delicate field grazes near Lincoln's profile and the lowest banner. The early single-year type is available in Mint State, though PCGS has certified just five pieces numerically finer (5/19). NGC ID# BYGU, PCGS# 9320

- 3976 1921 Missouri MS65+ NGC. CAC.** A high-end Gem example of the "plain" Missouri Centennial half dollar. Softly frosted luster displays subdued amber-gold and light olive toning over each side, and no bothersome abrasions are apparent with a loupe. NGC lists only 48 finer submissions (6/19). NGC ID# BYH2, PCGS# 9330

1923-S Monroe Half Dollar, MS66+
Surprisingly Scarce in High Grades

- 3977 1923-S Monroe MS66+ PCGS.** The 1923-S Monroe half dollar had the third largest distribution for any commemorative issue to that point after the Columbian halves of 1892 and 1893. In all, 274,077 coins were released into public hands, many at face value. Remarkably few examples are as well-preserved at this Plus-graded Premium Gem, especially considering the high mintage. Frosty surfaces remain mostly brilliant with blushes of golden-orange and ice-blue border toning. Only 10 grading events are higher at PCGS (6/19). NGC ID# BYH4, PCGS# 9333

- 3978 1915-S Panama-Pacific MS66 PCGS. CAC.** This Barber-Morgan collaboration was distributed to the extent of 27,134 pieces. Frosty, well-preserved surfaces reside beneath tan-gold and gunmetal-blue patina. Columbia's head is a bit soft, but the eagle's feathers are bold. NGC ID# BYHP, PCGS# 9357

- 3979 1915-S/S Panama-Pacific, FS-502, MS66 PCGS.** The upper serif of an errant S is visible north of the primary mintmark on this Premium Gem Pan-Pac type coin. Each side displays identical concentric toning, with sea-green, violet, and lemon-gold borders surrounding lilac and peach interiors. Eye appeal is outstanding. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

1937 Roanoke Half Dollar, MS68
Frosty and Lightly Toned

- 3980 1937 Roanoke MS68 PCGS. CAC.** Areas of brilliant transition to shades of green, blue, violet, and gold mainly around the peripheries. The effect is highly appealing and contributes to CAC's decision to endorse this Superb Gem. Frosty, fully struck surfaces are essentially unabraded. Population: 30 in 68 (1 in 68+), 0 finer. CAC: 18 in 68, 0 finer (6/19). NGC ID# BYHW, PCGS# 9367

- 3981 1936 Robinson MS67 PCGS. CAC.** Poor distribution and the nature of the design has resulted in the Robinson-Arkansas half dollar being a surprisingly elusive issue in top grades. This virtually pristine example is lightly framed in bits of russet and olive-gold toning. Housed in a green label holder. Population: 100 in 67 (9 in 67+), 2 finer. CAC: 31 in 67, 0 finer (5/19). NGC ID# BYHX, PCGS# 9369

**1926 Sesquicentennial Half Dollar, MS65+
Elusive CAC Coin, Lightly Toned**

- 3982 1926 Sesquicentennial MS65+ PCGS. CAC.** The Sesquicentennial half dollar is usually available in MS65, but fewer than two dozen such coins are Plus-graded at PCGS. A green CAC sticker is also a seldom-seen attribute on this issue, and the current Gem has both. Each side is well-struck and satiny with warm golden toning. Flecks of russet and olive-green also appear around the outer peripheries. PCGS lists only 13 finer examples. CAC: 95 in 65, 6 finer (5/19). NGC ID# BYJ4, PCGS# 9374

**1926 Sesquicentennial Half Dollar, MS66
Lustrous, Vividly Toned Example**

- 3983 1926 Sesquicentennial MS66 NGC.** Despite a large distribution of 141,120 pieces, the 1926 Sesquicentennial half dollar is rarely seen in MS66 condition, and finer coins are virtually unobtainable. This spectacular Premium Gem exhibits well-detailed design elements and impeccably preserved lustrous surfaces, under shades of orange-gold and lavender toning. Census: 28 in 66 (2 in 66+, 6 in 66★, 1 in 66+★), 1 finer (6/19). NGC ID# BYJ4, PCGS# 9374

- 3984 1935 Spanish Trail MS67 PCGS.** This sharp Superb Gem displays the typical satin luster of the Spanish Trail half dollar, although vivid multicolor toning through the left-hand margin on each side is not often associated with this issue. The coin is well-preserved and decidedly attractive. PCGS has seen seven numerically finer representatives (5/19). NGC ID# BYJ5, PCGS# 9376

- 3985 1935 Spanish Trail MS67 NGC.** The Spanish Trail and Hudson were both struck in 1935, and share second place for lowest mintage classic silver commemorative type, behind only the Hawaiian. This essentially immaculate Superb Gem is boldly struck and predominantly brilliant, although it displays an occasional blush of tan toning. Certified in a circa-2000 holder. NGC ID# BYJ5, PCGS# 9376

**1925 Stone Mountain Half Dollar, MS68
Among the Finest at NGC**

- 3986 1925 Stone Mountain MS68 NGC.** The 1925 Stone Mountain half dollar is a popular silver commemorative, from a large distribution of 1.3 million pieces. The issue is definitely elusive at the MS68 grade level, however. This delightful MS68 specimen exhibits well-detailed design elements, with vibrant mint luster throughout. The impeccably preserved surfaces are blanketed in attractive shades of lavender and pale gold toning. Census: 15 in 68, 0 finer (6/19). NGC ID# BYJ6, PCGS# 9378

**1935-D Texas Half Dollar, MS68
Unimprovable Quality**

- 3987 1935-D Texas MS68 NGC.** Daubs of russet and crimson color around the borders complement otherwise brilliant satin surfaces. The masterful design by Pompeo Coppini is rendered in complete detail, and there are no singular abrasions on either side. An unimprovable example of the 1935-D Texas half dollar. Census: 16 in 68 (3 in 68★), 0 finer (5/19). NGC ID# BYJC, PCGS# 9383

**1938 Texas Half Dollar, MS67+
Only One Finer at PCGS**

- 3988 1938 Texas MS67+ PCGS. CAC.** The 1938 Texas half dollar is an important issue in the series that was minted from 1934 to 1938. Less than 4,000 pieces were distributed from each Mint in this concluding year. This Superb Gem features an excellent strike with a crescent of gold toning along the lower obverse border on otherwise fully brilliant and untoned silver surfaces. Population: 81 in 67 (13 in 67+), 1 finer. CAC: 48 in 67, 1 finer (5/19). NGC ID# BYJL, PCGS# 9394

**1938-D Texas Half Dollar, MS68
Lightly Toned, Tied for Finest**

- 3989 1938-D Texas MS68 NGC.** A top-notch example of this late-series Texas half dollar issue, showing satiny surfaces with rose and violet patina surrounding silvery-iridescent centers. A bit of brighter yellow-gold and violet clings to portions of the outer peripheries. The Texas half dollar design seems to be a “love it or hate it” one among commemorative collectors, but this piece is definitely among the finest in existence. Census: 9 in 68 (1 in 68+, 3 in 68★), 0 finer (5/19).
Ex: FUN Signature (Heritage, 1/2016), lot 3404, which realized \$4,230. NGC ID# BYJM, PCGS# 9395

- 3990 1938-S Texas MS67+ PCGS. CAC.** Few 1938-S Texas halves in MS67 carry both a Plus designation and a CAC sticker. This piece stands apart from its peers on those grounds. It is well-struck and satiny with dusky champagne and lilac interiors. Vivid crimson, forest-green, and golden-russet toning appears along the right-hand borders. PCGS lists three finer pieces (5/19). NGC ID# BYJN, PCGS# 9396

**1925 Vancouver Half, MS66+
High-End Example, Vivid ‘Circus’ Toning**

- 3991 1925 Vancouver MS66+ PCGS.** A parade of vibrant colors includes alternating bands of electric-blue, deep-pink, lemon-gold, and pale-orange that occupy the obverse, while the reverse is more conservatively toned in cerulean-blue and pale-taupe hues. This lustrous Premium Gem Vancouver punctuates any toned classic commemorative set with vivid display seldom seen for the issue. Plus-graded by PCGS for its eye-stopping coloration and sharply struck, pristine surfaces. NGC ID# BYJP, PCGS# 9399

**1925 Fort Vancouver Half Dollar
Beautifully Toned MS67**

- 3992 1925 Vancouver MS67 PCGS.** A scarce Superb Gem example of this otherwise plentiful classic commemorative. The centennial of Fort Vancouver’s construction was marked in 1925. Only 14,994 examples of this half dollar were distributed. The piece offered here is satiny and boldly struck. Vivid rainbow toning forms concentric rings around each side, leaving the interiors gold and powder-blue. Population: 82 in 67 (16 in 67+), 3 finer (5/19). NGC ID# BYJP, PCGS# 9399

- 3993 1925 Vancouver MS67 PCGS.** Pilot Oakley G. Kelly flew the entire mintage of From Vancouver half dollars from San Francisco to Vancouver on August 1, 1925. Nonetheless, collector interest was limited, and about 70% of the mintage (of 50,028 pieces) was melted as unsold. This pristine Superb Gem is well struck and displays rich powder-blue and tan-gold toning. Population: 82 in 67 (16 in 67+), 3 finer (5/19).
Ex: FUN Signature (Heritage, 1/2016), lot 3405, which realized \$2,350. NGC ID# BYJP, PCGS# 9399

- 3994 1927 Vermont MS67 NGC.** Pastel ice-blue and straw-gold toning graces lustrous and exceptionally smooth surfaces. Tiny freckles of deep brown toning visit the right borders. Despite their high relief, Vermont half dollars are invariably well struck. Census: 31 in 67 (2 in 67+, 2 in 67★, 1 in 67+★), 3 finer (5/19). NGC ID# BYJR, PCGS# 9401

**1947 Booker T. Washington Half, MS67
Tied for Finest Certified**

- 3995 1947 Booker T. Washington MS67 NGC.** All three mints struck and distributed 6,000 Booker T. Washington half dollars in 1947, representing the lowest totals in the six-year series. This all-brilliant Superb Gem has thick, frosty luster and excellent eye appeal. Two tiny reed marks above the second O in BOOKER serve as pedigree markers. Census: 10 in 67, 0 finer (5/19).
Ex: FUN Signature (Heritage, 1/2016), lot 3407, which realized \$2,585. NGC ID# BYJW, PCGS# 9408

- 3996 1950 Booker T. Washington MS67 PCGS.** The 1950 Booker T. Washington half had one of the smallest distribution totals in the six-year series with just 6,004 pieces struck, including assay coins. The present Superb Gem example displays a bold strike with satiny luster and unabraded surfaces. The interiors are near-brilliant, while the peripheries display light gold and russet hues. Population: 17 in 67, 0 finer (11/15).
Ex: FUN Signature (Heritage, 1/2016), lot 3409, which realized \$1,762.50. NGC ID# BYK6, PCGS# 9420

- 3997 1951-S Booker T. Washington MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits sharply detailed design elements and virtually flawless surfaces, with delicate highlights of pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. Population: 88 in 67 (9 in 67+), 0 finer. CAC: 66 in 67, 0 finer (6/19). NGC ID# BYKB, PCGS# 9426

**1952-D Half Dollar, MS66+
Washington-Carver**

- 3998 1952-D Washington-Carver MS66+ PCGS. CAC.** While the 1952 Philadelphia Mint Washington-Carver half dollar is plentiful from a high mintage, the branch mint issues that year survive from low mintage of just 8,000 coins at each facility. This piece, tied for the finest that PCGS has certified, features brilliant, satin luster with champagne toning and splashes of gold. Population: 84 in 66 (10 in 66+), 0 finer. CAC: 20 in 66, 0 finer (5/19). NGC ID# BYL4, PCGS# 9435

**1954 Washington-Carver Half, MS67
None Finer at Either Service**

- 3999 1954 Washington-Carver MS67 NGC.** NGC and PCGS combined report only nine examples of this issue in MS67 and none finer, making this coin highly important for Registry collectors. It is exceptional for a Washington-Carver half. Slate-blue toning surrounds lilac-infused centers, with satiny mint luster glowing brightly across both sides. Marks are at an absolute minimum for the issue, which appears more boldly struck than other high Mint State coins. A tiny mark behind the ear on Carver's portrait is the sole pedigree marker for this extreme condition rarity. Census: 5 in 67, 0 finer (5/19).
Ex: FUN Signature (Heritage, 1/2016), lot 3413, which realized \$2,937.50. NGC ID# BYL9, PCGS# 9442

COMMEMORATIVE GOLD

**1904 Lewis and Clark Gold Dollar, MS65
Sharp, Reflective Type Coin**

- 4000 1904 Lewis and Clark Gold Dollar MS65 PCGS.** Struck from an early state of the dies, this 1905 Lewis and Clark gold dollar displays prooflike fields and lacks the often-seen metal flowlines in the margins. Sharp central devices complement rich orange-gold and lemon-yellow color, and neither side has bothersome abrasions. Eye appeal is outstanding. An early classic commemorative gold type coin. NGC ID# BYLF, PCGS# 7447

- 4001 1905 Lewis and Clark Gold Dollar MS64+ PCGS. CAC.** The 1905 Lewis and Clark dollar is the key issue among the small denomination gold commemoratives. This is a lovely example that appears much finer than the stated grade. The fields on each side glitter with slight reflectivity and there are no obvious or detracting abrasions present. NGC ID# BYLG, PCGS# 7448

**1915-S Pan-Pac Quarter Eagle, MS65
'Rattler' Holder, CAC Green Label**

- 4002 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. CAC.** This is a high-end coin for the grade, showing satiny yellow-gold luster without any singularly discernible flaws. The coin is sharp and moderately luminous. Only 6,749 Pan-Pac quarter eagles were distributed. Although this issue's design received criticism at the time of release, the coin is now an iconic classic commemorative and the most elusive Panama-Pacific coin aside from the obvious Round and Octagonal fifties. Housed in a first generation holder, with CAC approval. NGC ID# BYLP, PCGS# 7450

- 4003 1922 Grant Gold Dollar, No Star, MS66 PCGS. CAC.** An exceptional Premium Gem example of the Grant gold dollar variety without the incuse star on the obverse. Distribution included 5,000 examples of each variety, and more than 70% of those coins have been examined by PCGS and NGC, per the latest population data. Both sides are fully brilliant with frosty yellow-gold mint luster. NGC ID# BYLN, PCGS# 7458

1922 Grant Gold Dollar, MS67
No Star Variant

- 4004** 1922 Grant Gold Dollar, No Star, MS67 PCGS. The 1922 Grant No Star gold dollar claims a low distribution of 5,000 pieces, but many high-quality specimens were saved by contemporary collectors. Today, the issue can only be called scarce in MS67 condition, but finer coins are condition rarities. This spectacular Superb Gem exhibits sharply detailed design elements and virtually pristine orange-gold surfaces, with vibrant mint luster and terrific eye appeal. PCGS has graded only one numerically finer example (6/19). NGC ID# BYLN, PCGS# 7458

MODERN ISSUE

- 4005** 1984-S Olympic Silver Dollar MS70 PCGS. The 1984 Los Angeles Olympics became the second program of the modern commemorative series, following the quarter-millennial of George Washington's birth. Mintages were higher than subsequent issues, but examples are very scarce in the ultimate grade. This brilliant and pristine piece depicts the curious headless sculpture by Robert Graham, which graced the entrance to Los Angeles Memorial Coliseum. NGC ID# 28PB, PCGS# 9611

MODERN BULLION COINS

- 4006** Three-Piece Set of 2006-W 20th Anniversary One-Ounce Gold Eagles NGC. The set includes Reverse Proof PR70; Regular Proof PR70 Ultra Cameo; and Uncirculated Finish MS70. All three coins are fully struck and pristine, and each has received the ultimate third-party grade. The 2006-W Reverse Proof is the sole such issue within the American Eagle gold bullion series. (Total: 3 coins)
- 4007** 2008-W One-Ounce Gold Buffalo MS70 PCGS. 2008 was the first year of the gold buffalo program, and the one-ounce fifty dollar was offered in three finishes, Uncirculated, Proof, and Burnished. The latter two varieties possess West Point mintmarks. This is the burnished and mintmarked variety, designated as Mint State on older holders and as Specimen on newer holders. The fine-grained yellow-gold surfaces are flawless. NGC ID# 26RS, PCGS# 400037

TERRITORIAL GOLD

(1837-1842) C. Bechtler Gold Dollar, AU53
N Reversed, K-4 Variety

- 4008** (1837-1842) C. Bechtler Dollar, N Reversed, AU53 NGC. K-4, R.4. The N in ONE is reversed and impressed over another letter (possibly another N), identifying the popular K-4 variety. Bechtler's private gold coinage was well-respected and circulated widely in the South in the days before the Civil War. This lightly worn AU53 example shows wavy lilac and orange-gold surfaces, with some planchet flaws and minor abrasions. Listed on page 398 of the 2020 Guide Book. Census: 6 in 53, 56 finer (6/19). NGC ID# 2B98, PCGS# 10055

1849 K-4 Moffat & Co. Five Dollar, XF40
Attractive Color and Surfaces

- 4009** 1849 Moffat & Co. XF40 PCGS. K-4, R.5. Clashed near GOLD on the reverse, as typical for this variety. Moffat & Co. gold circulated extensively on the West Coast and was highly respected for its heavy gold content. The Moffat firm later operated the U.S. Assay Office in San Francisco under contract with the federal government. This early Moffat five dollar piece displays even wear and attractive olive-gold patina with reddish tints in the fields. NGC ID# ANJ5, PCGS# 10240

1849 Moffat & Co. Five, K-4, AU53

- 4010** 1849 Moffat & Co. AU53 PCGS. K-4, R.5, without the die break along the lower reverse. This Moffat & Co. five dollar gold piece displays bright yellow-gold color and satiny surfaces. Detail is in keeping with the grade, showing little wear. Both sides are moderately abraded as normal for territorial gold from San Francisco assayers of the Gold Rush period. Population: 9 in 53, 33 finer (6/19). NGC ID# ANJ5, PCGS# 10240

S.S.C.A. RELIC GOLD MEDALS

'1855 Kellogg Fifty, Gem Proof' S.S.C.A. Relic Gold Medal (2001 Restrike)

- 4011** (2001) SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck on September 8, 2001, one of 101 proofs struck on that date. This Gem Proof restrike contains 1309 grains of .887 fine gold salvaged from the famous S.S. *Central America* shipwreck. The coins were struck on the San Francisco Mint coin press, in gold obtained from melted-down Kellogg & Humbert ingots brought up from the *Central America* circa 1988. This example displays deeply mirrored surfaces and strong cameo contrast. The dies were prepared from the original \$50 round Kellogg & Co. dies with necessary alterations. Housed in its glass and metal frame of issue, with its tan-colored California Historical Society presentation box and slipcover. NGC ID# 32DS, PCGS# 10358

S.S.C.A. Relic Gold Medal '1855 Kellogg & Co. Fifty Dollar' Pristine, Contrasted Gem Proof

- 4012** (2001) SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. 128 commemorative restrike proof fifty dollar gold pieces were struck on August 25, 2001. The entire restrike mintage of 4,461 pieces was prepared from August 20, 2001 through September 12, 2001, the final day marking the anniversary of the ill-fated voyage of the S.S. *Central America*, which sank on the evening of September 12, 1857. These pieces were struck from 1309 grains of .887 fine gold, in line with the original Kellogg & Co. fifties from 1855. Dies (with necessary alterations) were prepared utilizing the original dies. This is a splendid, essentially pristine Gem proof with deep cameo contrast between frosted motifs and glassy-mirrored fields. Housed in a glass and metal frame, and accompanied by its tan presentation box and slipcover. NGC ID# 32DS, PCGS# 10358

S.S.C.A. Relic Gold Medal '1855 Kellogg & Co. Fifty Dollar' Struck August 21, 2001, Gem Proof

- 4013** (2001) \$50 S.S.C.A. Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck on August 21, 2001, with a proof mintage for that date of 84 pieces. Contains 1309 grains of 887 Fine gold, obtained from melted-down Kellogg & Humbert ingots recovered circa-1988 from the S.S. *Central America* shipwreck. An immaculate straw-gold specimen with icy motifs and glassy fields. Accompanied by a glass and metal frame, a tan presentation box and slipcover, a Monaco brochure, a screwdriver, and certificate of authenticity #537 from the California Historical Society, signed by Executive Director Stephen Becker. NGC ID# 32DS, PCGS# 10358

Proof 'Quintuple Eagle (\$50) Gold' S.S.C.A. Relic Gold Medal, Gem Proof Struck in .887 Fine S.S.C.A. Gold

- 4014** (2001) SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. The restrike of this famous 1855 Kellogg & Co. fifty dollar commemorates not only an iconic Gold Rush private minter and the classic Kellogg round fifty dollar gold piece, but more importantly the infamous 1857 shipwreck of the S.S. *Central America*. The tragedy claimed 425 lives and touched off financial panic throughout the United States, due to its massive loss of California gold. Similar to all of these restrikes done in the period August 20, 2001 to September 12, 2001, this magnificent proof is exceedingly well-made and attractive. It was struck on August 26, 2001— one of 200 proofs struck that day in gold recovered from the S.S. *Central America*. The coin contains 1309 grains of .887 fine gold. It comes with its original glass-and-metal holder and tan presentation box with slipcover. NGC ID# 32DS, PCGS# 10358

**'1855 Kellogg & Co. Fifty Dollar'
From S.S. Central America Ingots
2001 'Restrike,' Gem Uncirculated**

- 4015** (2001) S.S. *Central America* Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Uncirculated PCGS. Struck on August 26, 2001, with an Uncirculated mintage for that date of 100 pieces. Contains 1309 grains of 887 Fine gold, obtained from unsold Kellogg & Humbert ingots from the first (circa-1988) recovery of the S.S. *Central America* shipwreck. Medals from these dies were struck between August 20 and September 12, 2001. Most examples are proofs, but a few hundred were struck with an Uncirculated finish, including the present piece. The sharply struck canary-gold surfaces are lustrous and show only microscopic imperfections. NGC ID# 32DT, PCGS# 10359

CALIFORNIA FRACTIONAL GOLD

- 4016** 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 PCGS. Lemon-gold surfaces showcase lime-green accents and appear immaculate. A hint of strike incompleteness on the central reverse denies a higher grade. The homely, thick-necked Liberty bust identifies the maker as Frontier, Deviercy & Co. The firm struck two 1868 octagonal quarter varieties, BG-710 and BG-711, which are readily distinguished by star and berry placements. Population: 1 in 67, 0 finer (5/19). NGC ID# 2BMM, PCGS# 10538
- 4017** 1860 Liberty Head Octagonal 25 Cents, BG-732, High R.6, MS62 PCGS. Die State II. BG-731 and BG-732 are very similar, but the former has a repunched star at 1 o'clock, and the latter has a repunched star at 10:30. The terminal die state with a bold crack through the left-side wreath, and a network of fine cracks through the legends. The reverse die likely failed prematurely, given the rarity of the variety. A radiant sun-gold example with occasional incompleteness of strike. Population: 6 in 62, 0 finer (5/19). NGC ID# 2BNE, PCGS# 10559

**1859 Round 25 Cents, MS67 Prooflike
Liberty Design, BG-801**

- 4018** 1859 Liberty Round 25 Cents, BG-801, R.3, MS67 Prooflike NGC. An incredible California gold 25 cent piece, this Superb Gem has brilliant light yellow luster and fully mirrored fields around its lustrous devices, resulting in a splendid cameo appearance. This is only the third MS67 example of BG-801 that we have handled (the fourth appearance), and it is the first to include the Prooflike designation. PCGS# 710662

**1859 Round Liberty Half, MS67 Prooflike
Tied for Finest Certified, BG-1002**

- 4019** 1859 Liberty Round 50 Cents, BG-1002, High R.4, MS67 Prooflike NGC. A sharply detailed round Liberty half dollar, the 11 stars obverse variety, with the edge reeded after striking, BG-1002. This spectacular Superb Gem offers deeply reflective yellow-gold surfaces with no mentionable distractions. Only four BG-1002 examples are certified in this numeric grade and just two of those are Prooflike. None are finer. Census: 2 in 67 Prooflike, 0 finer (5/19).
Ex: Central States Signature (Heritage, 4/2014), lot 7185, which realized \$3,818.75. NGC ID# 2BYB, PCGS# 710831

PATTERNS

**1852 Gold Dollar Pattern, PR64
Judd-140, Copper Nickel, Perforated**

- 4020** 1852 Gold Dollar, Judd-140, Pollock-167, Low R.7, PR64 NGC. One of the proposed solutions to the problem of the undersized and easily lost gold dollar was an annular pattern. The large center perforation (as struck) and narrow margin forces a simple design. The obverse has only USA above the hole with 1852 below, while the reverse has a series of laurel sprigs amidst heavy concentric die lines. Curiously, no denomination is stated. Struck in copper-nickel with a plain edge. A sharply struck and unabraded near-Gem. Primarily chestnut-brown, though glimpses of gunmetal-gray emerge throughout. The perforation has an uneven wire rim on the date side. The left-side reverse exhibits a narrow rim. NGC ID# 2996, PCGS# 11589

1858 Flying Eagle Cent in Copper-Nickel
Judd-203, PR61

- 4021 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR61 NGC. The obverse has a hook-necked eagle flying left with tall wings. The reverse has the denomination within a wide oak wreath with an olive sprig and a group of three arrows are wrapped into the bottom of the wreath. Struck in copper-nickel with a plain edge. The surfaces on each side are deeply mellowed with only slight reddish color showing through the otherwise brown patina. NGC ID# 29BJ, PCGS# 11869

1865 Three Cent Nickel in Copper
Judd-411, PR66 Brown

- 4022 1865 Three Cent Nickel, Judd-411, Pollock-482, High R.6, PR66 Brown PCGS. CAC. Similar in design to the issued three cent nickel, but the ribbon ends extend to the denticles, giving the reverse a crowded appearance. Struck in copper with a plain edge. About a dozen examples were also struck in nickel in addition to the dozen pieces produced in copper. This is a lovely example with a strong presence of light blue patina throughout and few obvious specks on either side. NGC ID# 29HZ, PCGS# 60592

1866 Washington Nickel in Bronze
Judd-472, PR62 Red and Brown

- 4023 1866 Five Cents, Judd-472, Pollock-563, Low R.7, PR62 Red and Brown NGC. CAC. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large broad numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in bronze with a plain edge. This pattern was also struck in nickel, and is available on a regular basis in that metal; however, bronze/copper strikes are rare. The surfaces are gray-brown with a number of carbon spots visible beneath the toning. NGC ID# 29KF, PCGS# 70668

1868 Five Cent Pattern, PR63 Brown
Judd-634, Struck in Copper

- 4024 1868 Five Cents, Judd-634, Pollock-706, High R.7, PR63 Brown PCGS. CAC. The overall design is similar to the circulating three cent nickel, in larger format and with a V in the central reverse to indicate a five cent piece. Unlike the three cent nickel, Liberty has a small star on her coronet. The date 1868 is in exergue. The reverse has a wreath with small Maltese cross atop, surrounded by a scroll bearing IN GOD WE TRUST. Struck in copper with a plain edge. Powder-blue undertones outline design elements, but this nicely reflective specimen is primarily tan-brown. The fields exhibit hairlines appropriate for the grade. NGC ID# 29NP, PCGS# 60852

1870 Standard Silver Dime in Aluminum
Judd-866, PR65+ Cameo

- 4025 1870 Standard Silver Ten Cents, Judd-866, Pollock-955, High R.7, PR65+ Cameo PCGS. CAC. On the obverse the head of Liberty is wearing a diadem with a plain ribbon encircling her hair, the reverse has 10 CENTS in the center surrounded by a thick oak and laurel wreath with STANDARD SILVER 1870 at the margin. Struck in aluminum with a plain edge. Only a dozen or so examples are believed known in silver, both with reeded and plain edges. Copper and aluminum pieces are twice as scarce. This is a bright, strongly contrasted aluminum striking whose only noticeable flaw is a streak of oxidation along Liberty's jawline. PCGS# 800046 Base PCGS# 61110

1866 Three Dollar Private Pattern in Brass
Judd-C-1866-7, MS63

- 4026** 1866 Three Dollar, Brass, Reeded Edge, Judd-C1866-7, MS63 PCGS. Private pattern, struck by Merriam, of a bearded bust of Lincoln, facing right, GOD AND COUNTRY around the upper obverse rim, the date below. The reverse depicts an ornate wreath with a six-sided star at the top, Roman numeral III in the center. Struck in brass with a reeded edge, medalllic turn. Examples are also known in gold, silver, and copper. The brown surfaces display deeper gray patina on each side. An unusual and rare private-issue pattern. PCGS# 529015

GSA DOLLAR

- 4027** 1883-CC GSA MS65 Deep Mirror Prooflike NGC. VAM-5A. The well struck and icy motifs contrast with the brilliant, glassy fields. A magnificent Deep Mirror representative of the GSA hoard of Carson City Morgan dollars, distributed to collectors during the 1970s. Minor contact on the left obverse field determines the grade. The lot is accompanied by its original GSA box and certificate. NGC ID# 254H, PCGS# 518871 Base PCGS# 97145

REDFIELD DOLLAR

- 4028** 1892-CC MS63 NGC. Ex: Redfield Collection. Housed in the original red MS63 plastic holder as distributed by Paramount International Coin Corporation. The NGC label is affixed to the back. This well-struck Carson City dollar from the vast silver holdings of LaVere Redfield features untuned, frosted centers with colorful patina around the borders. NGC ID# 255M, PCGS# 7214

MASONIC

- 4029** 1923 Nassau Commandery No. 73, Knights Templar, 14K Gold Recognition Badge. As Issued. 63.0 grams. An intricately designed and produced recognition badge for Arthur C. Phillips, Past Commander of Nassau Commandery No. 73 in Nassau County, New York. The back is engraved and dated April 19, 1923, A.O. 805, signifying the 805th year of the Knights Templar that originated in the year 1118. The most likely candidate for the post commander is Arthur Coleman Phillips who lived at Hempstead, Nassau, New York in 1917. He was born in New York on March 3, 1877, and died there on May 1, 1952.

BETTS MEDAL

1783 Peace of Versailles Medal
Betts-608, AU53

- 4030** 1783 Peace of Versailles, Libertas Americana, Betts-608, AU53 NGC. Silver, 45 mm. A lovely antique-gray example that retains hints of luster beneath the toning. Splashes of luminous gold toning enhance the overall appearance of this splendid example. Faint blue overtones are evident on both sides of this medal that bears the LIBERTAS AMERICANA legend. The Peace of Versailles medal is usually seen in white metal and rarely in silver as offered here.

SO-CALLED DOLLARS

- 4031** 1920 Manila Mint Opening, Wilson Dollar, Silver, HK-449, R-4, MS64 PCGS. Struck to commemorate the opening of the Mint in Manila in 1920, most examples encountered are either in silver or copper. This is an attractive piece with mint luster that is mostly brilliant, except around the golden-brown margins. PCGS# 643969
- 4032** 1896 Bryan Dollar, Tiffany & Co., Silver, Z-3, HK-779, S-3, R-6, MS62 NGC. Part of the Educational Series of Bryan dollars, HK-779 demonstrates the difference between a silver dollar and the silver bullion equivalent of a gold dollar, as of September 14, 1896. This prooflike example is sharply struck and inoffensively abraded. A subtle spot is centered above the I in GRAINS. Census: 3 in 62, 4 finer (5/19).
From The Allen Moretti Swiss Collection. PCGS# 643491

EXPOSITIONS AND FAIRS

- 4033** Two Massachusetts Gardening Gold Medals. The first horticulture medal was issued by the Lord & Burnham Co. and is engraved MRS LESTER LELAND / E.H. WETTERLOW / GARDENER / MANCHESTER MASS / AUGUST 25 1909. 14 kt gold, 31.1 gm, 35 mm. The second medal was issued by the Massachusetts Horticultural Society and is engraved MRS. LESTER LELAND / - FOR - / OLD FASHIONED GARDEN / MARCH 25, 1930. 14 kt gold, 91.7 gm, 51 mm. (Total: 2 medals)

EARLY PROOF SET

1903 Six-Piece Proof Set PR64 to PR65

- 4034** 1903 Six-Piece Proof Set PR64 to PR65 NGC. The coins are separately housed in NGC holders bearing consecutive certification numbers. The set includes:

Cent PR65 Brown. Snow-PR1. A glossy chocolate-brown Gem with rose-red and apple-green undertones.

Nickel PR64. A fully struck and flashy Choice proof. The light silver-gray toning is more apparent along the right reverse margin.

Dime PR64. The portrait is brilliant, and the obverse border shows attractive fire-red and navy-blue shades. The reverse is tan-brown and cobalt-blue.

Quarter PR64. Deep autumn-brown and blue-green toning embraces both sides. Intricately struck throughout.

Half Dollar PR64. Rich ocean-blue, peach-gold, and rose-red patina encompasses well-struck and undisturbed surfaces.

Morgan Dollar PR64. Iridescent orange-gold, powder-blue, olive-green, and ruby-red toning dominates this Choice proof Morgan dollar. A fully impressed specimen whose coloration emerges beneath a light. (Total: 6 coins)

CERTIFIED MODERN PROOF SETS

- 4035** Five-Piece 1937 PR64 to PR66 NGC. The coins are housed in separate holders bearing consecutive certification numbers. The lot includes: **cent PR64 Red Cameo**, splendid pumpkin-gold color; **nickel PR64**, light gold patina, well struck; **dime PR66**, fully brilliant and sharply struck; **quarter PR65**, lightly toned with pastel aqua and gold shades on the reverse; and a **half dollar PR66**, sea-green and lilac hues frequent the borders. (Total: 5 coins) PCGS# 904751
- 4036** Five-Piece 1937 Proof Set PR62 to PR66 NGC. The coins are separately certified in holders with consecutive certification numbers. The lot includes: **cent PR64 Brown**, lavender toning dominates the obverse; **nickel PR62**, a razor-sharp specimen with occasional dark flecks; **dime PR66**, light wheat-gold toning streaks grace both sides; **quarter PR64**, faint lime-green toning; **half dollar PR63**, prominently mirrored, close to brilliant. (Total: 5 coins) PCGS# 904751

HERITAGE
AUCTIONS

Terms and Conditions of Auction

Auctioneer and Auction:

- This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
 - For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
 - For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve point five percent (12.5%) of any amount over \$3,000,000.

Auction Venues:

- The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

- In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

- Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
- Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://www.ha.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

- If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

- Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

“Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
- Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
- Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

- All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
- Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery, Shipping, and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, cause of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity,

typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsguarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. PCGS Gold Shield, PO Box 9458, Newport Beach, CA 92658. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Notes graded by PCGS Currency between February 4, 2009 and January 30, 2019 were graded and authenticated by K3B, Inc. under license from Collectors Universe, Inc. K3B, Inc., now operating as Legacy Currency Grading, has expressed in writing that notes graded under the license during this time period will still be covered by the full written guaranty of PCGS Currency. Warranties may be available from Collectors Universe, Inc. for all PCGS Currency notes graded prior to February 4, 2009.

COINS and CURRENCY TERM G: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM H: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM I: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM J: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM K: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

"The best parts
of working with Heritage are
the simplicity of drop-off of my
wine, and the price realized!"

VINTAGE GUITARS & MUSICAL INSTRUMENTS

July 19, 2019 | Dallas | Live & Online

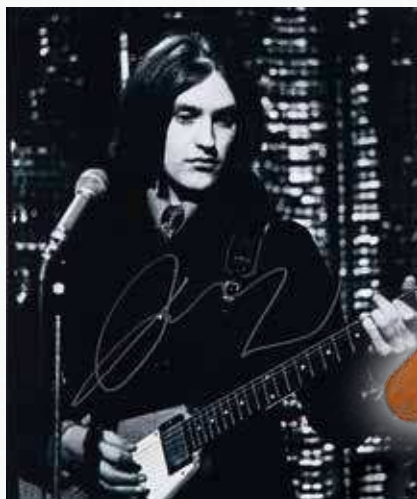

UP NEXT, *The Flying V*

Heard around the World! View and bid at [HA.com/7213](https://ha.com/7213)

This guitar is part of **The George Borst Electric Guitar Collection**, being offered in several events throughout 2019 at Heritage Auctions.

The auction will be held July 19 in Dallas. This guitar will be on display May 3-5 at the Dallas International Guitar Festival in Dallas Market Hall. Heritage Auctions is offering this 1958 Gibson Korina Flying V that was owned, and played on stage and in recording sessions by Dave Davies of The Kinks, considered by many to be among the most influential rock bands of the 1960s. The exceptional provenance includes a letter from Davies stating he purchased the guitar in June 1965 during The Kinks' first American tour and owned it until 1992. Davies played the guitar multiple times on television, beginning with *Shindig* in June 1965, and in recording sessions, starting with one of the band's biggest hits, *Till the End of the Day*.

Don't miss your only chance to own this piece of musical history.
